Christian Science makes one more capable and reliable. He can accomplish more, and in less time, than he could without it. To know that God's law ordains the right thing at the right time, and that in Christ, Truth, one can do what is right, is most helpful. By replacing fear, expressed at times as anxiety, with the calm assurance that God is always at the helm, Christian Science does away with hours of worried planning for emergencies that may never arise. Time formerly spent in such planning is now gained for other work, and this work is despatched more easily and quickly because fatigue is absent. Unburdened with anxiety over what has been done, and unafraid that any mischance may happen, each day finds the earnest Christian Scientist fresh for its routine and never exhausted at its close.

COURAGE.

ADA B. FOSTER.

ALL through the Bible we are enjoined to be courageous in confronting evil, in whatever guise it may present itself. God's command to Joshua, "Only be thou strong and very courageous," is reiterated throughout the Scriptures. Christ Jesus said, "Fear not, little flock; for it is your Father's good pleasure to give you the kingdom."

The courage which animates the true Christian is based upon and upheld by his invincible faith in God. In Christian Science this faith ultimates in a demonstrable understanding of God as omnipotent good. Confidence in omnipotence grows with the student's expanding realization of the spiritual man's oneness with the Father, as Principle and idea are one. As thought is held faithfully to this true concept of the real man's relation to divine Principle, we find fear fading out of consciousness, and with it the temptation to yield to discouragement, which is the devil's (evil's) subtlest and most frequently used weapon. The Christian Scientist, however, defeats its purpose by persistent, unremitting effort, for error cannot deprive him of his reliance on the all-power of divine Love and of man's God-given dominion over all untoward earthly conditions.

The one ambition of the true Christian Scientist is for the attainment of perfection. This attainment is possible only through orderly scientific processes. The student must ever abide by the law of God as unfailingly revealed to the outreaching thought which grasps and demonstrates the verities of being through the operation in consciousness of spiritual law. Failure to maintain continuity of courageous effort is the result of accepting the testimony of the carnal mind,—of looking "at the things which are seen" instead of looking steadfastly upon "the things which are not seen." We sink to the level of the lowered gaze, stumble and fall. "Where," we are asked in Science and Health (p. 264), "shall the gaze rest but in the unsearchable realm of Mind?" A Christian Scientist has no reason for discouragement, no matter what the seeming odds against him. Even if he fall, shall he not rise again—"stronger than before the stumble?" (Miscellaneous Writings, p. 10). The psalmist says: "Though he fall, he shall not be utterly cast down: for the Lord upholdeth him with his hand." We have also the reassurance, "The Lord will perfect that which concerneth me." In Philippians Paul writes, "He which hath begun a good work in you will perform it until the day of Jesus Christ."

If the student's purpose be honest, his motive pure; if he persistently lift his heart to that sublime summit of consecration where with David he can pray, "Purge me with hyssop, and I shall be clean: wash me, and I shall be whiter than snow;" if he gladly welcome the purging process, then with joy he will continue the warfare, knowing that the victory of Truth is assured. Pervading Mrs. Eddy's writings is an atmosphere of encouragement for all sincere effort at individual regeneration. On page 118 of "Miscellaneous Writings" we find these inspiring words: "Be of good cheer; the warfare with one's self is grand; it gives one plenty of employment, and the divine Principle worketh with you,—and obedience crowns persistent effort with everlasting victory."

Neither discordant bodily condition, circumstance, nor environment should cause discouragement, when we reflect that these seeming conditions are but temporal, inasmuch as they are eliminated from experience in proportion to the student's spiritual growth. To mortal sense the way may be dark and lonely, steep and rugged; it may lie in the crowded city or on the distant plain, amid the mountain fastness or by the waterside; but wherever the pathway be, it is illumined by "the true Light, which lighteth every man that cometh into the world." A Christian Scientist has a demonstrable Principle and proven rules whereby

Digitized by Google

he may solve his every problem, and he has the Master's loving promise, "Lo, I am with you alway, even unto the end of the world."

Refusing absolutely to recognize the testimony of material sense as valid, and dwelling confidently, understandingly, on God and His perfect creation, we reach that spiritual plane where the joys of conscious progress inspire us with divine courage, and where the blessings vouchsafed to the pure in heart are revealed.

"ALL THAT I HAVE IS THINE."

ANNE MAY LILLY.

THE lessons to be drawn from the parable of "the prodigal son" are inexhaustible, and in this story of the treatment accorded the two brothers by their father there seems to be also a hint as to the answer to a question which has puzzled many earnest seekers for the truth. How often it happens that a person will turn to Christian Science only as a last resort, after having drained to the dregs the bitter cup of human experience, and will receive instant help, while, on the other hand, one who has seemingly lived daily with the Father will apparently fail to get the needed aid. At first thought this seems unjust. Why should one who has done so little receive so abundantly? And right here comes the application of the parable.

We read that the younger of the brothers said to his father, "Father, give me the portion of goods that falleth to me. And he divided unto them his living." Here we see that the younger son made his request to his father, never doubting that he would receive his own. And though, as we read, "not many days after the younger son gathered all together, and took his journey into a far country, and there wasted his substance with riotous living," he seems never to have lost wholly the sense of his father's love, for in the end he turns, humble and repentant, to that father with the confidence of a little child. We all know the ready response to his unquestioning faith: "But when he was yet a great way off, his father saw him, and had compassion, and ran, and fell on his neck, and kissed him."

But how about the elder son, who abode continuously with the father? It would seem natural that he who had lived with the father day by day would have a thorough understanding of his tenderness and justice. But is this the case? Take, for instance, his reproach when he comes in from the field and finds the feast in progress to celebrate his brother's return: "Yet thou never gavest me a kid, that I might make merry with my friends." And then the immortal reply: "Son, thou art ever with me, and all that I have is thine."

Is not this the key to the whole situation? All things that the father had were his, but he did not reach out and take them—he failed to appropriate that which was so freely provided. Just here is where many of us fail. Perchance we have had endless proofs of our heavenly Father's tenderness, but do we put into practice the knowledge of it which remained so clearly with the prodigal throughout his wanderings? We thirst, though the water of Life flows freely for all. We hunger, though divine Love is ever ready to feed us with the bread of Truth "which cometh down from heaven." Let us therefore turn to this ever-ready source of all good, never doubting that we may partake freely thereof.

Art builds on sand; the works of pride
And human passion change and fall;
But that which shares the life of God
With Him surviveth all.

JOHN G. WHITTIER.

SELECTED ARTICLES

[Alfred Farlow in *Shreveport* (La.) *Journal*.]

Christian Science does not teach that the universe is an illusion, but on the contrary that everything in creation, from the least to the greatest, exists as the product of Spirit. Christian Science teaches that everything in the universe is real, but that mortals in their immature material condition have an imperfect perception of things, which needs to be corrected by spiritual understanding. In Christian Science, the important question is not what seems, but what is. Paul said, "For if that which is done away was glorious, much more that which remaineth is glorious."

When asked if Science teaches that the beautiful and symmetrical things of the universe are unreal, we answer no; but that if we were sufficiently spiritual minded, if our vision were sufficiently corrected or improved to see them as they really are, they would be as much more beautiful to us than they are now, as is infinitude greater than our present degree of comprehension. The universe is real and is God's creation. What we need is to understand it as God made it and as it really is. Christian Science is destroying sin and its consequences by first giving its adherents a corrected view of God, man, and the universe, and then insisting that the deportment of the individual shall be in accordance therewith. In other words, Christian Science presents first a correct understanding of God. This constitutes an understanding of what the individual needs to do or be in order to be like God and thus win the harmony which belongs to God's children.

Science is correct knowledge, that which is true. We insist that the Master's declaration, "God is a Spirit," is true; that the deduction which Christian Science draws from this premise, namely, that the creation is spiritual, is also true. Therefore these premises are scientific, and they are Christian because they are the teaching of Christ Jesus; hence the propriety of the term Christian Science. There is no authority for restricting the term science to materiality. There is something to know about God, and that something is true and scientific.

While Christian Science affirms that sin, sickness, and death are no part of the "very good" things which the Scriptures declare were made by God, and since it is true, as the Scriptures teach, that "without him was not any thing made that was made," we cannot escape the conclusion that these human evils have only a mythical existence. However, we do not hope to rid ourselves of these by merely ignoring them. They must be grappled with and overcome through divine power, and sin will never become unreal to the individual until he ceases to sin, ceases to deport himself according to his belief that sin is real. One does not do wrong because he believes there is nothing in it, but because he believes there is something in it. The sinner must be convinced that there is no pleasure or profit in evil, and then he will cease from sin.

We do not claim that Mrs. Eddy has added anything to the Bible, but that she has discovered the precious truths of God's Word which heretofore have apparently not been clearly discerned by us. We do not rest this claim upon a mere *ipsi dixit*. We point to the fruitage of Christian Science practice as the only reasonable proof of its divinity. If our critic will consider the Christian Science revelation apart from supernaturalism, it will appear more rational to him.

In keeping with the admonition to "render unto Cæsar the things that are Cæsar's," we must credit Mrs. Eddy with the discovery of the Science of Christianity, but the question with which she is most vitally concerned is the fact that Christian Science is a revelation or emanation of the divine Mind, and not a mere human opinion. It is a

Digitized by Google

"final revelation" because it is the clear, unveiled truth. The understanding that Spirit, God, is pure and perfect Mind and not a species of matter, rarefied or otherwise, can never be improved upon. It is final.

While it may be proper to say that we have not yet escaped from the belief in the pleasures of material sense, it should be added that it is not because of the materiality of the senses, but because, in spite of it, there is still a sufficient degree of real and true perception to vouchsafe a reasonable degree of harmony. Notwithstanding our misapprehension and misappropriation of God's creation, the fact remains that man lives and moves and has his existence in God. Through conduct based upon spiritual understanding we shall progress and develop, until finally we shall arrive at the full stature of manhood in Christ. Then we shall see all things as they are, and by deporting ourselves according to the will of God shall reap the reward which we call heaven.

[J. V. Dittemore in *Poughkeepsie* (N. Y.) *News-Press.*]

Our critic's nonsensical statement that "there is no sun, no moon, no sky," etc., is of course no part of the teaching of Christian Science. Christian Science does not deny the existence of any part of God's infinite universe, nor are the sin, disease, and suffering of human experience ignored by any rational Christian Scientist. The quickest and most effective way for any one to find whether or not the clergyman's statements regarding Christian Science are true, is for him to read the text-book of Christian Science, "Science and Health with Key to the Scriptures" by Mrs. Eddy.

For over forty years Christian Science has stood its ground, and it will continue to stand in the knowledge that the thousands who have been raised up from sin, suffering, and hopeless disease through its ministrations will continue to constitute an imperishable answer to its critics and will forever remain its sufficient justification.

[William E. Brown in *Glendale* (Cal.) *News.*]

Mortals have a material concept of God's universe, manifested in decay and death, and it is this material concept that Christian Science seeks to destroy, so that we may behold all the glories of the universe even as God sees them. This is strictly in accord with Scripture, as recorded by the apostle Paul: "While we look not at the things which are seen, but at the things which are not seen: for the things which are seen are temporal; but the things which are not seen are eternal."

Christian Science denies the reality of sin and disease only in the sense that they are not of God and consequently not eternal. It recognizes these conditions as a part of mortal existence, and teaches that they must be overcome and destroyed, and it imparts the spiritual ability to do this. Christian Science is not primarily a school of physical healing, but is a religion,—the religion of Jesus,—and is based wholly upon the Scriptures. It does not deny the atonement, resurrection, and ascension. On the contrary, it emphasizes these most important factors in the salvation of mankind. The physical healing occurring in Christian Science is only the evidence of the spiritual purgation that is taking place in the life of the patient. While those healed in Christian Science are grateful for the physical restoration, they treasure more highly the spiritual uplifting that is its inevitable accompaniment.

That Christian Science has correctly interpreted the teachings of the Master is clearly proved in the doing, in large part, by its adherents, of the works which he said would follow true belief. In John it is promised, "He that believeth on me, the works that I do shall he do also." It is sometimes said that this promise applied only to the disciples, but this error is instantly dispelled by the instructions to the disciples: "Go ye therefore, and teach all nations, . . . teaching them to observe all things whatsoever I have commanded you." Christian Scientists are striving to obey these commands, and are succeeding in a very large measure. Multitudes of hopeless invalids have been restored when all human aid had failed; slaves to appetite, drugs, alcohol, and tobacco have been liberated; but, best of all, these redeemed ones have been made consecrated Christians, daily striving to assimilate the divine nature.

[James Phelps in *Watertown* (Wis.) *Times.*]

Mrs. Eddy tells us that in her search for truth the Bible was her only guide, and in her book, "Science and Health with Key to the Scriptures," there are more than five hundred citations from Scripture. That Christian Science is the same truth taught by Jesus the Christ, is made to appear when we see the same results follow the efforts of its adherents as were cited by Jesus as the test of true discipleship; viz., "The blind see, the lame walk, the lepers are cleansed, the deaf hear, the dead are raised, to the poor the gospel is preached." Christian healing is the outward manifestation of an uplifted and purified consciousness and cannot be classed or confounded with the workings of any "fake." Even of the work of Christ Jesus it was said by the carping critics of his time: "He casteth out devils through Beelzebub the chief of the devils."

Christian Science does not deny the reality of sin, pain, and disease as experiences of mortal existence. However, if the Bible is true (and it is), God is Spirit; He made everything that was made, and without Him was nothing made that was made; He saw everything that He had made, and behold it was "very good;" He made man in His image and likeness; in the image and likeness of God created He man, male and female. He not only created all, but he established laws for the government of all He created, and especially for the welfare of man. These He revealed to His holy prophets and the patriarchs. Now, we do not believe that sin, pain, and disease were any part of that creation just referred to, nor were they comprehended in or provided for in His holy law, the law which Christ Jesus came not to annul, but to fulfil. Had they been of God, or any part of His law, Jesus would not have destroyed them as he did, for he did always those things that pleased the Father.

"The testimony of men and women the world over" often contradicts the truth; otherwise the world is flat, the sun moves, and the earth is stationary. If by "all consciousness" our critic means the testimony of the physical sense,—and he seems to,—we have long since found it to be wholly unreliable, for according to its testimony immortality would be a myth, Spirit a nonentity, and man a mere passing shadow from the cradle to the bier.

[Algernon Hervey-Bathurst in *Leicester* (Eng.) *Post.*]

Christian Science teaches that man has no more right to suffer than he has to submit to sin. If sin and sickness are real, that is, are part of the creation of one infinite God, or good, they could not be destroyed; if, however, they are not true, that is, no part of the divine economy, as was clearly proved by the Master, it is our privilege and duty to destroy or heal them in the way he taught. Christian Science teaches that mankind can only be freed from the belief of sin and sickness through a better, more spiritual and scientific understanding of Him whom to know aright is "life eternal." Physical health, then, is the necessary outcome of a better understanding of the teachings of the Master; and as Mrs. Eddy has written on page 2 of

Digitized by Google

"Rudimental Divine Science": "Healing physical sickness is the smallest part of Christian Science. It is only the bugle-call to thought and action, in the higher range of infinite goodness. The emphatic purpose of Christian Science is the healing of sin."

[Captain Geoffrey Wilkinson in *Interpreter*, London.]

Christian Science urges men to recognize their true selfhood and to live in accordance with this recognition, thus to obey the Master's command, "Be ye therefore perfect, even as your Father which is in heaven is perfect." The Saviour's life was spent in the exemplification and demonstration of the truth of man's being, and as men seek first the kingdom of God and His righteousness, they find that health, happiness, harmony are added to them. Healing in Christian Science results from the coming to man's consciousness of the truth about God and man's relation to Him, from the understanding of the spiritual law, the law of God who is Love, which annuls the physical so-called law. No amount of mental suggestion, no amount of blind belief will ever make man healthy and holy, but the realization and demonstration of man's spiritual selfhood in the image and likeness of God will accomplish this. "Ye shall know the truth," said Jesus, "and the truth shall make you free." Free from what? From what is true, from that which is of God? On the contrary, free from error, from sin, sickness, and death.

[George Shaw Cook in *Urbana* (Ill.) *Courier-Herald*.]

Our critic mistakenly states that Christian Science teaches that "there is no such thing as sin," and then quotes Paul's words, "All men have sinned," to show that Christian Science disagrees with the Scriptures. It will be understood, of course, that this declaration by Paul referred to the "sons of men," or mortals, and careful students of Mrs. Eddy's writings will readily see that she takes precisely the same view of the subject that Paul did. What she contends for is the sinlessness of the real spiritual individuality of man, which is the reflection of God. She urges her followers to strive earnestly to follow Paul's admonition to "put off . . . the old man" (the mortal, sinful sense of man), and to "put on the new man" (sinless, immortal manhood), which "is created in righteousness and true holiness."

Christian Science does not, as our critic seems to assume, dismiss the question of pain and disease with the mere statement that there is "no such thing." Christian Scientists recognize that pain and disease seem perfectly real to those who are suffering, but Christian Science teaches that pain is not inevitable and that disease is not incurable, and Christian Scientists are learning that pain can be not only alleviated but dissipated, and that disease can be not only relieved but permanently destroyed by understanding that they are not of God and therefore are not real in the highest sense of that word. Christian Science has, in spite of much adverse criticism, ridicule, and opposition on the part of those who do not understand it, cured thousands who were in bondage to disease and sin, thereby proving the destructibility and unreality of disease and sin.

[Olcott Haskell in *Pacific Unitarian*.]

Christian Scientists heartily agree that "prayer does not change God nor His laws, which are without shadow of turning, but it does change us." With this recognition they seek to understand and obey God's law, and they find themselves freed from sin, sickness, and death in proportion as they obey this law of Life.

[Frederick Dixon in *Medical Times*, London, England.]

Our critic says that Christian Science is not Christian because Christian Scientists deny the reality of suffering, while St. Paul wrote, "For I reckon that the sufferings of this present time are not worthy to be compared with the glory which shall be revealed in us." Now the word reality is used in Christian Science to describe the absolute, that is, the spiritual and eternal. In what way, therefore, the text from Romans just quoted affects Christian Science it would be difficult to say. If our critic considers sin and suffering a reality, he either believes them part of the creation of God, since "without him was not any thing made that was made," or else he considers them a creation, a real creation, independent of God in which case all things were not made by God.

The ministry of Jesus was to an enormous extent a ministry of physical healing. When John the Baptist sent to inquire if he was the Christ, it was by his healing works that he elected to be judged; when the material instincts of those to whom he preached revolted from the very absoluteness of the spiritual truths he presented to them, it was to his works he declared they must turn for proof of his words; and when he wished to define a believer, his definition was an ability to do his works. It is suggestive that our critic should have selected as a type of heresy the one sect which has accepted literally Jesus' command to preach the gospel and to heal the sick.

It is perhaps even more suggestive that he should have insisted further that whatever healing may be accomplished by Christian Science is the result of hypnotism. Now hypnotism is only the modern name for that which the Eastern peoples described as necromancy or magic, and which Jesus himself summed up as the works of the devil. It is the claim of one human intelligence to dictate to another, of the stronger to dominate the weaker, so that it becomes "a house divided against a house." It was this very charge, of course, that the Jews hurled at Jesus when they said, "He casteth out devils through Beelzebub." The reply of Jesus was final, "If I," he said, "with the finger of God cast out devils, no doubt the kingdom of God is come upon you." The kingdom of God is "the peace of God, which passeth all understanding," and this peace never came to any one through mental suggestion,—it is the "fruit of conquered sin."

The way to destroy sin is not to eat of "the fruit of the tree of knowledge of good and evil," for the result of that is death, and death, Paul says, entered the world through sin. It is by grasping the scientific fact that there is no power but God, and that consequently, because God is infinite, good is infinite, for God is good. Evil is nothing but the negation of this, an illusion which the understanding of this destroys. And because this fact is a scientific fact it can be demonstrated to-day as it was nineteen hundred years ago in the destruction of sorrow, and sickness, and sin. To-day, as of yore, when a man knows the truth he knows God, and in that he becomes the freeman of the Lord.

[Abbot Edes Smith in *St. Paul* (Minn.) *Dispatch*.]

Christian Science is essentially the primitive Christianity of Christ, as taught and practised by Jesus, by his apostles, and by the early Christians. Every reform, every advance in truth has received bitter opposition and often persecution at the hands of advocates of the prevailing creeds and theories. "History repeats itself." Orthodoxy of today has been the heresy of the past, and the persecutors of today have been the persecuted of the past. Even Christ Jesus suffered crucifixion at the hands of the

Digitized by Google

theologians of his time for what they termed his heresy and blasphemy; and in every age those who loved and followed him most devotedly and most unselfishly have, as he foretold, drunk of his cup.

Christendom has for centuries practically nullified one half of the Bible by reading into it a man-made limitation, namely, that all the positive promises of the Bible concerning God's help in sickness are only beautiful stories of how good God used to be, two or three thousand years ago, to a few favored people, and that He who is "no respecter of persons," and who is "the same yesterday, and to day, and for ever" has changed His eternal methods and no longer fulfils these former promises. Christian Science accepts the Bible in its entirety, accepts the "undivided garment," the whole of Christianity as taught and practised by our Saviour, by his apostles, and by the early Christians, and as tried by his test: "By their fruits ye shall know them."

Jesus taught unequivocally and without any limitation that a proper following of him produces physical healing, as well as moral, and that such fruits are the natural result of absolute reliance on God alone. Evil cannot stand in the presence of Him who is "of purer eyes than to behold evil." Hence, obedience to Him whom to know aright Jesus defines as "life eternal," implies exemption from physical evil as well as from moral. God's word unquestionably protects and saves not only from moral evil, but also from physical.

[John L. Rendall in *Dubuque* (Ia.) *Telegraph-Herald.*]

The healing work of Christian Science is not contingent upon the operation of what is ordinarily termed "mind force." It contains no elements of "mysticism," as one writer claims; it has no connection with suggestion, but on the contrary is a manifestation of the intelligent activity of the one infinite Mind, good.

By a process of reasoning which is difficult to reconcile with established facts, it is supposed by the advocates of certain movements that a coalition of two systems, either of which used independently has been found inadequate and insufficient to overcome or destroy the ills of an individual, will produce a system which becomes more nearly adequate and sufficient.

Separate and distinct from all this is the scientifically Christian method employed in Christian Science, wherein it is recognized that there is but one Mind, but one intelligent Principle, but one power,—even the power of God,—and that this power is adequate and sufficient, that it is available to the needs of humanity at all times and under all circumstances; moreover, it is in exact accord with the teachings of Scripture, with the practical example furnished us by Christ Jesus, by the prophets and apostles, and conforms to the promises given to "them that believe." It is distinctly and emphatically spiritual in its operation, requiring no aid from matter, and recognizing that matter, being inert, non-intelligent, mindless, cannot be a medium through which Mind or God can be expressed. Scientific therapeutics admits of no halfway position, of no coalition of opposites, but insists upon the oneness, allness, and all-sufficiency of God as the only healing power or Principle. It is the understanding of this Principle and its application to the overcoming of the woes of humanity which constitutes the difference between Christian Science and every other so-called healing method.

The theology of Christian Science is the theology of Jesus Christ. It recognizes the urgent need of humanity for an adequate salvation from the thraldom of sin and sickness, from all that which "worketh abomination or maketh a lie," and it presents the teachings of Truth, which alone frees man from error. It comforts "the broken in heart," it redeems the sinner, reforms the drunkard, and heals the sick.

AMONG THE CHURCHES.

CAMBRIDGE, MASS.

The Christian Scientists of Cambridge have purchased the Simmons estate at 1582 Massachusetts avenue, for the purpose of erecting a church edifice which, it is said, will surpass anything in Cambridge in the way of church buildings. The property consists of 10,480 square feet of land assessed for ten thousand dollars, and a mansion said to be over one hundred years old assessed for five thousand dollars. The estate is shaded by tall elms and faces a small common at the upper end of the Cambridge common, which also bears a number of magnificent old elms reaching across the avenue to form an arch. The church, when erected, will form one of a small community of churches in this section of Cambridge.

Boston Journal.

SALAMANCA, N. Y.

Ground was broken this morning [June 1] for the Christian Science chapel to be erected on South Main street, near Clinton. The building, which will cost about $2,500, will be 65 x 25 feet. Construction material will be cement blocks up to the ground floor line, superstructure stucco. A basement under the entire building will be used for Sunday school rooms. A cozy reading-room will be provided, which will be open daily. The auditorium is planned to seat about one hundred and fifty. Judging from the plans and style of architecture the chapel, when completed, will rank well up with Salamanca's splendid church edifices.

Daily Times.

LOS ANGELES, CAL.

Comparatively few Angelenos know that there is being erected in their midst one of the most beautiful temples of worship in this country. It is rapidly approaching completion on West Adams street, near Hoover, and will cost about three hundred thousand dollars. It will be the home of Second Church of Christ, Scientist. From the construction view-point the building presents several interesting features. The reinforced concrete dome is probably the largest in the United States. It is carried by a series of tangent concrete beams and girders, resting on reinforced concrete columns.

The movement for which this church stands, and what it has accomplished in a few brief years, challenges the attention of all thinking people. All over the land splendid churches are being erected by Christian Scientists, not for the purpose of display or proselyting, but as testimonies of gratitude for what Christian Science is accomplishing for mankind. Christian Science is unique in the matter of its phenomenal growth. It does not advertise nor proselyte. It does not give entertainments nor hold fairs. Its church services are simple, without personal preaching. It has won its way into the affections of men through the practical assistance it offers in daily life.

Los Angeles Times.

If I knew you and you knew me,—
If both of us could clearly see
And with an inner sight divine
The meaning of your heart and mine,—
I'm sure that we would differ less,
And clasp our hands in friendliness;
Our thoughts would pleasantly agree,
If I knew you and you knew me.

ANON.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

[Reprinted by request from the *Sentinel* of Oct. 19, 1899.]

A CORRECTION.

MARY BAKER EDDY.

IN the last *Sentinel* was the following question: "If all matter is unreal, why do we deny the existence of disease in the material body and not the body itself?"

We deny first the existence of disease, because we can meet this negation more readily than we can negative all that the body affirms. It is written in "Science and Health with Key to the Scriptures:" "There are degrees in the material or human belief, and a harmonious belief is one step out of error; a belief of health is an improvement on a belief of sickness."

Thus it is that our great Exemplar, Jesus of Nazareth, first takes up the subject. He does not require the last step to be taken first. He came to the world not to destroy the law of being, but to fulfil it in righteousness. He restored the diseased body to its normal action, functions, and organization, and in explanation of his deeds he said, "Suffer these things to be so now: for thus it becometh us to fulfil all righteousness." Job said, "In my flesh shall I see God." Neither the Old nor the New Testament furnishes reasons or examples for the destruction of the human body, but its restoration to life and health, as the scientific proof of "God with us." The power and prerogative of Truth are to destroy all disease and to raise the dead—even the self-same Lazarus. The *spiritual* body came with the *ascension*.

Jesus demonstrated the divine Principle of Christian Science when he presented his *material* body absolved from death and the grave. The introduction of pure abstractions in Christian Science without their correlatives leaves its divine Principle unexplained, tends to confuse the mind of the reader, and ultimates in what Jesus denounced, namely, "straining out gnats and swallowing camels."

"BY THEIR FRUITS."

IT is always a pleasure to be assured that the good works of Christian Science are not passed by unnoticed, and that these proofs of the truth of Mrs. Eddy's teachings are so plainly written on the face of the times that "he who runs may read." Among the voluntary acknowledgments of the value of this work that is being done in the name of the Master—and the apostle Paul declared "there is none other name under heaven given among men, whereby we must be saved"—is an editorial in the *Newburgh* (N. Y.) *Union*, from which we quote as follows:—

Any creed that accomplishes what Christian Science has accomplished must have as its foundation some element of the infinite truth.

It has been within the range of our personal experience to see men lifted out of the slough of despond by Christian Science, and started on the high road to success. You cannot be in the presence of a Christian Scientist five minutes without feeling some of his tremendous enthusiasm,—without feeling that you are in the presence of a man who has something that is worth having. His faith is like the faith of those ancient Christian martyrs who went cheerfully to their deaths in the old Roman amphitheaters.

The believers in Christian Science number hundreds of thousands—and among them may be found many of our brightest lawyers, doctors, merchants, and newspaper men. It ill beseems any one to denounce Christian Science without a hearing in a country whereof the very corner-stone of its foundation is "religious liberty."

And this is not from the pen of a Christian Scientist.

It is not surprising that such testimony as this is forthcoming, in view of the fact that the works of Christian Science are now so many and so well known. The only surprising thing about the whole matter is that any one should, by denying these good works,—as many self-appointed critics of Christian Science have done,—be willing to write himself down so poor an observer of current events. There is not a city of any size—and hardly a small town, for that matter—in which living witnesses to the healing and redemptive work of Christian Science cannot be found, yet many persons seem willing, when it comes to a discussion of Christian Science, absolutely to close their eyes and ears to the testimony of these people.

It is to the credit of the editor of the *Union* that he is not only willing to acknowledge the facts which have come under his observation, but that he voluntarily gives credit to the teachings of Mrs. Eddy, because of the "fruits" which they bear.

ARCHIBALD MCLELLAN.

TRIUMPHING IN TRUTH.

THERE are two very distinct bases of thought and activity in the Christian life, the choice of which has everything to do not only with one's confidence and peace of mind, but with the inspiration he brings to his fellows, his general helpfulness and success. These bases may be denominated as the human and the divine.

The man who thinks of himself as having been privileged to enter upon a splendid undertaking, and who addresses himself to it with energy and faithfulness, may be entirely worthy of every good return, so far as his purpose is concerned, and yet he may fail, and that pitifully, because he is thinking so constantly of the amount to be accomplished,—

> So many worlds, so much to do,
> So little done, such things to be,—

as Tennyson puts it, and of his relative weakness and incapacity to meet the demands of the hour, the requirements of God. The ill of this sense is measured not only in the weakness and failure of any and every effort that does not rely wholly upon the divine activity to accomplish all good, but in the sense of dependence upon human personality which it is likely to beget in others, a state of mind which is altogether in contrast with that of him who said, "I will triumph in the works of thy hands."

Christian Science teaches that the divine manifestation and government is not dependent upon men, though they may indeed be coworkers with God, and that our real effectiveness as exponents of Truth is accurately determined by the clearness and continuity with which we realize that all spiritual achievement is due to "God with us;" that our triumph and our rejoicing alike pertain to the recognition that we can overcome and are overcoming because, and only because, God does work in and through us to do His good pleasure. Daniel faced the lions so intelligently and so courageously that he did not have to fight with them at all. Indeed, the story states and the pictures represent that his hands were tied. The mortal implements of struggle were eliminated by this handicap. He was not only indisposed but unable to resist the assault of evil materially; he had to depend upon right consciousness, but in the outcome this brought him

Digitized by Google

no disadvantage, for in so doing he won. Manifestly all mortals are correspondingly incapable of meeting life's issues. They have neither the sense nor the strength to resist evil, and they are simply devoured if they do not rise to the present availability of God as their refuge and strength, the one adequate force in every exigency.

All this was clearly understood and expressed by the early Christians when, after Peter's superb and successful defense of the legitimacy of his preaching and healing work, "they lifted up their voice to God with one accord and said, . . . grant unto thy servants, that with all boldness they may speak thy word, by stretching forth thine hand to heal." Their recognition of God as the only doer, and that man in his every activity but expresses the force of divine Mind, saved them from every mortal phase of self-exaltation and self-dependence, and secured them that success in healing the sick and inaugurating a great world-redemptive movement which has been the glory of the Christian centuries, and for whose reestablishment Mrs. Eddy has prayed and preached and labored in all the years of her ministry.

This is the glory and the gain of Christian Science, as of the primitive church, that it stands for God, divine Truth and Love, as the only power, ever present and ever active in obedient lives to effect the overthrow of all evil, the realization and reign of all good.

JOHN B. WILLIS.

SIMPLE ADDITION.

As a sort of summation to the Sermon on the Mount, with its infinite promises of good, the great Teacher said, "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." Long before that time the wise man had said, "The blessing of the Lord, it maketh rich, and he addeth no sorrow with it." These statements support the teaching of Christian Science that the divine supply for human need is unlimited, and that no evil ever comes from God,—neither sin, pain, sorrow, nor death.

No professed Christian would question the inspiration of the texts here quoted, but with strange inconsistency many quarrel with the logic of Christian Science in its insistence that these statements are capable of demonstration, and that they are valueless unless demonstrated. Paul says that the mere letter "killeth," while "the spirit giveth life;" but it often happens—so tenacious is human belief—that even those who accept Christian Science retain their old and incorrect views of addition, and yet wonder why all good things are not more quickly "added unto" them. They may be even tempted to believe that "the blessing of the Lord"—the coming of Truth to their consciousness—has subtracted a few things which they would like to retain, but Science, with irresistible logic, brings us back to the Scriptural statements, that what God gives brings no sorrow in its train; and that, if we seek "first" the things of God, of Spirit, all good will be added unto us, for God never fails to make good the divine promises.

There is, however, something for us to do with respect to addition, and Peter gives us a wonderful lesson on this subject in his second epistle, which takes on a marvelous meaning in the light of Christian Science. We are almost startled at his assurance that we may become "partakers of the divine nature," and this promise, be it noted, is to those who have "escaped the corruption that is in the world through lust,"—which means a tremendous emptying out of the elements of mortal belief. Then comes the addition of "diligence," "faith," "virtue," "knowledge," "temperance," "patience," "godliness," "brotherly kindness," "charity,"—a splendid list of Christlike qualities, truly! The apostle insists that these things must not only be in us, but that they must "abound," and that when they do abound we are neither "barren nor unfruitful."

Peter goes on to say, "He that lacketh these things is blind, and cannot see afar off." He that lacks these spiritual qualities cannot see how to work out any of the problems of life aright. To do this, we must begin with divine Principle and add continually to our store of spiritual understanding, a process which requires of us earnest study and actual demonstration. If any good thing is lacking, it is evident that we need to add to the problem some quality of "the divine nature," till the need is supplied; for in God, divine Mind, there can be no lack.

That the teaching of Christian Science on this point is entirely reliable and intensely practical, thousands are bearing witness. Like Peter we are sure that "we have not followed cunningly devised fables." What could be more inspiring than these words of our revered Leader: "Through the accession of spirituality, God, the divine Principle of Christian Science, literally governs the aims, ambition, and acts of the Scientist" (Miscellaneous Writings, p. 204). This attained, we have "added unto" us health, holiness, happiness; and having these, we have indeed "all things." To quote the familiar hymn,—

> Thou, O Christ, art all I want;
> More than all in thee I find!

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

Macon, Ga., June 10, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Dear Mrs. Eddy:—Your statement of June 7 contains some of the most luminous, inspiring, and comforting things that have ever been penned, and in loving and grateful appreciation I desire to thank you. When you say, "I do not regard this attack upon me as a trial, for when these things cease to bless they will cease to occur," you not only give great comfort and unbounded joy to your friends, but to my mind you say the best thing that has ever been said on the mystery of seeming evil in a world of real good. Certainly it is heaven on earth to be grateful for all that is seen and known to be good, and to look upon what seem to be our severest trials and testings, not as trials, but as things that "will cease to occur" when they "cease to bless."

Before having any report from Boston, I set to work to correct the false charges that appeared Sunday, knowing that the consciousness which inspires, comforts, and heals is as far above fraud and deception as heaven is above earth. To use your own words, which humanly speaking are fine enough to be immortal: "It is self-evident that the discoverer of an eternal truth cannot be a temporal fraud." While it seems that personally I have never gotten beyond the stage of being a friendly student of Christian Science and everything that appeals to me as good in idea and good in results, my debt of gratitude and affection is far greater than I know how to express.

Yours sincerely,
J. R. MOSLEY.

Toledo, O., June 16, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—We, the members of the senior class of the Sunday School of First Church of Christ, Scientist, Toledo, O., wish to express our gratitude to you for the example you have shown us of Christian living and how to give out love to all mankind. In preparing our lessons for the Sunday School we gain a better understanding of

Digitized by Google

the Bible through the study of your inspiring book, "Science and Health with Key to the Scriptures," and experience more and more of the Christ-healing. We are very grateful for the by-law which permits us to remain in the Sunday School up to the age of twenty years, and wish particularly to express our gratitude for the help Christian Science is to us in our school work. We are constantly gaining a good and clear understanding of this blessed truth, and learning to put it into practice daily.

Yours with love and gratitude,

ALMA RODEMICH, CARMON HERRICK,
JOSEPHINE PRENTICE, *Committee.*

St. Louis, Mo., June 7, 1909.

Beloved Leader:—I expect every loyal Christian Scientist feels like penning a message of love and sincerity to you today, for Christian Scientists are loyal and strong toward you and the Cause you so gallantly lead onward and upward. This week's Lesson, "God the Preserver of Man," truly shows how you are protected by divine power. As you have so nobly written in your article, "Christian Science Healing Explained and Defended," in *The Christian Science Journal* of April, 1901, "'This kind goeth not out but by prayer and fasting' (refraining from admitting the claims of the senses)." We have only to go back to your writings, and we find the ground already covered to meet every approaching error. We come upon the error, as it were, that it may meet with a stern mental rebuke and disappear, as a proof of the utility of Christian Science healing, even as you say in the same article, "He who is overturing will overturn until He whose right it is shall reign."

The opportunity for learning how to bless and love one's enemies is a proof of progress in that we are learning not to swallow their poisonous lotions concocted from the tongues of asps; and to pity rather than censure them,—"forgive them; for they know not what they do,"—and to know the sorrow of the cup of bitterness they are mixing for themselves. You have tried to open their eyes, but they would not see; you have tried to save them, but they would not be saved. It is a consolation and a blessing to know that every knee shall bow, and every tongue confess unto God that He heals all our diseases; and that your knowledge of God's allness protects you from all harm. My love and loyalty to you, dear Leader,

KATE JOY GRAY.

Chicago, Ill., June 15, 1909.

Beloved Leader:—Ever since I was given some understanding of the wonderful statement made in your public letter of the 7th inst., my heart has repeatedly urged me to write you and tell you how much it has helped me; so I do it. Your words seem indeed marvelous and effective. The statement further illumines the meaning of your idea of reversing material beliefs, found in the last lines of page 60 and first lines of page 61 of "Miscellaneous Writings."

This most recent statement of yours brings to me, and to several others with whom I have talked, much rejoicing, and a deeper understanding of the significance of present human activities. I am sure that much good is the result of this latest evidence of your discernment of the needs of the Field. Gratefully and lovingly,

ERNEST C. MOSES.

Boston, Mass., June 12, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—About eleven years ago I first opened Science and Health, and within a half hour afterward the beautiful proof of healing came to me, and many times since have these words on page 496, "scientific certainty," encouraged me until a demonstration has been brought out. Often have I longed to write you of my love. To be able to comfort, to heal, to uplift; to understand even in a small degree how to replace discouragement with hope and joy and peace and love,—is cause for a gratitude which words can never express. I owe this gratitude to you, and am trying to express it in my daily life. Knowing that you dwell in the security of infinite Love, and there find wisdom and strength to lead us on, I am grateful for every word you have written, for every message of love and direction. Lovingly,

ANNA A. FILE.

Topeka, Kan., June 4, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—I wish to thank you for the new edition of "Unity of Good and Other Writings," under one cover. I have long wanted this combination, and here it is, so convenient for every-day use. Your lesser works are of inestimable value, and the new arrangement makes a beautiful volume, suitable for carrying in one's pocket. I also thank you for the change of the paragraph on page 13 of "Rudimental Divine Science," beginning with the line, "When treating a patient," etc. My gratitude for your loving care and watchfulness in meeting humanity's need for spiritual advancement, can only be expressed through demonstrating what you have taught us.

Mrs. McKinstry joins me with love for you.

Your grateful follower,

WILLIS D. MCKINSTRY.

Savannah, Ga., June 7, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—We, the board of trustees of First Church of Christ, Scientist, Savannah, Ga., at a meeting held May 31, resolved to send you a letter of thanks for the amended by-law (Art. XXIII., Sect. 10, entitled, "No Interference." We recognize in the Church Manual the divine wisdom which is guiding us in the present growth of church organization and government. We know that in God's house there is no place for aught but humility and love,—no place for personality, greed of power, and vainglory. Only pure, sweet, and true spirituality can abide there, unchanging and omnipotent. In your endeavor to make this truth manifest, we reverence your unceasing labor of love, and we know that only in patiently striving to follow your teachings can we in a measure aid in bringing forth this condition of consciousness.

Yours in truth and love,

The Board of Trustees, First Church of Christ, Scientist.

A. HAZEL COHEN, *Clerk.*

London N., England, May 28, 1909.

Beloved Leader:—In opening enlarged and more prominent premises, in which to carry on our society in North London, we desire to convey to you an expression of our loyalty and sincere gratitude, for having made it possible for us to publish abroad this message of peace on earth, good will toward all men. As we progress, the sacredness of this holy work becomes more apparent, and we know that only as the Christ-idea is demonstrated in each individual consciousness will the Church of Christ, Scientist, appear. In this manifestation we desire to follow you, God's chosen one, even as you follow Christ.

In reverence and gratitude for the privilege of such service to God and man, we are,

In obedience and love,

Christian Science Society, London N.

E. E. BADDELEY, *Clerk.*

THE LECTURES.

DENVER, COL.

One of the most comprehensive lectures on Christian Science ever heard in Denver was that given on Friday evening and again on Saturday evening [April 23, 24] by Prof. Hermann S. Hering, at First Church of Christ, Scientist. The speaker was introduced by Judge R. A. Hicks, who spoke as follows:—

In the first place, friends, it must be understood that I am not a Christian Scientist. When I first heard the subject discussed, I, like most people without proper understanding, scoffed at and ridiculed it. I have since seen many of the splendid results of its teachings. I have since numbered many Scientists among my most valued and devoted friends. I have since attended a number of their devotional services, and have been profoundly impressed with the simplicity and harmony there prevailing. I have now learned to respect and admire rather than scoff and ridicule. I am proud to say that I have been especially blessed in that I live in a home which is guided by the ennobling influence of this faith, and where love and cheerfulness and harmony and hope prevail. For me to have been thus favored, without having at least some appreciation of the results and benefits and advantages of the teachings of this faith, is impossible. If nothing more were accomplished than the living of the beautiful life it teaches, Christian Science is worthy of our most profound respect and thoughtful consideration.

In this so-called free country of ours, freedom of thought in religious matters is one of our greatest boasts, and certainly no well-founded objection can be made to a religion or faith which accomplishes so much good and is so totally free from bigotry, envy, hatred, and interference with the creeds, dogmas, and beliefs of others. If such groundless objection can be seriously made, then our boasted religious freedom becomes a hollow mockery. For the noble character who founded Christian Science, I have the most profound respect and admiration, and no thoughtful person can but honor and respect a belief which can show such splendid results.—*Denver Post.*

LA PORTE, IND.

The Rev. William P. McKenzie of Cambridge, Mass., delivered a lecture on Christian Science at Hall's Theater May 14. He was introduced by Attorney A. J. Hickey, who said,—

It is hardly half a century ago that a beautiful character, Mrs. Mary Baker Eddy of Boston, founded a new religious sect, which has since become widely known as the Christian Science denomination. The growth of this new faith has been rapid, so that now it has a considerable following in the cities and towns of this country and England, and numerically it compares favorably with many of the older religious denominations. I may add, too, that its membership has been drawn largely from among the most enlightened and cultured people, those who stand for what is highest and best in life.

The worth of a thing may usually be judged by the willingness of those who believe in it to have it investigated and to explain it to others, and for this reason I understand the Scientists have adopted the plan of giving public lectures, that the people generally may become acquainted and familiar with the teachings of their religion. While many of you here tonight, like myself, are not members of this sect, yet I am certain that we shall all be greatly interested in hearing a discussion of this question.

Correspondence.

COLUMBIA UNIVERSITY.

On Friday evening, May 7, Bliss Knapp of Boston lectured on Christian Science in Earl Hall, Columbia University, New York city. He was introduced by the president of the society, Miss Virginia Taylor, who said in part,—

The Christian Science society of Columbia University takes great pleasure in welcoming you here tonight. This society was organized to give a home to Christian Scientists in the university, and to unite them in closer bonds of Christian fellowship. The First Church of Christ, Scientist, Boston, maintains a board of lectureship for the purpose of correcting misapprehensions and misjudgments concerning this religion. We are fortunate in having with us tonight one who is eminently capable and competent to explain the fundamental truths of Christian Science. I take great pleasure in presenting Mr. Knapp.

Correspondence.

ST. LOUIS, MO.

In introducing Judge Septimus J. Hanna May 3, at Third Church of Christ, Scientist, Gerry H. Barnes spoke in part as follows:—

For over fifteen hundred years men have been persuaded to believe that the harmony of heaven is to be attained only after death, in a distant, unknown future, although it is only too evident that there is a crying need for a present deliverance from the burden of pain and woe, and although the Bible emphatically declares that now is the day of salvation. In our own time, following close upon an ardent devotion to the things of matter, there has come a growing desire to know more of the things of Spirit, and a steadily decreasing interest in the formal teachings of the organized church has been accompanied by an earnest seeking for a better understanding of the truth which Jesus taught and lived. To this questioning spirit of the age, a positive, definite, and practical answer has been given.

In 1875 there was published in New England a book destined, under the providence of God, to revive the practice of primitive Christian healing, to reveal to men the present freedom of the children of God, and to implant deep in their hearts a steadfast devotion to the highest ideals of thought and conduct. This book was "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and in it is set forth with faultless logic that exposition of Biblical truth which the author rightly—inevitably—named Christian Science. Already thousands of lives have been made happier and thousands of men and women better through its ministrations.

TESTIMONIES OF HEALING.

Several years ago I awakened to the realization that my opinions of life and what life should bring were all wrong. I was a church-member, but was not interested in religion, for as near as I could gather it was something for women, or for men who were about to die. I was neither a woman nor an old man, but a young man starting in business, having just graduated from college. On looking around I saw unhappiness and unfulfilled desires almost everywhere, and I began to look for the reason.

For several Sundays I passed a number of churches of different denominations, just after service, and I was attracted to the members of the Christian Science church because of the look in their eyes. The general appearance of the congregations was about the same, but the eyes of the Scientists were bright and full of life and joy, while to me the others seemed dull and tired looking. I wondered what made them so, and remarked to a friend that if ever I took an active part in any religion it would be in Christian Science. Judge of my surprise when I learned that this friend's mother had been healed in Science of a very serious trouble. She gave me some of the literature, which I read carefully, and thus I learned why Christian Scientists are bright and happy. In order to see if it were all true, I took treatment for a tendency to constant colds, supposedly caused by a diseased condition of the cheek bone. I had had several operations for this trouble, in this city and in New York, and had treated it daily for over a year, but I had been asked to go East for another operation that spring. I was fully convinced of the truth of Christian Science when the whole trouble was overcome in less than a week.

Through the reading of Science and Health and our other literature I was able to give up the wearing of glasses, which I had used constantly for seven years. These were the only physical ailments I had, and I have since been able to overcome any troubles arising from accidents. On one occasion I got a quantity of very strong lye in my mouth, but through what understanding I had of Christian Science I was able to overcome the pain and inconvenience which would ordinarily have arisen from such a burn. But greater than all of these things is the joy which comes from knowing that God, good, is the only power. What an inspiration for a young man to know, on starting out in life, that his support is the infinite power, that his inheritance is the infinite supply of omnipresent good, and that his path through life may be guided by an unvarying Principle.

Is it necessary to add that I am grateful to her whose purity enabled her to see clearly the majesty and power of God, and whose fearlessness made her able to face and withstand all attacks, so that the truth might be given to you and to me?

J. LELAND MOTHERSHEAD, JR., Indianapolis, Ind.

At the age of fourteen, after having had a fall from a swing, it was said by the doctors, my relatives, and well-meaning friends, that as I had always been a delicate child, now I would be an invalid for life. When I was nineteen, and my father passed on, an uncle told my oldest brother that he would always have to support me, as I would never be able to do for myself. The best and kindest physicians, —three in this city and three elsewhere,—after trying to help me in many ways, said one after the other, "I can't help you so long as you try to be self-supporting. You have more ambition than strength, and need the rest-cure." I always felt that it was wrong to follow this advice, and would, even when suffering greatly, push on until there would be a breakdown. Then, after a time, in which I would seek help from the Bible promises and also from the best books I then knew about, I would again struggle on until there would come another breakdown. This continued for twenty years.

In 1885 I earned my way to Boston, seeking for the something that I felt confident was God-given to man; also to continue my work and study as an artist, and to consult a noted woman physician, who, after faithfully doing her utmost, sent me to another very noted doctor, and wrote to a relative that I needed to be taken care of. This good doctor, after doing all he could, said, "Make up your mind to go home and let your people make you as comfortable as possible; you cannot be cured." At this point came "God's opportunity," for one who had seen what Christian Science could do for others told me of it. I bought the book which teaches how one may receive help, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and the study of this and of other works by the same author has healed and regenerated me in all ways.

The physical troubles from which I have been freed were many. I was reduced to eighty-one pounds in weight, had a spinal trouble said by five physicians to be incurable, also a chronic catarrhal trouble, supposedly inherited. A growth in the nose had been removed twice in four years, and I was told this would have to be done at least once in every four years; but Christian Science has kept me perfectly free from this disease for the past fifteen years. An affection of the eyes made the fourth trouble said to be incurable. The eye trouble was said to be a very complicated case, and I was told that I would always have to wear glasses and even then suffer greatly. Three noted oculists in different cities agreed in this diagnosis. I, however, laid aside my glasses in 1894, had two weeks' treatment in Christian Science, and then helped myself by reading the text-book. My eyes have been perfectly healed since that time.

I would naturally be grateful to any one who had made great sacrifices to reach me in a dark and fearful wood, bringing me a light and leading me out where I was safe, so I am even more grateful to the Founder of Christian Science, and I think no one would approve of me were I to feel otherwise. Our Leader's self abnegation and purity enabled her to hear the word, and she was self-sacrificing enough to endure persecution in order to give the truth to humanity,—surely this merits my gratitude. Gratitude also comes to consciousness when I think of all the helps along the way,—The Mother Church, the Publishing Society, and all it sends out; also the services and meetings of the branch churches. For all of these and more, I feel that I am only beginning to be grateful enough, especially when I consider that I have been well and instrumental in helping others for many years, and that I can yet be much more useful because of Christian Science Jesus said, "Lo, I am with you alway."

NANCY M. DUNN, St. Paul, Minn.

That I have waited till now to tell of the many benefits which I have received from the study of Christian Science is not because of any lack of gratitude. I think perhaps I was waiting for some striking experience, not realizing that, whatever be the error overcome, there is "proof positive" of the saving right idea and the ever-present help in trouble.

One afternoon I was occupied with a piece of work which I was very anxious to complete on the sewing-machine before it grew too dark to see, when suddenly the machine needle was driven through one of my fingers. To mortal sense the pain was intense, and for an instant I seemed to be losing consciousness, but at once the words of the "scientific statement of being" illumined my consciousness like a benediction, and brought me to a realiz-

Digitized by Google

ing sense of the absolute truth of the statement that "all is infinite Mind and its infinite manifestation, for God is All-in-all" (Science and Health, p. 468). I repeated every word of that immortal sentence slowly and carefully—waiting upon God. So busily occupied was I in thinking the truth, that I removed the broken needle, bound up the wound, and finished the piece of work without further trouble. I felt not the least sense of pain during this time, nor was there any soreness afterward.

I have had many proofs of the divine power to heal, and I am indeed grateful for it all, but I think perhaps the greatest benefit I have received from the study of Science and Health has come through the wonderful light which its author, our beloved Leader, has thrown upon the commandments. Before I knew anything of Christian Science I was deeply impressed by the commandments, but never understood their true meaning. I would try again and again to fit them to our way of living, and as frequently close the Bible in utter despair of their application to mankind in this day and age. I saw many enjoying the pleasures of the senses, endowed with much of worldly good, surrounded by admiring friends, and yet ignoring many of the commandments (so I thought). Not long after Science found me, I awoke to the glaring fact that I, too, had been breaking the commandments daily. I was amazed and humiliated, but also grateful to have been shown the way to keep them,—the way to life eternal.

My daily prayer is for that Mind to be in me "which was also in Christ Jesus,"—that I may show my gratitude to God and to our Leader by the truth I am able to manifest and the works I am permitted to do in His name.

MRS. EMILY N. STOKES, Astoria, Ore.

[Translated from the German.]

It is now two years since a stomach trouble induced me to have Christian Science treatment. Years ago I had suffered from an alarming attack of this trouble, which had left me in a weakened condition. A Christian Scientist now began to help me, and after the first treatment the pains ceased. After the third treatment the abnormal condition disappeared without pain, and the next day, which was Sunday, I could attend the service. I have been quite well since, an obstinate bowel trouble having also disappeared through the treatment. I have had the great pleasure of being able to help, through the power of the truth, a relative of mine who suffered with rheumatic trouble. I thank God with all my heart for Christian Science. May God protect Mrs. Eddy.

PAULINE BAYER, Stuttgart, Germany.

As my wife was healed through Christian Science, I also began to take treatment, as I myself had suffered several years from stomach trouble attended with much pain. I was soon much better and now I feel quite well. I thank God daily for the great benefits which I have received through Christian Science.

CARL BAYER, Stuttgart, Germany.

One of the most helpful passages I have found in the Scriptures is in the thirtieth chapter of Isaiah: "For thus saith the Lord God, the Holy One of Israel; In returning and rest shall ye be saved; in quietness and in confidence shall be your strength." This is the experience of all who have awakened and become cognizant of the fact that man really lives in spiritual consciousness,—the consciousness of Spirit, God. To know peace and quietness is the only door open whereby he can escape from mortal mind, or wrong thinking, and enter into the "holy of holies" to learn of the infinite, and in faith and confidence place full reliance on the never-failing rock of Truth and Love.

Prior to my acquaintance with Christian Science, I endured many trials, sicknesses, and burdens that seemed almost unbearable, and life at best appeared an irksome fate. Those conditions have all been changed, and Christian Science has shown me the way to overcome them, and by watching and praying to forsake the old way and hold to the way where God is first, if we desire to make the spiritual sense of all things our own. For the many blessings that have come to me through Christian Science, I am most grateful to our revered Leader, whose patience and constant reflection of divine Love have made it possible for each and all to avail themselves of it, if they will. Only as I labor for this truth of truths do I feel safe, or realize that I can please God.

I have known of many cases of healing, through this great power, from sin, sickness, death, and the grave. The study of "Science and Health with Key to the Scriptures" by Mrs. Eddy, helps every one to see plainly the plan of salvation which Jesus the Wayshower brought to mortals to teach them how to put on immortality. Through God's witness in this age prophecy is being fulfilled.

MISS L. A. EATON, Brooklyn, N. Y.

In the harvest of 1906, while repairing a hay elevator, it fell on me, hurting my right wrist and right foot. The wrist got well quickly, but the foot, which did not trouble me much at the beginning, got worse and worse for a year, till, by next harvest, I had to walk with a stick and be helped in going up any stairs. I did not go to a doctor, as I had been trying to treat myself in Christian Science, but after enduring much pain and being unable to heal myself, I went to a practitioner and asked for help. I went into the room walking with a stick, and came out perfectly sound. I have never felt anything more the matter, the right foot being now the same as the other one. I am a working man, and it is a matter of great importance that I should be able to walk about, lift heavy weights, etc.

I am very grateful for this, and for several other healings I have had in Christian Science.

JAMES COOLEY, Dutchlands, Great Missenden, Bucks, England.

In May, 1907, I was taken ill with what the doctors pronounced an incurable disease, from which I was bedfast five months. After giving up the struggle as fruitless, I turned to the only relief offered me, which was Christian Science. Through its teachings and the kindly assistance of a practitioner, I have been raised from the brink of the grave to perfect health and all the joys of life. I cannot express my feeling of love and reverence for our dear Leader, who has shown us our way to freedom.—MRS. CATHERINE DAVIDSON, Pittsburg, Kan.

[Translated from the German.]

Although I had been a zealous church-goer and Bible reader, and the Bible had comforted me at times, I can now see that I was groping in the dark. Since I have come into Christian Science, I am learning, through God's grace, to understand the Bible aright, and numberless blessings have been mine. I have learned to discern the truth which frees from all suffering, no matter what may seem to frighten me. Christian Science brings us into communion with God and teaches us to recognize the power over the flesh which is given us through Christ.

For the past two years and a half I have enjoyed the blessings of Christian Science, and have myself met during that time the following cases in my family: My oldest

Digitized by Google

foster-daughter, who was attending an industrial school, injured her left foot so that she could not walk. The lady principal had her taken to a physician, who stated that the bone was affected. He put her foot and part of the leg in plaster-of-Paris and said that she must stay in bed for the next two weeks. I then had to take her home. As she trusted in Christian Science and did not feel like going to bed, I removed the cast, and the next morning she was able to walk. During the two weeks that she had been ordered to stay in bed I kept her at home, and she was glad to have the opportunity to attend the Christian Science meetings. A year later my son was injured at his employer's by falling into a green-house, his left arm being terribly cut. The employer immediately had him taken to a physician, who dressed the wound temporarily and turned him over to the surgical clinic. According to the physician's statement the injury was very severe, and as my son knew by experience that I could help him without causing him to suffer, he came home instead of going to the hospital. I kept him with me, trusting in Christian Science, and the wound healed without medical treatment. Later on the boy contracted hernia on both sides through heavy lifting. Through Science this trouble also was overcome entirely in about two weeks' time without his wearing a truss. My second foster-daughter used to suffer with asthmatic trouble, which has also been overcome completely.

Not only disease, but all inharmonious conditions may be removed through the understanding of Christian Science. Last winter I met with financial difficulties; but Science taught me the right thought respecting them. I recognized that man is the child of a Father in whom there is no lack nor sorrow. Surely the Christ-religion has again been given us; its truth is proved by its works. It is comforting and healing; it is "the way which leadeth unto life."—MARIE HELENE BENISCH, Dresden, Germany.

It is my desire to express in this way my gratitude for Christian Science and what it has done for me. Many blessings have been brought into my home through the slight understanding I have gained of this wonderful truth. We moved unexpectedly into the same house with a sincere Christian Science practitioner and lived there one year, but six years went by before I realized that Christian Science was for me, or would meet my need. When I asked this same lady for help she was surprised to learn that I was at all interested in Christian Science. She had not talked it to me, but she had lived it, and that was what convinced me. I saw that Christian Science is based upon Life, Truth, and Love.

I have one little girl, and she has been a great help to me,—the child-thought is so pure and receptive. We have had some beautiful demonstrations of the truth, and have realized many times the truth of the statement that "divine Love always has met and always will meet every human need" (Science and Health, p. 494). I see and feel more than ever the need of living this truth, which has been given us by our dear Leader, Mrs. Eddy, and my heart goes out in gratitude to God for all the benefits I have received.

MRS. LENA M. REX, Bucyrus, O.

Through love of humanity and out of gratitude to Christian Science, to whose aid I owe my redemption from the liquor habit, I contribute this unsolicited testimonial of the benefits I have received. I wish to state that I was for a period of fifteen years, prior to 1904, addicted to the constant and excessive use of liquor. So protracted had been my debauch, and so strong was my craving for alcohol, that I was incapacitated both mentally and physically for either business or labor. Upon the advice of a friend, in February, 1904, I consulted a Christian Science practitioner. She gave me one treatment, and the effect was instantaneous and all but miraculous. The appetite for liquor left me, and I have not to this day—more than four years—taken a drink or had the slightest desire for it, and this despite all manner of temptations. My health is now perfect, my strength normal, and my intellect clear. I send this testimony with the hope that others who may be in bondage as I was, may profit as I have done by this wonderful Science.—W. P. CURRIGAN, Denver, Col.

In the winter of 1907–8, I was taken sick with a severe attack of lung trouble. The coughing was constant for days, and the pain intense. I called a Christian Science practitioner, who helped me at once, and the next day she came to see me. In a few days I was out of pain and danger; at the end of the week I was entirely well and dismissed the practitioner. The members of my household thought it a wonderfully quick healing. It is needless to say that for this healing I am truly grateful.

HENRIETTA F. TUCKER, Oak Park, Ill.

One evening, about a year and a half ago, I was taken with a severe pain in my side, so retired, thinking it would pass away, but before morning I had to send for a physician, who gave me a hypodermic injection. For two months I grew steadily worse, while the doctor increased the quantity of the drug until its effect was lost. Two specialists were then called in, who diagnosed the case as an abnormal growth, and I was told that an immediate operation would be necessary. They said it would be a very dangerous one, that I might live through it and I might not, but without it my life would only be prolonged a few months, during which time the suffering would be intense. I had decided to go to the hospital within three days, so my husband went there to complete the arrangements, but the physician postponed my going for another week.

I asked him if he could do anything for me during the time of waiting, and he answered, "No, I cannot." I then told him he need not come any more, as I intended to try Christian Science. "If you do," he said, "do not expect your suffering to stop; and give them a trial of more than ten days, for they can do nothing for you in that time." The next morning a practitioner was called in and the treatment in Christian Science began. In twenty-four hours the pain ceased, returning only once afterward, and then it lasted but twenty minutes. In five days I could sit up, and within a week was up, dressed, and walking with help. In two weeks I went out every day, and in five weeks was well, feeling better than I had done for two years. In that time I rode twenty-four miles in a buggy without the least discomfort. Now I am perfectly well and have gained greatly in weight.

MRS. C. S. EARNSHAW, Cincinnati, O.

Two years ago my little daughter, then eight years of age, injured her foot in some manner and it became very painful. We consulted a doctor, for we then had no desire for Christian Science, and he thought, after lancing the heel, there would be no more trouble with it, unless the bone had been injured. The foot continued to be very sore, however, for about eight weeks, the child during all this time not being able to wear a shoe or to stand on that foot. The doctor feared the trouble might be a tubercular disease of the bone. Becoming discouraged, we finally turned to Christian Science for help, and after two or three treatments the little one was able to put on her shoe and walk. The sore soon healed and the child was perfectly well and strong again. I was healed of rheumatic trouble

Digitized by Google

in a few days by Christian Science, and also of severe stomach trouble.

For these healings, and many others which have occurred in our family, I am truly and sincerely grateful; grateful to God, of whom I now have a better understanding, and to Mrs. Eddy, who has so lovingly shown us the way out of darkness into light.—MRS. WM. MACKENZIE, Canton, O.

For over thirty years I suffered each summer with an attack of fever and cough, which under medical treatment usually lasted about six weeks. In the winter of 1899 I became interested in Christian Science, and the following August I had what I had come to regard as the customary attack. As usual I had high fever, and felt very sick, but this time, instead of using material remedies, I sent to a Christian Science practitioner for absent treatment, and in one half hour the fever was entirely gone, and my skin was moist and perfectly natural. I was healed of this trouble, and it has never returned in the eight years since, although long ago an able physician told me that it would return every year, and so it did, until it was destroyed in Christian Science. For this and for many other benefits and privileges received in Christian Science, I am very grateful.—WM. H. PHINNEY, Denver, Col.

One of the many things for which I am indebted to Christian Science is the healing of a carbuncle on my neck. It had become very painful when I applied to a Christian Science practitioner for help. I received my first treatment on Saturday; on Sunday I was free from pain, and by Tuesday or Wednesday following, all traces of the trouble had disappeared. This healing occurred over two years ago, and I have never had a return of that ailment since. This is only one of many instances of healing that have come to me through Christian Science. I have been helped not only physically, but morally and spiritually as well. Perhaps one of my greatest blessings is the release from the bondage of fear in its multitudinous forms.

Every day I am more grateful for the blessings that come to me through my slight understanding of Christian Science. I am deeply grateful to Mrs. Eddy, who has given us this wonderful truth, which has helped me over so many rough places.

DALE G. VAUGHAN, Los Angeles, Cal.

Some two or three years after my first healing through Christian Science, I met my former physician, who about a year prior to my recovery had moved from the town in which I was then living. He was a thoroughly educated man, and in all respects a successful physician and surgeon. Both he and his wife remarked at once on the evidences of health and vigor, such as they had not seen in me before; and the doctor naturally supposed that this was due to a continuation of his method of treatment. My husband and I, however, soon told them of Christian Science. The doctor was incredulous, and with much solicitude in look and tone, he begged me to "be careful," saying, "I know that you are just as honest in this as you can be, but do not go too far with it. If you should be taken with anything very serious,—pneumonia, for instance,—take no risk; send for a physician at once."

Several years after this interview the condition of which my medical friend had warned me manifested itself, but there was no thought of turning to any material means for relief or cure. The attack was most sudden and severe, was accompanied with the usual alarming symptoms, and came at a time when the disease was almost epidemic in this city and elsewhere. A Christian Science practitioner was immediately sent for, and in about three days the grip of the malady was broken. My recovery was perhaps a little slow (unless one takes into account the severity of the case); but improvement was continuous, and after several weeks I had gained my normal strength, though for three or four weeks I had been going about the house and out of doors (the time was February and March), attending to my usual duties.

Is it possible to be too grateful to our Leader, Mrs. Eddy, for her faithful, patient, loving persistence in presenting anew this gospel of healing? Of what avail would it have been to me, in the foregoing instance, if, after her discovery of Christian Science more than forty years ago, she had not labored unceasingly that mankind today might thereby be delivered from pain and woe—as thousands have been. We learn from the Scriptures that "every good gift and every perfect gift . . . cometh down from the Father of lights." No words that I know are adequate to express how good a gift the understanding of Christian Science, the Science of Christianity, has been to me and mine; and in being thankful to the divine Giver, I must in the very nature of things be ever lovingly mindful of the one who unselfishly became an instrument in His hands for the presentation of this truth to humanity.

MRS. SARAH J. BAILEY, Kansas City, Mo.

The prophet Jeremiah said, "Come, and let us declare in Zion the work of the Lord our God." I am so glad I can help to declare this wonderful truth. Five years ago, when Christian Science was first presented to me, I had no room for it; but three years later, when trouble seemed to be overwhelming me, it was offered to me again. I was then "so weary, so weary of living, I longed to die;" but now all is changed, and through the study of the Bible and "Science and Health with Key to the Scriptures" by Mrs. Eddy, and the help of a kind practitioner, my sorrow has been turned into joy and I am learning more and more each day that all good comes from our Father.

Physically I have been able to overcome many of the ills of the flesh, both in myself and family. A short time after taking up this study I laid aside the glasses which I had worn for fifteen years, and can see now much better without them than I did with them. My daughter was healed of a very distressing cough in one treatment. For all the many blessings that have come to me through Christian Science I am indeed truly thankful. And I am so glad that Mrs. Eddy was found worthy in this age to give to the world this healing truth in a way we can understand, and I am thankful that it has come to me.

ELIZABETH B. MCGREW, Canton, O.

[Written for the *Sentinel*.]

"THE SINLESS JOY."*

CASSIUS M. LOOMIS.

IT gave the Master comfort to the end.
It makes the humblest child of earth thy friend.
So gentle, and so filled with healing balm—
Have ye not felt its wondrous holy calm
Steal o'er thy heart and lull thy sense of pain,
Till words to do it justice seem in vain?
This is the sinless joy of him who led
His chosen few to God, and raised the dead.

How now, O child inured to baneful ease,
So prone to sensuous hours, so hard to please,
Might not some friend dissuade thee from thy wine
To seek one moment for this joy divine,
And seeking, taste God's nectar sweet and rare,
Or don the seamless robe that all may wear?
For, lo! one glimpse of heaven is more to thee
Than all the pleasures known on land and sea.

* Science and Health, p. 76.

FROM OUR EXCHANGES.

[Prof. Milton S. Terry, D.D., in (New York) *Christian Advocate.*]

We should study all religions with a sympathetic feeling, for we may see in every one of them the noblest elements of human nature yearning after God. Thoughtful men are now asking, What is religion? What is the essence of Christianity? And we are told that, in the deepest sense, religion is the recognition of a divine relation between God and man. This being true, that religion which best exhibits the fact and significance of such relationship should have the highest claims upon us all. Accordingly we ask of Christianity, as we would of any other cult, What is the best you can tell us about man and about God?

[Rev. Henry Davies in *Baltimore* (Md.) *Sun.*]

The test of Christian progress is not the success of the different sects and churches, but whether the world is growing more responsive to love, whether good deeds are more genuinely appreciated, whether men seek each other's welfare with more zeal than ever before. This can be said with confidence, that, compared with the early centuries of Christian history, the world is, in all these respects, vastly changed. Yet there are large territories of human life which have yet to feel the full power of this test as applied to their harmony with the spirit and truth of Christianity according to Christ.

[Principal P. L. Forsyth, D.D., in *British Congregationalist.*]

To believe in miracles is not to believe in a magical action of divine forces, but in the moral exercise of the divine power. Magic is an irreligious idea. Religion does not rise above mere religiosity unless the divine power act in the moral personality and through it. "Magic" miracles are alien to the genius of the New Testament. They represent God's action as that of pouring into men; which becomes theirs by that infusion, and not by experimental assimilation; which acts on their nature and not their personality. The healing grace of God can be received only by faith, and not by mere passive exposure to it.

[Rev. Alexander MacColl in *New York Observer.*]

Healthfulness is contagious; the sunny spirit will radiate sunshine. But if his work is to be permanent, he must remember always that his plea is not for a mood, but for a Master. The peace that brings "quietness and confidence" is Christ's peace. It is not an achievement, though persistent effort helps to make it effective, but a gift to the man who has made a whole-hearted surrender to Christ and is eager to learn of and be led by him. The peace of God which passeth all understanding shall guard your heart and your thoughts in Christ Jesus.

[Rev. Melville K. Bailey in *Living Church.*]

God's presence in the hearts of men has never yet depended and never will depend upon human definitions. Our wisest judgments are shamed into silence and our most elaborate systems set at nought by manifestations of His presence and His power. The only measure of His kingdom may be known by the action of His Holy Spirit. For where the Holy Spirit is, there the church of God exists in process or in accomplished fact.

[Rev. Frank Oliver Hall in *Universalist Leader.*]

Religion has blossomed out of the deep necessities of the human soul. It has come to us not out of the heavens, not out of the sea, not out of the earth, but out of the hopes and fears, the joys and sorrows, the most generous impulses and the holiest aspirations of humanity's sacred life.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel*. Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel*.

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to JOHN V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

The Publishing Society has in stock a number of copies of *Sentinel* No. 6, Vol. IX., containing the article "What Our Leader Says" as last published. As this article is of abiding interest and value to the Field the Society will be glad to supply it, postpaid, at the following prices: 1 copy, 5 cents; 5 copies, 15 cents; 10 copies, 25 cents; 25 copies, 50 cents; 50 copies, 85 cents; 100 copies, $1.50.

On foreign orders add 2 cents a copy to cover postage.

The supply of *Sentinel*, Vol. IX., No. 14, is exhausted.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES." MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

PAMPHLETS AND REPRINTS

CHRISTIAN SCIENCE. THE RESTORATION OF PRIMITIVE CHRISTIANITY. A Lecture. By CLARENCE C. EATON. 29 pages.

CHRISTIAN SCIENCE: A RELIGION OF DOING. A Lecture. By JUDGE WILLIAM G. EWING. 26 pages.

MISCELLANEOUS

BIBLES. Clarendon Brevier (01483 x), heavy faced, very distinct type, Turkey morocco, size 6 1-2 x 4 3-8 inches, corresponding in size and binding to pocket edition of Science and Health. Price, $3.75.
Morocco cases, to hold pocket Science and Health and above Bible, may be had at $1.25.
Text Bible. (01561 x), pica square type, Alaska seal, size 7 1-2 x 6 1-4 inches, 1 1-2 inches thick. Specially adapted for use of Second Readers. Price, $7.25.

CHRISTIAN SCIENCE AND LEGISLATION. A pamphlet of one hundred and twelve pages, containing articles by JUDGE CLIFFORD P. SMITH, EDWARD A. KIMBALL, and JUDGE SEPTIMUS J. HANNA, together with testimonies of healing, editorial comments, etc. Single copies, 10 cents; twelve copies to one address, $1.00; twenty-five copies, $1.85; fifty copies, $3.50.

QUARTERLY COVERS, in black seal leather. Regular size, 5 1-4 x 7 3-4, $1.25 each or $12.50 a dozen. Pocket size, 4 1-2 x 6 1-2, $1.15 each or $11.00 a dozen.

QUARTERLY COVERS WITH CHANGE POCKETS.—Regular size, $1.50 each or $15.00 a dozen. Pocket size, $1.40 each or $14.00 a dozen.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. One hundred and three pages. Illustrated. One copy, $1.50; six copies, $7.00; twelve copies, $12.00.

PICTURE OF THE MOTHER CHURCH. A half-tone reproduction, size 12 x 15 inches, mounted on a white mat 21 x 25 inches. Single copies, 50 cents; a dozen copies to one address, $4.50.

SOUVENIR POST CARDS, showing picture of The Mother Church, 25 cents per dozen.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9.00; per half dozen, $5.00. Half morocco, per copy, prepaid, $1.40 each; per dozen, $12.00; per half dozen, $6.50. Full morocco, $2.50 each. Levant, $3.50 each. Pocket Edition, size 4 5-8 x 6 5-8. Full morocco. Per copy, prepaid, $3.00; twelve or more copies to one address, prepaid, each, $2.50.

MUSIC. Poems written by MARY BAKER EDDY and used by special permission, have been set to music, as follows:
"THE MOTHER'S EVENING PRAYER." By William Lyman Johnson. The arrangement for both high and low voice in the same copy. 75 cents the copy; $7.00 the dozen.
"CHRIST MY REFUGE." By William Lyman Johnson. Arrangement for high and low voice in same copy. 75 cents the copy; $7.00 the dozen.
COMMUNION HYMN.—"SAW YE MY SAVIOUR?" By William Lyman Johnson. Published in two keys for high and low voice. 50 cents the copy; $5.00 the dozen.
"BLEST CHRISTMAS MORN." By Frederick W. Root. Published in two keys, for high and low voice. 27 cents the copy; $2.75 the dozen.
"O'ER WAITING HARPSTRINGS OF THE MIND." By Frederick W. Root. Published in two keys for high and low voice. 27 cents the copy; $2.75 the dozen.
Please state when ordering any of the three last named whether high or low key is desired.

Our Catalogue for 1909, containing description and prices of above named literature and a selected list of Bibles, will be mailed free on application.
Remittances should be made by check, post-office money order, express money order, or exchange on Boston or New York. Currency or coin should not be sent by mail unless *registered*. Please send no money remittances or business letters to the Editor or Editorial Department.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75

Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883–1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), single copy $2.25
Twelve or more books to one address, each . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75

The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.
Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science: containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

No. 400-406 Sixth St., Boston, Mass., U. S. A.

ARCHIBALD MCLELLAN, Editor

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00

Ten copies or more to one address, one year, each copy, $1.70

Twenty-five copies or more to one address, one year, each copy, $1.60

Fifty copies or more to one address, one year, each copy, $1.50

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.

Bound Volumes: Current year and two years previous, cloth, $4.00; half calf or half morocco, $4.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second class mail matter.

ITEMS OF INTEREST.

National.

Arthur Hooker, secretary of the board of control of the national irrigation congress, will present a resolution for approval by that organization at its seventeenth session in Spokane Aug. 9 to 14, memorializing Congress to issue three per cent gold bonds, running one hundred years, to the amount of $3,000,000,000, or as much thereof as may be necessary for the following specific purposes: One billion dollars for drainage of overflowed and swamp lands, thus reclaiming an area equal to one hundred thousand square miles; one billion dollars for the reclamation by irrigation of forty million acres of arid and semi-arid lands, now partly or wholly waste; one billion dollars to construct and improve deep waterways, to develop thousands of miles of territory now without adequate transportation facilities; one billion dollars for good roads and national highways, for the lack of which the loss to the farm area of the United States is approximately $500,000,000 annually; one billion dollars for forest protection, reforestation, and conservation of the forest resources.

The most comprehensive and costly subway plan ever outlined for New York city has been presented to the public service commission by the Bradley Gaffney Steers Company. It includes the construction with private capital of the Broadway Lexington avenue route from the Battery to the Bronx, a two-track connecting subway in Canal street, the Lafayette avenue Broadway route in Brooklyn, and two spurs of the Broadway Lexington avenue route along Jerome avenue and 138th street in the Bronx. The estimated cost of the work is $83,000,000. The company stipulates as part of its offer that the city [illegible] the [illegible] of [illegible] [illegible] [illegible]

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

"UNDERSTANDEST THOU WHAT THOU READEST?"

SAMUEL GREENWOOD.

THE Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, has many thousands of readers, but some evidently do not understand what they read or they would not rise from its perusal to criticize unkindly the book and its author. It is a serious thing to disparage a work which brings daily help and comfort to so many of its students, and one should ascertain beyond question that he understands it correctly before pronouncing judgment. One notable fact regarding the reception of this book is, that the large majority of its readers have so far grasped its meaning as to make Christian Science the rule of their thought and life.

The ranks of Christian Science contain numbers of cultured people, as well educated as can be found elsewhere, and as capable of detecting error in Mrs. Eddy's writings, if error there be, as are her critics. What, then, is it, other things being equal, that in the one case leads to joyful acceptance and satisfied adherence, and the lack of which in the other case leaves the reader in unbelief or downright antagonism?

It may be answered that the majority who read Science and Health do so with a hope for better things, in the desire to find the truth which makes free. Their dominant thought is not to pick flaws in its teaching, but to receive the good it holds for them. Such readers are not concerned about defending the fortress of their former beliefs, which affords but scant protection from the enemy, for they seek that perfect refuge, Truth, wherein no evil enters. Finding in Christian Science what they seek, experiencing its ability to meet human need, and discerning the higher thought of God and man which it unfolds, do they not act wisely and intelligently in accepting this truth as the Comforter sent them of God? It would be positive folly, held inexcusable in other things, to turn away from Christian Science simply because it does not accord with one's former views, because its logic is contrary to material philosophy, or because its teaching is not that of popular theology and dogma.

On the other hand, its aggressive critics have evidently read Science and Health for the sole purpose of finding it in error, not with the prayer that more of the truth might be revealed to them. Their object has been to defend their own position rather than to gain a better one. In many cases the critic has judged and condemned this book before he opened its pages, and no one in that spirit could hope to see what had inspired its author. It is not to be wondered at that these readers do not get beyond the external wrappings of the priceless pearl hidden within, even that spiritual understanding of God which the human intellect alone is unable to attain.

It should be readily comprehended, even by its would-be censors, that Science and Health cannot be interpreted by any material standard of thought, since it is written entirely from the spiritual standpoint. A critic recently condemned this book because he could not understand it on the basis of what he termed "the five senses." Mrs. Eddy did not expect him to. If Christian Science could be understood materially it would be a mere human-mind product, and therefore helpless to redeem humanity from its self-imposed miseries. Although this critic contends for the asserted infallibility of these so-called senses, he would not expect Christian Scientists to understand his position from their spiritual standpoint. One would not expect a pagan to see the beauty or truth of Christianity while holding to his pagan views; how then can one hope to understand spiritual truth through his material beliefs and hypotheses? St. Paul's precept holds good throughout all time, that spiritual things can only be spiritually discerned.

It is true that Science and Health professes no respect for what is known as material law, or for any phase of belief in power or intelligence apart from God. If it did, what were its teachings worth? Do not these critics understand the desperate need of humanity, and that no material system has ever met or ever can meet that need? Do they not understand that something above materiality is needed to lift mankind out of it? If they do not, upon what basis do they claim to understand Mrs. Eddy's position or her writings? What help, might one ask, has the belief in matter ever rendered in reforming the sinner or in redeeming the sensualist? or how high has human wisdom yet ascended in scaling the heights of the infinite?

The key-note of Christian Science, as of all truth, is that God, Spirit, is infinite, All; and the Christian Science text-book was written to elucidate and make practical this truth. This should make clear how impossible it was for Mrs. Eddy to present pure Christian Science and make any concession to material beliefs, no matter how strongly they were entrenched in public thought. When her book was first published she stood practically alone with respect to her teachings, and faced the opposition of the various schools of thought in establishing her system. It is not surprising, then, that many still disagree with her, but it is a little surprising that some essay to criticize or dispute her statements without making sure that they understand them. He who understands mathematics can demonstrate his knowledge; and Mrs. Eddy pertinently declares that "one who understands Christian Science can heal the sick on the divine Principle of Christian Science, and this practical proof is the only feasible evidence that one does understand this Science" (Science and Health, p. 345).

One might candidly and with self-respect aver his disagreement with Christian Science, as he views it, and Christian Scientists would respect his sincerity; but to put forward that disagreement as conclusive evidence that this teaching is not true, condemns itself as presumptuous. Those who grasp the import of Science and Health sufficiently to "heal by its means" (*Ibid.*, p. 558), discern in its teachings the truth which its critics do not, and should

Copyright, 1909, by Mary Baker Eddy.

Digitized by Google

be judged to have the better understanding thereof. Yet some there are who assume to explain Christian Science, and even to define the method of its operation, who display no ability to heal as Christian Scientists are doing. But why should they not, if they understand it? Why should they not do even better work, if they know a better way? To pull down a building which affords refuge to the needy without erecting a better in its place, serves neither God nor humanity.

As much as any other, Mrs. Eddy desires "on earth peace," and her history shows that she cherishes only "good will toward men;" but, like her Master, her teachings are not designed to give peace to material and sinful beliefs. She has not written to meet the views of medical or theological schools, nor to please public opinion, although she respects the motives of all who are honestly working, in their own way, for the welfare of mankind. Her mission is from God, and she has not consulted human wisdom as to the extent or the manner in which she should fulfil it. On the contrary, she has stated the whole truth as revealed to her understanding, without regard to the hostility it might arouse in the so-called "carnal mind."

In the spirit of the old-time conquerors the Founder of Christian Science has raised the standard of Truth, and proclaimed the freedom of mankind "in the name of Almighty God" (*Ibid.*, pp. 225, 228). She denies the asserted power of evil to bring sin or suffering upon the children of God, declaring the ever-presence of infinite good; and her only opponents are those who accept and defend the claims of evil. Think of the significance of this fact, that no one criticizes or condemns Christian Science who actually believes in and acknowledges the omnipotence of God.

It is, perhaps, one of the best confirmations of the divine sanction of Science and Health that it is held in disfavor only by those who assert that power does exist apart from God, and that this evil power has dominion over man. After all, the fact that Christian Science continues its good work of healing the sick, reforming the sinner, and rescuing the unfortunate, is the best possible rebuke to its critics, and the only answer that effectually silences their objections.

THE MASTER'S SERVICE.

EDITH L. IVES.

If Christian Science had helped me only by giving me a new and true idea of the word "service," I should be deeply grateful for that alone. Having studied Christian Science for about a year and a half, I was filled with the desire to do something great for the Master, to devote my life to the service of God in some way apart from the common round of every-day life. I wanted to grow rapidly, forgetting that all real growth is gradual; that things of rapid growth are apt to be short-lived; while a slow unfolding and growth, as that of the sturdy oak-tree, means strength and beauty. So I had my lesson to learn.

As I sat reading the Bible one evening, these words, "Whatsoever ye do, do it heartily, . . . for ye serve the Lord Christ," stood out before me in letters of fire. "Whatsoever ye do,"—nothing great or wonderful, but "whatsoever ye do,"—even to the right performance of household duties, the routine of daily business life, giving a kind word or a smile, the "cup of cold water" for Christ's sake. What could be a more lowly task than the one our Master performed when he washed the feet of his disciples? He was ever doing the Father's will, serving God. "I came down from heaven, not to do mine own will, but the will of him that sent me," "Whosoever will be chief among you, let him be your servant." We are apt to forget that it is the little things which count. The drops of water make the mighty ocean, the little brooks the wide river, the slender saplings the forest; and it is just in the position we are that we can best serve the Master. No matter how uncongenial the task may seem, we should seek to know, as some one has written, that

> The place that He willeth in love for me,
> That is the place for me!
> I care not at all, whether large or small,
> The work may seem to be,
> If only sometimes in a quiet hour
> I may hear Him say to me,
> My little child, thou art doing well
> The task I have willed for thee.

Our Leader tells us that we must constantly "stand porter at the door of thought" (Science and Health, p. 392), and watch, not only our thoughts of ourselves but those we send out to others. To remember that a strong helpful thought for another may mean a great service to one in need, shows how we learn to serve all mankind, while the overcoming of error in one instance means so much the less evil in the world. By letting no error hide from us the sunlight of our Father's love, we are indeed serving the Lord Christ, and are about our Father's business. This necessarily means that we are putting the Golden Rule into practice and seeking to love our neighbor as ourself. Such service brings into one's daily life a joy and peace beyond all expression. And the secret of this right service is Love understood! We must strive to know this "unselfed love" (*Ibid.*, p. 1) which makes all things possible. With love to God and man in our hearts, all work done and duties fulfilled must necessarily be service for the Master.

THE SUNDAY SCHOOL CLASS.

ALICE L. NICHOLS.

Recently I was asked to teach a class in a Christian Science Sunday School, and I accepted this work with the feeling that it was both an opportunity and a responsibility. As a first preparation I studied Article XX., Sect. 2, of The Mother Church Manual, in which our Leader says: "The Sabbath School children shall be taught the Scriptures, and they shall be instructed according to their understanding or ability to grasp the simpler meanings of the divine Principle that they are taught." The reason for this ruling is plainly stated in the first tenet of Christian Science: "As adherents of Truth, we take the inspired Word of the Bible as our sufficient guide to eternal Life" (Science and Health, p. 497).

Clearly, then, there is a motive in presenting to little children this "sword of the Spirit, which is the word of God." They are passing day by day into experiences of conscious living and living consciousness, and this growth must be rightly guided. All growth is governed by divine Principle, and in accordance with this law the wise teacher seeks to establish a scientific method. Teaching may be defined as the process which leads out toward the appearing, within the consciousness of the learner, of mental concepts that unfold to him hitherto unrealized facts of his own being and environment. The law of progression is the natural order in this unfoldment, and this law cannot be ignored or violated.

A wonderful light is thrown upon this necessity in our Leader's interpretation of the successive mornings and evenings in the account of creation in Genesis. Jesus' recognition of the fact that mortal mind passes through successive stages toward the final fulfilment of the law, is evidenced in his statement, "Therefore speak I to them in parables." This master Teacher unfolded to human thought the substance of Spirit in the language of the known tongue, and by means of this he taught the new.

Digitized by Google

Everywhere we find him interpreting things as thoughts, bringing to light the real and showing the unreal to be a counterfeit; moving from the concrete image to the spiritual fact and substance of which that image is a symbol.

This, then, was the way that Jesus taught, and this is the way of all true teaching. With both subject and method clear before me, I began the serious task of selection. Several years' experience as a teacher in the public schools had taught me the futility of desultory, unsystematic effort, and so a basis for regular and related work was adopted. The study with this Sunday School class was based largely on the Ten Commandments and the Beatitudes, with the other work outlined in "first lessons." It was found to be a good plan to select the illustrative material from some incident or story which was touched upon in the lesson, care being taken that the incident or narrative emphasized the truth.

I also endeavored to employ some plan by which each Sunday's lesson should be an outgrowth of the one preceding it. To this end it seemed necessary that we should find a starting-point, and naturally "the beginning" was considered as that point. After reading the narrative of creation with the children, we came to the Lesson-Sermon on "Reality." The meaning of this one word presented the important fact that the new tongue we are learning in Science must be a part of this study. It was easy to discover the realities in God's creation: so also, in the Lesson following, the unrealities in the false account of creation in the second chapter of Genesis.

In studying the next two Lessons, "Are Sin, Disease, and Death Real?" and "Atonement," we learned that the path we were following had already been blazed by the workers who prepare these wonderful weekly love-feasts. "And he will destroy in this mountain the face of the covering cast over all people, and the vail that is spread over all nations;" this was in one Golden Text. In Genesis we read, "But there went up a mist from the earth, and watered the whole face of the ground." What was this mist but the "covering cast over all people," the false beliefs which must be destroyed before they can attain to the realization of that wonderful Scripture, "And God said, Let us make man in our image, after our likeness."

Four Sundays were spent in the study of creation, illuminated by the truth as expressed in the subjects and Golden Texts of the Lesson-Sermons. We also found adequate hints for the unfolding of spiritual truths in each story as the narrative proceeded. In the Lesson on "Everlasting Punishment," we found in the responsive reading, "Woe unto them! for they have gone in the way of Cain." What was the way of Cain? He was a tiller of the ground, and brought the fruits thereof as an offering unto God. His offering was material, and therefore God did not look upon the fruits of his labor with favor. Abel's sacrifices were more spiritual, for he was a keeper of sheep, and we read that "the Lord had respect unto Abel and to his offering." When Cain in his fear pleaded with God for protection, "the Lord set a mark upon Cain, lest any finding him should kill him;" thus making it possible for him to work out his own salvation and learn the way back to purity and love.

The story of the flood brought us to a sort of climax or turning-point in the narrative of events from "the beginning," and with it came the Lesson, "Adam and Fallen Man," which shows the necessity for the destruction of false beliefs. The Lesson on "Mortals and Immortals" was full of the promise of the new covenant; and the bow which God set in the cloud stands for this new covenant, the promise of immortality. So the flood, which covered the face of the earth and destroyed the errors in man's belief, hints at the omnipresence of Truth, which guides mortal thought into the ark of safety established in the beginning for the sons and daughters of God.

In some such way as this the children may become familiar with the use of our text-book, and learn that it is indeed a "Key" which unlocks the deeper things of Scripture and reveals unto babes that which has been hidden from the so-called wise and prudent throughout all the years that have come and gone. I have often tried to express in written words my gratitude to our consecrated Leader for the glimpse she has given me of a higher and better life, but until the present effort I have somehow failed to find the way. Even now, when this opportunity is mine, there is no promise I can make which I think she would appreciate more, than to live the life she has taught me to live, and to do my work a little better each day.

SINCERITY.

FLORENCE ELLIOTT.

SOME one has said: "I give thoughts words, and words truth, and truth boldness. She whose honest freeness makes it her virtue to speak what she thinks, will make it her necessity to think what is good." Webster's International Dictionary defines sincerity as "honesty of mind or intention; freedom from simulation, hypocrisy, disguise, or false pretense." In the material world we are very often confronted with the statement that it is impossible for any one to be absolutely truthful, or sincere, and still be able to hold his friends or maintain his position in society; and instances are cited of some daring individual who has attempted to adhere strictly to the truth for one day, and the direful results which followed.

The average business man will also affirm that a certain amount of dissimulation is necessary, in order that he may sell his goods and carry on his business successfully. In Christian Science, however, we know that this is not true. We know that a man who is absolutely honest can succeed in business; we know that no real success is ever gained except through honesty and sincerity, that no true friendship or love can exist without them; that no genuine happiness can be attained in any other way. The man in business who is guided and governed by Principle does not need to use any flavor of deceit in order to sell his goods; the mother who rears her children with the understanding that Truth is reflected in truthfulness, is laying the foundation for their future success and happiness, and the sincerity which makes it possible to tell a friend his faults, with the desire to help him overcome them, is the only true test of friendship.

Sincerity of purpose is also necessary in our study of the Bible and the Christian Science text-book, if we would gain the real good which these books contain, and which is unfolded to us each day as we acquire a better understanding of God and His universe. Our Leader says in Science and Health (p. 192), "We are Christian Scientists, only as we quit our reliance upon that which is false and grasp the true;" and she has proven through her own life that this can be done.

The command given to the tribes of Israel, as recorded in the book of Joshua, seems to sum up the whole matter: "Now therefore fear the Lord, and serve Him in sincerity and in truth: and put away the gods which your fathers served on the other side of the flood, and in Egypt; and serve ye the Lord."

LIBERTY.

GEORGE W. WILSON.

THIS cheering word expresses a divine sentiment, and the love of it stands for the greatest human progress yet attained. It points to and is correlated with the saying of Jesus, "I am come that they might have life, and that

Digitized by Google

they might have it more abundantly." While it may be true that crimes due to the greed and avarice of depraved mortals have been committed in the name of liberty, yet it nevertheless stands for a widening of the bounds of freedom. Liberty is opposed to slavery, subjection, or bondage of every nature whatsoever, and perfectly understood it means a complete independence from external causes or motives, wherein thought remains unbiased by rules and dogma.

Jesus came, in fulfilment of prophecy, to set the oppressed at liberty, and St. James refers in his epistle to "the perfect law of liberty." St. Paul admonishes his followers: "Stand fast therefore in the liberty wherewith Christ hath made us free," and he further declares that "where the Spirit of the Lord is, there is liberty." Of old the psalmist sang, "I will walk at liberty: for I seek thy precepts." Personal liberty, national liberty, liberty of thought, has cost and is costing a vast amount of endurance, suffering, and treasure. Contrast, if you will, the broad, permanent foundation of liberty now being established throughout the world by the true "embodiment of right thinking," which abolishes "mental slavery" (Science and Health, p. 225) and demonstrates "on earth peace, good will toward men," with the price of liberty on a much lower plane of existence, as here pictured by Henry Giles:—

"Trace it along the line of centuries; mark the prisons where captives for it pined; mark the graves to which victims for it went down despairing; mark the fields whereon its heroes battled; mark the seas whereon they fought; mark the exile to which they fled; mark the burned spots where those who would not resist evil gave up the ghost in torture to vindicate the integrity of their souls; add then open suffering to those that have found no record; imagine, if you can, the whole: then you have the price—only in part—of liberty, for liberty has cost more than all these."

It was to secure and enjoy a higher sense of liberty that our forefathers braved the perils of the deep and the hostile tribes, that the American nation might be established, where religious as well as political liberty might prevail. Yet here, in this peace-loving land of ours, the world witnessed an unparalleled loss of human life and treasure that the divine "law of liberty" might be more firmly established; but, as Mrs. Eddy says, "oppression neither went down in blood, nor did the breath of freedom come from the cannon's mouth. Love is the liberator" (*Ibid.*, p. 225). History abounds with visions of freedom; endless verse has been written and set to soul-inspiring music that men might attain a higher degree of liberty; for all of which the world rejoices in some progress, but Pythagoras said, "No man is free who does not command himself."

Our beloved text-book is replete with thoughts of liberty, and gives a comprehensive and logical analysis of the way it is to be obtained. On page 224 we read, "Truth brings the elements of liberty." No one familiar with the teaching and practice of Christian Science can doubt its truth, or the fact that it comes in fulfilment of the promise of Jesus, as recorded in the fourteenth chapter of St. John; for surely it does bring to our remembrance all the Master did and taught. With the advent of Christian Science a new era has dawned in human affairs, the greatest in importance of any yet recorded. People in all ages have turned to the Holy Scriptures for spiritual awakening, and in proportion as their teaching has been understood and practised, has a higher spiritual plane been reached—where in the atmosphere of God the scales drop from the eyes and we behold a demonstrable truth—a religion of works, and the thought of all scholastic or merely human theology is cleared. As an evidence that Christian Scientists are being guided by the right chart, we note today the highest degree of freedom yet expressed,—freedom from disease, sin, and fear; and this is due to the better understanding of the truth,—freedom's guiding star, revealed in Christian Science.

A CHILD'S FAITH.

ELLA T. GEORGESON.

He was a little Scientist of six summers, and with his mother and a few friends made up a party who were spending a month at one of the mountain hotels in northern California. What is known as poison-oak was in flower and everywhere in evidence, and all the party, especially the children, were repeatedly warned against touching or approaching it; but the children who had learned the falsity of the material law because of the actuality of the spiritual law, handled the plant with impunity, breaking switches of it to urge on the old pony when they rode him, and bringing in sprays of the beautiful leaves with the wild flowers they found on hill and roadside.

One evening the landlady, who had formed a great attachment for our little six-year-old, was, with him, watering the roses in her garden. This garden was situated at the base of a very steep hill, and the poison-oak fairly overhung the flowers on two sides of it. As the spray dashed from the roses over the offending bushes, she called to the little fellow to step aside, saying that the wind was blowing directly upon him from off those wet bushes, and that she did not want the dear little boy to be hurt by the poison-oak. "Why, it won't hurt me; I'm not afraid of it!" he answered in surprise. "That's all right, little one," she said energetically, with an incredulous smile. "The next time I get poison-oak I shall say, 'I'm not afraid of it—it won't hurt me! Poison-oak isn't poison—God never made poison'"! etc.

The child was troubled—he felt the thrust without understanding it. Then, raising his big blue eyes to hers, he answered with intense earnestness, "You've got to believe it!" The lady's face clouded and her eyes filled with tears. "That's just the trouble, dear;" she said, and hastily turning off the water she went inside. The child's mother, who had seen and heard unobserved from an upper window, thought of the Master and the blessed children of ancient Galilee. She remembered that Master's rebuke to the chief priests in the temple, "Have ye never read, Out of the mouths of babes and sucklings thou hast perfected praise?" also our Leader's words on page 130 of our inspired text-book, Science and Health, "The author has often remembered our Master's love for little children, and understood how truly such as they belong to the heavenly kingdom." How many adults in years and understanding would have answered so wisely or so will as did this child?

Many times since then has that little scene in the hillside garden come to that mother with its loving rebuke. How many times do we find ourselves simply repeating the phraseology of the Bible or of our text-book, without believing (understanding or realizing its truth). Then our words are but "as sounding brass, or a tinkling cymbal." Still we wonder why we do not heal, or the blessings which we think we deserve do not appear. Verily we must "believe" with the absolute trust and confidence of a child if we would prove the truth of the Master's saying, "My yoke is easy and my burden is light."

When Haydn composed "The Creation," he wrote at the top of every page, "To the sole glory of God!" He did not think of the applause he would gain by his great work. He thought only that it would express his thanks to God for the beauties of creation, and raise the hearts of the thousands who should hear it to the giver of all good. When it was first performed the marvelous burst of music, "Let there be light!" caused such enthusiasm that the whole house arose and shouted applause to the composer; but he, with tears coursing down his cheeks, waved it away, saying with deep emotion, "It came from God: it is not mine! Give glory to God!"—ANON.

SELECTED ARTICLES.

[W. C. Williams in *Baltimore* (Md.) *American*.]

The resurrection symbolizes to Christian Scientists the overcoming of the belief in materiality through the understanding that the spiritual is the only real. As the individual thought becomes clearer and more purified through righteous living, this understanding develops until daily proofs strengthen the reliance upon the spiritual and show the instability and powerlessness of the material. Jesus proved beyond all question that he triumphed over the body through this understanding, and although the body appeared to be dead, he showed it afterward unchanged; yet he said to his disciples, "He that believeth on me, the works that I do shall he do also," showing that this command over materiality was an example for us to follow, just as much as were his other works.

Mrs. Eddy says, "The efficacy of the crucifixion lay in the practical affection and goodness it demonstrated for mankind. The truth had been lived among men; but until they saw that it enabled their Master to triumph over the grave, his own disciples could not admit such an event to be possible. After the resurrection, even the unbelieving Thomas was forced to acknowledge how complete was the great proof of Truth and Love" (Science and Health, p. 24).

Orthodox religion teaches that after man dies his immortal soul is resurrected from his dead body; Christian Science teaches that our resurrection, the recognition of the image and likeness of God, should commence now. The putting off of "the old man" of error, sin, and disease will bring to light the real man, the immortal man. This regeneration is not accomplished in a day, and until we gain the Mind that was in Christ Jesus, it will be necessary to work out of the accumulation of centuries of false beliefs and fears before the true child of God is revealed in each of us.

Jesus, by his resurrection, proved to all the world that life is deathless, that man's life is immortal; and he proved further that life is not in the body, else it would have been put to death when his body was put to death. Man is the image, the reflection, of God—Life; and though the material conception may be taken away, man will continue to express life eternal. Jesus said, "He that believeth in me, though he were dead, yet shall he live: and whosoever liveth and believeth in me shall never die." Paul said to the Romans, "And if Christ be in you, the body is dead because of sin; but the Spirit is life because of righteousness." Jesus said, "I am come that they might have life, and that they might have it more abundantly;" and again, "Verily, verily, I say unto you, He that heareth my word, and believeth on him that sent me, hath everlasting life, and shall not come into condemnation; but is passed from death unto life."

[Alfred Farlow in *Orangeville* (Ont.) *Banner*.]

Christian Science teaches that Jesus, through his death, resurrection, and ascension, demonstrated certain facts concerning the Science of being which are necessary to be understood in order that mortals may follow the Scriptural injunction, "Work out your own salvation;" and the plan of salvation involves—first, repentance, that is, the recognition that sin is wrong; second, the absolute abandonment of that which is discovered to be wrong, in order that sin may be eliminated from the life of the individual and he may attain to spiritual and Christlike manhood. Christian Science recognizes the truth of the Scriptural statement, "For all have sinned, and come short of the glory of God." All mortals are imperfect, and must, therefore, learn the way of righteousness and deport themselves accordingly, even to the extent of attaining to the full stature of manhood in Christ, putting off "the old man with his deeds," and putting on "the new man, which is renewed in knowledge after the image of him that created him."

Christian Science does not teach that man is a mindless creature, but that man is God's own image, an expression of the divine intelligence. Science recognizes that sin, though no part of the divine economy, and therefore only an imposition, must be detected and destroyed by Truth and righteousness.

We plead guilty to the fact that Christian Science does deny the existence of a personal devil, and we insist that there is no Scriptural authority for believing that the devil is a person or intelligence. Jesus said of him that because he "abode not in the truth, there is no truth in him. When he speaketh a lie, he speaketh of his own: for he is a liar, and the father of it." Here the Master plainly declares that Satan is a self-constituted lie, simply deception, that which never had any truth in it, which does not live in the truth, and whose offspring is a lie. Surely our critic will not attempt to declare that such a devil is a person or intelligence.

Christian Science teaches that it is impossible to escape the punishment due to wrong-doing, that even if there is no other punishment the mere fact that one has become entangled in sin and must therefore disentangle himself is punishment enough. Moreover, if one moves in a wrong course he is sure to find discord, but the moment he turns about and moves in the right direction he abandons the discord and finds harmony. This is the eternal law of God. Through Christian Science men find salvation from sin and all its consequences, not by merely believing, but by understanding the way of righteousness and walking therein. It is the teaching of Christian Science that Jesus demonstrated the fulness of God's way out of discord into harmony, out of earth into heaven, and that the mission of Christian Science is to help mortals to know how to follow in his footsteps and to do as he did, fulfilling his own words, "He that believeth on me, the works that I do shall he do also."

[J. V. Dittemore in *Brooklyn* (N. Y.) *Times*.]

Our critic says that "religious healing must take into consideration the laws and power of suggestion." This opinion cannot be based on the teachings of Scripture. The only unfailing and instantaneous system of healing which the world has ever known was that system which was demonstrated by Jesus Christ. His method was neither mesmeric nor based on any of the arbitrary and despotic manifestations of human will-power. Its potency lay in the Master's understanding of the omnipotence of God and the ever-present availability in human affairs of divine law when rightly understood. "Christian Science," says our critic, "denies substantial beliefs of Christianity." Christian Science does not deny anything except the man-made theology which was through superstition attached to the pure spiritual teachings of the great Wayshower. Christian Scientists believe so firmly in the teachings of Jesus Christ that they trust their health, happiness, and very lives to his teachings and to their demonstrable understanding of the divine law he elucidated. At this time the practice of Christian Science is but partly demonstrated, but its present results make it clear that as mortals put on more of that Mind "which was also in Christ Jesus" they will be able to prove more fully the truth of his promises.

The doctor says that Christian Science is not scientific because "it bars out the physician and the surgeon." This statement can scarcely be considered accurate, as Christian Scientists avail themselves of the services of a surgeon

Digitized by Google

whenever the necessity arises. They do not, however, employ physicians, because, after long experience with *materia medica* and later with Christian Science, they have demonstrated beyond all question the superior efficacy of Christian Science. No honest physician would agree with our critic when he calls the practice of medicine a science. That which is scientific is based on fixed and unchanging Principle and is always capable of exact proof and demonstration. On this basis the changing, speculative theories of medical practice cannot be considered scientific.

[Walter Sickels in *Independence* (Kan.) *Republican.*]

Christian Science is here to stay. It will survive any of its present-day traducers and is destined to supplant any existing religion that allows its creed to remain unrevised. Christian Scientists do not claim to know it all. New discoveries are being constantly made in the realm of thought, and the bright minds in Christian Science are in the front rank of these explorers in search of knowledge and the truth. Here are some of the symptoms of the early demise of Christian Science: More than a thousand prosperous organizations in the United States; somewhere throughout Christendom a new Christian Science church is being established at the rate of one every four days; it numbers new adherents by the hundred every week.

Christian Science churches are flourishing in every city in the land without making life miserable for the business men of a community through solicitation in myriad forms. It is a sad commentary upon the orthodox church that it cannot exist upon the free-will offerings of its membership. At the same hour that a critic was castigating his congregation for its lack of liberality toward the church, and its tendency to spend money for automobiles, the collection basket at the Christian Science church was being literally weighted down with the coined gratitude of a people who had obtained therefor value received. Practical proposition, isn't it? Is it any wonder people go after it?

In his preliminary prayer last Sunday night the Rev. —— asked for divine guidance that he might not say anything that would be uncharitable, offensive, or unkind, and then he reached for his hammer, leaving his hearers to conclude that the prayer was either perfunctory or inefficacious. Humanity in general is weary of doctrinal quibbling and man-made theology. Offhand, a person who never had heard of the Christian religion might declare its basic idea to be absurd, and then become a convert after investigation. The fact of the matter is that all religious belief is based entirely on faith—"the substance of things hoped for, the evidence of things not seen." From the writer's view-point Christian Science seems the most rational of all of the many beliefs, because at least a part of it can be demonstrated—can be proven. Without doubt every person who reads this has a friend, or knows of some one, who has been healed or helped by Christian Science. Should this work be stopped?

Were the writer a Christian Scientist he would not have undertaken this self-appointed task—bandying words with an orthodox preacher—but he objects to being classed as one having no intelligence, simply because he is inclined to think Mrs. Eddy's religious philosophy is as good as that championed by the reverend gentleman. If he doesn't like the Christian Scientists, let him down them with two cures to their one, and see how people will rush to join his church.

[Algernon Hervey-Bathurst in *Morning Post*, London.]

Christian Science teaches and proves sickness as well as sin to be the outcome of wrong thinking, the result of believing that evil is real or part of the divine economy. The one great cause or creator being infinite good. His creation must be likewise good; and since evil is not to be found in good, a change of mind or a knowledge of the truth, a more spiritual or scientific understanding of Him "with whom is no variableness, neither shadow of turning," heals the belief in the reality of sickness or sin. Physical health is, then, the outcome of a better understanding of that statement of the Master, "The kingdom of God is within you."

[James Phelps in *Appleton* (Wis.) *Post.*]

The reluctance of ministers of the gospel of Jesus Christ to believe in the availability of divine power in healing the sick, is simply amazing. His healing works were cited by the Master when that momentous question was put to him by the disciples of John the Baptist: "Art thou he that should come? or look we for another?" The ability to heal as the Master healed was given as one of the tests of the sincerity of true believers: "These signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover." Much of the Master's time was taken up in healing the sick. His instructions to his disciples were: "Preach the gospel;" "heal the sick, cleanse the lepers, raise the dead." He said, "Believe me for the very works' sake;" again, "The works that I do shall he do also; and greater works than these shall he do; because I go unto my Father;" "Ye shall know the truth, and the truth shall make you free." Many more promises along the same line could be cited.

Now the question is, How did he do these works, and are we, his professed followers, to follow in his footsteps as nearly as possible or invent ways of our own? The good Book says: "There is none other name under heaven given among men, whereby we must be saved." Evidently, then, we are to seek out and follow his way. He said of his method: "The Father that dwelleth in me, he doeth the works;" "It is the spirit that quickeneth; the flesh profiteth nothing." St. Paul admonishes us, "Let this mind be in you, which was also in Christ Jesus." That Jesus healed the sick through divine Mind, and that he used no drugs, herbs, or other material remedies, I believe will be conceded. So, too, the healing of disease in Christian Science is the result or outward showing of spiritual healing which takes place in the consciousness of the patient, regenerating, reforming, renewing, and reestablishing him in the image and likeness of his creator.

Have we any evidence of the reality of matter except the testimony of the physical senses? Have these senses not been proven to be deceivers, times without number? The Christian religion cannot be safely founded on the testimony of the physical senses. If their testimony is true, immortality is a myth. The great Shakespeare and St. Peter both discerned that matter was "the stuff that dreams are made of." Had not Christ Jesus known the unreality of matter could he have raised the dead, stilled the tempest, passed through closed doors, raised himself from the dead, and achieved the ascension? Never.

[Gray Montgomery in *Pueblo* (Col.) *Star-Journal.*]

More than a million who have been lifted from beds of pain, loosened from bonds of sin and misery, would take issue with our critic's denouncement; would gladly and gratefully testify to physical, mental, and moral benefits received. The many who are daily blessed, comforted, and healed through its ministrations, are swelling the chorus of grateful ones who have harvested its fruit of good.

Digitized by Google

They have become convinced by irrefutable proofs that Christian Science is of God. It is bringing into their lives a greater faith, a higher understanding of God, a dearer and closer dependence upon the Father. It is awakening them from fear, bondage to sin in its myriad forms, and teaching them to rely on God for their every need. They have learned to know God as infinite, divine, all-tender Love, and they are persuaded with the apostle that "neither death, nor life, nor angels, nor principalities, nor powers, nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate us from the love of God, which is in Christ Jesus our Lord." They are therefore confident that no condemnation can hinder the establishment and progress of this sacred religion, this Science of Christianity.

[Frederick Dixon in *Guernsey* (Eng.) *Star.*]

Among other subjects our critic plunges lightly into an attack on the Christian Science teaching of the atonement. Quite apart from the fact that it is manifest that he does not understand the teaching of Christian Science on this subject in the very least, he talks as if orthodox Christianity were agreed on it. He says that this doctrine "means one thing to a Christian and another to a Scientist." On which side does he rank the vice-principal of the Theological College at Lichfield, who declares that the Miltonic view, besides "offending one's moral sense," "logically and rapidly leads us to undiluted Arianism;" and then proceeds to discuss what he terms "four typical modern theories of the atonement" as a prelude to developing a fifth one of his own. When the orthodox critics of Christian Science can agree among themselves what the correct teaching of the atonement really is, Christian Scientists may be expected to discuss their view with them. Until then it is scarcely profitable.

It is simply childish to maintain that the Christian Science church (which in forty years has wound itself round the entire globe, so that today its meetings are held northward in Christiania and Stockholm; southward in the Transvaal and Australia; eastward along the Persian Gulf and the Chinese littoral; and westward on the Pacific slope) is a profitable heresy, founded on blasphemous nonsense, promulgated through shallow magazine articles, written by fools for fools. Yet that is the gentleman's description in his own words.

To the ordinary man, puzzled by the riddles of physical existence, Christian Science is sooner or later presented. He may be sympathetic, he may be antagonistic, or he may be as indifferent as a Laodicean, but he has before him a phenomenon which is arresting the attention of the civilized world, and, if he is wise, he will put it aside and say nothing, or he will investigate it. If he decides upon investigation, it will entail the effort, not merely to master the theory, but to demonstrate it. He will find that he is being led not to the study of disease, but to the study of health; not to the dissection of evil, but to the realization of good. He will find that he is incessantly striving to put off the old man and to put on the new; in other words, that, as Mrs. Eddy says, "in order to cure his patient, the metaphysician must first cast moral evils out of himself and thus attain the spiritual freedom which will enable him to cast physical evils out of his patient" (Science and Health, p. 366). If he will do this patiently and humbly, he will find the secret of healing in Christian Science, and there will open before him "the wide horizon's grander view."

Humility grows best in a soil of self-examination. The mote in thy brother's eye will be seen to be small if the beam in thine own eye, magnified by its own divergent rays and casting its evil shadow on all about, be first removed.—FRANH P. EBERMAN.

AMONG THE CHURCHES.

EXCELSIOR, MINN.

On Sunday, May 23, the members and friends of First Church of Christ, Scientist, Excelsior, held their first service in their new church home. The usual order of exercises was observed, with the addition of the reading of several telegrams, which brought words of cheer and encouragement from the sister churches in Minneapolis.

Divine Love has been trusted, and the human need met in the securing and remodeling of this building, which is situated on one of the finest lots in the village and overlooks beautiful Lake Minnetonka. The first floor has been converted into a commodious audience-room, which will meet the needs of the congregation until growth demands a church edifice.—*Correspondence.*

SAN DIEGO, CAL.

Plans have been completed and construction will be started in the immediate future upon a beautiful new house of worship for First Church of Christ, Scientist. The site, which has been given to the church corporation by John S. Hawley, is on the southwest corner of Second and Laurel streets and the church will face on Second street. The lot is one hundred and fifty feet on Second and one hundred on Laurel, and is valued at eight thousand dollars. The design for the church provides for an edifice combining all the beauties and dignity of the old mission style with the added touches of grace and airy spaciousness which are distinctively American—in a word, the new building will be a "Spanish-Californian." The length of the building is one hundred and thirty-six feet and its breadth eighty feet.

Reinforced concrete will be the material used in construction of the whole building, including the flooring, and all the work will be done by day labor, under the personal direction of the donor of the lot, who is also the buyer of the old church lot and building, for which he paid twenty thousand dollars outright. The new building will cost approximately $50,000, and will be finished late in the winter or very early in the spring. It is expected by the church officials that by that time the total cost of construction will be met and that there will be no delay before the dedication.

The need for a greatly enlarged structure is very pressing, the present house of worship at Third and Ash being far from adequate in size to accommodate the numbers who try to gain admission to every service. At the Sunday services every seat is taken, the vestibule is filled, and many are seated on the Readers' platform, while on Wednesday night large numbers are sometimes left standing in the street.—*San Diego Union.*

CORRECTION.

The item in the *Sentinel* of June 26, copied from another paper, concerning the land recently purchased by First Church of Christ, Scientist, in Cambridge, Mass., was incomplete. In addition to the Simmons estate the plot includes two adjoining estates, and its total area is twenty thousand two hundred and ninety-eight square feet, with a frontage of about one hundred and twenty-nine feet. The purchase price was twenty-seven thousand dollars.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

DEDICATION OF CHURCH IN LONDON.

THE following letter from Mrs. Eddy to First Church of Christ, Scientist, in London, was in response to the two letters which follow it on this page. Our English brethren deserve great credit for their loyalty and activity:—

Chestnut Hill, Mass., June 26, 1909.

First Church of Christ, Scientist, London, England.

Beloved Students and Brethren:—Your letters of May 1, and June 19, informing me of the dedication of your magnificent church edifice, have been received with many thanks to you, and great gratitude to our one Father.

May God grant not only the continuance of His favors, but their abundant and ripened fruit.

I am as ever,

Lovingly yours,
MARY BAKER EDDY.

London, S. W., England, May 1, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—At a special meeting of the members of this church, on April 26, it was unanimously resolved that a letter should be sent to you, informing you of the fact that we are looking forward to dedicating our church on June 13 next.

The whole of our liabilities, amounting to upward of eighty thousand pounds (approximately four hundred thousand dollars), have been met, and the church stands on its own freehold site in one of the most convenient positions in London. Our aim throughout has been to keep to the key-note of simplicity and dignity, to accommodate as many as possible within the limits of our space, and to arrange that all should be able to see and hear to the best advantage. All the Christian Science churches in London, and other Christian Science churches in the United Kingdom, have generously contributed to our building fund.

The meeting on April 26 had been called for the purpose of taking up a collection to enable us to pay off the sum still remaining as a liability on the land, but at the commencement of the meeting the treasurer was able to announce that the sum was already in hand, and that he had that day paid off the last instalment. The members then decided that a practical expression of our thankfulness to God could take no better form than in a gift to the publishing house, so a collection amounting to £1417-13-4 (approximately seven thousand dollars) was taken at the meeting, and it was also resolved that the collection at the dedication service should be devoted to the same purpose.

We would like to say that during these past years, while we have been building our church, we have learned many and lasting lessons in patience, humility, and self-abnegation. Experience has shown us how we have lengthened our own road, how mistakes have had to be corrected, and how self-will had to be silenced; but the thought that we were working for our Cause and for our Leader, and not from any selfish motive, has always sustained us, and divine Love has led us in wonderful ways.

Your message to us at the laying of the corner-stone has been our constant inspiration, and this and your other writings on the subject have helped us to understand more and more what "church" in Christian Science really means. Our unceasing prayer will be that this understanding may continue to unfold in us and be manifested through us, and we realize profoundly that only as we are unswervingly faithful to the teachings of Christian Science and to its Discoverer, can we attain to and hold fast our ideal.

Gratefully and lovingly,
For the Board of Directors,
MABEL S. THOMSON, *President.*

London, S. W., England, June 19, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—I am instructed by the board of directors of First Church of Christ, Scientist, London, to inform you that the services on Sunday, June 13, were observed as the dedication service of this church. The order of service was as usual, with the addition of a short account of the steps which had led up to this point in the establishment of Christian Science in London. The congregation at both services was very large, and included many members of other branch churches and societies in the United Kingdom.

With loving gratitude, I am

Very sincerely yours,
On behalf of the Board of Directors,
W. S. MONTGOMERY SMITH, *Clerk.*

A NEW BY-LAW.

ARTICLE XXVII.

CLASS TEACHING.—SECT. 5. Members of The Mother Church who are authorized by its by-laws to teach Christian Science, shall not solicit, or cause or permit others to solicit, pupils for their classes. No member of this church shall advise against class instruction.

Teachers of Christian Science must have the necessary moral and spiritual qualifications to elucidate the Principle and rule of Christian Science, through the higher meaning of the Scriptures. "The less the teacher personally controls other minds, and the more he trusts them to the divine Truth and Love, the better it will be for both teacher and student" (Retrospection and Introspection, p. 84).

"CONSISTENCY, THOU ART A JEWEL."

SOME of the statements about Christian Scientists which are to be found in newspapers of the sensational school, would be entitled to a place in the "funny column" were it not that they deal with serious subjects. A case in point is the newspaper account of the passing away of a man who, according to the head-lines, "Tried Their Treatment After Doctor Had Given Him Up."

After giving the name and address of the physician who as long ago as last February pronounced the case incurable, the statement is made that the patient then turned to Christian Science. According to a member of his family, the patient was temporarily benefited by the treatment, but the reporter naively concludes his story thus: "The police of the —— station have made no arrests."

Just why the police should arrest any one is somewhat puzzling to the ordinary reader. If the case was incurable, as diagnosed by the physician, certainly the Christian Scientist was not to blame for the patient's death; and if it was not incurable (the only ground upon which the Scientist could be held at fault), then the physician was mistaken in his diagnosis and was also to blame. Perhaps it was the expectation of the reporter that both the physician and the Christian Scientist would be arrested, because the latter could not be blamed unless the former was guilty of having made a wrong diagnosis.

The question of arrests—the who and the why—may

Digitized by Google

have been very clear to the reporter, but it could not be otherwise than hazy to his readers who attempted to be logical. It may be, however, that we are on the wrong track entirely, and that the arrests which the police had not made at the time of our contemporary's going to press were not to be of the physician and the Christian Scientist, but of some person connected with the coroner's office, for the reporter says that this official's office was notified at eight o'clock and "up to noon the coroner's physician had not arrived on the scene."

May be, after all, the best explanation is this, that the reporter felt it was necessary to talk of arresting somebody, in order to be sensational, and wrote his story accordingly.

ARCHIBALD MCLELLAN.

THE RETURNS OF GRATITUDE.

WHATEVER else we may or may not be able to give in appreciative recognition of benefits received, the meed of gratitude is always at our command, and is sure to bring joy to our benefactor's heart. When spontaneous and sincere, its expression is sure to bring satisfaction to all who have befriended us.

The guerdons of gratitude include very much more than this, however, for they sum up all that comes by way of return to the grateful heart, and to measure their riches is to taste life's sweetest joys. The mere mention of this gain leads one to think of the happiness which is inseparably linked to a sense of thankfulness. Gratitude and gladness have ever dwelt in holy wedlock, and the more constant our companionship with the one, the more certainly do we possess the other. Hand in hand they go singing through the corridors of the heart, and their sweet roundelays fill all the place with song.

We are all quite alike in that we cannot help wanting to be happy, and if we would fill our "garden of gladness" with the fairest and sweetest blossoms, we shall accomplish it never so surely as when we plant and nourish the seeds of gratitude. The desire for human happiness often has a strong flavor of that sense of self-gratification which ends in its own surfeit, but genuine thankfulness yields a joy that is unfailing, and for the reason that it impels to love. The grateful heart is a perennial fountain of affection. This is the larger, more significant gain of gratitude, for it gently leads to all those kindly, unselfish doings that make our lives worth while to others and that most truly register an appreciation of our own blessings. Upon every plane of life, he who loves much most fittingly evidences his remembrance of all that has been done for him. Thus he honors and fulfils the two great commandments and insures for himself a continuous return of good.

The pleasure which attends the celebration of "the glorious Fourth," and kindred memorial days in other lands, together with the spirit of patriotism which leads to noble deeds and the larger human helpfulness,—these all pertain to him who cherishes a grateful appreciation of his country and of those who have hazarded their all for its good. The noise and declamation of a national holiday are but a foolish pretense if they do not express gratitude for the authors of the nation's great events, and if there is not a corresponding devotion to the advance of the nation's noblest ideals. Genuine patriotism always expresses that love of country and of mankind which springs out of a sense of indebtedness to unselfish forbears.

All this has special significance to every true Christian Scientist, and for the reason that multiplied freedoms of personal consciousness, and unnumbered overcomings in life's experience, have begotten in him a livelier and more impelling sense of his indebtedness to divine Love, to the great Wayshower, and to her through whose long-time devotion to the statement and demonstration of Truth's healing ministry his choicest blessings have come. Moreover, he not only has myriad occasions for gratitude, and can "rejoice in secret beauty and bounty, hidden from the world, but known to God" (Science and Health, p. 15), but he has learned the world-conquering power of that divine love to which gratitude opens the door. He knows that as Christian Scientists "wait, and love more for every hate" (Miscellaneous Writings, p. 389), all their darkness is dispelled, their sickness healed, their problems solved. They have learned that Love is the lever and Truth the fulcrum by which alone the human race is to be lifted into light, hence for them the spirit of gratitude can but brighten every face and temper every word and deed.

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Minneapolis, Minn., June 12, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Teacher and Leader:—A note from Mr. Dittemore tells me of my reappointment as a member of the board of lectureship. I know this could not be without your knowledge and approval, so I am writing now to thank you for entrusting me again with this part of the work. More and more the deep sacredness of this position is impressed upon me, and I long and pray and strive for more perfect preparation for the task. Since God has called me to this place, surely He will and does provide the needed equipment in every way. I am deeply grateful to you, dearest friend and guide, for your recent messages, through the *Christian Science Sentinel*, concerning the church affairs and teaching. Your counsel comes just when we need it most.

Gratefully and lovingly your student,

MARY BROOKINS.

St. Joseph, Mo., May 25, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—It is nineteen years since I first heard about Christian Science. Eighteen years of that time I never lost an opportunity to say unkind words about you and what I thought Christian Science to be; but Jesus said, "Ye shall know the truth, and the truth shall make you free," and I am now very grateful to you for your untiring efforts, for it is through your teachings that I am able to say that the truth has made me free. During the last year I have been drinking at the open fount, and although I feel my journey is scarcely begun, the way grows brighter each day. To me, Science and Health has truly been a "Key to the Scriptures." It has caused me to study and reverence the Bible as never before. Again I wish to express my gratitude for your teachings, and for what Christian Science is doing for me every day. May God continue to bless you and your efforts.

Yours lovingly,

FRANK CHANEY.

Savin Hill, Mass., June 10, 1909.

Dear Mrs. Eddy:—Truth has been revealed to us, a family of four, through the healing of our son. For many years we vainly sought to heal matter with matter, till Christian Science taught us to seek the fountain-head, Spirit, and with a renewal of the mind, health, happiness, and every good thing follows. To you we owe the disclosure of this light, and as this sunshine of Life unfolds the petals of right thinking and healthy living, a fragrance of love and gratitude arises which I cannot refrain from wafting to you.

An honest seeker of "the way,"

JEANIE W. ROBBINS.

Digitized by Google

Falmouth, Jamaica, B. W. I., June 7, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Our grateful hearts prompt a message to you this morning, wafted on the wings of love and gratitude from this little isle of the sea. Truly thy mission is heaven-born, and thou art blest indeed! It is only four months since we became acquainted with your inspired teaching, the rediscovery of the religion the Master taught, and your noble heart will rejoice to know that we have benefited spiritually and physically. Our gratitude to you for this sense of freedom into which you have led us,—out of the bondage of old beliefs, into the glorious liberty of the sons of God,—is not easily expressed. Daily we lift our hearts in silent thanksgiving to God and His Christ for having given you to us. Our earnest desire is to know more of Truth and to let our lives attest our loyalty.

Gratefully, lovingly yours,

LAWRENCE and MAUDE ADDISON.

St. Louis, Mo., June 9, 1909.

Beloved Leader:—Mere words are inadequate to express the love, reverence, and gratitude that I feel toward you for your loving-kindness and tender patience toward human consciousness, which has enabled you to reveal the truth and set free the slaves of false belief. Christian Science is indeed the Comforter which shall lead them into all truth. The full recognition of your unceasing endeavor and selflessness to impart this light is far beyond my comprehension. I have more to thank you for than I could mention here. My dearest ambition is to demonstrate by daily living that life which you have opened to my consciousness, by devoting my young manhood and future to this great Cause, and by laying my "earthly all upon the altar of divine Science" in taking up its practice, I hope to prove my appreciation of Christian Science. Your immunity from the attacks of error of every sort has again been demonstrated; His truth is indeed thy shield.

Lovingly, obediently yours,

LYNN LLOYD ROWAN.

Darlington, England, June 2, 1909.

Beloved Leader:—Often have I felt I would like to pen a few words of love and gratitude to you for the blessings I have received—health, happiness, heaven. As I understand more of your life I get clearer glimpses of Truth, more spirituality, and a steady determination to stand for Christian Science. Recently I received a letter from a German Hebrew lady, with whom I came in contact in Germany, and she said she saw so clearly that Christian Science must be the truth of Christianity, and that the lives of Christian Scientists come nearest to her idea of what the Christ ought to be. A Quaker gentleman called at our home yesterday, and when we showed him a copy of the *Monitor* he thought it such an excellent idea of yours to begin to purify the newspapers of the world, and said that there was need for such a paper in these parts.

With true love and loyalty, in which my husband joins,

MAUD MARY JENNINGS.

Oak Park, Ill., June 20, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—My heart goes out in thanks to you this peaceful morning, for your noble work for this turbulent world; also for the amended by-law given May 22. To me it is a clarion call for each of us, your followers, to keep strictly the Golden Rule, to mind our own business,—serving God. In your "Miscellaneous Writings" (p. 156) you tell us how to acquire "solid Christian Science." For the *Monitor*, a paper to place daily before my young boys, what shall I say? Another need has been met through your purity and faithful courage. No words can express my gratitude for what Christian Science has done and is doing daily for me. May I live close to the Bible, and to all your writings.

With loving gratitude,

MRS. MARY WOOD GRIFFITHS.

Des Moines, Ia., June 17, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dearly Beloved Leader:—My heart has been singing songs of thanksgiving to you continually this last few days for the freedom and peace which is mine through my meager understanding of this healing truth; also for your last message to the world, with its blessed assurance that there are no trials or crosses when we realize that these things only "work together for good" to our Cause, and to us individually. The fruits of your experience have always blessed and will continue to bless us with a diviner conception of its meaning. The value of our ***Monitor*** grows with each day, and I thank you more and more for it as I gain clearer insight into its great worth in convincing the world of the all-power of good.

Ever lovingly yours,

CORA P. HILL.

Santa Barbara, Cal., June 9, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—May I express to you my deep satisfaction in reading your pointed and concise statement on "Class Teaching," in the *Sentinel* of May 29. This strongly emphasizes the following, from page 461 of Science and Health: "Systematic teaching and the student's spiritual growth and experience in practice are requisite for a thorough comprehension of Christian Science." Class teaching in accord with the ethics of Christian Science (*Ibid.*, pp. 445, 454), and an honest practice thereof, will bring comfort to those who are seeking the truth.

With loving appreciation of your great service for all mankind, I remain Faithfully yours,

EDWARD W. DICKEY.

Muskogee, Okla., June 7, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Dearest Leader:—We, the members of the joint board of directors and trustees of First Church of Christ, Scientist, Muskogee, Okla., assembled in regular business meeting, desire to express to you our love and loyalty for what you have given us and are still striving to teach us. We know you are chosen of God to present the truth to this age. We wish also to tell you that the Cause is growing here and much good work is being done in our midst in the healing of both sickness and sin. We are grateful to you for teaching us the way, even though to the material senses it be a thorny road. Lovingly yours,

BOARD OF DIRECTORS AND TRUSTEES.

New York, N. Y., June 9, 1909.

Mrs. Mary Baker Eddy, Box G, Brookline, Mass.

Beloved Leader:—Today I have again reason to be grateful to God, that is, especially so, having again proved the truth of this passage from Science and Health, "Divine Love always has met and always will meet every human need," and thereby added another to the long list of blessings I have received through Christian Science. I thank you, dear Leader, for your unceasing labor for mankind.

With love and gratitude,

Your student's student's student,

AUGUST KAHN.

THE LECTURES.

BLACKPOOL, ENGLAND.

Christian Science certainly seems to have aroused a great deal of interest in Blackpool, judging from the attendance at the lecture given in the Victoria Hall of the Winter Gardens on Friday evening [April 30]. The place was crowded to the doors. Many, no doubt, were there out of mere curiosity, but the applause which followed some of the utterances by the speaker, plainly showed that there were a good many there who were at least sympathetic toward the new belief. The Rev. B. R. Hawker, M.A., Liverpool —an ex-Church of England clergyman—took the chair, and he made ready the minds of the audience for further miracles by relating the story of his own cure. Some time ago, he said, he was told that he had but a short time to live; and after receiving that hopeless news, the little strength he had seemed to vanish altogether. Soon afterward he received a letter from a friend, who asked him —as no hope had been held out to him elsewhere—if he would consult a Christian Scientist, and at the same time he gave the name and address of a practitioner in London. Well, he did so; and what he was told then created in his mind, which was well prepared for it, a very great conviction. Within a fortnight he had gained a stone in weight; and since that time he had steadily regained his strength.—*Gazette-News.*

ST. PAUL, MINN.

Clarence C. Eaton lectured in the Auditorium May 9, on the subject of Christian Science. He was introduced by Col. James H. Davidson, who said in part,—

Nearly two thousand years ago a mysterious being appeared on earth. He wrought miracles,—he opened blind eyes, unstopped deaf ears, made the lame to leap for joy, cleansed lepers, raised the dead to life; he was the Son of God. The whole faith of the Christian world rests on these facts. It is the corner-stone of Christian faith. The Christian world has professed to believe in the divine Master and that marvelous record of the Saviour's miracles. This belief is wrought into every church creed,—the apostles' creed, which is recited in unison in nearly every church in Christendom on Sunday morning,—and it is taught at every altar. It is the foundation stone on which Christianity builded.

In the past four decades a few people—"common people"—have revived the ancient faith. They proclaim that Christ Jesus meant what he said, and that his witness is true. The Christian world and the medical world scoff, and write jokes, and perpetrate witticisms, at the expense of "absent treatment," etc. They refuse to believe that the promises of Christ are to be taken literally and acted upon, and accepted as true. To many it seems "foolishness," but other children of men have been made glad, have stopped their crying and wiped away their tears, and have been healed of various diseases. A new faith has been kindled—or an old one revived—in the hearts of suffering humanity. Tears have been dried, broken hearts made whole, lives made better, and like leaven it is working through the Christian churches. Multitudes are now ready to listen to this wondrous story of love and faith, and they say earnestly, "Show us." That is why many of us, not in this faith, are here today. Men learned in the Scriptures, taught by tests in their own souls and physical bodies, and in the lives of others who have sent out the voiceless cry of utmost need, and have felt the answer with love and faith, bear witness to marvelous things wrought by infinite good. They do not ask you to accept their testimony, but to put yourself in harmony with the universal good. Test it in your own lives. That seems a simple and reasonable proposition, does it not?

I am not authorized or qualified to speak for Christian Science. I would not presume to explain anything about it. I do not consider myself competent to do so. As I understand, Christian Science asks no favors, begs no patronage, offers no apologies; but it says to all the world, to doubters and unbelievers, to suffering and unhappy humanity everywhere, Test this simple faith. Put yourselves in the attitude to receive these great truths. Try them in your own lives, and accept or reject them by their fruits, by actual knowledge within your own souls.

Correspondence.

MILWAUKEE, WIS.

First Church of Christ, Scientist, was packed to the doors on Tuesday evening [May 18] on the occasion of a lecture on Christian Science by the Rev. William P. McKenzie of Cambridge, Mass. The lecturer was introduced by F. G. Underwood, First Reader of the church, who spoke in part as follows:—

It may not be out of place to refer briefly to the ethics of Christian Science effort and accomplishment. Less than fifty years ago there was but one Christian Scientist on earth, and today in looking back we realize that only a faith and courage born of God could have enabled our beloved Leader to have brought this truth forward to where it is now so wonderfully blessing all mankind. It proves the power there is in one unswerving right idea, that in these few years there could be established a mighty religious movement, based solely on works, resulting from a demonstrable faith and understanding of God.

The Christian Scientists are enlisted to prove the allness of God, good, and the powerlessness of evil. With meekness and humility we as Christian Scientists are striving to attend to our Master's business, in obeying his command to love God, and our brother, which necessarily includes our friendly consideration, and this must bring with it our loving respect for the thoughts of even those who seem to be opposed to this truth. This is what all true Christian Scientists are striving to do, and must do, or we fall. That we have been partially successful, the garners that are filled with the harvest will bear testimony.

Evening Wisconsin.

GREEN BAY, WIS.

Bicknell Young of Chicago delivered a lecture on Christian Science last evening [May 14] at First Church of Christ, Scientist, the church being filled to its capacity with an interested audience. The speaker was introduced by the First Reader of the church, W. K. Bartels, who said in part,—

From the lecture of the evening you will learn something of the teachings, something of the practice and Principle of this great truth, which is feeding the hungry, giving living waters to the thirsty, healing the sick, and restoring man to his real spiritual being.

Green Bay Gazette.

TESTIMONIES OF HEALING.

Today marks my thirteenth birthday of freedom from fear and disease of many years' standing. Thirteen years ago I walked for the first time into the house of a Christian Science practitioner, loaded down with disease beliefs, among which were stomach and rheumatic trouble, from which ailments I had suffered for thirty years. I also had a bladder trouble for ten years, etc. I had been treated by many doctors in various places, from the Atlantic to the Pacific, but had received no permanent help. As each year passed by I kept getting lower in the scale of health, until the last two doctors I consulted told me there was no help for me. One of them said that medicine would do me no good, and advised me not to take any more.

At this time, when I was looking for death to relieve me of all this suffering, a friend came into my store and spoke to me about Christian Science, telling me how his wife had been helped. I never had heard much about it, but I became interested, and as the doctors held out no hope to me, I resolved to try Christian Science. This friend told me the address of the practitioner by whom his wife had been treated, and about two o'clock that afternoon I walked into her house. I talked with the lady, and was given a Christian Science treatment. The result was that in less than an hour I left that house a well man! The healing was instantaneous, but I had been sickly so many years that I could not fully realize I was healed for about three days, when I began to see that there was no return of these troubles. I felt so light and happy and free; then I became conscious that I was a well man, and on the third day after visiting the practitioner it seemed as if I could not get home quickly enough to gather up all the pills, powders, plasters, etc., that lined my room and get them into the ash-barrel. In the thirteen years since the day of my healing I have had some trials and temptations, but they have only made me cling closer to the truth, as I understand it from reading our text-book, "Science and Health with Key to the Scriptures" by our beloved Leader, Mrs. Eddy. This precious volume is my daily companion, and I am striving to live closer and closer to the truth it teaches, as the understanding comes to me. Words are feeble to express the joy I feel each day for my knowledge of this great truth. Although beset many times by mortal error, I know with the psalmist that "the Lord is my shepherd; I shall not want," and in Him will I trust.—C. R. DALTON, San Francisco, Cal.

For over three years I have been a student of Christian Science, and am now a firm believer in its teachings. I therefore wish to tell of some of the blessings that have come to me through this wonderful truth, for I have had many proofs of its power to heal. I had been a semi-invalid since a girl of sixteen, when I had a fall which I was told afterward was the cause of my ill health. I had a stomach trouble (from which I was never entirely free until I came into Science), and continued to grow worse until I had to decide between certain invalidism and an operation. I finally consented to the latter, but not until I had prayed over it and believed it was God's will. The woman physician under whose care I then was, was my dearest friend, and had done all that a skilled physician and devoted friend could do to find the remedy or cure for my condition. At times I was somewhat relieved, thanks to her love and faithfulness, but never well.

I went to a New York hospital and had an abdominal operation performed, which was practically four operations in one. For eight years I had had headache, and hoped the operation would at least relieve that, but it did not. The stomach trouble was relieved, but it returned at intervals afterward, and I was far from being a well woman. A year and a half after the operation I broke down again, and was ill in bed for nearly five months. The autumn following this year I tried osteopathy for six months. This did me no permanent good, and I gave it up on the advice of the osteopath, who said the treatment was too severe for me at that time. For the first time in the twenty-four years of ill health I was utterly discouraged, because I had everything to live for and a child who needed the care which I was not able to give him.

Another dear friend, who had taken care of me during my last illness, had a Christian Science friend in whom she had great confidence, and she urged me to allow the Scientist to come and talk with me. I refused at first, but finally consented, to please my friend. The Scientist came, and I was impressed with what she said, although I did not understand it. I was daily growing worse, so finally decided to be treated in Christian Science, but not until I had read Science and Health and felt quite sure of its spiritual teaching. I did not receive any marked help at first, but began to gain gradually, and one condition, which had baffled all the various physicians I had had, was relieved, and has continued to improve until I am now nearly free from it. I commenced to attend church as soon as I was able, and have been a regular attendant ever since. The Scientist who started me in this way was not a regular practitioner, but I was helped under her work and I can never forget the spiritual help and love she manifested to me.

My healing has been very gradual, but during this time I have had many acute conditions overcome. On one occasion I received an injury to my side. I suffered intensely, and my old trouble started up, so that I was unable to retain any food, and I also had great pain in my side. I telephoned for help, and after a distressing night sent for the practitioner to come to the house, which she did and stayed with me for about six hours, when I fell asleep. When I awakened I was better, and the vomiting had ceased entirely. The following day my physician friend came to see me, and asked if she might examine my side. On a close examination she reported a severe injury to a ligament. Christian Science treatment was kept up and I grew steadily better. On the third day all the pain had gone, but not the lump or soreness. On the fourth day I dressed as usual and was able to take my regular food. The physician said no medicine could have helped me like that in so short a time. Another instance where the truth freed me, was when I went to New York to see this same medical friend. She inquired as to my condition, and I told her of an affection with which I was then suffering. She said that the condition would in all probability give me some trouble. When I returned home, I telephoned the practitioner, and the trouble was very quickly overcome, the swelling, which had been very painful, also disappearing. At another time I had what seemed like the rupture of a blood-vessel, and that was overcome at once.

There are many other instances of help received from this great healing Principle of which I might tell, but will not take the space. Although I am not yet entirely free, I am practically a well woman and able to do all that is necessary. I have also gained in weight, and am said to be a picture of health. I am more thankful than words can express for all these blessings, and my prayer is that I may know more of this regenerating truth and demonstrate it daily.—FLORENCE H. GEARY, Orange, N. J.

Although but a babe in Christian Science, my growth has been rapid and fruitful. A little more than a year ago I first became interested enough in Science to attend the

Digitized by Google

services and read in a desultory way Science and Health and the Lesson-Sermons. At that time I was suffering from more than one bodily ailment for which I was under the care of a physician, and although I believed in a way in the wonderful power of Christian Science, so far as others were concerned, I had no desire to try it for myself.

After many months of medical treatment, in which I was very little improved, I decided to try a Christian Science practitioner. I did so, and in two weeks' treatment I was completely healed of a disease from which I had suffered intensely for seven years. During that same period I had worn glasses to correct so-called hereditary eye trouble, and this was also healed in a few treatments. Since a small child I have been a victim of acute attacks of throat trouble, which invariably meant days and sometimes a week in bed each month, until a condition had arisen which my physician pronounced tubercular, and he said that it was incurable; but this also has disappeared.

The spiritual understanding which I have gained through the study of Science and Health and the Bible Lessons has been very wonderful and uplifting to me. I now realize man's birthright and his unity with God, and I strive each day to gain more of that peace "which passeth all understanding." For these, to me, very wonderful demonstrations I am most grateful.—MAY TERRY, Denver, Col.

I wish to give a testimony to the healing power of Christian Science, with the hope that it may be of benefit to others. For seven years I was a nurse in one of the largest English hospitals. I had taken up the life largely with the idea of helping mankind, and four years ago came to America for rest and change, being worn out mentally and physically with the hopelessness of the task. One could do so little, and sin, disease, and death seemed so real and so powerful. I had heard of Christian Science, but knew very little about it, except that in some way it taught the supremacy of mind over matter—a proposition which to me seemed quite tenable, having often seen it proven in the so-called functional diseases about which we know so little. Soon after I came to this country several cases of healing in Christian Science came under my observation, cases which could not possibly be called functional. This experience led me to a study of the wonderful truth which Mrs. Eddy has given to the world, and I realized that the healing of disease was naturally one of the signs which follow its understanding. Since then Christian Science has done very much for me.

Recently I had yet further proof of the allness of Truth and the nothingness of error. We are living in the country, and had started to spend my little daughter's first birthday with her grandmother in Minneapolis. Baby had always been very healthy, and to my surprise, when we reached the trolley-car after a short drive, she began to be violently ill. As it would have taken us as long to return home as to go to town, and as my sister-in-law, who is a Scientist, was with me, I decided to go on. We both declared the truth, but the child seemed to get rapidly worse, the conditions becoming very alarming. When we reached the outskirts of town, we left the trolley to telephone to a Christian Science practitioner. While waiting for a carriage to continue our journey, the little girl manifested signs of collapse. I have, I may say, seen thousands of sick children in my life, and never one who seemed to mortal sense more dangerously ill.

Once on that drive, when I looked at her, a terrible fear took possession of me; but almost instantly I remembered that "perfect love casteth out fear," and that we were in the presence of the ever-conscious Mind that knows only life, and fear left me entirely. From that moment the little girl began to improve; soon after we reached the house the practitioner arrived, and in less than two hours baby was her own merry little self and ready to take her food. Then, in spite of the wonderful proof of healing I had just seen, I hesitated about giving her the ordinary food. In the hospital a child who had been as sick as she had seemed to be would require careful feeding for months, but the Scientist said to give her her food, and I did. She took it with appetite, and there was no after effect. That same evening the child was downstairs, and no one who called could see that she had been sick at all.

I have no words to express my gratitude to Mrs. Eddy for this knowledge and application of the truth which she has made possible for mankind.

EDITH CHUTE, Minneapolis, Minn.

I had suffered for many years with several diseases which medicine did not cure, although my husband, who was a physician and had served as a surgeon during the Civil War, gave me his best efforts, besides calling to his aid in the case the best medical advice obtainable. Finally one of my fingers became diseased with what was pronounced a malignant affection, necessitating the removal of the bone. About this time our daughter was healed in Christian Science of a paralytic trouble which affects piano students, and she called my attention to this Science. I applied to this source for help, and had two treatments for the finger, not mentioning any other trouble. To my amazement, all of the old complaints also disappeared with these treatments. No language can express my thankfulness. I often feel grateful that I did not live a hundred years ago—before Christian Science was revealed.

SARAH R. WOODS, Cottage Grove, Ore.

I am very grateful for what Christian Science has done and is doing for me and my family every day. I have had so many blessings from this truth that I would like to relate some of them in thankfulness to our heavenly Father, the one great and only power. One night, about two months ago, I was awakened by a sense of severe pain, and I could swallow only with great difficulty. I had suffered in this way at different times before coming into Christian Science, the attack usually lasting several days under a physician's treatment, and then the throat had nearly always been lanced. When morning dawned I arose, and as soon as possible I sent to a Christian Science practitioner for treatment. In the mean time I continued to work at my household duties, and about nine o'clock I noticed that I was no longer suffering. I had been so absorbed in my work that the pain had vanished unnoticed, and I was greatly surprised to find that nearly all the swelling was gone from my throat. I ate my breakfast with very little difficulty, and by the end of the day there was no sign of the trouble. Truth had not been long in reaching and destroying the error.

At another time, a few months before this, my son was brought home unconscious, suffering with what a doctor said was appendicitis. The doctor worked over him for hours, but was not able to give any relief from the awful pain, so the next day he came prepared to operate. I, however, dismissed him, after a long argument, and sent immediately for a Christian Science practitioner. In fifteen minutes after the practitioner had given my son treatment, he was free from the terrible suffering and had fallen into a refreshing sleep. He had several lighter attacks of pain during the day, but with Christian Science treatment they were successfully met, and he was soon healed. He had always been a sufferer with stomach trouble, more or less since infancy, but since this experience he has enjoyed the best of health, and eats whatever he likes with no thought of bad results.

Christian Science has helped us all in every way, both physically and spiritually, and we know with the apostle, "that all things work together for good to them that love God."—MRS. E. DENISON, Fruitvale, Cal.

Digitized by Google

Although I had known of Christian Science for several years, it was not until April, 1904, that the truth of it dawned upon my consciousness, bringing me such joy and peace that my life was entirely changed. Previously my husband and I had been traveling through the South, and while at Daytona, Fla., I read a book which proved to be a veritable missionary, and which led me to think that perhaps Christian Science was the truth for which I had always been looking. On my arrival home I was filled with such care and trouble, and my physical ailments were so many, that I called a friend whom I knew to be a sincere student and practitioner, and asked for treatment. As she told me that God is Love, and that Love heals all our diseases and troubles, the most heavenly feeling of peace and comfort came over me, and I know I was healed immediately. Then followed a season of happiness, when I was given some understanding of the divine Love that does such wonderful things.

Since that time I have had perfect health, with the exception of a few instances, and then a little assistance and the study of the Bible and Science and Health did the work. Christian Science is such an ever-present help along all lines that it would be impossible now for me to live without it. The Bible has become my daily companion, whereas before it was seldom read because of my inability to understand it. I am very grateful to God for giving this living truth to the world through our noble Leader, Mrs. Eddy, and I am also grateful for the understanding which enables me to apply it.

SARAH D. SASSAMAN, Toledo, O.

I feel deeply grateful to our heavenly Father, and to Mrs. Eddy, our dear Leader, who has shown us the way out of sin, sickness, and sorrow, into joy, health, happiness, and heaven, and can retain the joy and good news no longer when I see thousands upon thousands wearing away their lives in servitude to an unreal and untrue master,—the belief in sin, disease, and death. How can I keep the good news and see those around me suffering and sinning for want of a beckoning hand or comforting word to lead them in the way of holiness and truth,—the truth that saves to the uttermost? I have learned that the only life worth living is that which reflects our Father's love in loving each other,—love expressed in our every word, thought, and act; that true happiness comes only through a life spent in doing our Father's will.

I came into Christian Science three or four years ago. God had been leading me, and I had read the New Testament through several times in trying to find the way. I was a perfect wreck. It seemed as if my body was heir to every ailment to which material belief consigns mortal man. I tried doctors and material remedies until I finally gave them up in despair, but I commenced to search more earnestly than ever before to find God. One morning I went to a studio kept by a young friend of mine, and when he inquired about my health I told him I had about lost all faith in medicine, and had come to the conclusion that the mind was the ruling power in man. He said to me, "You need Christian Science;" and after thinking the matter over, I concluded to try it. I wrote for treatment to a friend who was then studying Science, and he replied that he would commence treatment at once. I secured a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and have been studying and proving for myself the truth contained in this book,—that "divine Love always has met and always will meet every human need" (Science and Health, p. 494). The result is that one ailment after another has left me. The first to leave was liver complaint, which I had had most of my life. Now I can eat anything I want and all I want; I have no fear whatever. While all error is not gone, yet I thank God, who is Life, Truth, and Love, that it has to go. I thank God for the benefits I have received, and dear Mrs. Eddy for her untiring efforts to bring to this age a knowledge of the ever-presence of God.

I, however, feel that the greatest blessing I have received is the spiritual uplifting, and that calm and glorious trust which I am learning to have in God. Hoping that this testimony may be the means of leading some weary pilgrim out of the mire of despondency into the freedom and liberty of the truth, I shall endeavor to prove my gratitude to our blessed Master, and to Mrs. Eddy, his willing disciple, by spending the future in the service of Love,—in doing good all along the way.

OSCAR E. PRESTON, Roanoke, Va.

[Translated from the German.]

About seven years ago I became acquainted with Christian Science. At that time I was afflicted with a form of lung trouble. I had severe attacks of coughing, and now and then would also turn giddy. I was freed of these troubles with nine treatments in Christian Science. Later on, I suddenly sank into mental darkness. The nature of my disease and the circumstances at our home were such that my husband was obliged to have me taken to a hospital, but I had Christian Science treatment continually. I stayed there four months without any seeming improvement in my condition. I became very low physically through all the hypodermic injections, and was greatly reduced in weight. My husband therefore came one day with a sister of mine to take me home, but when he informed the directing physician at the institution of his intention, the latter said it was absolutely impossible to take home a patient so ill. As my husband insisted, he gave his consent, on an attestation that my husband would be responsible for any harm that might occur. Through the understanding of Christian Science, however, my relatives were enabled to hold out patiently. After I had been home four weeks the hold of the disease was broken. I gained strength perceptibly, and soon recovered my normal condition and weight. Today I feel stronger and healthier than ever before, and am infinitely grateful to Christian Science. I am glad to be able to study the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, wherein she shows us the way by which we are led, slowly or quickly, to God. I am very grateful for the physical healing, but much more for the spiritual growth.

FRAU J. PAWELCZYK, Wilmersdorf, bei Berlin, Germany.

I was taken very ill in July, 1906. Our family doctor was called, but he could not help me, and advised me to consult a doctor at Freeport. I did so, but got no help. I consulted seven doctors with the same result, and was told finally that nothing but an operation would help me. I then went to see a lady who had been healed in Christian Science, hoping that it would heal me also; and it did. It was in December when I began to take treatment, and after a few treatments the passing of blood from the kidneys was stopped. The next fall I had an attack of bowel trouble, but I was healed again through Christian Science.—GARRETT C. RUCKER, Polo, Ill.

About seven years ago my little boy, then nearly three years old, was terribly reduced in flesh, as he had suffered all of his life from stomach trouble. Our family physician had exhausted his remedies, when a Christian Scientist asked me to let her take care of the child for a while. She seemed so earnest and so positive that I decided to trust her. I laid aside all material remedies, and in a few days the child's food was properly digested, he gained flesh

Digitized by Google

rapidly, and never since has he been troubled with any of those symptoms. This same little fellow had his thumb badly injured from a fall. The Scientist, who was present, lifted the child up, set him on a stool, and asked him if he did not know the verse, "Yea, though I walk through the valley of the shadow of death, I will fear no evil." He replied, "Yes." She then told him he should use both hands, and "fear no evil." He obeyed, and the thumb resumed its natural position. That was the end of the trouble.

Through the understanding of Christian Science my concept of God as a corporeal being has changed to a demonstrable faith that God is a loving ever-present Father, to be acknowledged and understood. During the past seven years all of my troubles, physical, financial, and mental, have been overcome through the application of Christian Science. Often the work of healing has been instantaneous, that is, in the case of physical ailments. I lovingly submit this testimony, and could tell of many more blessings which have come to me through obedience to divine Love, and to the teachings of our Leader.

MRS. H. H. BLACKLEY, Durham, N. C.

Something over twenty years ago, I became interested in Christian Science. It came to me suddenly, after my wife had been healed some ten days before. She did not tell me when she was taking the treatment, thinking it might possibly prove a failure, as everything tried in the past twelve years had done; so I was very much surprised when she said that she was perfectly well, and that she had been healed by Christian Science. This was the first that I had ever heard of the subject. I did not then realize that I needed Christian Science, but as time went on, and as I read and reread Science and Health and other works by Mrs. Eddy, I found that I did need this truth. I now fully realize that I have received very many benefits, and that I shall continue to do so as long as I prove faithful to this teaching.

In reviewing the past I find that severe rheumatic trouble, fever, etc., also eye trouble, the use of tobacco and intoxicating liquors,—these have all dropped away, one after the other. Truth has softened my temper, improved my language, and made me a better man, and for all these blessings I am truly grateful to God, and to our beloved Leader, who is doing so much for me and for all mankind. May heaven's blessings rest upon her! I am also thankful for the *Sentinel* and *Journal*, and look forward eagerly to their appearing. Especially do I look for a line from our Leader and adviser. I also enjoy the *Quarterly*, together with the Bible and Science and Health. Jesus said, "Ye shall know the truth, and the truth shall make you free." Mrs. Eddy says (Science and Health, p. 222), "Truth regenerates this fleshly mind and feeds thought with the bread of Life." My mother was a devout church-member, and I was an attendant at church and Sunday School, but in after years I only read the Bible from a sense of duty; now I love it.

HENRY W. MORGAN, Dallas, Tex.

[Translated from the German.]

I long to express my gratitude for the great blessings which I have received physically and mentally through Christian Science. For years I had suffered from headaches. I had tried everything conceivable, going from one physician to another, and they all agreed that my condition was serious. Finally other organic troubles set in; at times I would limp, being lame in the right leg. I then heard of a famous physician for nervous diseases in Bohemia. It meant a long journey, but I went to the doctor, and he said, "At present you suffer in the head and in the leg; wait till you get the pains in the back, then you will not be able to rise in bed without assistance." This made me very unhappy, and I decided not to remain at home any more.

Thinking a change of climate might do me good, I went to Dresden. On the day of my arrival there I was fortunate enough to make the acquaintance of a Christian Science practitioner. I had never heard anything of Christian Science before, but soon took great interest in it. I attended the service on Wednesdays and Sundays, and finally asked the same lady to help me. The nervous trouble as well as the organic diseases disappeared, and I now feel better than I ever did before in my life. My relatives at first had little faith in the efficacy of the truth; they were convinced, however, when they saw on my return that I had regained a fresh and healthy appearance, as during my illness my complexion had become very bad.

I have found the understanding of God's all-power, as it is taught in Christian Science, very helpful in every condition of life; it has helped me to overcome the fear and worry which so often used to beset me. I thank God, and also Mrs. Eddy, with all my heart for all the blessings which have been mine through Christian Science.

SELMA CASPER, Schweidnitz (Schlesien), Germany.

Hoping that this testimony will be a help to others who suffer as I did, I wish to tell in a few words what Christian Science has done for me, although it seems impossible for me to express my gratitude to God, and to Mrs. Eddy, for the good I have received. It is two years since this blessed truth came to me. I had suffered from a severe stomach trouble for seven years, the doctors saying that I could never be cured. I consulted some of the best physicians in Montana and in Minnesota, but did not receive any lasting benefit, and was waiting for death to take me out of my pain and misery. I also had a serious throat trouble, from which I had suffered for three months. I tried all kinds of medicine, but nothing seemed to relieve me, and when the physician told me he could do no more for me my brother-in-law insisted on my trying Christian Science. I did so, and was healed of the throat trouble in one treatment, and in less than two weeks I was healed of the stomach trouble.

For all these blessings I am deeply grateful to God, and to our dear Leader, Mrs. Eddy. I wish that all the world might turn to this healing truth.

MRS. J. B. CHEATHAM, Spokane, Wash.

I would like to tell how Christian Science helped me when suffering from a severe attack of illness, with throat trouble and headache. In two treatments I was entirely healed and went to work. I am very grateful to Mrs. Eddy for the truth that comes through Science and Health.

CHARLES NEVINS, Orange, Cal.

[Written for the *Sentinel*.]

WATCH!

KATHARINE T. PORTER.

WITH trailing wing I fluttered low,
Along the ground in sorry plight;
I heard the voice of Truth, and lo!
It broke the darkness of my night:
No poison dart had laid me low,
But praise of friend,—an ambushed foe.
My ruffled plumage once again I dressed;
The world for me held nought,
I only loved my Lord! and by Him blessed,
With joy again aloft I soared.

FROM OUR EXCHANGES.

[G. B. F. Hallock, D.D., in *Christian Work and Evangelist.*]

Nothing can be more certain than that Jesus' teachings concerning the Christian life present it, and were intended to present it, as a thing of deep and abounding joy. He meant us to know that religion in itself is a joyous experience. Religion is the normal attitude and exercise of the spiritual nature. In other words, it is spiritual health. As it is a joy to be able to see and to hear the beautiful things in the natural world, so it is immeasurably a greater joy to be able to hear and to see the glad and beautiful things in the kingdom of God—in the spiritual world. Religion is immeasurably more than the means of securing future happiness. It is that; but it is also happiness and well-being now and here, and all the way along, until one comes into the full enjoyment of the bliss of heaven.

[Rev. Charles F. Aked, D.D., in *Examiner.*]

Dogmas may grow obsolete. And opinions once venerated may rightly seem to us no more respectable than those of barbarians. But principles cannot grow old. They are world-wide, unchangeable, and immortal. And the thinker with insight to perceive how history will always justify the ways of God to man, sees certain great principles rise rock-like out of the sea of time. Centuries and ages surge around them. Wave after wave of opinion, of criticism, of denial beat upon them. Tides of thought swell and sink. Nations are hurled against them in storm and flood, and civilization itself goes to pieces in the wrack, but these principles are more firmly based than the foundations of earth and more enduring than the pillared firmament of heaven. In a return to these principles nations are saved; in rest within the haven they afford is security.

[*Christian Register.*]

No impulse of the soul toward a purer, sweeter, and kinder walk and conversation is ever quite lost. It shows humility and a degree of self-knowledge, no matter how many slips and stumbles may land us repeatedly in the mire and cover us with humiliating bruises. The confirmed egotist, who recognizes neither his absurdity nor his folly, who has no hours of deep contrition, no heart-searchings and self-inflicted humiliations, is almost hopeless in his smug content. The erring of many classes and kinds have more of promise, more power and potency of growth and redemption.

[*Universalist Leader.*]

Do not worry about any possible catastrophe which may befall this great life at the end of the eternities. There isn't going to be any catastrophe; there is no such thing as the end of the eternities. This is God's world. He made it because He wanted it, and He did not make a mistake in the creation, and He has not lost control of it, and He has not become discouraged, and He does not propose to give up and let men run it themselves. With our limitations we may not be able to see the end, but if we believe in God, we know it is all coming out right. Don't worry.

[*New Church Messenger.*]

It is good that it is becoming so universally recognized that if the people want to get rid of any evil, the only way is to get it out of themselves, whereupon it can be suppressed. The world is beginning to see in a new light that a man's foes are "they of his own household." After all, John was right in crying repentance for the remission of sins. The people are beginning to see that frantic fanaticism only adds fuel to the fire, and that the rational way to get rid of the effects of sin is to remove their causes. But the hard part is the confession and repentance.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel.* Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel.*

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to JOHN V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

The Publishing Society has in stock a number of copies of *Sentinel* No. 6, Vol. IX., containing the article "What Our Leader Says" as last published. As this article is of abiding interest and value to the Field the Society will be glad to supply it, postpaid, at the following prices: 1 copy, 5 cents; 5 copies, 15 cents; 10 copies, 25 cents; 25 copies, 50 cents; 50 copies, 85 cents; 100 copies, $1.50.

On foreign orders add 2 cents a copy to cover postage.

The supply of *Sentinel*, Vol. IX., No. 14, is exhausted.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES." MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75

Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883-1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), single copy $2.25
Twelve or more books to one address, each . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75

The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.

Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, cents; $2.50 per dozen Library edition, cloth binding, rbled edges. Price, prepaid, single copy, 60 cents; $3.00 pe half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD MCLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.50.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.

Bound Volumes: Current year and two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

A permanent international court of arbitral justice and the limitation of armaments, two subjects left undisposed of by the second Hague conference, are to be taken up by two commissions, if a concurrent resolution, introduced by Representative Bartholdt of Missouri, is enacted into law. Under the resolution each commission is to consist of three members at $7,500 per annum each, and are to be appointed by the President. The President is requested to ask all the Powers represented at The Hague conference to take similar action, with a view to obtaining a joint recommendation on these points prior to the next conference.

The contract has been awarded by the Navy Department to the San Francisco Bridge Company for the construction at Pearl Harbor, Hawaii, of what will be the largest dry dock in the world. The masonry and cement portion of the dock alone will cost $1,670,000. Plans have been drawn for a complete system of defense for the harbor, and the construction of these defenses and of the dock will proceed simultaneously.

Application has been made by District Attorney Lamb of Jackson, Miss., for a perpetual injunction restraining the Standard Oil Company from operating in Mississippi and seeking to collect $11,000,000 penalties for the alleged violation of the anti-trust law. The hearing, it is understood, will take place during the November term of the chancery court.

The Massachusetts Legislature has authorized the appointment of a commission to investigate the delay in the trial of civil cases. Lawyers have declared that there are fully fifteen thousand cases awaiting trial in Suffolk county alone. The usual time for a jury trial to be reached is three years.

Reports of the Employes' Relief Fund of the Pennsylvania Railroad system show that the total payments since the organization of the relief departments on Feb. 15, 1886, amount to $25,765,403.

Following Governor Hughes' initiative in New York, Louisiana, California, Washington, and now Florida have forbidden race-track gambling.

The United States will probably accept twenty-five per cent of the Chinese foreign loan for the Hankow-Sze-Chuen Railway.

President Taft and Ambassadors Bryce and Jusserand are to be present at the Lake Champlain tercentenary exercises July 6.

The census bill, appropriating ten million dollars for taking the thirteenth census, has been passed by Congress.

Harvard College conferred 867 degrees at its commencement last week.

International.

An experiment on the part of the White Star Line in landing mails and passengers at Holyhead, England, on the voyage to Queenstown and Liverpool, worked with such success in the case of the steamship Cedric, that the company has decided to continue the service. A special train took the mails and passengers to London, where they arrived only thirty minutes after the Cedric docked in Liverpool, a saving of four or five hours.

The report of the parliamentary commission which investigated the naval scandals in France has been turned in. It is a scathing condemnation of the naval administration for the past ten years and it makes an astounding exposure of the deplorable condition of the fleet for which France has spent $700,000,000 since 1899. The 350 pages of the report are filled with details of the inefficiency resulting from confusion and red tape.

According to London figures, the transatlantic passenger trade of 1908 showed an extraordinary shrinkage. The number of passengers going to America in 1908 was 635,000, which was 1,048,000 less than in the previous year. The number leaving America was 850,000, or 80,000 more than in 1907. The loss to the steamship companies in gross receipts was $34,000,000.

Arrangements are said to be complete for the establishment of an American bank in Pekin, China. The establishment of this bank meets one phase of the European bankers' criticism that China should not consider the American protest against the Hankow-Sze-Chuen Railway loan, since there was no American bank in China seeking business.

News has reached Victoria, B. C., that rare birds, including the little auk, supposed to have become extinct, have been discovered on Riangle Island by Warburton Pike and W. F. Burton, two well known sportsmen. They have an egg of the little auk.

Walter Wellman, who is about to undertake another North Pole expedition, and his party have left Paris for Tromsoe, Norway, where they will embark on the Arctic for Spitzbergen. They were due at the latter place on July 1.

Belgium's complete system of narrow-gauge steam railways, connecting all the towns and villages with the main centers, is being electrified.

Industrial and Commercial.

The longest artificial water conduit ever planned in America, says *Scientific American*, is that which is to increase the water supply of the city of Los Angeles in southern California, and which is now being completed. While the conduit is notable for its engineering features, it will not only supply water for domestic purposes and for irrigation, but the head of water is so great that it will produce electrical horse-power for pumping, manufacturing, transportation, and other purposes, so that the project achieves three different objects. The Owens river, the source of the supply, which rises in the eastern Sierras of the state, is over two hundred miles from Los Angeles, and separated by a country which includes not only mountains but a large area of absolute desert, presenting many difficulties in the way of constructing such a canal. When the necessary surveys were made, it was found that it would be necessary to build a waterway no less than two hundred and fifteen miles in length. The total cost of the project represents about $22,000,000. The tunnels which have been required on the route are notable for their extent. The Coast range of mountains is pierced by a tunnel nearly eleven feet in diameter, which is nearly 27,000 feet in length—one of the longest in America. In this tunnel and its approaches, covering a distance of eleven miles, there is a fall from 2,922 feet altitude to 1,520 feet. The head of water thus obtained will be utilized in an electric power plant of 93,000 horse-power. Another tunnel is 7,800 feet in length.

H. M. Wilson, chief engineer, technological branch, United States geological survey, speaking before the convention of the international association for the prevention of smoke, said: "No greater step in the conservation movement of the United States could be taken than the utter suppression of the smoke nuisance in our great cities. This evil is one of the great dangers of modern times, increasing the death-rate and causing untold injury to property. The damage which smoke inflicts every year in the United States amounts to more than $600,000,000 in the destruction of merchandise, the defacement of buildings, the tarnishing of metals, the injury to plant life, and the greatly increased labor and cost of housekeeping. The Government is indirectly attempting to abate the smoke nuisance of the country by directly finding how to increase the efficiency with which coals are used and thus prolong the supply for the nation. Investigations show that the smokeless American city is entirely possible, and that it will come when the public conscience is thoroughly awakened to the enormous waste of natural and human resources through this evil, and the battle that is being waged by the smoke inspectors in the various cities has not been in vain."

Twenty-five thousand worn-out or antiquated freight-cars of all kinds are to be destroyed by the Pennsylvania Railroad system during the coming year, to make way for more modern equipment. The total original cost of the cars to be "scrapped" amounts approximately to $17,000,000. They will include all of the old wooden type of forty thousand pounds' capacity or less.

The Pennsylvania Railroad Company has just compiled a statement showing that the amount of wages paid on the system in 1908 was $125,543,947, a decrease of $29,471,951 as compared with 1907. The number of employees was 24,000 less than in the previous year, when 199,000 men were employed.

The importation of hides and skins into the United States for the fiscal year amount to about $75,000,000 in value. There were imported buffalo skins to the value of $750,000; horse and ass skins, $2,250,000; sheepskins, $9,500,000; hides of cattle, about $23,000,000.

Less than one tenth of the manufactures of the United States are exported, while those imported equal in stated value about one twentieth that of the home product.

An official estimate by the statistical department places Canada's wheat acreage at 7,750,400 acres, which is 1,140,000 more than last year.

Gold-dust to the value of $2,700,000 has been received so far this year at Seattle from the Yukon region.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

ETERNAL LIFE.

FRANK H. SPRAGUE.

THE phrase "eternal life" has commonly been associated with a future state of existence, or a continuation beyond the grave of existence begun in the flesh. Theological belief has divided the career of man into two parts—a brief span before death, in which he is regarded as mortal; and an endless period after death, in which he is characterized as immortal. Death has in this way been made to appear as a factor in the divine economy of being. The artificiality of this view is apparent, however, when the conditions of the case are examined in the light of fundamental metaphysical certainties.

Philosophical idealism, although largely negative as to its practical outcome, has rendered valuable service in preparing the way for the spiritual revelations of Christian Science. Idealism affirms that the real world-order lies beyond the "show world" of sense phenomena; but it gives no satisfactory account of the things that pertain to that order, nor does it indicate any means by which human consciousness may come into immediate and vital relation with its verities. Christian Science takes up the question where speculative philosophy leaves it. It brings human consciousness into touch with the real world-order by giving a demonstrable understanding of spiritual law. In this way the real and fundamental are distinguishable from the unreal and incidental in human experience.

The progressive steps in spiritual demonstration prove that death is the culmination of the mistaken belief which asserts that man is an independent self or soul endowed with the capacity of self-determinate thought and action. The outcome of this belief evidences the self-destructive tendency of those elements of human consciousness which are not in accord with the divine idea. Instead, therefore, of being a legitimate factor of experience which divine wisdom has decreed as a means of conferring immortality on man, or of ushering him into a state of everlasting blessedness, death appears as the chief obstacle to a realization of immortality. This point is brought out with great distinctness on page 42 of Science and Health. Here death is seen to be, as Paul declares, an "enemy," to be "destroyed" through the understanding and demonstration of Life.

According to material evidence, man is subject to birth, growth, and death. Moreover, that which begins is finite, and is governed by conditions which imply an ending. It is impossible to imagine a line as starting in space and being endlessly prolonged. Likewise, if we attempt to reckon time in this linear fashion, we cannot conceive of a period of duration as having a beginning without also being governed by conditions which imply an ending. The so-called life which has a beginning is but a finite concept, which involves in itself the necessity of an ending.

On page 282 of Science and Health, Mrs. Eddy graphically illustrates, by means of certain familiar geometrical figures, the distinction between real being and a finite, human sense of existence, which is incapable of realizing immortality. Whenever we attempt to gauge existence according to the human or linear conception of time, the vision of real being is shut out by a panorama of sense phenomena. The consciousness of immortality is excluded from a sense of life which dates its origin from a point in time. Finite sense can take no cognizance of absolute time and space or of their content, the ideas of divine Mind. The only evidence of immortality that can be had must come, therefore, from a source outside the realm of finite sense testimony.

Christ Jesus brought "life and immortality to light," as the apostle Paul expresses it, by proving that immortal man exists apart from any temporal sense of life. In contradistinction to this temporal so-called life, he made known the "eternal life" (*aionios zoe*, the life always being, or the life that always is). In this connection it may be observed that a literal translation of the Greek words conveys a sense more nearly in accord with the teaching of the Master regarding the life to which he bore witness than do the freer renderings of scholars and theologians, into which personal bias or opinion has entered to a greater or less extent, in that it indicates the timelessness, according to a human estimate, of the eternal life. Mrs. Eddy defines eternity as "God's measurement of Soul-filled years" (Science and Health, p. 599). In the light of the derivation of the Greek word *aionios*, this definition is especially significant, as suggesting quality of experience rather than mere duration of existence.

The phrase "eternal life," as employed by Jesus and the New Testament writers, has no equivalent expression in the Old Testament. It was Jesus' discernment of Life as God, and of man as the reflection of that Life, which gave his use of the phrase its peculiar significance. His understanding of the nature of immortal being enabled him to regard all questions from a standpoint superior to the restrictions implied in a human sense of time. "Before Abraham was, I am," he declared. Martha believed her brother Lazarus would "rise again in the resurrection at the last day;" but Jesus corrected this material view of the case with the comprehensive statement: "I am the resurrection, and the life; he that believeth in me, though he were dead, yet shall he live: and whosoever liveth and believeth in me shall never die."

To the extent that we succeed in becoming conscious of "the life always being," the reflection of infinite Mind, do we lose the sense of life as temporal—identified with beginnings and endings—and catch glimpses of the real man as described by Mrs. Eddy on page 258 of Science and Health. Immortality thus appears not merely as the goal of existence, to be arrived at, perchance, in the course of events, but as an ever-present fact to be brought out by degrees in experience here and now through the Christ-like understanding of God and man, as made known in Christian Science.

While theologians have, as a rule, given assent in a qualified way to the proposition of Christian Science that God is All, they have not proceeded logically, as does

Copyright, 1909, by Mary Baker Eddy.

Digitized by Google

this Science, in deducing their conclusions from this premise; rather have they been influenced by human or chronological considerations in attempting to work out a theoretical salvation for humanity. On the other hand, the demonstrations of Christian Science are daily proving that the belief of existence as subject to beginnings and endings has no place in nor relation to "the life always being." "This is life eternal," said Christ Jesus, "that they might know thee the only true God, and Jesus Christ, whom thou hast sent."

RAISE YOUR PRICE.

DR. EDMUND F. BURTON.

THE mastery of a situation is gained through a true sense of the values involved, and that wisdom which is "the principal thing," which is removed from all perplexity and doubt and which gives poise of mind and certainty of action, is this understanding of values. The teachings of Jesus iterate and reiterate this truth, and abound with instructions as to how to determine true values and as to what are the really valuable and substantial things. There is nothing in the operation of Christian Science which goes farther toward convincing its faithful students that it is the truth and wisdom of the Mind that was in Christ Jesus, than the enlightenment which it brings in this very direction, and the ability which it gives to determine relative values, not as matters of opinion, but accurately and scientifically.

Jesus said, "What is a man profited, if he shall gain the whole world, and lose his own soul?" Science and Health (p. 477) defines Soul as "the substance, Life, and intelligence of man." Jesus again taught that life is the understanding of God. Thus the inspired declaration is plain that the whole material world is too small a price to accept in exchange for that which alone is life, the understanding of God, Truth. How little do men realize this wisdom when they accept, with thanks, the most pitifully worthless fragments of this world as payment in full for the giving up of that which is theirs.

Surely Esau was not the first nor the last man to sell his birthright for a mess of pottage. Whatever is allowed to stand in place of or hide from view the title to and possession of this understanding of God is accepted as a price for the birthright of eternal life. As such price there is often accepted a passing sensual gratification; the fleeting opinion or praise of others as deluded as ourselves; that which is called self-respect, but which is only a suggested belief as to the consensus of mortal-mind opinion; the holding of a title in state, city, corporation, church, or other organization, and the grotesque belief, derived from a false sense of real values, that such place or office sets one above his fellows, and that it is more worthy to be ministered to than to minister. Some are even glad to accept for their lives and the possibilities thereof, a bare getting through of the days without unusual physical discomfort.

Perhaps a majority of men feel quite well satisfied with the wages of a clean financial balance, with scarcely a thought of what is coming to them in the way of mental or spiritual reward. If, at the end of the year, there is a balance of money or property set aside for the days "when there is no pleasure in them," there is a sense of having passed a profitable twelve-month, and perhaps a feeling of something like gratitude—but which is really a sigh of relief—to his god, a father who is not disturbed when misfortune comes to his creatures, but who has, on account of the diligence in business of this particular child, grudgingly doled out to him a few grains of yellow dust over and above that which is necessary to keep life in his body.

Following the wisdom of Jesus, Christian Science teaches us that man is not a worm of the dust, a fallen and debased thing, unfit to hold up his head among his kindred until he has been changed by death and disintegration for companionship with God and his "elder brother," but that the real man is now a son of God, a manifestation of His perfection. It teaches us that to value our true selves less highly than this is to deny our paternity and to dishonor our Maker. Jesus said that his Father is our Father; that within us is the kingdom of heaven; that we are the salt of the earth; that eternal life is ours. Thus Jesus is our Wayshower in all things, and we can emulate his example, follow his footsteps, and learn from his experiences as well as from his words. Then let them be our teachers.

We are told that after Jesus had been forty days in the wilderness, Satan made certain offers to him. Jesus was an hungered, and Satan offered him—what? Bread? No; a stone, together with the suggestion that Jesus might make bread out of it. He would have had Jesus think that he was being offered something which would appease the lack he felt within himself; but all that he offered him was a stone. Then Satan, perceiving that Jesus was in too exalted a state of mind to yield to the temptation of hunger,—on the pinnacle of the temple,—and that in his love for mankind he would fain draw all men unto him, offered him—what? Again a suggestion; this time to the effect that Jesus cast himself down from his high place to the earth below, involving a fall or at best making a spectacle of himself for the amazement or amusement of the people he would reach.

Finally Satan raised his so-called offer to the highest of which he was capable. Again only a suggestion, that Jesus bow his neck to the yoke of slavery to materiality; a suggestion to which every man has yielded who has sought the "kingdoms of the world, and the glory of them." All these suggestions were seen in their shallow vacuity by the Son of God, and Satan—the claim of good apart from the one God—disappeared for a season. But when the sentence and execution of Jesus seemed to have put the stamp of failure upon his career, this same tempter who had been routed in his assault in the wilderness, sought to give the lie to his own defeat by classing Jesus in his death with the thieves and murderers of whom he would fain have had him one.

What then did Satan offer Jesus altogether? Nothing but suggestion—bad advice! Suggestion that Jesus should do something which involved a sacrifice of the realities of which he knew himself to be abundantly possessed, for the unrealities of a profitless material and temporary show. And do we think that we shall be offered or given more than the prince of this world brought to his assault upon the beloved Son in whom God was well pleased? Did not error exhaust its treasure-box in that effort, and if it offered Jesus nothing worth the consideration of the one who knew whence he came and whither he went, let us be wise to learn from our "elder brother." Jesus' reply to all the temptations or suggestions presented to him was a declaration in one form or another of the oneness of God. When we know that there is "none good but one, that is, God," there will be no response to suggestion of other minds or other good.

Jesus said that the prince of this world came, and found nothing in him. Like can discern only like. As God can see only purity, so only the pure in heart can see God. Similarly the evil one finds nothing where there is nothing but good, and when evil finds something in a man, that which it finds is its own likeness. It has no purity of heart and cannot see God. False sense finds only false sense. The counterfeit of Mind finds only Mind's counterfeit presentment, mortal mind, deceit. When error meets with any response from us, that which responds is a false sense of value, ignorance of the no-value of that which is suggested or offered. So long as there is any sense of per-

Digitized by Google

sonality,—something apart from God and His reflection,—the suggestions of values as attaching to such personality will find response, for such suggestion appeals only to this false sense of personality. We must know, as did Jesus, that the Father that dwelleth in us is God, and that He is all that is real and doeth all the works that are done.

There is a saying that every man has his price. It is not true with the meaning perhaps most commonly given to it, namely, that there is no man who cannot be induced to violate, for some material reward, his sense of honor or honesty; but in the sense that there is for every man some goal or attainment, the reaching of which will satisfy him and bring him a feeling of sufficient reward for the life and effort spent in reaching it, it is and should be true. With the understanding which is brought to us through the teachings of Jesus and of Christian Science as to that which we are, and which the expression of ourselves amounts to, considering our origin, nature, character, and the resources upon which we can draw throughout our existence, it is for every man to determine what goal and what accomplishment is worthy of him. Such goal is his price.

Certainly the highest possible attainment and accomplishment will be set as the price upon our lives, directed by wisdom and supplied with divine energy without limitation, and it is necessary to take into consideration all these things, with a full understanding of what we are, what they are, and what service to God and man this equipment is capable of rendering, as well as to appreciate exactly the value and character of that which is obtainable therefrom. With this understanding in mind, surely there can be nothing attempted which is low or unworthy of sons of God, but our aims will be as high and as broad as our appreciation of the limitlessness of our supply, and our accomplishment of good will correspond thereunto.

THE CHRISTIAN SCIENCE READING ROOM.

CAROLINE E. LINNELL.

Of late, many churches have been awakening to the realization that, as the cultivation and upbuilding of the spiritual nature is the daily need of every individual, the church, whose mission it is to minister to this need, should provide for daily moral and spiritual guidance and help, and not confine its ministrations to the Sabbath. Many expedients have been resorted to in order to meet this need, —the institutional church, among others, and the Young Men's and Young Women's Christian Association, with their earnest workers. The Christian Science church, in addition to its healing work, offers the Christian Science reading-room as its solution of the problem. Although this department of church work has been established only a few years, it has already proved itself a most important institution; yet, while so much has already been done and accomplished, it is still in the first stages of its development, and great possibilities are before it.

When Jesus departed from his disciples, he commanded them, "Go ye into all the world, and preach the gospel to every creature;" and after his departure the disciples were scattered into all parts of the known world, carrying the "good news" with them,—exhorting, preaching, "in season, out of season," as St. Paul says. Today Christian Science presents a new phenomenon to the world, a great religious movement which is sending its declaration of truth throughout the world, not only by the spoken, but by the written word. In the past, people assembled in large gatherings to hear topics of interest discussed by noted speakers. Today, by their own firesides and alone, they read concerning the ideas which are awakening and remolding thought.

Christian Science has taken advantage of this changed condition, and is sending forth as preachers its extensive literature. The reading-room naturally becomes the channel through which this literature is sent into circulation, and the importance of this branch of Christian Science activity cannot be overestimated. Other denominations at great expense send devoted men and women to the ends of the earth as missionaries. Christian Science also sends forth her missionaries, the Bible and Science and Health, with the periodicals to prepare the way; and the missionary spirit of any church or reading-room is fairly indicated by the proportionate amount of literature it puts into circulation.

Often to the reading-room come echoes of the world awakening. A Japanese, traveling in this country, bought a copy of Science and Health and other books to take home with him. A young Hindoo woman, coming into the reading-room to buy literature, brought the good news that the English were carrying Science and Health to the people of India, many of whom have become dissatisfied with other religions. More and more each day the literaature of Christian Science is encompassing the world with its healing power, and to the reading-room belongs the high privilege of being the channel through which flows this healing stream. The prophet Ezekiel, when he sees in his vision waters issuing from the door of the temple, says, "And it shall come to pass, that every thing that liveth, which moveth, whithersoever the rivers shall come, shall live: . . . for they [the waters] shall be healed;" and surely this Scripture is being fulfilled in our midst.

The mission of the reading-room is not confined, however, to the dissemination of literature. Graciousness of hospitality should be one of its chief characteristics. When a sincere welcome is offered to all who will accept that hospitality, that the invitation is appreciated is shown by the daily increasing number of visitors. These visitors are from all classes, and this ever-changing stream shows how universal is the appeal which Christian Science makes to all sorts and conditions of people, and how compelling is its power. Many are coming to Christian Science who have no practitioners or friends to advise them, and they naturally turn to the reading-room for help. "What must I do to learn more of Christian Science?" is no unusual question, and the answer is always ready in the literature on the table.

To the traveling man and the tourist, the Christian Science reading-room is a great boon. I remember one August morning, after a hot night's journey, of going into one of these places of rest and refuge. The graciousness of the welcome I received, the delightful freshness of the breeze that swept in through the windows high above the roofs of the city, the peace and comfort of the place,—all these were full of rest and refreshment, and after an hour spent in quiet thought and in reading the Lesson for the day, I continued my journey with a heart full of gratitude for these Christian Science "houses of refuge." Later in the same journey I went into a little reading-room in a desolate mining-town. The surroundings were most unprepossessing, and the appointments of the simplest, but I found the same spirit of love and fellowship, the same sense of rest and peace; and I realized that material environment is in no way essential, but that it is the pervading spirit of the Christ which makes the reading-room a power.

Not only to the traveler, but to the business man and the business woman the reading-room is a place of refuge. It furnishes a resting-place in the heart of the noisy city, where one may come for a quiet hour and turn his thoughts away from the stress of business life to the realization of spiritual truth. In the Psalms we read that those who love the Lord shall be kept "secretly in a pavilion from the strife of tongues," and many a business man finds the Christian Science reading-room not only "a pavilion from

Digitized by Google

the strife of tongues," but from material thought. Oftentimes the seeker finds not only peace and quiet, but healing as well. The presence of the Christian Science literature, proclaiming the power of Christ, Truth, purifies and sanctifies the place, filling it with its comforting and regenerating influence. Any one who has had experience in reading-room work can bear testimony to the many who come in with faces full of distress and unrest, and who go out peaceful and quiet.

Our Leader says (Science and Health, p. 567), "Gabriel has the more quiet task of imparting a sense of the ever-presence of ministering Love." In like manner to the reading-room is given the high mission of preparing a place where the Gabriel message may be realized,—"To infinite, ever-present Love, all is Love, and there is no error, no sin, sickness, nor death."

"AWAKE THOU THAT SLEEPEST."

WILLIAM HOLMAN JENNINGS.

THE modern English word "wake" is from the Anglo-Saxon *wacan*, arise. Then the word of Jesus to Jairus' daughter, "Damsel, I say unto thee, Arise," could be rendered in plain English, Young woman, I say unto thee, Wake up. And the Master's word to the sick of the palsy, "Arise and walk," could be read, Wake up and walk. In the case of Lazarus, Jesus said, "Our friend Lazarus sleepeth; but I go, that I may awake him out of sleep;" but, to meet the dull senses of the disciples the Master finally said, "Lazarus is dead."

The psalmist sang, "I shall be satisfied, when I awake, with thy likeness." In this text man's perfect state of being in God is declared, and also the way of salvation. God is perfect, therefore the real man is perfect. If any illusion of imperfection is upon us, we need to awake to the perfection of man in God, and so be disillusioned and have our waking thoughts bright with the praise of "perfect God and perfect man" (Science and Health, p. 259). Thus sin, sickness, and death are shown to be but ugly dreams that attend those who are asleep and dead in the senses. The way out is to wake to the perfection of God and man, and the spiritual law and order, to see the kingdom of heaven on earth and everywhere else,—God's will and law working on earth as it is in heaven. In other words, heaven is universal and eternal, and we must awake to this fact of present and eternal and universal harmony

And how shall we wake up? By knowing the truth! God, Mind, Spirit, never slumbers nor sleeps, and the real and spiritual man in God's likeness never sleeps, but like God is ever conscious and always active. If, then, the real man is always awake, mortals must need the awakening, but how are they to be waked up? The most natural way to wake up is to let the light awaken us; so truth is the light which wakes men to the perfect and divine, the Life which is God. We read in Isaiah, "Arise, shine; for thy light is come, and the glory of the Lord is risen upon thee." The voice is another wakener of men. We speak to sleeping children, we tell them to wake up, and Mrs. Eddy says that the disciples were "wakened by their Master's voice" (Science and Health, p. 35).

A study of the words "to wake" and "to awake" in the Bible and in Science and Health will yield much fruit in practice. It is not wise to save the student the work and profit of a careful study of these words in our text-books, but we venture to note these texts from Science and Health: "If sickness and sin are illusions, the awakening from this mortal dream, or illusion, will bring us into health, holiness, and immortality;" and again, "If it becomes necessary to startle mortal mind to break its dream of suffering, vehemently tell your patient that he must awake" (pp. 230, 420). Verily, as Paul says, "it is high time to awake out of sleep." Again he says, "Awake thou that sleepest, and arise from the dead, and Christ shall give thee light." We read that when Peter and John "were awake, they saw his glory." Let us all be wide-awake men and women, "awake to righteousness," —to the eternal righteousness, the universal perfection of all things in God. As we awake and walk in the light of Life eternal and Truth universal, we shall reflect and radiate the glory and splendor of God in the majesty and power of the Godlike man.

OUR THINKING.

EBBA V. KREBS.

I AM indeed thankful to our Leader, Mrs. Eddy, for having impressed upon us the necessity of right thinking. Today I wonder that there was ever a time when we believed we could reach heaven, harmony, before we gave up our old ways of careless thinking.

At one time we really believed we were doing the most we could do if we kept our erroneous thoughts to ourselves. To guard our talk was wise, but had we guarded our thoughts first, there would be no necessity for guarding our speech; and that would have been true wisdom. There is an old saying, "Thoughts are free of duty;" and we believed it, judging from the way we carried over the border line of what should be our sacred thought-land all kinds of thoughts, good and bad alike,—thoughts of criticism, jealousy, hate, envy, pride, and many others. Now, in Christian Science, we realize what awfully high duty we have paid and continue to pay for such thoughts. We pay it sometimes in sickness, in sorrow, in poverty, or death.

We are too apt to lull ourselves to sleep in thinking that there is plenty of time in which to try to be good. One says, "For a while yet I will think and talk as I please, criticize and make fun of my neighbor. I am doing it all good-naturedly. It will not hurt him, and it is such fun to have a good laugh at another's expense." It is true that there is no scarcity of time; we have all the time there is to improve in, but can we afford to waste it? Can we afford, for humanity's sake, for our loved ones' sake, for our own sake, to lengthen the days of suffering on this earth?

When we know, as we come to know in Christian Science, that our thinking has so much weight for good, and that it is felt by humanity in some degree, even if we cannot measure it today on our inexact scales of human consciousness, should we not make every thought count for the alleviation of suffering, the overcoming of sin, and the advancement of the whole world?

ONE PHASE OF SCIENTIFIC CHRISTIANITY.

GENEVA MARY CLIPPINGER.

THE doctrine of eternal damnation, though fast disappearing from theological creeds, still remains in human thought as an element of cruelty which needs the correcting influence of scientific Christianity. Among the various expressions of mercilessness cultivated by this theory, are found the belief in incurable disease, the sense of hopeless poverty, the manifestation of limited intelligence; and that which deals with the denial of man's spiritual perfection most frequently claims the attention of the Christian Scientist.

For instance, suppose that an individual habitually, or even occasionally, expresses wickedness: mortals attach this wickedness to the man, and, governed consciously or unconsciously by the teaching of eternal damnation, call him a bad man. They not only think of this man as being evil, but they speak of him as sinful, act toward him as if he

Digitized by Google

were inherently bad, and by their beliefs about him continually damn (condemn) the man. On the other hand, the individual who is governed by the teachings of Christian Science recognizes that the real nature of man is good, because God is the only creator, and God could not make an imperfect or sinful man. This Truth-governed individual knows that wickedness is not a permanent part of any person, and that some time the belief in wickedness is to be put off, hence it is inevitable that the real, sinless nature shall finally be seen as the only fact about man.

This scientific point of view is one of the great blessings which Christian Science brings, not only to the Christian Scientist, but also to society at large; to the Scientist because it protects him from taking into his consciousness the picture of a wicked man, and to society because it protects it from the mental malpractice which believes that any man is or may become permanently evil. Such a point of view by no means implies that the Scientist calls evil good, or that he calls sin anything but sin, or excuses it in any degree until it is destroyed; but it does mean that he knows sin to be no part of God's creation, that it has not even His permission; therefore, it cannot be eternal, or real, because only the qualities, conditions, and characteristics which express God are enduring.

If his neighbor sin once, twice, or "seventy times seven," the scientific Christian does not condemn him by calling him a bad man, for the Scientist knows that he is inevitably bound to stop sinning some time, since the law of God is the only law, and this law is eternally acting to bring about perfection, the real state of being. The poet says,—

> Step by step, since time began,
> We see the steady gain of man;

and we shall continue to see this gain until God's man is manifested everywhere, and that argument of evil known as eternal damnation is thoroughly rooted out of human consciousness.

[Written for the *Sentinel*.]

MY KINGDOM.

SEBA M. CHRISTIN.

WITH thought attuned unto the perfect Mind,
My heaven within my consciousness I find;
There hope and health and happiness abide,
To Christlike guests the portal opens wide.
Faith guards the door; no fear can enter in,
For truth and falsehood are not less akin.

My unity with good brings peaceful joy,
Free from the bitterness of earth's alloy;
It gives me power to think aright,—to know;
To heal the sick; to silence want and woe.
No thought of age or death can mar my peace,
For Truth unchangeable bids discord cease.

In God I have my being, move, and live,
And life eternal Life alone can give.
And thus, within my heaven, there is no room
For sense of loss, nor loneliness, nor gloom.
All-knowing, ever-present Love divine
Is there, and sweet companionship is mine.

Awakened from the dream of pain and sorrow—
No need to wait for heaven until tomorrow!
It is no distant place nor realm apart,
For heaven is here and now, within each heart.
But, precept upon precept, line on line,
Into the fulness of that Life divine
Must we press onward, as Truth lights the way;
More bright it grows, unto the perfect day.

SELECTED ARTICLES.

[W. C. Williams in *Baltimore* (Md.) *Star*.]

The healing through Christian Science is accomplished by the Mind that was in Christ Jesus. This is quite a different matter from the use of the unpurified mortal mind, named by St. Paul the carnal mind, which is nothing else than will-power. Christian Scientists claim that Jesus proved that there is no death; that life is eternal. Our critic says, "Death is an enemy. It robs the heart and the home. Jesus never came to reconcile men to death." Paul said death was an enemy, but an enemy to be overcome. Jesus said, "Whosoever liveth and believeth in me shall never die." It was not necessary to reconcile men to death when its powerlessness was shown.

As the work of Christian Science is the healing and uplifting of humanity, which it is steadily accomplishing, the charge that it is a contagion can only refer to the epidemic of thought it has created in church-members, whereby, according to the consensus of opinion of a congress of ministers held a short time ago in New York city, the church-members are demanding a higher, more vital and practical religion, and they go outside the church to find it. The works of Jesus were declared to be of Satanic origin, but that did not prevent him from continuing his campaign against Satan.

If Christianity is the truth as taught by Christ Jesus, then it is also Christian Science. If Christianity is the obeying of the commands of Jesus to heal the sick as well as to preach the gospel, in the way he healed and preached, then it is Christian Science. If Christianity is the following of the law of God, through the understanding of which all are lifted up to Him, overcoming sin and disease and dominating the material by the spiritual, then Christian Science is Christianity.

Christian Scientists do not deny nor denounce the noble sacrifices and unselfish work of both physicians and ministers, but they denounce as strenuously as our critic the evil results that too often follow from hypnotic suggestion, and the reverend doctor should know that Christian Science has nothing in common with it.

[Frederick Dixon in *British Medical Journal*.]

I wish to refer to your comment that "with the make-believe which denies the existence of pain and disease we have no patience." May I be permitted to say at once and without equivocation that neither has any Christian Scientist. The members of the medical profession have for centuries devoted their lives, have even often given their lives, to the struggle which has for its object the overcoming of disease and pain. No Christian Scientist who denied this would be worthy the name. The Christian Scientist has come to join in the struggle, to spend his life in pressing on to the same goal. Surely it would be unworthy of the physician to deny this, and unworthy of a great medical journal, however much it might discredit the means, to misstate the method.

Christian Science, then, does not teach that disease and pain have no existence in the ordinary sense of the word, but it does distinguish between an existence which is an expression of the absolute and one which is nothing beyond a subjective condition of the human mind. In other words, Christian Science is idealism pushed unshrinkingly to its ultimate and logical conclusions. It contends that pain and disease are unreal, inasmuch as they are no part of divine law; it admits that they have relative existence as a subjective condition of the human mind. "Sickness," writes Mrs. Eddy in Science and Health (p. 460), "is neither imaginary nor unreal,—that is, to the

Digitized by Google

frightened, false sense of the patient. Sickness is more than fancy; it is solid conviction. It is therefore to be dealt with through right apprehension of the truth of being. If Christian healing is abused by mere smatterers in Science, it becomes a tedious mischief-maker. Instead of scientifically effecting a cure, it starts a petty crossfire over every cripple and invalid, buffeting them with the superficial and cold assertion, 'Nothing ails you.'"

In attempting the demonstration of this problem the student of Christian Science relies on nothing but the understanding of divine Principle as taught by Jesus to his disciples, and in proportion to his power to grasp this, and not in any way in dependence on the will of man, will the demonstration be quickened or protracted. It is this fact which gives perennial force to that great saying of Gamaliel, "If this counsel or this work be of men, it will come to nought: but if it be of God, ye cannot overthrow it."

[Herbert M. Beck in *Commercial*, Pine Bluff, Ark.]

The relation of pain and disease to the whole human family is similar to that of sin. To one, a given temptation to sin presents an awful reality, and to him the possible unreality of that temptation is out of the question; but another through self-denial and a larger love has learned that the would-be power of the temptation is based on needless fear or on false promises of vindictive or sensuous pleasure, and to him the tempter is left without any power or reality of being.

Did the sick but know that there is to be obtained here and now a knowledge of God, good, which is a liberator from the bonds of disease, half of all human misery would disappear at once, for fully that proportion is based upon the false belief that God visits sickness upon mortals, or that it must run a course and possibly be found incurable. With the help of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, they can find the truth in the Bible, and the truth will make them free.

[J. V. Dittemore in *New York Mail.*]

In the course of an article in a recent issue of the *Evening Mail,* "some of the best-known clergymen and physicians in America" are reported as expressing a fervent, disinterested, and dispassionate desire to rescue the unsuspecting public from the rapidly increasing inroads of Christian Science. The average layman must be somewhat bewildered by the widely divergent arguments of these gentlemen. While it is true that they express absolute unanimity, so far as their desire to discredit Christian Science is concerned, they seem to have used perfect freedom of thought in selecting the standpoint from which they advance to the attack.

By way of illustration: My attention was recently called to a criticism of Christian Science in the form of an editorial in a prominent Hebrew newspaper, in which the members of that faith were warned against Christian Science on account of its "being based on and in fulfilment of the teachings of Christ." On the same day there appeared an editorial in an influential orthodox religious journal, warning their readers that Christian Science "denied Christ, and was wholly unchristian and untrue." Not long after this one of our most distinguished physicians declared that the religious influence and teachings of Christian Science were beautiful and inspiring, but that as a therapeutic system it was a dangerous delusion and a snare, notwithstanding the fact that a few days before one of the best-known clergymen had lauded its healing work as true and in fulfilment of the Scriptural promises, but had uncompromisingly condemned its theology as "the work of the devil."

When those who appoint themselves critics of Christian Science learn to leaven their zeal to destroy with a very small quantity of exact knowledge of the subject, they will find that the vast army which is being raised up from among the sick and sinning is the inevitable result of a philosophy which, when understood, is the very essence of consistency, compassion, and love—of true Christianity; and that its ministry is destined to bring to all mankind a greater measure of that peace which passeth all human understanding.

[Algernon Hervey-Bathurst in *Medical Times,* London.]

The teachings of the Master are what Christian Science upholds and practises, but these teachings do not merely substitute the word "spirit" for "matter;" they do, however, give the disciple or student a scientific reason for understanding and demonstrating that "it is the spirit that quickeneth; the flesh profiteth nothing," and that, as Mrs. Eddy has written on page 468 of Science and Health, "Spirit is the real and eternal; matter is the unreal and temporal." Christ Jesus healed the sick, reformed the sinner, walked on the water, stilled the tempest, and raised the dead, reversing so-called material laws because he was about his "Father's business;" because he was fulfilling God's law,—the only law; because he was demonstrating the power of Truth.

Christian Science certainly does not "inculcate any new doctrine," but it points its followers to Truth, which has been from all time, and which cannot be changed, think or say what we will. Jesus was the greatest exponent of Truth the world has ever known, and Christian Scientists are striving to follow his example; in fact, they soon learn that unless they do this they can by no means practise Christian Science. It may be said that the basis of Christian Science practice is to "let this mind be in you, which was also in Christ Jesus,"—to "know the truth" which makes men free, mentally, morally, and physically. The Master said, "He that believeth on me, the works that I do shall he do also," and Mrs. Eddy has declared and proved to the world that this statement is as true and as much to be demonstrated today as it was over eighteen hundred years ago. Now most Christian Scientists have doubtless possessed their Bibles for years; but it is only since commencing the study of Science and Health that they have been enabled to understand and apply in some measure the spiritual teachings of which the letter only had previously been familiar.

[John H. Wheeler in *Maryville* (Mo.) *Tribune.*]

Christian Scientists rejoice in every good deed, and under no circumstances do they malign or belittle the religious faith of another sect, neither do they seek to interfere with the method of any benevolent sect or society. They know that there is but one common foe for all to fight, and it is greater than any personality or number of persons. To the world, it is manifested in different phases of wicked personalities and their evil deeds. Christian Scientists desire to cast out this devilish element from the life of mortals, and save them to a life of truth and goodness. Constantly breathing forth the impulse of kindness and charity, wherefore should the world stone us for this holy purpose and the practice thereof, even though it accords not with another's beliefs. Any statements as to our religious convictions or practice that disagree with this are absolutely false.

[George Shaw Cook in *Joliet* (Ill.) *News.*]

Christian Science is not gnosticism nor Brahmanism as is claimed, but it is the restatement or rediscovery of primitive Christianity. The claim of Christian Science to

Digitized by Google

be a reinstatement of the theory and practice of Jesus and the early Christians, is substantiated by the fact that it is doing the works which Jesus said should be the evidence of true discipleship. Christian Science does not teach that disease is healed by denying the existence of the body, but on the contrary teaches that disease is healed by understanding what Mind really is. It teaches its students to wipe out the abnormalities and discords of mortal existence by understanding more of the immortal and harmonious reality of being.

[John L. Rendall in *Oskaloosa* (Ia.) *Herald.*]

From the Christian Science view-point the Principle of true mental, spiritual, or Christian healing is God. This Principle is absolute; it is the same Principle that was understood and demonstrated by Christ Jesus and his disciples and apostles. It is exact, scientific, adequate, and sufficient to the needs of humanity. Inasmuch as God is the Principle of Christian Science, the healing work which Christian Science accomplishes is necessarily a spiritual and not a material process. It is the manifested activity of infinite Mind, finding its legitimate expression through spiritual law. There is nothing of the "carnal mind" or so-called "mortal mind" in it or of it. It repudiates the supposition of mind, intelligence, or power apart from God, and in this it is absolutely consistent with the teachings of Scripture. Christian Science presents the undivided garment of Truth. It is not dependent upon will-power, upon the uncertain and erroneous processes or vagaries of supposititious human mind forces, but its activities are the manifestation of the one infinite God, besides whom there is none else.

Christian Science "denies matter" in the same sense in which the Bible denies it, and in this denial there is no repudiation of reality, but a positive understanding and declaration of that which constitutes absolute reality. Jesus declared, "Heaven and earth shall pass away, but my words shall not pass away." St. Paul stated, "While we look not at the things which are seen, but at the things which are not seen: for the things which are seen are temporal; but the things which are not seen are eternal." St. Paul also says, "Be not conformed to this world: but be ye transformed by the renewing of your mind, that ye may prove what is that good, and acceptable, and perfect, will of God;" again, "For bodily exercise profiteth little: but godliness is profitable unto all things."

The result of Christian Science, its effect upon the lives and characters of its adherents, its health-giving, peace-bestowing influence, is its sufficient justification with those who know what it has accomplished, and these results are permanent and preeminently satisfactory. Knowing the integrity of their motives and the purity of their desires, also being fully conscious of the intense practicability of Christian Science, its adherents rest in the assurance that is given in Jesus' words, "By their fruits ye shall know them."

[R. Stanhope Easterday in *Terre Haute* (Ind.) *Star.*]

Christian Science is a recapitulation of the teachings of Jesus, and its line of argument and methods of treatment are identical with his. His treatment of economic and social questions was a reasonable one, and Christian Scientists to-day follow out the same rational line of procedure in handling such matters. Christian Science has to do with the Christ-Mind or the Mind of the Father, and the successful Christian Scientist subjects his own human will to the divine, and thinks and acts under the supervision of the Mind "which was also in Christ Jesus," the Mind which never errs and never wills ill to any, the Mind which knows and includes all good and blesses all alike in the working out of its divine behests. The individual thus dominated by good alone and subject only to the will of the Father is in a position to think and act intelligently, just as the mathematician or musician imbued with his basic teaching fears neither error nor discord and recks not the opinion or the "thoughts" of any.

In this line of metaphysical reasoning there is no mystery except the "mystery of godliness," made clear in the Scripture. Mrs. Eddy's text-book on Christian Science, "Science and Health with Key to the Scriptures," is a recapitulation of the teachings of Jesus and a scientific guide for the demonstration thereof. It contains a clear, concise exposition of Scriptural truths which enables the many thousands who constitute the Christian Science following to grasp the plan of salvation as worked out in example by our Master, and to make practical his teachings in the healing of their diseases and sins and in solving the knotty problems that come up in the experience of all.

[Alfred Farlow in *Brattleboro* (Vt.) *Reformer.*]

Our critic speaks of the "true" in Christian Science "which has done good." May we call attention to the fact that, whatever else may be said about Christian Science, it is consistent, and he who has found even one point in its teaching that he considers "true" and "good" may rest assured that as he continues to study the Christian Science text-book he will discover more and more that is "true" and "good," and eventually it will be unfolded to him that there is nothing in the book that is not true and good and that every statement contained therein is entirely consistent with every other statement contained in the book. Such is the conclusion which I have reached after many years of careful study.

A consistent Christian Scientist has no desire to "eliminate the whole medical profession."

While Mrs. Eddy makes no pretense that Christian Science is in keeping with the more material schools of philosophy and science, it is well to note that Christian Science is in perfect accord with the science of the Scriptures. There is something to know about God and His creation and the relationship that exists between creator and creation. Moreover, this something is wholly spiritual and is not in accord with the evidence of the material senses, but it is not on that account any less entitled to the name science, for a knowledge of God which is true is on that account scientific, and is therefore entitled to the name science.

THE MANUAL.

The 82d edition of The Mother Church Manual, containing all of the recent changes, has been issued and is now on sale.

Subsequent editions of the Manual will be issued when new By-laws are made or when important changes are made in By-laws already in effect; and due notice of each new edition will appear in the *Sentinel.*

Address all orders to Allison V. Stewart, Publisher, Falmouth and St. Paul streets, Boston.

The birth of every loving thought, unselfish desire, or noble impulse, commemorates the birth of Christ, and makes for us a Christmas day.—JOY E. R. ZINT.

Bicknell Young, C.S.B., The Republic, 209 State street, Chicago, Ill.

Obedience to the Church Manual [Article XXXII., Section 4] requires that each branch church shall call upon the board of lectureship annually for one or more lectures.

Applications for lectures from branch churches or societies advertised in the *Journal,* should be made on the initiative of the church or society, through its clerk, and sent to the lecturer whose services are desired, at the address given above. It is desirable that applications for the coming year should be sent in as soon after July 1 as convenient.

THE SECOND COMMANDMENT.

IN studying the Ten Commandments, as set forth in the twentieth chapter of Exodus, we are given at the start the reason why we should acknowledge the divine authority which demands our obedience, "I am the Lord thy God, which have brought thee out of the land of Egypt, out of the house of bondage." The second commandment is clearly an amplification of the first, and it inevitably directs thought away from any tendency to material worship, and lifts it toward the apprehension of spiritual realities. No thinker would deny that idolatry has a degrading tendency, wherever practised, or that spirituality has an elevating influence upon any people whose worship is characterized by it. In other words, we see that obedience to God's law is for our good always, and that this obedience is never restrictive, but leads to the largest liberty.

It is very evident that we must understand God in order to understand His requirements, and this understanding demands our awakening to spiritual sense. The tendency of the human mind is to attribute to God its own qualities, which are admittedly imperfect; as, for instance, jealousy, to which reference is made in the second commandment. It sometimes happens that people are greatly puzzled by the statement, "I the Lord thy God am a jealous God." Strictly speaking, this word is synonymous with "zealous," and it is so given in some dictionaries, where it is also defined as "vigilant, solicitous, watchful." The other definitions, "apprehensive," "suspicious," "intolerant of rivalry," are secondary, but they express the prevailing mortal concept. We should of course see at once that God could never manifest or cherish any quality which would be wrong in us. In "Miscellaneous Writings" (p. 259) Mrs. Eddy says: "Whatever appears to be law, but partakes not of the nature of God, is not law, but is what Jesus declared it, 'a liar, and the father of it;'" therefore God's jealousy must mean the zealous, watchful care with which He guards His children from every sense of evil,—from sin, sickness, or death.

We should never forget that when the Decalogue was written a corporeal concept of Deity seemed to prevail over the spiritual, a concept which has unfortunately come down to our own day, and which fails to discriminate between the divine justice that wipes out all sense of evil, and the personal punishment of the wrong-doer. A clergyman, in discussing with a young student of Christian Science the subject of healing, contended for the law of heredity as he held it to be expressed in the second commandment. The Scientist tried to show him that this passage referred only to those who hate God, good, and who were therefore not under the protection of Truth and Love. She also pointed to the wonderfully inclusive promise of "mercy" (healing) unto the "thousands" who love God and keep His commandments. The good man acknowledged that this was a new view of the subject to him, as he had never supposed this commandment referred in any way to healing, but that this view had much to commend it. He was also told that Christian Scientists seek to obey the second commandment by refusing to "bow down" to any images of mortal thought,—beliefs of sin and sickness,—or to serve these false gods; that they strive to obey the command, "Thou shalt utterly overthrow them;" and that they rely upon the promise, found in the twenty-third chapter of Exodus, "I will take sickness away from the midst of thee."

The second commandment, spiritually understood, is a life-giving statute, revealing the all-wise provision of divine Love, the vigilant care of infinite Mind, which leads away from the bondage of the senses and of sense worship "into the glorious liberty of the children of God."

ANNIE M. KNOTT.

A QUESTION OF RESPONSIBILITY.

HE was on his way to the station, and fell in with the deacon, who said, "This hot day will be rather hard on Mary B——. She has always been frail and sickly, poor girl, and they have had to doctor her ever since she was a baby. She is all they've got, and it would be hard for them to lose her; but, do you know, may be it's needed. Jim is a member of our church, but I don't believe he has attended a service for fifteen years, while his wife has been given to parties and fine clothes and all the rest of it, as though

Digitized by Google

there wasn't anything else to live for. It don't seem right for a professed Christian to turn down the church like that."

They had reached the train, and as the listener mused upon the matter on the way to town, he could but think how Christ Jesus attracted and linked the people to his ministry by his healing works, and he wondered if it had ever occurred to the deacon that the church is not altogether irresponsible for the lapse into worldliness which he so heartily deplored. Such a state of spiritual indifference is true of many today, and even when brought to the extremity of human need, as in "Jim's" instance, they do not return to their Christian allegiance, but the rather go hunting the world over for some more favorable climate or some famed specialist who can give promise of relief. How is it that they do not "cry unto the Lord" in their trouble, that they may be saved from all their distresses?

In trying to answer this question we must not forget the relation of habit to conduct. The average man does for the most part just what his boyhood education and the customs of his clan impel him to do, and it is therefore fair to ask whether if the deacon's friends had always been taught that spiritual thinking and living have immediately to do not only with one's health but with the harmony and protection of the household, and that when assailed by a disease which one does not seem able to resist his pastor or some other earnest Christian brother is to minister to him, in keeping with their authorization "to preach the kingdom of God, and to heal the sick,"—if such a thought had been established and such a habit of looking to divine Truth and its exponents for succor from every ill had been acquired, would "Jim" have separated himself from his base of supply, would he have ignored the preacher and stayed away from church, had he understood that to know God means life and health and peace now as well as in the indefinite future? Surely not. Every consideration of self-interest and family affection as well as of Christian privilege and duty would then have prompted him to maintain his religious activities, and his troubles might thus have been made to serve a purpose in impelling him to seek health and happiness at the source of all real good.

So long as Christian ministers insist that it is not their business to heal the sick, and thus beget in their parishioners a sense of dependence upon non-spiritual means and ofttimes upon non-spiritual men for relief from human suffering, how can they escape the responsibility when those to whom they have preached turn not to God but to materiality for succor in a trying hour? The loss of active interest in the church is rendered not only explicable, but inevitable, in so far as its teaching leads men to rely for help, in their human struggles, on any other presence and power than that of God; and here again the significance of spiritual healing to the spiritual life, both of pastor and people, is made manifest, together with the consequent importance of the fact that in its restatement and demonstration of this Christ-healing Christian Science has come to awaken a higher thought of Christian privilege and duty, and so to bless all would-be Christian people.

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Boston, Mass., June 28, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader:—In nothing does your divine authority as a Christian teacher and Leader seem to me to be more apparent than in the timeliness of your acts and public utterances. I can see that it is your scientific adjustment to the gentle influences of Mind which confirms your right to be the Leader of this mighty Cause. It is a great thing to have learned, as you have, to work as God works, by exchanging a finite computation of days and hours for the chronology of an eternal now.

I cannot tell you how refreshing and inspiring are your statements about body, republished in last week's *Sentinel*. You must have known that we needed just this to confirm our faith. For one thing, it effectively answers the hoary canard, repeated every so often, that you have changed your teaching radically on the essential and fundamental points of Christian metaphysics. And, almost as though it was designed to fit in with your article (as indeed it was, in a sense), comes the citation in Mr. Moses' letter in the same issue of the *Sentinel*, to your words on pp. 60 and 61 of "Miscellaneous Writings," in answer to the question, "If mortal mind and body are myths, what is the connection between them and real identity, and why are there as many identities as mortal bodies?"

It is important to our growth as Christian Scientists that we have a clearing up of abstractions. Thank you, dear Mrs. Eddy, for this "word in season," for your fidelity, your watchfulness, and your sublime patience.

Ever faithfully yours,
WILLARD S. MATTOX.

[Telegram.]

Toledo, O., June 27, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—We send loving greetings, and express our sincere gratitude to you for restoring the original tunes to your hymns. Hymn 195 was sung at this morning's service. Lovingly and gratefully,

Congregation of First Church of Christ, Scientist.
C. B. HADDEN, *First Reader.*

St. Louis, Mo., June 15, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—We, the members of the board of trustees of Third Church of Christ, Scientist, in St. Louis, Mo., desire to convey to you our sincere love and gratitude for all you have done for us and for humanity throughout the world and for all time. Our little branch church is young in years, but we feel that under divine guidance, and in obedience to your teachings so far as we comprehend them, we have much to be thankful for; and we wish to express our loyalty to you, revered Leader, and to the sacred Cause of Christian Science. With the hope that we may be accounted worthy to follow in your footsteps, even though "afar off," we are

Lovingly and loyally yours,
BOARD OF TRUSTEES.
Third Church of Christ, Scientist, in St. Louis, Mo.

Springfield, Mass., June 21, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—My heart goes out in gratitude to you for having established the board of lectureship. As an usher in your branch church here, it was my privilege last evening to show a man a seat. After service I learned in conversation with him that he had heard of Christian Science for the first time by attending our lecture given by Professor Hering, the previous Sunday. So deeply was he impressed with the truth voiced by the lecturer, that "Mind is supreme," that he had come here again to hear of this wonderful truth which makes men free. He said to me, "I have been a better man all this week for having heard that lecture; and not only that, but I have felt better toward my fellow-men." What a loving tribute from a stranger to the truth of your statement, "A grain of Chris-

Digitized by Google

tian Science does wonders for mortals, so omnipotent is Truth" (Science and Health, p. 440).

I am very thankful to God for my own healing of an organic disease of some fifteen years' standing, also of the liquor and tobacco habits; and to you, dear Leader, for the uplifting truth of Christian Science. Before coming into Science, over three years ago, I was wanting in veneration, and now I know that because God is, I am. Daily shall I strive to serve you in the only way you ask all your loyal followers to do.

'Tis in deeds we serve the Master,—
Words are idle empty prayer;
All our Christian life a pretense,
If the deeds are wanting there.

Your loving follower,

JAMES R. MILLER.

Fairbury, Ill., May 6, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader:—At the annual business meeting today, of First Church of Christ, Scientist, Fairbury, Ill., we, the members, desire to send to you our love and gratitude as a united and harmonious body. Although our church is small in numbers we realize today more than ever that we are rejoicing in strength made manifest through the knowledge and understanding of Christian Science, as given in Science and Health and your Christian Science periodicals. As a proof of our appreciation we are sending to the publishing house fund the collection taken today. It was also resolved to make all necessary repairs needed upon our church edifice and grounds, knowing full well that God is the source of our supply and will provide for all our needs.

From our hearts we thank you, dear Leader, for the many blessings we are realizing through the knowledge of divine Principle as shown us by your teachings.

Your loving followers,

MATTIE H. DUBOIS, *Clerk, pro tem.*
MRS. H. M. SPENCE, MRS. JANNETT PHILIP,
MRS. M. V. COOLEY, MRS. T. TALBOT.

Red Wing, Minn., June 9, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Every day I feel more grateful to you for Christian Science, which is leading the whole world out of the bondage of sin and suffering into health and peace. I am one of a great multitude who have come out of "great tribulation," and have been healed through the Word, as revealed in your precious book, Science and Health. Truly "the Word was God," "who healeth all thy diseases." Before I knew anything of Christian Science, the Bible was to me a sealed book, and I felt as if I was "without God in the world;" but Christian Science has unlocked the hidden treasures and revealed the pearl of great price. I owe you, dear Leader, an endless debt of love and gratitude, and words are a feeble way to express it, but I am striving daily to be worthy the name Christian Scientist, and to follow as you lead the way.

I would like to add a word in regard to our work here. My sister and I came to Red Wing in February, 1909. We found a little band of earnest workers here, and March 16 we organized as a Christian Science society with twelve charter members, so we are now a branch of the true vine. Three of this number drove in ten miles from the country to unite with us. We realize that only as we are in unity and harmony with all that pertains to the progress and the welfare of our beloved Cause, are we a living branch that will bring forth much fruit.

Yours with much love,

GRACE THORURN.

[Telegram.]

St. Louis, Mo., June 7, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Greetings to you, our beloved Leader! We, the ushers of First Church of Christ, Scientist, in St. Louis, wish to express our loving fidelity in our work of standing porter at the door of this our spiritual home. The wish to reflect divine Love and fellowship, as taught by you in Christian Science, is ever uppermost in our consciousness. Our spiritual work in our ushers' meetings before services embraces the thought of reverence and loving loyalty to our Pastor Emeritus. It is our prayer that we may be in all sincerity your followers in truth and love.

USHERS OF FIRST CHURCH.

Garden City, Long Island, N. Y., June 9, 1909.

Dear Mrs. Eddy:—Many times I have felt a strong desire to write and express my love for you and my loyalty to the Cause for which you labor so bravely, but I have hitherto refrained, knowing that your hours are full with the great work of leading the world away from materiality to Spirit. Your letter in yesterday's *Tribune* impels me to write you, although words are inadequate to express what a blessing your guidance has been to me. Through your teaching the Bible is becoming an open book. In many instances I have learned that what I once looked upon as grievous trials I now know to be but stepping-stones to harmony, and my blessings are commensurate to my courage in overcoming self. This I know can be done only by constant striving to be as a little child.

Believe me, in deep gratitude for Christian Science,

Faithfully yours,

HARRIETTE STENT CLARK.

Chicago, Ill., June 14, 1909.

Beloved Leader:—I want to thank you for your words, words that gave me a sense of peace and power,—"I do not regard this attack upon me as a trial, for when these things cease to bless they will cease to occur." Often these words from your "Miscellaneous Writings" (p. 389) have given me strength. "O make me glad for every scalding tear, for hope deferred, ingratitude, disdain!" but these last words from you meant much to me, more than I can tell. I thank you.

With love,

LULU A. MILLER.

Bakersfield, Cal., May 19, 1909.

Beloved Leader:—The full extent of what you have done for the world I cannot realize, but I neglect a privilege so long as I delay to send you an expression of loving gratitude for what I can as yet perceive. In trying to live a life of love, from a better understanding of the Bible, through your noble work, so much help has come to me from the pages of Science and Health, and from the truth reflected by your loyal students, that every day I am more and more thankful to you. My words had best be few; my hope is to let my acts attest my heartfelt desire, that is, to be worthy to call myself

Your humble follower,

MARY BLANCHE WINSER.

Kansas City, Mo., June 22, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—With the deepest gratitude I thank you for the good, the happiness, the understanding of all that is right and Godlike which you have brought into my life. May God continue to bless you tenfold, is the prayer of one who is happy to abide by your every wish.

Faithfully yours,

PAULINE N. BOLLES.

THE LECTURES.

SOUTHPORT, ENGLAND.

The Town Hall was well filled on Tuesday evening [May 4] when Francis J. Fluno, M.D., gave a lecture on Christian Science. The assembly included many invalids interested in the subject, and a large number of Liverpool and Manchester Christian Science adherents. Dr. Fluno was introduced by Dr. Walter Wilding, who in his opening remarks said the subject of the lecture was one of great importance, and was of increasing interest in England, especially so in the north. All classes of people by this time knew something about it, and the work already accomplished in this country was causing people of various and differing shades of thought to give it some attention. To many it was a startling, unique, but doubtless a prophetic sign of the times in which they lived, that for the first time in the history of the country two medical doctors were met on one platform—of one accord—for the sole purpose of giving some information on the subject of Christian Science. Many years ago the lecturer practised medicine on the other side of the world, under the laws of the United States, and he himself in this country, under the laws of the United Kingdom. Each of them came to a place in life's experience when it was found impossible to contain the "new wine"—Christian Science—in the "old bottle" of medical science. As Christian Scientists they went hand in hand with orthodox practising medical men in lending the best efforts of their lives to the relief of mankind from the stronghold of disease. They made a common cause with them. Their aim was the same, but they differed widely in their methods. Before abandoning medical practice he had witnessed the healing through Christian Science prayer of several cases of otherwise incurable disease. His daughter suffered from tuberculosis in both hip joints and in the lungs, and had rapidly wasted away until little remained but skin and bone. Every possible material means had been tried, but nothing arrested the downward progress. When the grave seemed terribly near, help was sought in Christian Science, and all things became new—splints, couch, spinal carriage were discarded, pain ceased, and normal conditions gradually appeared. Every breath his daughter had drawn for more than eight years had been due solely to the understanding of Life learned through Christian Science. Witnessing from the criticizing standpoint of a doctor in actual practice the healing power of Christian Science in this and other equally incurable cases of disease, compelled him to make a careful study of the "new, yet old way," until he became convinced that it was the only true way, and also that it was the same which Jesus practised and left for them as a glorious heritage. He ceased entirely to practise medicine nearly eight years ago, and had never regretted taking the step. His whole desire now was to become a Christian Scientist, and so bring this Christ-healing into the lives of others.—*Southport Visiter.*

BANGOR, ME.

An audience which nearly filled City Hall listened to a lecture on Christian Science Tuesday evening [May 11] by Bliss Knapp of Boston. The speaker was introduced by Gorham H. Wood, First Reader of First Church of Christ, Scientist, who spoke as follows:—

Jesus Christ understood God, and he showed this understanding in words and in works that shall never pass away. What was the purpose of his marvelous career? Does it have any practical bearing upon our lives in this day and generation? Did he set forth an impossible or a possible example for us? These are vital questions. Laying aside every other consideration, let us, with open minds, listen this evening to an exposition of this subject—the present-day possibility of understanding God.

Bangor Commercial.

GOSHEN, IND.

The lecture on Christian Science by Bicknell Young of Chicago, at the Jefferson Theater Tuesday evening [May 11], was listened to by an attentive audience that very nearly filled the theater. Mr. Young was introduced by the Hon. E. A. Dausman; who said in part,—

I know but little of the system called Christian Science, but "Christian" means "pertaining to Christ." We all believe in the Christ, nominally at least; but the trouble is, the masses have never understood the lessons he taught at the sea of Galilee. After two thousand years we are just beginning to comprehend the true meaning of the teachings of Jesus. If the fundamental truths for which he lived and died could be vitalized in the hearts of men and women they would save the world from many errors. "Science" means "knowing accurately;" not vaguely, not dimly or looking through a glass darkly, but clearly and distinctly. This is science. Christian Science, then, should mean accurate knowledge of the teachings of Jesus, and this knowledge we should be anxious to acquire.

Goshen News-Times.

WATERTOWN, S. DAK.

A well-attended and highly-instructive lecture was given here Tuesday evening [May 11], under the auspices of Second Church of Christ, Scientist, of this city, by Rev. Arthur R. Vosburgh. The lecturer was introduced by the Hon. J. W. Martin, mayor of the city, who said in part,—

The world owes most for its advancement to the liberal thinker, for the unbiased, unprejudiced, liberal, broad-minded Christians are the most helpful in lifting up humanity, whether as an individual, a society, or a church. Whether in religion or business, narrowness in the individual makes a narrow community or church, and I believe those who conscientiously seek the truth will find it; I believe he who follows the dictates of his conscience will be honest with himself and just to his fellow-man, and will come nearest to the ideal of the creator. I can only judge the worth of your creed in knowing that you all seem to be honest seekers of the truth, and knowing from an acquaintance of years with your members here that they are a high-minded Christian people.

Watertown Public Opinion.

BETHLEHEM, PA.

Prof. Hermann S. Hering lectured on Christian Science on May 18 at Loskiel Hall, to a large audience. He was introduced by Horace DeY. Lentz, attorney-at-law, of Mauch Chunk, Pa., who spoke in part as follows:—

As I understand it, Christian Science answers the question, Who is the true Christian? by asserting that he is a Christian who is Christlike, he who has that Mind in him which was also in Christ Jesus. Christian Scientists, by demonstrating that the Christ-Mind is an ever-present power, and attainable by all of God's children, unfold a gospel with healing in its wings, and revive the days of heaven upon earth.—*Correspondence.*

TESTIMONIES OF HEALING.

Five years ago last Thanksgiving, Christian Science came to our home in the darkest hour of our lives. My husband at that time had been intoxicated for a month, having been a slave to this habit since he was a young boy,—about thirty years. He was profane in language, a user of tobacco, a gambler, with all the attending evils of drink, and we were financially ruined. We had a valuable property, but had borrowed and mortgaged till we could get no more. My husband had taken a well-known cure, and all had been tried for him that drugs could do. Through a friend, Christian Science help was called for when he was in such a condition that he literally knew nothing. I did not know a practitioner had been called until the following day, and I had no faith whatever in Christian Science, but from that night my husband has never touched liquor nor wanted it; and one by one the other sins have been destroyed, the bad habits have disappeared, the ills of the flesh have vanished, till today he is clean in soul and body. The financial indebtedness is also wiped out—we "owe no man any thing" but love; joy has taken the place of sorrow, health of sickness; we have love instead of hate; prosperity instead of poverty; gladness instead of misery; peace instead of discord, singing instead of mourning; praise instead of cursing. This blessedness has all been worked out through the knowledge of Christian Science, which is the Christ-knowledge of God, man, and the universe.

When I saw the efforts which my husband was making toward the right, I at first read to him from Science and Health from a sense of duty, but as soon as I laid aside my prejudice the light began to dawn, and the Bible, which I had studied and dimly taught for years, became illumined by the Spirit of truth. As I read to him the Scriptures thus illumined, our hearts would overflow with joy, and we would exclaim, "Is it not wonderful!" We love Christian Science better than anything else on earth, for it teaches us of an ever-present God, always good, always Love, sending no evil to His little ones, but hiding and sheltering them in His omnipotent care. For this wonderful healing, and the transformation in both our lives, we "praise God, from whom all blessings flow," and our hearts are filled with gratitude to the dear Leader, Mrs. Eddy, who has shown us through Science and Health this highway provided for the people of God.

Written in love of the Master, who said, "Come unto me, all ye that labor and are heavy laden, and I will give you rest."—Mrs. Etta M. Ousley, Austin, Minn.

I feel that it is my duty to give testimony for the many blessings I have received through Christian Science. It is about twelve years since I first became interested in its teachings, through the healing of my mother of chronic stomach and bowel trouble. Since that time myself and children have relied upon Christian Science.

One of the most beautiful demonstrations I have ever witnessed was in the case of my eldest boy, then eight years of age. He was taken with severe pains in his head and vomiting, a condition which lasted for some hours and was followed by most alarming symptoms and unconsciousness. A physician who was called in to make a diagnosis, after a careful examination pronounced it a severe case of spinal disease, and said that all we could do was to keep him quiet and make him as comfortable as possible, for he did not think the child could last but a few days. He also said that if anything could help him it would be Christian Science. A Christian Science practitioner then continued with the case, and when consciousness had been restored it was found that the child's left side seemed to be lifeless; but this, with many other symptoms, soon disappeared. In eight days he was up and around the house, and in six weeks he was able to attend school again. It is now four years since his healing and he is today a picture of health. I cannot find words to express my sincere gratitude to God, and to our beloved Leader, for this blessed truth.

Mrs. Laura C. Horan, San Francisco, Cal.

When my little daughter was about two years old, we went to visit a lady in a city near our home. The next morning after our arrival, I took the little one up to dress her, when to my amazement she seemed entirely helpless and would have fallen had I not caught her. Thinking I must be mistaken, I tried to have her stand again, but with the same result. I then realized there was something seriously wrong with her. I had only a slight understanding of Christian Science at that time, and the lady whom I was visiting had still less, but I had witnessed some wonderful healing in Science and thought I would try to treat her myself.

The child, however, continued to grow worse, and realizing that I had not enough understanding to do the work, I asked for help from a practitioner. She treated the child for a few days, but as I intended to return home, I thought it best to secure treatment from a practitioner in the city where I lived, as I could more easily communicate with her. I returned to my home on the 26th of October, and immediately asked for help. The following day we could see a change for the better in the little one. She continued to improve, and one eye, which had been seriously affected, gradually became normal; she began to talk more distinctly, and in about two weeks after I asked for treatment she began to stand on her feet a little. By Thanksgiving day she was running across the floor, almost as well as usual. She continued to improve rapidly, and soon was entirely well. This was four years ago, and she has remained well ever since, with the exception of a few ailments supposed to be peculiar to children, which have all been met through Christian Science.

I feel very grateful to God, and to Mrs. Eddy, who has shown us how to find out more about God.

Mrs. May O. Van Houten, Butte, Mont.

For eight years I had been under the care of specialists for throat and lung disease; had spent one winter South, and had been told that I could not endure another winter in this climate. I was very much discouraged, and decided to try Christian Science, although I had very little faith that it would help me. I went to a practitioner, and was healed of the throat and lung affection in a short time. It is nearly eight years since I began the study of Christian Science, and they have been the happiest years of my life. I have had some struggles with error, and have yet much to overcome, but I know that I have found the right path, the way that leads to life eternal. I am grateful to all who have in any way helped me, and I thank God daily for the beautiful life of our Leader, who has taught us how to understand this truth that makes free.

Marion L. Fuller, Bradford, Pa.

[Translated from the German.]

Heartfelt gratitude impels me to testify to what Christian Science has done for me. After eating some fish I was taken with terrible suffering, which to sense seemed to be poisoning. Having been freed from many ills in the three years since I came into Christian Science, and having been healed of a disease from which I had suffered for ten years, I dragged myself to the kind practitioner who had helped me many times through her understanding of

Digitized by Google

God's power and love. I told her about the condition I was in, and she treated me. When I left her an hour later I was well, without pain. I was helped in this quick way by the understanding of the omnipotence of divine Love, and I thank God, and our beloved Leader, Mrs. Eddy, with all my heart for this healing truth.

FRAU M. KIRSCHKE (née v. BRONEWSKI), Berlin, N., Germany.

About two years ago I had a small growth appear on my neck. It was not at first painful or troublesome in any way, but at times I had the most intense fear of what it might result in. About a year after the growth first appeared, it began to enlarge rapidly and was very painful. I immediately asked for help in Christian Science, and in the first week's treatment all fear and sensitiveness left me. I felt positive that Christian Science would completely heal the disease, so I called the attention of my family to it, wishing them to see and acknowledge the healing. In the second week's treatment the healing was complete, and I so wrote the practitioner. Today there is not even a scar to indicate that there ever was a disease. I thank God for Christian Science, and feel the greatest love for its Discoverer.

MRS. FRANCES WILKINSON, Milwaukee, Wis.

I was under Christian influence from childhood, and united with an orthodox church when a young woman, becoming an earnest worker in the Sabbath School and a religious society. As the years passed, however, I became dissatisfied; something, I knew not what, was lacking. While I believed that the Bible promises of healing, and Jesus' commands to heal, were intended for all time, I accepted the belief that for some unknown reason Christian healing had been allowed to lapse, and in my work I avoided passages from the Bible which contained such promises and commands. I had heard of Christian Science, but was very much opposed to what I mistakenly believed it to be.

Through the healing of my sister, my mother and she became Christian Scientists, and my own thought of Christian Science was changed. Occasionally I read the Lesson-Sermons with them. At that time the International Sunday School lessons were used in the Christian Science Sunday Schools, and in preparing my own lessons for teaching in an orthodox Sunday School, I found myself depending more and more upon the *Christian Science Quarterly*. After some months I borrowed a copy of Science and Health, my husband reading it with me. Before we returned the book my husband had quite a severe attack of illness. We read Science and Health most of the time, and in three days he was much better. Suddenly he again became very ill, and grew rapidly worse, so that in a few hours the symptoms were very alarming. As he partially roused from the stupor into which he had fallen, I told him we must have help and asked which he preferred,—Christian Science or a physician. He replied that we had started with Christian Science, and that he "would like to see it through."

It was a cold, dark night, but I drove to the nearest village and telegraphed to a practitioner. Soon after my return my husband had a sinking spell, when I thought he was dying. My first impulse was to use stimulants, but immediately the thought came that as we had sought divine aid, we should rely upon it entirely. As I read aloud from Science and Health he revived somewhat, but my own fear was still so great that I felt condemned because I had not called a physician. I, however, continued to read, sometimes aloud, until near morning, when my fear vanished and I fell asleep. Upon awakening I found a decided improvement had taken place, and by noon my husband was well. The next day he drove to the city, twelve miles, and home again, experiencing no bad effect, although it was cold March weather.

Since that time, nine years ago, Christian Science has been our only physician, and many discords have been overcome. While I am grateful for the physical healing, I am more grateful for the better understanding of God and the Bible which I have gained through this teaching. I am very grateful to our Leader for what she has done and is doing for the good of mankind, and each day I appreciate more her pure, unselfish life.

ELGIVA K. STEWART, Samaria, Mich.

Having received so much help and encouragement from the testimonies of others, as to what Christian Science has done for them, I thought my experience with it might perhaps help some one else. For over three years I was under the care of a prominent physician in this city, for a trouble which he and a specialist said was gall-stones. Gradually I was growing worse, until they both said there was no relief for me except through an operation. I then turned to Christian Science for help, and one treatment by a practitioner took away all the pain and soreness in about twenty minutes. That was on the 11th day of June, 1907, and I have had no indications of the disease since; nor shall I, for the work of divine Love does not have to be done over. I have also been able to overcome bowel and stomach difficulties, of nearly twenty years' standing, that medicine had utterly failed to relieve, and have been helped in so many other ways that I have no words to express fittingly my gratitude to Mrs. Eddy, and to those who helped me by words and acts of encouragement to get an understanding of Christian Science.

B. MARVIN, Chicago, Ill.

I write to express my gratitude for what Christian Science has done for me. About five years ago I was healed of a severe bowel disorder, from which I had suffered for more than twenty years. I was also healed of rheumatism and neuralgic pains, heart disease, etc., while reading Science and Health. While I am very grateful for the physical ease which Christian Science has given me, more beautiful than all is the spiritual uplifting, the sweet communion with the ever-present One, our Father-Mother God, whom to know aright is life eternal.

I am striving to live my gratitude, as words are inadequate to express what the heart feels. I am very thankful to Mrs. Eddy for giving us this understanding of God.

MRS. GEORGE J. SMITH, Kinston, N. C.

In April, 1904, I suffered from a paralytic attack in one arm, and a complete breakdown from worry and overwork. For nearly three years the periods of depression and mental anguish made life a burden to me and to my family. After trying specialists, a rest-cure, change of scene, and massage, all to no avail, I was led to Christian Science through a sister, who investigated it in the hope that I might be willing to try it. She was so greatly benefited that I asked for treatment of her practitioner, though up to this time I had been most violently prejudiced against it. With the first treatment I was wonderfully helped, and though not free from physical suffering, I found myself singing for the first time in years, and the clouds of darkness seemed to have rolled away. My understanding of Science and Health is as yet very imperfect, but through the help received I have enjoyed such health and happiness for the past eighteen months as I never knew before. I am indeed grateful for this healing truth.

MARY M. BRATTEN, Snow Hill, Md.

Digitized by Google

I wish to give my testimony to show what Christian Science has done for me. About seventeen years ago my only daughter, then but seven months old, was afflicted with an abscess on her neck, and her mouth was so sore that she refused to eat or drink. She cried almost incessantly, and I was advised to see a Christian Scientist. I had no knowledge of Science, and had never even heard of it before, but I felt a great deal of confidence in the practitioner whom I went to see, because she treated me so kindly. When we first got there the baby was crying, but after the lady had said a few words of comfort to me and given the child a treatment, she ceased to cry and took her food, which she had refused before. The baby was healed within one week. I was also healed of all fear and anxiety, and have ever since been enabled to overcome the sense of disease, poverty, and all kinds of error in my home. Words can never express my gratitude to God for Christian Science, and to Mrs. Eddy, our dear Leader.

MRS. WILHELMINA SETZER, Oakland (East), Cal.

Over three years ago, when I was living in Elk City, Okla., I was taken down with kidney disease in its worst form. I had three of the best doctors there, and they said I could live but a few days longer. I had been treated by a Christian Science practitioner in two previous illnesses and was healed in both instances, so as soon as I could find the address of a practitioner I went to see her, and was healed of this disease as well as several other ailments, one of which was baldness of long standing.

The physician said I had organic heart disease, and I also had neuralgic and catarrhal trouble so that I was taking an opiate, besides a powerful drug for my heart; by the doctor's advice I was also drinking whisky. All this is awful to think of, but thanks be to God and to Christian Science I am a free man today. I love God with all my heart, and with all my soul, and with all my mind. I was a sufferer for thirty odd years, but now I feel like a new man, and I am grateful to God for it; also to Mrs. Eddy as the Discoverer of this blessed truth.

WEBSTER FULLER, Bransford, Tex.

I have been helped and encouraged so many times by the testimonies given in this periodical, that I wish to express my gratitude for Christian Science and for the *Sentinel*, which I enjoy very much each week. It is about twelve years since I have used any medicine. Prior to this our family always had something the matter, and were always drugging, but since we have resorted to Christian Science our ills are less frequent and more quickly overcome. One thing in particular for which I have reason to be thankful was the harmonious condition at the birth of our baby. I am very grateful for having been so faithfully helped through it all,—thankful to God, and to Mrs. Eddy, who has shown us the Principle that, when rightly understood, heals all our diseases.

MRS. BERTHA P. JACOBUS, Boulder Creek, Cal.

I wish to express my gratitude for the innumerable blessings which I have received, and am receiving daily and hourly, through the application of Christian Science. It is a great comfort to know that God is ever present, and that all we have to do is to call upon Him and He will answer us. The psalmist says: "For he shall give his angels charge over thee, to keep thee in all thy ways. They shall bear thee up in their hands, lest thou dash thy foot against a stone." How often have I had proof of the truth of this promise. I have been healed of acute lung disease in the last stages, of neuralgic trouble, and of colds that were sometimes of several months' duration. Two years ago I was healed of a very bad felon. My friends advised me to go to a surgeon. They said that even if he did take off the one finger, that would be far better than having the whole hand amputated, which they were sure would be the ultimate result if I continued to take the risk of Christian Science treatments. But the truth, which is "sharper than any twoedged sword," was the only surgeon, and the error was destroyed, leaving the hand whole and perfect.

These physical benefits are, however, but the least of our blessings received in Christian Science. They do not compare with the joy and love and peace that fill our hearts when we learn, at least in part, to have that Mind in us "which was also in Christ Jesus."

HENRIETTA O. Ross, Chicago, Ill.

[Translated from the German.]

In the summer of 1908 I was taken ill with a severe attack of throat disease, and as it did not yield readily, we asked a Christian Science practitioner for help. I seemed to have great pain, could hardly swallow even liquids, and during the night I felt as if I could not breathe; but man's extremity is God's opportunity. I knew that no one could help me except God. I tried to realize that the Father sees His child as always perfect; that to God there is no evil, and therefore no sickness. The assurances of the truth strengthened and quieted me. The difficulty of breathing and the pain gradually lessened, and error yielded to the truth. In connection with this trouble a weakness of the eyes had manifested itself, so much so that I was unable to read anything whatever; but this condition also completely disappeared, returned to its nothingness.

I am indeed grateful to the Discoverer of this great truth, and am very happy to know that I can rely firmly and entirely on God, good, under all circumstances; yea, that He has already helped me.

HILDEGARD OHRTMANN, Halberstadt, Germany.

Are you seeking health and harmony through Christian Science? Then "put off thy shoes from off thy feet, for the place whereon thou standest is holy ground." You will need to go no farther. My mother was healed by this inspiring truth, after ten years of intense suffering from a disease of the eyes which necessitated constant physical and mental quietness. The slightest noise distressed her, so that the childhood days of her four children seemed cheerless—left to the mercy of hired help in bringing them up. I have no early memory of my mother except as on a sick-bed. After Christian Science came this was changed. She became well; attended to her household affairs, and has been a spiritual companion to all who know her.

My brother suffered continually, in the winters more than in the summers. When he was two years old an attack of illness left him with an affection of the lungs, and every year he grew weaker, until he too was healed in Christian Science. How well I remember his first treatment! My mother had been healed, and a Christian Science practitioner was visiting in our home. My brother had been vaccinated, in accord with the school regulations, and his arm was badly swollen and excruciatingly painful. He was weeping and begging for a sleeping powder. The Christian Science practitioner offered to help him, and he retired without the powder and slept well. The suffering ceased and we heard nothing more about the arm. It seemed perfectly wonderful then; now I see that it was perfectly natural.

There are no words that I can find to tell of my own condition at this time. I was apathetic, pessimistic, and

Digitized by Google

extremely nervous. Every effort fatigued me, and it was predicted by many that I would not live through my teens. After a great many treatments in Christian Science I responded and was healed. I laid aside my glasses, became energetic, and it is hard to make any one who did not know me then, believe that I have not always been well and cheerful. The salvation which has brought the family to this harmonious point of recovery, sustains and guides, and we press on in gratitude to God, and to our dear Leader, Mrs. Eddy. Our home is happy and harmonious. Before Christian Science came it was more like a hospital than anything else. In the words of one of our hymns:—

For flower and fruitage now are seen,
Where blight and mildew rested!
The Christ today to us has been
By word and deed attested.

ELIZABETH H. MATHER, Springfield, Mass.

My heart goes out in gratitude to God, and also to our dearly beloved Leader, Mrs. Eddy, whose teachings have started me on my journey from sense to Soul. I suffered for many years from what physicians called chronic stomach, kidney, and bowel disorders. After trying a number of different doctors without receiving any help, I was healed through Christian Science in less than three weeks. Words cannot express my deep gratitude for this physical healing, but the spiritual uplifting, the joy and the peace, that this blessed teaching has brought into my life, mean much more to me. It is now fourteen years since my healing, and I have not had the slightest return of these ailments.

It has been proven to me many times, in our family, that God is an ever-present help in time of need. All I am and all I have, I owe to this wonderful truth. Through the study of the Bible, and Science and Health by Mrs. Eddy, I have learned that God is our Life, that in Him is our health and our strength, and in Him we "live, and move, and have our being."

MRS. MARY REYNOLDS, Garvanza, Cal.

I have good reason to be thankful for Christian Science. I am a barber, and the thumb of my right hand was so badly injured that I could hardly work with it. One evening, while at a friend's house, I spoke of it, and was asked if I wanted treatment in Christian Science. I said I would be glad to get help, and the treatment was given. Before I left the practitioner's house the pain had ceased, and later on I found the dislocated joint was in its right place. I was also healed of rheumatic trouble, which no material means seemed to be able to cure. I had tried all kinds of remedies for it without relief, but Christian Science freed me entirely. I am grateful for all the benefits I have received through this healing truth.

E. S. BROWN, Hopkins, Minn.

I desire to tell of some of the blessings that have come to me through Christian Science. In 1901 my lower limbs became affected as a result of spinal difficulty; I could not walk without the aid of crutches, could not even lift my feet; was afflicted with kidney and bladder disease, in fact was a wreck physically and mentally. So terrible seemed my affliction that I contemplated suicide. I was under medical treatment for two years, was in two different hospitals, tried electric treatment, took ice-cold baths for some months, but still I grew worse.

Hearing of Christian Science, I decided to give it a trial, and two months later I laid aside my crutches and walked with a cane. The doctors had informed me that the disease of the kidneys could never be cured. At that time I had no control over them, but in ninety days after beginning Christian Science treatment the action was perfectly normal. I gained rapidly in flesh, and now weigh one hundred and seventy-six pounds. While I still use a cane in walking, yet I have much to be thankful for, physically, morally, and spiritually. After the first treatment all desire for intoxicating drinks was destroyed. I am now a member of Second Church of Christ, Scientist, Dayton, O. Christian Science has brought to me a peace of mind I never experienced before. I have found these words of the prophet Isaiah true, "Thou wilt keep him in perfect peace, whose mind is stayed on thee: because he trusteth in thee."

VOLLEY W. OAKES, National Military Home, O.

I wish I could express in words my gratitude for Christian Science and what this healing religion has done for me and mine. It may be that I sometimes forget to acknowledge this inspiring truth. Before looking into Christian Science I could see nothing but darkness and misery, I was ailing all the time,—had heart difficulty and female trouble, nervousness and other ailments, but they have all disappeared under Christian Science treatment. I will also add that four years ago my little girl was very sick with a serious throat disease, and in three days she was healed through Christian Science. For all this, and for many other blessings, I am truly thankful, and shall strive to be worthy of the name of a Christian Scientist.

MRS. BESSIE ENGLEBRIGHT, Coeur d'Alene, Idaho.

[Written for the *Sentinel*.]

IN ÆTERNUM.

MARY J. ELMENDORF.

THERE is a deep grave in the heart
Of time, unmarked, weed-grown, apart,
  Where seas of fog are creeping.
Break thunders there and bleak winds brood—
Shadow and storm and solitude;
  And there gray death lies sleeping.

When came the Word to human ken,
Lifted was sin from hearts of men
  And hushed were woe and weeping.
Death fled that presence shelterless,
Down to his primal nothingness,
  And there he still lies sleeping.

Only a grisly ghost today—
The fear we bear and then obey—
  Darkness on earth is heaping.
As men to saner manhood grow,
Illusion passes, and they know
  That death indeed lies sleeping.

No more comes semblance back to dreams
That pass beneath the rapier gleams
  Awakening has in keeping;
Life yields nor home nor hiding-spot
To him whom Spirit, All, knows not:
  And so stark death lies sleeping.

Forward to freedom, men of God!
Hark, down the steep the Saviour trod
  Life's trumpet-call is sweeping!
Vanquished is evil, gloom laid low,
And rebel death, your final foe,
  Forevermore lies sleeping.

FROM OUR EXCHANGES.

[Rev. R. F. Johonnot, D.D., in *Universalist Leader.*]

Primitive Christianity made its rapid progress, unquestionably, because it gave practical service. It held out to the poor and oppressed its kingdom of the saints, wherein the proud were to be humbled and the lowly exalted. It had its gospel of love, also, and its spiritual values; nor are they to be denied to these modern movements which are now making headway. But the practical, temporal values play a great part in them as in primitive Christianity. The modern church must be able to help life on its practical and material side; to make the individual happier, healthier, more prosperous because of its faith and ministry. It must show how, through its help, husband and wife are knit together, the family life made sweet, the work of daily life made to yield its just returns. Along these lines of unity of effort, in the discarding of non-essential forms and faith, in the giving of its place to art in the cultivation of noble emotions, in the aim of saving society as a whole and not merely its individual units, in the creation of a true social order upon earth, in the giving of practical help to men, will the course of the new reformation of the church run.

[*Interior.*]

Of churches it is as true as of individual men,—nay, more true,—that whosoever shall lose his life for the Master's sake shall find it. The biggest of all hindrances to Christianity is that its organization seems to the mass of Christians to demand so much attention, so much defensive care and much protective jealousy. What all Christians need to be convinced of is, that if the church will only throw itself with utter self-forgetfulness into the mission the Master gave it, the pulse of divine life in the organization will be all the protection it needs from perils that may threaten to disintegrate it. Vitality is always the best defense of life. Let the church be vital, and abandon its anxieties. Let it forget itself and save its life.

[Rev. J. C. Jaynes in *Christian Register.*]

A revolution is in the social order such as the world has never seen before. A change is coming over the face of society,—a change in our conceptions of God and man, a change in our ideas of social responsibility, a change in our thinking in regard to the economic values of life. The church hears less of the intoning of the creed and more of the prayer, "Give us this day our daily bread." The call is not so much for a heaven in another world as it is for a little more of heaven in this world. Everywhere there is uppermost a discontent with existing conditions and the feverish desire to improve them.

[Rev. J. Estlin Carpenter, D.D., in *Christian Life.*]

The bonds of ancient dogma are falling away. When a living human experience takes the place of a theological conception, it exercises at once a reproductive power. It awakens the affections, rouses the conscience, quickens the will, and leads the worshiper into the sanctuary where teacher and disciple can kneel side by side, can pray common prayers, can share a common joy, and strive in fellowship for a common good.

[Rev. W. P. Du Bose, D.D., in *Churchman.*]

Christianity ought to include all that, anywhere, is true religion, or is akin to it. It ought to recognize unity of interest and aim, and make common cause, just so far as these actually exist, with all religions, and take all that is of Christ in them up into its own higher and completive self. So will it give itself to all races and peoples as far as possible along the lines of their own religious evolution.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel.* Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel.*

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to JOHN V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

The Publishing Society has in stock a number of copies of *Sentinel* No. 6, Vol. IX., containing the article "What Our Leader Says" as last published. As this article is of abiding interest and value to the Field the Society will be glad to supply it, postpaid, at the following prices: 1 copy, 5 cents; 5 copies, 15 cents; 10 copies, 25 cents; 25 copies, 50 cents; 50 copies, 85 cents; 100 copies, $1.50.

On foreign orders add 2 cents a copy to cover postage.

The supply of *Sentinel,* Vol. IX., No. 14, is exhausted.

Digitized by Google

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES." MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

PAMPHLETS AND REPRINTS

CHRISTIAN SCIENCE. THE RESTORATION OF PRIMITIVE CHRISTIANITY. A Lecture. By CLARENCE C. EATON. 29 pages.

PRICE: Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

MISCELLANEOUS

BIBLES. Clarendon Brevier (01483 x), heavy faced, very distinct type, Turkey morocco, size 6 1-2 x 4 3-8 inches, corresponding in size and binding to pocket edition of Science and Health. Price, $3.75.

Morocco cases, to hold pocket Science and Health and above Bible, may be had at $1.25.

Text Bible, (01561 x), pica square type, Alaska seal, size 7 1-2 x 6 1-4 inches, 1 1-2 inches thick. Specially adapted for use of Second Readers. Price, $7.25.

CHRISTIAN SCIENCE AND LEGISLATION. A pamphlet of one hundred and twelve pages, containing articles by JUDGE CLIFFORD P. SMITH, EDWARD A. KIMBALL, and JUDGE SEPTIMUS J. HANNA, together with testimonies of healing, editorial comments, etc. Single copies, 10 cents; twelve copies to one address, $1.00; twenty-five copies, $1.85; fifty copies, $3.50.

QUARTERLY COVERS, in black seal leather. Regular size, 5 1-4 x 7 3-4, $1.25 each or $12.50 a dozen. Pocket size, 4 1-2 x 6 1-2, $1.15 each or $11.00 a dozen.

QUARTERLY COVERS WITH CHANGE POCKETS.—Regular size, $1.50 each or $15.00 a dozen. Pocket size, $1.40 each or $14.00 a dozen.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. One hundred and three pages. Illustrated. One copy, $1.50; six copies, $7.00; twelve copies, $12.00.

PICTURE OF THE MOTHER CHURCH. A half-tone reproduction, size 12 x 15 inches, mounted on a white mat 21 x 25 inches. Single copies, 50 cents; a dozen copies to one address, $4.50.

SOUVENIR POST CARDS, showing picture of The Mother Church, 25 cents per dozen.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9.00; per half dozen, $5.00. Half morocco, per copy, prepaid, $1.40 each; per dozen, $12.00; per half dozen, $6.50. Full morocco, $2.50 each. Levant, $3.50 each. Pocket Edition, size 4 5-8 x 6 5-8. Full morocco. Per copy, prepaid, $3.00; twelve or more copies to one address, prepaid, each, $2.50.

MUSIC. Poems written by MARY BAKER EDDY and used by special permission, have been set to music, as follows:—

"THE MOTHER'S EVENING PRAYER." By William Lyman Johnson. The arrangement for both high and low voice in the same copy. 75 cents the copy; $7.00 the dozen.

"CHRIST MY REFUGE." By William Lyman Johnson. Arrangement for high and low voice in same copy. 75 cents the copy; $7.00 the dozen.

COMMUNION HYMN.—"SAW YE MY SAVIOUR?" By William Lyman Johnson. Published in two keys for high and low voice. 50 cents the copy; $5.00 the dozen.

"BLEST CHRISTMAS MORN." By Frederick W. Root. Published in two keys, for high and low voice. 27 cents the copy; $2.75 the dozen.

"O'ER WAITING HARPSTRINGS OF THE MIND." By Frederick W. Root. Published in two keys for high and low voice. 27 cents the copy; $2.75 the dozen.

Please state when ordering any of the three last named whether high or low key is desired.

Our Catalogue for 1909, containing description and prices of above named literature and a selected list of Bibles, will be mailed free on application.

Remittances should be made by check, post-office money order, express money order, or exchange on Boston or New York. Currency or coin should not be sent by mail unless registered. Please send no money remittances or business letters to the Editor or Editorial Department.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75

Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883–1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), single copy $2.25
Twelve or more books to one address, each . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75

The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.

Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD MCLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, six months, $1.20; one year, $2.00.
Ten copies to one address, each, six months, $1.15; one year, $1.90.
Twenty-five copies to one address, each, six months, $1.10; one year, $1.80.
Fifty copies to one address, each, six months, 90 cents; one year, $1.50.
These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.
Subscriptions to the SENTINEL will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid, to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.
To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.
Bound Volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

The headings in the great Gunnison tunnel, in southwestern Colorado, which is to carry the waters of the Gunnison river through the Vernal Mesa into the Uncompahgre valley on the other side, where they will be used for irrigation purposes, have met. This tunnel is the largest underground waterway in the world. It is six miles long, has a finished cross section of 10½ x 11½ feet, and will carry thirteen hundred cubic feet of water a second. It will be cement lined throughout and will cost more than $2,500,000. The Uncompahgre project is the first of the great irrigation systems started by the Reclamation Service to near completion, ranking third among the twenty-seven enterprises started by the Government, according to the amount of acreage to be reclaimed. This project will reclaim approximately one hundred and fifty thousand acres of fruit land. After the water leaves the west portal of the bore it will be conducted to the Uncompahgre river through twelve miles of canal. There is a drop of two hundred and fourteen feet from the tunnel portal to the river which will be used as the main distributing canal for irrigation purposes. This drop will be utilized in generating ten thousand horsepower and light the entire Uncompahgre valley, besides furnishing a basis for many manufacturing plants.

The returns from internal revenue in Massachusetts, derived largely from the tax on alcoholic liquors, declined during the last fiscal year by $680,821.74. This is due in part to less taxes collected on malt liquors and spirits, a smaller quantity of them being consumed owing to the wide prevalence of the no-license cities and towns throughout the state. The enormous shrinkage of business to brewers and distillers in Minnesota through the "dry wave" is shown by the reduction in the internal revenues for the same period amounting to $322,000. Practically the entire loss is due to the falling off in the output of beer. This year's receipts were $3,852,848 for beer alone, as against $4,174,103 for the preceding year. The same influence, say delegates to the National Glass Bottle Blowers' convention at Milwaukee, has resulted in so great a decrease in demand for bottles that more than three thousand members of the association have been out of work during the past year.

Congress should control organization of corporations doing an interstate business, according to George W. Wickersham, attorney general of the United States, in an address delivered recently before the Kentucky State Bar Association. "Of course, many will object to the centralizing tendency of a national law authorizing the formation of corporations to carry on interstate business," said Mr. Wickersham, "but such a law seems to be the inevitable result of economic conditions."

Edward Payson Weston, the walker, seventy years of age, who started to cover the distance of about four thousand miles between New York and San Francisco in one hundred days exclusive of Sundays, was on the ninety-ninth day only two hundred miles from his goal.

Preliminary work has been begun on the survey of the proposed route of the Boston to Beaufort intercoastal canal, but no actual surveys have been made. The work is in charge of a board appointed some time ago by the secretary of war.

The famous horseshoe curve on the Pennsylvania Railroad on the east slope of the Allegheny mountains is to be done away with, and the distance between New York and Chicago will be shortened something like five miles.

Dr. Charles W. Eliot, former president of Harvard University, at the late commencement day exercises was officially created president emeritus of the university, doctor of laws of Harvard, and honorary doctor of medicine.

Incomplete returns collected by the Chicago *Record-Herald* give the casualties in the United States of the three-day celebration of the Fourth of July as forty-six dead, 1,575 injured, and fire losses $446,500.

The federal grand jury at New York has handed up indictments in the United States circuit court against the American Sugar Refining Company as a corporation and against eight men—officers and counsel.

During the first six months of the current year 19,322 automobiles have been registered in Massachusetts, and the amount turned in to the state treasurer was $127,913.

The attendance for the first month of the Alaska-Yukon-Pacific Exposition amounted to 667,071, and the net profits for the month amounted to $86,000.

The National Shoe and Leather Exposition opened in a permanent and attractive building on the north bank of the Charles river, Boston, July 1.

International.

The Chapala Power and Irrigation Company, which has just been organized in Mexico with a capital stock of $8,000,000 Mexican money, will construct a $2,000,000 hydro-electric plant for the purpose of providing water for irrigation. It is probable that two of these power plants will be built—one to be located on the Santiago river near Guadalajara, and the other on a stream that empties into Lake Chapala. Transmission lines will be built to operate the pumps, which will be located upon the shore of Lake Chapala, the water of which will be used to reclaim 75,000 acres of land. The government loan of $3,000,000 and an additional loan of $2,000,000 from the Loan bank of the City of Mexico, will be used to build about one hundred and ten miles of main irrigating canals, and to establish three pumping-stations. The plans, when completely rounded out, will involve the irrigation of more than five hundred thousand acres.

The Tauern Railroad, the new Alpine line connecting Gastein and Spittal, was officially opened by Emperor Francis Joseph last week in the presence of a large gathering of the Austrian archdukes, the ministers of the empire, members of Parliament, and the public. So great were the engineering difficulties that had to be overcome in the construction of this line that, although it is only thirty miles long, it cost $62,500,000. Eight years were required for the completion of the Tauern tunnel. The railroad greatly shortens the distance between central Europe and the Adriatic.

The German steamer Peiho, which has been engaged in a scientific research expedition for some months, has arrived at Hong Kong from the Bismarck Archipelago with many tons of curios and fifty cases of butterflies aboard. After traversing many of the waterways of the Bismarck group, the Peiho proceeded to New Guinea and up the Kaiserin Augusta river for two hundred and thirty miles.

The British government declines to give its approval to the annexation of the Congo Free State to Belgium until satisfied on these points: The extension of the territory reserved for the natives; free labor and the right of the native to dispose of the produce of the soil; arbitration.

With the beginning of the present fiscal year the republic of Cuba established a bureau of information, President Gomez appointing as its director Leon J. Canova, an American newspaper man, who has resided in Cuba eleven years and has a wide acquaintance with the island.

Prince and Princess Kuni of Japan, who have been making a prolonged tour of Europe and who will spend the summer in England, have decided to return home by way of the United States, and will leave for New York late in August.

Industrial and Commercial.

The expectation that denatured alcohol would make rapid strides in supplanting gasoline as a motive power for small farm engines, automobiles, etc., has not materialized, first, because the engines now in use are not adapted to alcohol, and, second, because of its comparative high cost of manufacture by present methods. Considerable progress in its utilization in certain classes of manufactures is, however, apparent, notably in the production of celluloid, ether, gunpowder, and as a solvent for paints, varnishes, and the like, and to a slight degree as fuel and light. In many of these uses it has taken the place of wood alcohol. But so far as any direct benefit to the farmers of the country, the removal of the tax of $1.10 a gallon on denatured alcohol has been inconsequential. The total production of denatured alcohol in the United States during 1908 was 3,321,451 wine gallons, and in 1909 about 4,500,000 gallons.

The Bourne Mills Corporation last week paid its regular semiannual profit-sharing dividend to its regular operatives. The amount paid was three per cent on the wages of all operatives who worked steadily from Dec. 7, 1908, to June 5. The total amount paid out was about $4,000.

An ordinance passed by the city council and signed by the mayor legalizes the erection in Kansas City of a new union railway station. The proposed station, it is said, will cost $20,000,000.

The Waterbury yards handle over two hundred million pounds of freight a month. One of the local brass concerns averages to send out thirteen solid carloads of manufactured goods every working day.

Reports for the first six months of this year show that enlargements in the southern cotton mill industry as announced amounted to 477,380 spindles, 13,810 looms, and an investment of $17,000,000 in capital.

The new main line railroad mileage constructed in Texas during the fiscal year which ended June 30, amounted to 376 miles. This gives Texas a total of 13,283 miles of main track.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE RIGHT TO BE WELL.

CLARENCE W. CHADWICK.

THE materialist might argue, If "flesh and blood cannot inherit the kingdom of God," men need not expect to enjoy the blessings of good health in this present world. To confirm this thought he might call attention to the fact that no known material system devised for the prevention and cure of disease has proven itself infallible; that diseases have continued to multiply, and in many instances to become more alarming, with the world's advance in material knowledge.

Christian Science rebukes this line of reasoning and begins to differentiate between what the world calls real and what is real in the sight of God. In harmonious accord with Bible teaching it designates "flesh and blood" as the temporal or unreal, as that which is to be "put off" or overcome. It does not teach that pain and evil are spiritually real or God-given, and then try to find a remedy to do away with them. It does teach that they are the mistakes of false sense, and that in obedience to divine law they must be corrected or destroyed. In no other way could it magnify the name of the Lord.

Magnifying evil by calling it real or ineradicable does not give all honor and glory to God. The constant aim of every true Christian must be to minimize evil and not to magnify it in thought, word, or deed. Since "the flesh profiteth nothing," he knows that "flesh and blood" cannot be of God, and he begins at once to lay claim to his spiritual dominion over that which is unreal and unprofitable. He no longer dignifies "flesh and blood" by calling it man. His concept of man has risen above the sensual or unreal to the spiritual and real, wherein he finds man to be the spiritual image and likeness of God. He knows that this man has a perfectly indefeasible right to be well, and that health will be made manifest just to the extent that the old man is put off and the new man put on.

Health is one of the blessings of the heavenly or spiritual kingdom. It is not "of the earth, earthy," but as the children of earth learn to throw off "the bondage of corruption" they feel the touch of divine Love in improved mental and bodily conditions, until they attain to a fuller recognition of the great spiritual fact in Science that man never was sick, because he is, was, and ever will be the perfect representation or reflection of perfect Mind, God. The spiritual understanding of health will then reign in place of any material concept of health as being a condition of matter.

The mission of Christian Science, therefore, is reformatory in every sense of the word. It is not engaged in making healthy or happy sinners, but it is engaged in showing the sinner how to part company with both sin and disease. The mortal who takes medicine for his pains, but who does not recognize the necessity of correcting his evil thoughts and habits, is not appropriating the blessings of good health—he does not know the meaning of the word. Christian Science arouses him to a higher order of thinking. It teaches him that health is not related to immorality, is not subject to "flesh and blood," and it is never in nor of matter. This teaching reveals the futility of trying to establish the reign of health through the use of any material means. Only through the coming of Christ, Truth, can real health or happiness be ushered into human experience.

Is it rational to think that a lifeless drug is the medium for Christ's appearing? Not unless darkness can radiate light. If health is in matter, it is temporal, subject to chance and change. If health is a condition of matter, the sinner might hope to be well and happy without forsaking sin; whereas the Bible teaches that "the wages of sin is death," not health and happiness. Any attempt to gain health without reformation must be based upon the assumption that corruption can inherit incorruption, which betrays at once the absence of right thought concerning God and man and spiritual law. God's law is health-giving because it is ever operative to destroy sin and the effects of sin. Whatever does not destroy sin cannot be depended upon to bestow health upon man. Only that state of consciousness which is in accord with Truth and Love can inherit the blessings of God. The only blessing bestowed upon the belief in sin or sickness is the extirpation of the belief. The mission of Christ Jesus was not to bring peace to false law or testimony, but rather a sword.

An argument which ought to appeal to all Christian people is that Jesus would not have healed sickness and sin in obedience to spiritual law if it is wrong for man to be well. He came to do the will of the Father. To those having ears he said, "Ye shall know the truth, and the truth shall make you free;" and he demonstrated beyond all cavil that freedom from disease was a part of God's heritage vouchsafed to His children. There was no doubt with Jesus as to the will of the Father. He knew that a God who is all Love could not will or decree that man should be anything less than well and happy. He knew, therefore, that man's right to be well is sustained by the unerring law of God. Whenever a case of disease confronted him he appealed to the higher court of Spirit, where a verdict was always rendered in favor of health and against disease. Any system or court of evidence which acknowledges the validity of matter and its assumed laws is forced to admit that man is amenable to disease and that he may and may not recover from his malady. It is always in doubt as to whether it is right for man to be well.

Christian Science stands alone with God and Bible teaching in its positive rejection of matter's false claims, and denies that man is amenable to any so-called law of matter. It recognizes one perfect spiritual creation, man in the image and likeness of God, and is never in doubt as to whether it is right for this man to be well. Through this higher metaphysical or scientific understanding of the rights of man humanity is being shown the way out of mental, moral, and physical dis-ease into the true consciousness of health, happiness, and holiness.

REFLECTION.

EDWARD EVERETT NORWOOD.

ONE may express certain qualities of mortal thought, as envy, selfishness, or fear; or, as an improved belief, he may express much good through faith, hope, and pure affection. The mere personal sense of goodness, however, is only a belief of goodness, because consciousness is not yet awakened to know itself and protect itself, and things are not seen as thoughts. Thus, what human sense calls love is often a form of idolatry, and may be instantly replaced by hate; one who is naturally unselfish may, through a great sense of fear, express the opposite quality, and so on through the whole gamut of human characteristics. On the other hand, reflection is rethinking, according to law, and relates all inspiration to the law of thought. This reflection of good is our real identity in Mind. There is no other selfhood or sonship, and we find the Father just as we find our real selfhood. As Jesus told Philip, in so many words, he who discerns the spiritual idea discerns also the Principle behind it, and regains his individuality, which seemed lost in materialism.

To the wondering Nicodemus, Jesus explained the new birth to be that of purity and understanding, and it requires one to retrace mentally every step in his life as a mortal, to separate himself from every claim of hereditary belief, prenatal influence, constitutional tendency, etc., and reckon himself as a spiritual identity, a manifestation of divine Mind, the infinite Father and Mother. On page 185 of her "Miscellaneous Writings," Mrs. Eddy says: "Self-renunciation of all that constitutes a so-called material man, and the acknowledgment and achievement of his spiritual identity as the child of God, is Science that opens the very flood-gates of heaven; whence good flows into every avenue of being, cleansing mortals of all uncleanness, destroying all suffering, and demonstrating the true image and likeness."

Each idea of God is perfect now, and always will be. As Christ, Truth, governs each thought, word, and deed, error has no avenue through which to work; no subject, object, nor lines of mental action or suggestion. The Christ-idea, or reflection, is the only selfhood, perfect and complete, and our work is to identify or individualize it in our consciousness, and so be saved from all belief in error. Humility, patience, purity, and impersonal love are the watchwords of all true Christian Scientists. The strife is all in the human consciousness. Here error strikes at the idea of Truth; and pride of intellect, with its sensuality and love of power, endeavors to wreck the spiritual understanding. Dependence upon the mortal concept, and faith in organization, though associated with a belief of honesty and zeal, often require much love to overcome. This attitude of thought is sometimes met among young Scientists, and such an one, in the name of "individual thinking," which may be in fact a species of unconscious insubordination, may seriously handicap his progressive spiritual unfolding, for he prides himself in a freedom that is without government, consciousness not being free enough to know and protect itself.

We must value man's true selfhood. All must know its value, but ourselves first, and this is the opposite of self-righteousness. We must not lower or cheapen our reflection of good any more than we would undertake to cheapen Mind. We must not let the argument of mortal mind reverse the scientific fact. There is need that we honor and protect right mentality—the Christ-idea—and detect and resist false mentality—the devil. We must see ourselves rightly in order to see any one or anything else rightly and find our real place in Mind, through understanding of the meaning of reflection. A wise self-knowledge must be maintained, respecting both our real selfhood and its counterfeit embodiment. As we work understandingly, consciousness will unfold in wisdom and discernment. The spiritual discernment and assertion in us, that which strives to be honest, loving, and pure, is born of God, never of mortality.

The true awakening is a putting on of the new man, and in proportion as this is done, the mortal concept, the old man, fades away. Our mental work in guarding and demonstrating the spiritual idea does not cover up error and cry peace when there is none; it uncovers and destroys error. If man never was born in matter he does not live in it, and his harmony is not disturbed by mortal mind's beliefs about the body. Metaphysically speaking, a mortal has neither father nor mother, for mortal mind, the supposed origin, is neither a man nor a woman. When this mortal mind is analyzed, it is seen to be but a false sense without creative power, unreal.

Transformation is effected as we recognize man's existence as idea or reflection, and never as organized matter, flesh and bones, with a mind inside. As each idea of God is an individualization of infinite Mind, so also is it of all the wisdom, power, purity, strength, and love that are existent in this Mind; hence there is no lack of any necessary thing or thought. All the promises of God are yea and amen, but at present it doth not yet appear to the senses. Right-knowing, thinking the truth, means abidance "in the secret place," and this activity of the spiritual idea is the Saviour, who frees us from all that is unlike God. By reckoning ourselves as reflection or idea, we cut ourselves off from yesterday's failures or tomorrow's fears, and know that today, the ever-present now, is the only time in which to live; that yesterday never was, and tomorrow never will be.

Now is the time to reflect Mind, to have dominion over all that is unlike Truth and Love, and to walk the earth in a spiritual atmosphere of love that sees only God and His reflection—that is ever obedient to the heavenly vision, that endureth all things, understandeth all things, hopeth all things, and is joyous and serene in the consciousness of God's presence and power.

HELP IN TIME OF NEED.

SARAH J. E. SOLLEY.

IN Science and Health (p. 301) Mrs. Eddy tells us: "Few persons comprehend what Christian Science means and by the word *reflection*," and it was, as I understand, by means of "reflection" that I obtained the results to which I refer below.

In January, 1907, I was engaged to demonstrate what might be done with dye-stuffs to improve the rug-making carried on at the Morgan Memorial Cooperative Stores and Industries of Boston, Mass. The ability to undertake the work required was in itself a demonstration of the mighty power of Christian Science to heal. One year before (1906) I had been suffering from irritation of the spinal cord, and doomed to perpetual pain by the physicians, with no permanent relief. Now I was well, free from all suffering, able to go where I pleased and do what I pleased, capable of enduring hardship and fatigue. This improvement had come, in the first instance, through Mrs. Eddy's thought as given in Science and Health, without the aid of a practitioner; so that I knew beyond doubt that the power was of God. Later I asked help from a Christian Scientist in Boston, to whose wise counsel and constant admonition I owe more than words can tell. Owing to the condition of affairs at the Morgan Memorial at the time, my dye-shop was in the basement, and all my equipment was crude and commonplace, nevertheless I was able to work there in the coldest weather and on the hottest days. Here I made the necessary experiments, and turned out forty to sixty yards of carpet each day, dyed to order—sometimes to shade—with my own hands, and preferably without help.

Digitized by Google

Three problems were given me to solve, and in working them out I was to verify the faith of those by whom my services had been engaged. I was given to understand that these problems had hitherto been deemed impossible of solution by the "trade," the first being to dye ingrain carpet in the piece, without cutting and fraying, *i.e.*, to make the dye-stuff penetrate the fiber so that when cut it was all alike. The second was to dye Brussels carpet so that it should be a solid color when cut and frayed. There are two, sometimes three fibers in Brussels carpet, viz., the linen warp, the wool filling, and sometimes jute interwoven with the wool. All these take different shades in the dye-bath, and colors suitable for wool often will not "take" on linen at all, while they always give a different shade. The third problem was to make a regular set design in the kind of rugs manufactured at the Morgan Memorial. These rugs are made from short strips of cut and frayed carpet, in appearance like tape with raw edges. Owing to the nature of this material it had been deemed impossible to make a square, for instance, of one color on a ground of another color.

In addressing myself to the task assigned me, I knew that all knowledge is in the divine Mind, and that man reflects this Mind; therefore, since the relation between God and man is that of Mind and its idea, I could know anything which legitimately pertained to me within the compass of that limitless Mind. So as the problem was held in thought I sought to know the truth, the manifestation of that Principle which we call intelligence, and awaited the outcome. I had had four years' experience with dye-stuffs, and for a woman my acquaintance with modern methods and materials was fair. Many of the dye-stuff firms had kindly supplied my wants, and three in particular had given me constant help and encouragement. I knew a little about colors, so that the problem of dyeing ingrain carpet was solved, within certain limits, easily and successfully. In the solution of the second problem I had to look up for wisdom and guidance, and in this aspiration and endeavor to reflect the divine intelligence I saw how two acids could be replaced by a third; how dye-stuffs suitable for wool only could be combined with one suitable for linen, and by the addition of another ingredient a mordant for the linen could be formed in the ordinary dye-bath, so that Brussels carpet could be dyed a solid even color throughout. I had to experiment a little to get the exact proportions of the colors needed for a particular shade, but the percentage once found, the rest was easy.

The third problem required yet more earnest thought. I had nothing to work from, humanly speaking, and no ideas came to me for some time, but one morning early, at the close of my study of the Lesson-Sermon, as I sat quietly "in the secret place," a design was pictured in my thought which, while simple, was effective and practicable. I saw how it could easily be made, and that the fabric when finished would be strong. I had no words with which to express my thanks. It was one of those moments when one is lost in gratitude, in humility, because of the unutterable kindness of divine Mind, who gives "above all that we ask or think." Many difficulties presented themselves when I tried to demonstrate the method, and no one would believe I had found one possible. At last I supplied my own material, and was permitted to use a weaver and his loom. I stood by him and told him what I wanted done. Very generously he supplied my lack of technical skill with his superior knowledge of this kind of weaving, and together we made the rug. It was a success, and found favor. Altogether I made ten rugs of different designs, using two and three colors, until we knew that they could be made easily and well.

After I left the Morgan Memorial in July, I applied for a patent for the method and process. The application has been granted, so that the Morgan Memorial has, besides myself, the sole right to make these rugs. My own right has been surrendered to a friend, who has taken my dye-stuffs, looms, etc., to his shop, and there this reflection of an idea will be expressed in new material, as perfectly as possible, by a student of Christian Science, who thus gives employment to others and adds to the comfort of the world. I thought I should miss the delight of seeing mind ruling matter, which used to be my joy in my experimental dye-shop; I thought I should sacrifice a little for righteousness' sake, when I severed all connection with the arts and crafts movement, in order to have my card in the *Journal*. It is not so. Our Leader writes: "All things will continue to disappear, until perfection appears and reality is reached" (Science and Health, p. 353); and the Principle I used to see "through a glass darkly," when at work among the chemicals, I have found more plainly, more beautifully expressed in my work of healing the sick and sinning, so that once more the desire of my heart has been granted above all I could ask or think.

THE DAWN OF TRUTH.

ORA S. DREWRY.

In the opening chapter of Genesis, as we learn from the teachings of Christian Science, is the spiritual account of creation—the truth about God and man and the universe. This truth is the epitome of all revelation, the golden text of the Bible. It is at once the basis of all moral advancement, as well as the aim and end of all spiritual attainment. The full understanding of this truth is the spiritual consciousness, or heaven, which to material sense is so far away.

After the statement of the spiritual creation, the record takes up the history of the material counterfeit of man, and of the struggle of the human mind to rise above error and to reach the truth. During a period of more than two thousand years, according to the Biblical account, there were only isolated individuals, such as Noah, Abraham, Isaac, Jacob, and Joseph, who caught glimpses of spiritual truth, and kept the torch of understanding burning upon its altar. Then came Moses, with a clearer vision, who, Mrs. Eddy writes, "advanced a nation to the worship of God in Spirit instead of matter" (Science and Health, p. 200). The sacred narrative then deals with the history of a nation instead of individuals, as we learn from Scriptural commentators, and in the subsequent ages many nations came into some understanding of the truth of being. When Noah apprehended in some degree the immortality of Spirit, it enabled him to build his ark as a place of safety from the seething waters,—the self-destruction of error, called the flood. Then was unfolded to him God's covenant or promise, that the waters should no more cover the earth, error should no more cover human understanding; that his discernment and reflection of Truth should remain a permanent spiritual possession of the human mind, and a token of this covenant was the bow in the heavens, a symbol or reflection of Love's protection.

More light came to the human understanding with each revelation to these old patriarchs and prophets, and with more light came a fuller comprehension of God's allness and goodness, known as His covenants and promises. As in the advancement of civilization the telegraph, the railway, the electric light, and all that stands for human progress, can never be lost to human consciousness but tend to greater progress, so these flashes of spiritual truth that illumine the pathway of spiritual unfoldment remained to teach and uplift humanity, until they culminated in that great burst of light called the advent of our Saviour. Jesus exemplified and demonstrated the absolute truth of the Science of creation as taught in the first chapter of

Digitized by Google

Genesis; and in him are all the promises of God, "yea and amen," so says the Scripture. He taught that the spiritual kingdom is within consciousness, near at hand, ever present.

As we gather from our text-book, Science and Health, all the revelations of Scripture point to the truth of spiritual creation, and John, as recorded in the last book of the Bible, foresaw its dawn in a new heaven and a new earth, —an understanding consciousness. The Master said that men should be led into all truth, and this was foreseen by John. That such time should come is the logical ultimate of the spiritual progress of man and of all revelation. To the thoughtful student spiritual progress is no less a part of our inheritance than is material progress. Indeed, genuine human progress is the outward manifestation of moral and spiritual advance.

Through Christian Science there has come to this age an understanding of the meaning and mission of the Master's life and teaching, and hence of the real meaning of the record of creation as given in Genesis. A new era in the reign of Truth has dawned. This important and sacred experience follows the growth of spiritual understanding from the first appearance of light in the human consciousness, and is a subject for careful and thoughtful study at the present day. God's mandate, "Let there be light,"—the light of spiritual understanding, which dispels the darkness of error,—is as imperative today as in the beginning. In our text-book, Science and Health, wherein is found the key to the deep things of God, we are taught (p. 202) that "Christian Science lights the torch of spiritual understanding," and this light illumines the Word of God. The prayer of Ajax was for light. Spiritual light has come, and the prayer of all today should be that our eyes may be loosened from the bondage of material sleep, and opened to behold the light dawning upon human sense through the teachings of Christian Science.

It is said of the Eskimoans of the far north, wearied with their long night of darkness, that, as the time approaches for the light of day to reappear, they station sentinels high and higher up, to catch the first dawning beams. When anxious eyes behold the first rosy flush of the rising morn, the sentinel at the highest post calls to the next lower down, "The dawn is come!" and the glad cry goes echoing down, from sentinel to sentinel, until it reaches those in the shadows of the dark valley below, who respond, "The dawn is come." So our revered Leader, standing today on the highest peak of human consciousness, and beholding the radiant light of the rising sun of Truth, calls to those who are catching its first beams, and to those yet in the shadows of the valley of material belief, "The dawn is come!"

HEALTH, HAPPINESS, HOLINESS.

WM. HART SPENCER.

ON the plane of the human concept of existence, happiness is the chief end and aim, and health the important factor; therefore health and happiness are coupled in the thoughts of men. They may indeed be considered as relative terms; but health of itself does not always insure happiness, although to some the unsuccessful search for health has become a veritable lion in the path, in their "pursuit of happiness." The hope and desire of mortal man is for a sound mind in a sound body, on the assumption that such a combination will enable him to withstand and overcome the buffetings of the world and develop an individualism which shall be proof against the wiles and assaults of evil. This idea was voiced by Hamlet when he said,—

> And blest are those
> Whose blood and judgment are so well commingled
> That they are not a pipe for fortune's finger
> To sound what stop she please.

The true idea of physical health is not merely a negative sense of the absence of disability, but a positive sense of the fulness of natural life; and a genuine belief in the health of the human body is primarily a necessity for the ordinary man in his "pursuit of happiness." That such is a fact is readily proven when we take into account the struggle which has been going on for untold ages, in the attempt to remedy any supposed defect or deficiency in the human system, though, owing to the belief of life in matter, the search for health has been confined largely to the attempt to correct inharmony in the body by the use of such remedies or changing conditions as have from time to time been indicated, but which are so often, alas, like the following of a "will-o'-the-wisp."

There is always a spirit of thankfulness for health, through whatever means attained; but the happiness which follows healing explains the means used to obtain it. True healing comes through divine Mind, and to most of those benefited the healing in Christian Science comprises more than the overcoming of so-called physical disability, for to the receptive mind there is generally the resultant quickening of the spiritual concept or intuition, so that Truth comes to us as the angel came to Jacob, touching us on the thigh, the fighting muscle,—the human will.

The surrender of the human will is like the breaking down of a wall of partition for the entrance of Truth, awakening us to a sense of that which must be denied and cast out; and while we are thankful for the overcoming of a belief in some physical or mental ailment, our thankfulness is greater for our increasing responsiveness to spirituality, which enables us to see results in some uncovering of sin, some change of thought from indifference or wickedness, some breaking down of obstacles which have been stumbling-blocks in the way of our advancement. Whatever mortal man has set as a mark for the prize of happiness, the ultimate desire includes contentment and safety. A sense of safety presupposes confidence in some person, place, or thing, and the higher or stronger the object upon which confidence is based, the greater is the assurance.

Faith in God brings with it this desired assurance, in proportion as we realize that He is all-power as well as all Life, Truth, Love; and, as our faith increases through this understanding, the sphere of our spiritual life will surely be enlarged, and we shall discover that our whole thought about God and man has changed. Then there comes a glimmer of the truth that God is All-in-all, and the dawn of the knowledge that, as the reflection of the divine, man is the unobstructed channel through which infinite good is expressed. It is the absorption and assimilation of this truth which vitalizes our heritage, and brings to us a larger realization of man's oneness with God.

HIM evermore I behold
  Walking in Galilee,
Through the cornfield's waving gold,
In hamlet or grassy wold,
  By the shores of the Beautiful Sea.
He toucheth the sightless eyes;
  Before him the demons flee:
To the dead he sayeth, Arise!
  To the living, Follow me!
And that voice still soundeth on
From the centuries that are gone,
  To the centuries that shall be.

LONGFELLOW.

SELECTED ARTICLES.

[From *Portland* (Ore.) *Oregonian.*]

Whatever may be the opinion of the people at large about the Christian Science religion, it makes a strong appeal to some people by reason of the studied and successful efforts of the cult to attend strictly to their own business and permit their neighbors to worship God according to the dictates of their own consciences.

[Frederick Dixon in *Standard*, London.]

The fact is that the world is suffering grievously from sickness and from pain, and is anxious beyond almost anything to rid itself of these. People who are in pain and people who are sick, know when they are relieved of that pain and of that sickness. It is because Christian Science has relieved hundreds of thousands of men and women, not only of pain and sickness but of sorrow and of sin and of despair, that it has spread itself over the habitable globe, and is enlarging its kingdom day by day. If this were not so, it would have foundered in failure years ago. It will take something more than the "wit and satire" of our medical critic to convince the world of anything contrary to this. It is, indeed, to be suspected that, while he is fulminating his critical thunderbolts and sharpening his wit, an ever-increasing number of the public for whom his criticism and his satire is intended will have experienced the healing of Christian Science, and will reply, in the words of the man born blind, "One thing I know, that, whereas I was blind, now I see."

[Royal D. Stearns in *Beatrice* (Neb.) *Sun.*]

The Christian Scientist believes the Bible teaching that it is God "who healeth all thy diseases." The Bible also teaches that God is Spirit, Mind, and that man is His image and likeness. There is no warrant in the Scripture for assuming or believing that God, Mind, has affinity for the material. There is nothing in the Bible or human experience to indicate that God is in any more need of assistance in administering His laws now than He was in the time of Jesus, or that any exigencies have arisen or can arise touching the spiritual development of mankind, that has not from all time been amply provided for.

Jesus said he came to fulfil the law, not to destroy it, and he violated every element of so-called physical law during the entire period of his active ministry. He healed the sick,—those afflicted with organic diseases,—without diagnosis, although one of his apostles had been a physician. He walked on the water, and raised the dead, and made no failure. He cured the most difficult cases in much less time than would have been required to have even called a physician. If Jesus had made any failures in his healing work, or if he had only handled functional disorders and had failed to secure relief when organic cases came to him, there might be force in the argument put forth, that if he were now upon earth, he would make use of modern medical methods; but his record furnishes no mistake of any kind, and when it is remembered that he healed every kind of ailment known to humanity during his time, instantaneously, and never made a failure, the question naturally arises why he should, if here now, want to change a perfect system of healing for one which even under the most advanced medical methods records daily failures that annually run into the millions.

The remedy Jesus relied upon exclusively was always at hand, and it never failed. He instantly relieved his patients, and thus removed all danger of every kind. The Christian Scientist has supreme confidence in the stability, as well as in the efficacy, of the apostolic plan. God's creation, the Bible tells us, was perfect; that all things were made by God, "with whom is no variableness," and that "whatsoever God doeth, it shall be for ever: nothing can be put to it, nor any thing taken from it." Then, if there is any reality to any form of sickness, in the sense that it is any part of God's creation, it must be of endless duration.

Furthermore, Jesus designated both disease and sin the work of the devil, and then declared the evil one "a liar, and the father of it." Christian Science is in full accord with the teaching and practice of Jesus when he said, "Whether is easier, to say, Thy sins be forgiven thee; or to say, Arise, and walk?" and when he said to another whom he had healed, "Sin no more, lest a worse thing come upon thee."

As a final summing up of the whole matter, we are told that "to be carnally minded is death; but to be spiritually minded is life and peace." Christian Scientists rely implicitly upon the efficacy of the application of spiritual law in demonstrating the truth of their doctrine, as is evidenced in the healing of every description of sickness and disease and in destroying every phase of misery, despair, and sin; and in doing this they accept the test demanded by Jesus himself when he said, "He that believeth on me, the works that I do shall he do also."

[Alfred Farlow in *Chester* (Pa.) *Times.*]

Our critic declares that the fundamental tenet of Christian Science is this, "Matter does not exist." This is not a premise of Christian Science, but a conclusion. The premise of Christian Science, as before stated, is its teaching concerning God. Moreover, the abstract statement, "Matter does not exist," needs the fuller explanations given in the Christian Science text-book, in order that the student may obtain an adequate knowledge of the subject.

Christian Science does not deny the existence of phenomena. It affirms that these are not what they seem to be from a material view-point. It is the mission of Christian Science to give a spiritual understanding of creation. Science teaches that in our present immature condition we do not see things as they really are, that as we progress spiritually, and consequently become more intelligent, our sense of creation will improve; that this improvement will continue until we reach the point of perfection, when we shall see creation exactly as it is and it will be discovered to be spiritual and not material. Matter is the name which is applied to the false sense of creation. As this false sense is not true, it is proper to say that it does not exist; hence the declaration, "There is no matter." Christian Science does not deny that sin and disease exist in erring mortal experiences. It does not hope to dispose of these by ignoring them, but by grappling with them and overcoming them through divine power.

Christian Scientists believe in the death and resurrection of our Lord, in the ascension, in the atonement. In fact, Christian Science is in perfect accord with the entire teaching of the Scripture. Our critic asserts that the activities of the Christian Scientists have not been "among the class of mankind that needs help," but "they would rather enter the fold like wolves seeking whom they might devour." This point alone is enough to reveal the fact that the gentleman has absolutely no knowledge of the work of Christian Scientists. I personally know many persons whom Christian Science has lifted out of all sorts of degradation into lives of purity and prosperity. The practice of Christian Science is not confined to any particular class; it is applied to those who call for it, among all classes, rich and poor, high and low. Christian Science is doing more for the poor and needy than any charitable institution could possibly do, because it not only

Digitized by Google

feeds the hungry, but it heals the sick, places them on their feet, enables them to work and earn a living.

It is said that the best sort of charity is that which dispenses with charity. To illustrate, I know an individual who was afflicted to such an extent that together with his family he had been for ten years supported by the county in which he lived. After a week's treatment by a Christian Scientist he was healed and immediately went to work, and has since earned his own living. Which is the better charity, to furnish food to a man for ten years, or to cure him in a week so that he can earn his own living? Moreover, Christian Scientists do not hesitate to help the poor and needy in a material way. During calamities they are liberal in their contributions. To illustrate: At the time of the recent Sicilian disaster the Christian Science church of Boston contributed far more than any other society in Boston, and when the call for funds was made by the Governor of Massachusetts, Mrs. Eddy's was the first personal check that was given in response, according to the newspaper reports. Christian Scientists are well aware that hospitals are necessary in this age of the world; that they will be essential until mortals have made sufficient spiritual growth to rely more upon the divine power. In keeping with this recognition, Mrs. Eddy recently gave five hundred dollars to the City Hospital, Newton, Mass.

Christian Scientists make no boasts as to what they are able to do. They simply point to the fact that an adequate degree of Christianity should enable all men to do the works which the Master did; that while one may be a Christian in a certain degree and not be able to do what Jesus did, yet as he continues to grow he must eventually measure up to the full stature of manhood in Christ and be able to fulfil the promise of the Master, "He that believeth on me, the works that I do shall he do also." As to the question whether Christian Science heals, we shall leave that to the multitude of witnesses who are already known to your readers.

[Algernon Hervey-Bathurst in *Richmond and Twickenham* (Eng.) *Times.*]

The Master said, "Lo, I am with you alway, even unto the end of the world." A spiritual and scientific understanding of the Master's teachings was demonstrated by healing the sick, reforming the sinner, raising the dead, nineteen hundred years ago, showing that the means of salvation from the thraldom of evil was then at hand. That same salvation, or Saviour, is at hand today. We have all had our Bibles, and possibly studied them for years; but only since Science and Health, frequently termed the Christian Scientists' commentary on the Bible, was given to the world, have we been able to realize that it is the privilege and duty of every disciple of Jesus the Christ for all time to obey his commands, or preach the word with "signs following."

Christian Scientists profess to have understood and demonstrated the teachings of Christian Science in a measure only, and they know that the day must come when not only will the "works" of the Master be done, but, in fulfilment of his words, the "greater works" as well. To quote cases of what the world has called "failures" of Christian Science is not argument. *Materia medica* is not infallible; but it would be neither Christian nor in keeping with the ordinary courtesies of life to condemn or malign those whose motive is to free humanity from suffering and pain. Christian Science has healed, and is healing, all kinds of diseases, organic as well as functional, and, above all, it is reforming the sinner.

No one is asked to study Christian Science, but so long as the sick are healed and the sinful reformed through its teachings, so long as men and women find in it the comfort they have failed to find elsewhere, so long as they learn through its teachings that God is at hand and "not a God afar off," just so long will they seek its support and protection, and those who seek it will not seek in vain.

[William E. Brown in *Portland* (Ore.) *Spectator.*]

Perhaps one of the most popular fallacies regarding the method of Christian Science is the idea that it ignores sin and sickness, and that if one only thinks he is well he will be so. This misconception is, of course, based upon a total misapprehension of the teaching of Science and Health, the text-book of Christian Science; there is nothing in this book that could be distorted into such a conclusion. Mrs. Eddy emphatically teaches that those who sin must suffer, and that the only way to maintain spiritual and physical health is to overcome sin and spiritual ignorance in all its forms. Christian Science recognizes that sin and disease are very real to the sufferer, and that they must be destroyed, not ignored.

Probably the most misunderstood proposition of Christian Science is its teaching regarding the non-existence of matter. The statement that "there is no matter," is not meant to convey the idea that all the objects in the world about us do not exist, nor that man has no body, but it is equivalent to saying that these are not material, as they seem to be to the senses. The declaration that "there is no matter" only partially defines the Christian Science doctrine; but when considered as a consequent of its correlative statement, "All is Mind," its meaning immediately becomes apparent, *i.e.,* that what is generally called matter is but a misconception of mental ideas.

It is a self-evident fact that Mind and matter as opposed entities could not exist, and since Mrs. Eddy has given forth her discovery of the allness of Mind, many physical scientists have changed their views regarding matter and agree with her that we live in a thought-world and that matter does not exist. Among others who subscribe to this theory of matter are Professors Ostwald, Huxley, Crookes, Lodge, and Curie, the latter being the famous discoverer of radium.

Mrs. Eddy's statement that "all is infinite Mind and its infinite manifestation," is strictly in accord with the Scriptural teaching that God is all and there is none else. The proof that this premise is correct and in accord with the teachings of Jesus is established in the healing and redemptive work accomplished by Christian Scientists. In this connection the Master said, "It is the spirit that quickeneth; the flesh profiteth nothing: the words that I speak unto you, they are spirit, and they are life."

[W. C. Williams in *Baltimore* (Md.) *American.*]

The teachings of Jesus and of all the prophets will remain a dead letter, mysterious and impractical, so long as the physical is considered the real and the spiritual the unreal. The Bible commands that we seek first the kingdom of God and His righteousness, and that all else will be added. The kingdom of God is spiritual. To find it, then, we must leave out the physical, which can tell us nothing of the spiritual, and the first step in this direction is to be willing that not our own will, but that of the Father, be done. When the absolute elimination of selfishness is accomplished, the kingdom of God will not be very far off and can readily be perceived; then, in giving all thought to the glorification of Truth, all else will be added, so that even to mortal eyes many of the results will be manifest.

Healing in Christian Science refers not only to the cure of sickness and disease, but to the overcoming of all erroneous conditions,—mental, moral, physical, and finan-

Digitized by Google

cial,—everything that is opposed to God's law, and these conditions are overcome through the understanding that under God's laws these are not facts. If they were facts, it would be impossible to overcome them. The healthy condition is the real condition in the mental and moral realm, as well as in the so-called physical expression. Moral and physical health cannot be obtained through the operation of mortal mind or will-power,—the carnal mind, as St. Paul called it,—but through divine Mind.

[James Phelps in *Stanley* (Wis.) *Republican.*]

Christian Scientists are firm believers in good ventilation, fresh air, soap and water; also in wholesome food and proper clothing for both children and adults. Moreover, to these they add temperance, purity, brotherly love, and faith in God. And last, but not least, they evince a lively consideration for the views of others, and therefore strictly observe laws relating to quarantine and the reporting of assertedly communicable and contagious diseases to the proper authorities.

[R. Stanhope Easterday in *Crawfordsville* (Ind.) *Journal.*]

The disciples and Paul did heal themselves and others through spiritual means and without drugs, and such healing by spiritual means, even to the raising of the dead, continued to be practised by the early church for some three hundred years. For centuries past, however, this phase of our Lord's teachings has been practically lost sight of, until today we find our brother and many another critic of Christian Science arguing that "Jesus did not institute miraculous [so called] healing as a continuous system." There is no justification within the lids of the Bible to support this contention, while Christian Scientists find much in the Bible which enjoins upon them the necessity for emulating our Lord in "all his mighty works," and today they are but making a reasonable effort thus to maintain "undivided" the Christly garment of healing and regeneration. It is unreasonable for us, however, to expect the ultimate of experience and demonstration before preliminary steps have been taken one by one. Already every known disease has been healed in Christian Science, and the healing results, now as in Jesus' time, from moral regeneration. The "prayer and fasting" which our Lord declared so essential is still the vital essential in the Christian's effort to heal the sick as Jesus did, and in fulfilment of his direct demand. Jesus often healed the physically infirm by "forgiving the sins" of the individual, while in the 91st Psalm "long life" is promised to the faithful followers of the good. It goes without saying that no one could hope to lift another to that high moral plane which would conduce to health unless he himself were already living on that plane. If our brother will but attempt to live the life of a Christian Scientist, he will learn that the Christian Science approximation of heaven on earth leads into no "rose-colored paths." The Christian Science "theory" is like the rainbow only in the sense that it gives "promise." The "practice" of the "theory" means struggle and effort. The Christian Scientist indeed has need of the "whole armor of God."

[Abbot Edes Smith in *Duluth* (Minn.) *News Tribune.*]

Christian Science does not deny the existence of pain under the human laws of disease and of sin to which mortals are usually subject; but Christian Science does maintain and prove by practical results that the apostle Paul made no mistake when he said: "The law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death." Jesus proved that the human laws of disease, as well as of sin, are nullified by the law of God, when an appeal is made to our heavenly Father; and our Master said: "He that believeth on me, the works that I do shall he do also." Thus our Saviour established the only test to show who are his worthy followers and who really believe in him.

Christian Science does not deny, it affirms the infinite personality and individuality of God, in the true philosophical and religious meaning of those words, namely, that God possesses infinite self-conscious existence, and knows Himself and knows and loves His whole creation, the least as well as the greatest. Following the plain teaching of our Saviour and of his apostles, Christian Science teaches a spiritual and infinite, not an anthropomorphic and finite, God. The word "Principle" is applied to God to emphasize the absoluteness and eternal unchangeableness of Him who is "the same yesterday, and to day, and for ever;" "With whom is no variableness, neither shadow of turning." The other words applied to God are all in accordance with and follow the Bible teaching.

In the Christian Science text-book, "Science and Health with Key to the Scriptures," Mrs. Eddy expressly affirms her belief in the immaculate conception of Jesus, in his resurrection and his ascension. She draws the distinction, long recognized by theologians, between the human side of his nature and the divine, between the Jesus who was born, who died, rose, and ascended, as he said, "unto my Father, and your Father; and to my God, and your God," and the eternal Christ of whom Jesus said, "Before Abraham was, I am,"—the Son of God.

Referring to one that dies in the Lord, is it right to criticize a person who says, as Jesus said of the maid, "She is not dead, but sleepeth"? The kingdom of heaven is recognized by Christian Scientists, as it was by Christ Jesus. The Bible is emphatically taught by Mrs. Eddy to be the foundation of Christian Science. The mental suggestions, etc., of "applied psychology" are merely the enforcement of the finite, human mind or will, in other words, hypnotism. This is not the method of healing used by Jesus, who surrendered the human mind or will to the infinite Mind, God, and without any assistance from physicians or from material remedies, healed all kinds of diseases. Our Saviour taught that those who believe in him shall do the works which he did. He said, "It is enough for the disciple that he be as his master." Shall not Christians follow Christ?

We are endeavoring to separate intellect and manual labor; we want one man to be always thinking and another to be always working, and we call one a gentleman and the other an operative: whereas the workman ought often to be thinking, and the thinker often to be working, and both should be gentlemen in the best sense. As it is, we make both ungentle, the one envying, the other despising his brother; and the mass of society is made up of morbid thinkers and miserable workers!—JOHN RUSKIN.

The two supreme dangers that menace a democratic state are despotism on the one hand and mob rule on the other. . . . The more constant and universal the voice of the people makes itself manifest, the nearer do we approach to an ideal government. The initiative and referendum make public opinion the controlling factor in the government. The more promptly and the more fully public officers carry into effect such public opinion, the more truly is government of the people realized.—JUSTICE DAVID BREWER.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

A LETTER BY MRS. EDDY.

Box G, Brookline, Mass., July 12, 1909.

Mrs. Augusta E. Stetson, New York City.

Beloved Student:—I have just finished reading your interesting letter. I thank you for acknowledging me as your Leader, and I know that every true follower of Christian Science abides by the definite rules which demonstrate the true following of their Leader; therefore, if you are sincere in your protestations and are doing as you say you are, you will be blessed in your obedience.

The Scriptures say, "Watch and pray, that ye enter not into temptation." You are aware that animal magnetism is the opposite of divine Science, and that this opponent is the means whereby the conflict against Truth is engendered and developed. Beloved! you need to watch and pray that the enemy of good cannot separate you from your Leader and best earthly friend.

You have been duly informed by me that, however much I desire to read all that you send to me, I have not the time to do so. The Christian Science Publishing Society will settle the question whether or not they shall publish your poems. It is part of their duties to relieve me of so much labor.

I thank you for the money you send me which was given you by your students. I shall devote it to a worthy and charitable purpose.

Mr. Adam Dickey is my secretary, through whom all my business is transacted.

Give my best wishes and love to your dear students and church.

Lovingly your teacher and Leader,

MARY BAKER EDDY.

"SEEK, AND YE SHALL FIND."

FREQUENTLY the editors of the *Sentinel* are asked to write on various subjects, the elucidation of which their correspondents believe to be necessary to the upbuilding of the Christian Science movement in some particular place, and while the editors are glad to be of such service as they can, it should not be expected that they will undertake to comply with all these requests, or even a great number of them. Many of the questions pertain solely to the local conditions surrounding the work of the questioner, and frequently they are of such a nature as to render an answer impossible by one who does not know both sides of the contention—for usually there is a contention back of these questions.

The Bible, Science and Health, the Church Manual, and other writings of our Leader, Mrs. Eddy, if thoroughly studied and their teachings and rules put into practice, are sufficient guides for the solving of the thousand and one questions which come up in the management of branch churches, Sunday Schools, and reading-rooms, as well as for the proper conduct of practitioners and church-members. Christian Scientists are in possession of these books, and they are free to consult them at any time; in fact, it is their duty to consult them, and thereby be able to work out their own salvation.

The Christian Scientist who wishes to heal the sick—whether himself or his neighbor—must be so familiar with the text-book, Science and Health, that he can apply the rule and destroy the false claim, whatever it may be, and a moment's consideration will show him that all the other claims of discord which come to him for betterment are so similar that he needs only to apply precisely the same rules as he would in a case of sickness. There is just one thing to be done in any and every instance, and that is to demonstrate the Principle of Christian Science.

The great work of a Christian Scientist is to heal the sick and reform the sinful, and if this is done diligently and prayerfully, with selflessness and consecration, the smaller matters with which so many of the questions referred to have to do, will sink into insignificance. Our Master said, "And as ye go, preach, saying, The kingdom of heaven is at hand. Heal the sick, cleanse the lepers, raise the dead, cast out devils: freely ye have received, freely give." Surely this is enough of an undertaking for any one.

ARCHIBALD MCLELLAN.

TRUTH IS INTELLIGIBLE.

CHRISTIAN SCIENCE rebukes the tendency to superficial thinking. Says our Leader, "We must . . . take up ontology,—'the science of real being.' We must look deep into realism instead of accepting only the outward sense of things" (Science and Health, p. 129). As the result of its material handicap, human sense does not find this an easy thing to do; but it is imperatively demanded in Science, and herein lies the explanation of much of the indisposition and antagonism of mortal thought. To his disciples Jesus said, "It is given unto you to know the mysteries of the kingdom of heaven, but to them [the indifferent outsiders] it is not given." So, too, St. Paul writes to the Ephesians that it was the purpose of God "to make all men see," through his preaching, "what is the fellowship of the mystery, which from the beginning of the world hath been hid in God," and he asks his faithful friends to pray that utterance may be given him, so that he may boldly "make known" this "mystery of the gospel."

Paul's Greek *mustarion*, makes it clear that he referred to the spiritual truths of the Christ-teaching respecting the nature of God and His manifestation, and of man and his dominion, which were revealed in the gospel and of which he was a God-appointed "steward." That these "deep things of God" are not mysteries in the sense of being incomprehensible or unintelligible, is made clear by the apostle's definite statement that they are to be understood and utilized by every Christian disciple.

Entirely in keeping with this teaching of the Master and of his great minister, Christian Science declares that spiritual truth is apprehensible, that we may so "know God" as consciously to enter upon the life eternal, and that this understanding may be utilized, as it was by Christ Jesus and his disciples, in the overcoming of sickness and sin, the solution of every human problem. In ancient Egypt and Greece the leaders of religious cults evidently not only consented to but encouraged the idea that much of the sacred teaching was reserved for the apprehension of the priestly class alone, and this idea still obtains to a pitiful extent even in the domain of Christian thought. That it tends to the advantage of the few and to the superstitious subserviency of the many, is manifest. Its degrading effect must have impressed St. Paul, and no doubt he was seeking to break the rule of this belief in his frequent references to the freedom-bringing power

Digitized by Google

of the gospel, his insistence that every believer was to become a veritable priest unto God.

In recognizing the likeness of man to God, the eternal oneness of the spiritual idea with its divine Principle, Christian Science makes logically apparent the fact that awakened thought is capable of apprehending divine truth, the Science of being, of embracing the divine ideas in consciousness and of responding thereto. This is the basis of that communion with God which is the vital fact of prayer, and this was the ideal toward which the psalmist aspired when he said, "Let the . . . meditation of my heart, be acceptable in thy sight, O Lord, my strength, and my redeemer."

Christian Science finds a sufficient ground and philosophy of spiritual healing in the recognition that evil with all its phenomena is unreal, of the nature of a lie, which may be corrected, cast out, by the truth of being in consciousness. It further teaches that the things of false material sense are by nature unintelligible, since they are without Principle, lawless, "an enigma" (Science and Health, p. 124) which it is wholly profitless to undertake to analyze or explain. Thought is thus centered upon Truth and its manifestations, to the unlabored apprehension of which we are attaining as we awaken and "rise from the dead,"—escape from the unintelligibility, inconsistency, and incongruity of mortal sense.

JOHN B. WILLIS.

THE LAST SUPPER.

THE last supper of Jesus with his disciples has been a favorite theme of artists and theologians, and around it have centered many of the dogmas of creedal Christianity. That it was a momentous occasion appears certain, from the fact that it is mentioned in the four Gospels, although John's account differs considerably from that of the other evangelists. He is the only one who mentions the washing of the disciples' feet, which followed the supper. Only Luke, who was not present on this occasion, has the statement, "This do in remembrance of me;" while John, who was present, lays great emphasis upon the admonition, "If I then, your Lord and Master, have washed your feet; ye also ought to wash one another's feet. For I have given you an example, that ye should do as I have done to you." Several Christian sects have insisted upon the literal fulfilment of this behest, as the greater number of the others have upon the commemoration of the last supper. The question today with many sincere Christians is, What have been the fruits in either case?

There are many devout thinkers, as well as Christian Scientists, who fail to find in the Gospel accounts of the last supper any hint of an intention on the part of Christ Jesus to make of the "remembrance," mentioned by Luke, a material rite. Did not Jesus seize upon everything which appealed to thought and make it an object-lesson for those who were seeking the truth? Did he not tell Peter and John that they were to become "fishers of men"? To the woman of whom he asked a drink, he told in immortal words of the "living water;" to others he pointed from their ordinary food to the "bread of life;" thus, too, the lessons of sower and seed, springtime and harvest, but never once did he fail to direct thought away from the material to the spiritual.

There are perhaps few who read the story of the last supper who pause to consider that at that time Jesus and his followers were excommunicate from the church of their fathers, for the reason that he had put to shame mere doctrines and beliefs, rites and ceremonies, by his demonstrations of the power of Truth to save from sin, sickness, and death. The priests said, "If we let him thus alone, all men will believe on him." At the yearly passover every household within the pale of the church had a lamb, killed for them by the priest, but Jesus and his followers were without the pale, so they could have no paschal lamb, nothing but the bread and wine which constituted the evening meal of the common people, yet what an occasion he made it! As our revered Leader says, "Their bread indeed came down from heaven;" and the wine was "the inspiration of Love, the draught our Master drank and commended to his followers" (Science and Health, pp. 33, 35). Christ Jesus did indeed bid his followers eat of his flesh—but how? Here are his words: "As the living Father hath sent me, and I live by the Father: so he that eateth me, even he shall live by me." That this bread "giveth life unto the world," Christian Scientists are proving daily in their own healing and in that of others, and they know that the demand of Truth is that every thought, word, and deed should be consecrated so as to be a perpetual "remembrance" of the Master's holy mission.

Deep is our gratitude to the one who has made known to us the privilege of "this spiritual meeting with our Lord in the dawn of a new light" (*Ibid*, p. 35),—the gloom of the last supper being dispelled by the glorious triumph of the resurrection morn, with its deathless promise to all who are "risen with Christ."

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

Rushville, Ind., July 6, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—It is with a heart full of appreciation that I attempt to write you regarding the change that has come into my life after years of earnest prayer by a good mother. I was addicted to almost every known evil habit, such as profanity, drinking, and the tobacco habit in its different forms, but what seemed worst of all happened a short time before I became interested in Christian Science—I took a small sum of money from my employer. After reading and studying Christian Science for a short time I found that I must right the wrong, but how? that was the question. It did not take long to decide, for there was but one way—the right way. Trusting divine Love to care for me, I went to my employer with double the amount I had taken, feeling that he was entitled to that. After telling him what I had done, I gave him the money, and much to my surprise he refused to take more than the original amount, and in a very impressive manner commended the step I had taken.

The teaching of Christian Science enables one to do right always. Words do not express my love to you for such teaching, and it is my humble desire to prove myself worthy to be called a follower and an advocate of this truth that makes free indeed.

With sincere gratitude, I am

WILLIAM O. FREEMAN.

Duxbury, Mass., June 28, 1909.

Dear Leader:—A sweet sense of tenderness has come to me, in my love for you, since reading your life by Sybil Wilbur, and I just want to tell you this. The glimpses I have caught there of your great sacrifice for us all, have made your writings more precious to me than ever before. Lovingly,

ALEXIE F. BUCHANAN.

Asheville, N. C., June 29, 1909.

Dear Leader:—The change you have made on page 55 (66) of the old edition) of "Unity of Good" has made it clear to us that, as we give up the thought of the flesh, we shall have the consciousness of divine Love. For

Digitized by Google

many years I read and reread our Master's words, "Take no thought . . . for the body," but I had no conception of what they meant until I read your book, Science and Health. Since then I have been trying to see the falsity of the belief in pleasure and pain in matter, and to be able to say, as did Job, "Yet in my flesh shall I see God."

With gratitude and love,

ALICE B. POWELL.

Los Angeles, Cal., June 20, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—It is with a sense of gratitude beyond the power of words to express, that we bear witness to the truth in Christian Science, and bring our love to you as a tribute of praise for the life which, by your own life, you have taught us to emulate. In seeking to follow where divine Love leads us, we have been instrumental in distributing our literature to the inmates of the county jail and hospital, various fire-engine houses, car barns, hotel and department store rest-rooms throughout the city, one of the railway stations, the Ransome Home for the Aged, the reading-room of the Bethlehem Institutional Church, and the George Junior Republic. We are glad to testify to the hearty good will and interest with which our efforts have been met in every instance, and to the results which have been made manifest to us as tokens of encouragement to continued work along this line.

A new meaning has come to some of us from the parable of the good Samaritan, for he took him that was beaten and robbed, "and set him upon his own beast, and brought him to an inn, and took care of him;" and when he departed he said to the host, "Take care of him; and whatsoever thou spendest more, when I come again, I will repay thee." Surely it is the power of God, as taught in Christian Science, which bears mankind away from the scenes of disaster and distress to the house of comfort and regeneration, and that says: "Take care of the brother man, and whatsoever he needs supply it at the cost of belief in materiality, and when the spiritual man is awakened, he will repay you." Yours in the Cause of Truth,

The Literature Distributing Committee of First Church of Christ, Scientist, of Los Angeles, Cal.

REV. ELMER C. ANDRUS, *Secretary,*
MRS. CLAIRE V. THOMAS, *Chairman.*

Chicago, Ill., April 6, 1909.

Dear Leader:—The Christian Science Monitor, as "a school for the education of the poor," is a kindergarten of learning for both young and old. As an object-lesson before the newspaper world, it stands alone. Its editorials are an education in themselves. You have established many branches of learning for the higher education of mankind, but the *Monitor* as an educator is an inspiration of crowning magnitude, for through it multitudes are being fed, thought is being purified, and to the poor the gospel is being preached.

A grateful reader,

NELLIE DODD PURNELL.

London, S. W., England, June 20, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—As ushers of this church, we unanimously desire, at this time of its dedication, to express to you our deep sense of gratitude for the healing message of Christian Science. We feel that it was indeed a privilege to participate in that special and uplifting experience, lovingly assisted, as we were, by several members of the other London churches, in hearty response to our invitation. It was gratifying, too, to see the building full, and to note the harmony and peace that prevailed throughout both services.

Recognizing that the progress of our Cause in this country has been made possible only through the dedication of your life to the service of omnipresent Love, we begin to see the necessity for consecrating ourselves more wholly to the realization of Spirit as All. You have already shown us the way, and as we "follow and rejoice," we find that the lessons learned from our duties are many and invaluable. Doorkeepers in the house of the Lord, we would gain the higher sense of our office,—that of helping our brother-man into a haven of release from the storms of sin and suffering, within that Mind which was in Christ Jesus. Lovingly and loyally yours,

The Ushers of First Church of Christ, Scientist, London, England.

CHARLES BUCKLAND, *Chairman.*

Frankfurt, a|M, Germany, June 15, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader and Friend:—For one moment let your thought rest upon this field, where workers and congregation alike look up to you in deep and heartfelt gratitude for your loving wisdom and watchful care, brought to bear upon us by every onward move of that Cause which we have all embraced and are serving, each one as he best knows how. Experience has shown us that waiting patiently on God means having our path directed.

This field is but small, and at times the odds against us seem heavy, but this last week has been one of rejoicing, with all difficulties fallen away—we have had our second lecture. Dear Dr. and Mrs. Fluno did some loving work here, on their way down to South Africa. At the lecture attention was riveted, and the response was enthusiastic and sincere. Dr. Fluno said at the following Wednesday evening meeting that he had not found it difficult to lecture here—what that means in a German field, with an almost exclusively German audience, only they know who have gained a glimpse of the spiritual language, and the joyous gratitude is more than can be expressed, except by pressing on to reach those shores where only the "still small voice" is heard. We have all felt the growth since last year's lecture, given by Mr. Kimball, and I wish to say what a boon these landmarks are, and how they bring to the far-off fields a big wave of that Spirit-atmosphere which is the air of home for every one of us.

We would, one and all of us, send you the best we have: a fervent God bless you, and keep us steadfast in the way you have opened up for us, rejoicing alway.

In loving gratitude,

POLDINE, BARONESS SENFFT VON PILSACH.

Brooklyn, N. Y., July 5, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—The board of trustees of First Church of Christ, Scientist, of Brooklyn, N. Y., in behalf of the members of the church and congregation, desire to express to you their gratitude and appreciation for the restoration to our Hymnal of the old tunes to your hymns, which are so closely associated with our early experiences in Christian Science. This is added proof to your followers that you reflect the wondrous activity of the one Mind, bestowing and enriching with the fulness of Love wrought out in life practice.

Faithfully yours,

MRS. EMMA SLOAN FIELD, *Secretary.*

THE LECTURES.

BRISTOL, ENGLAND.

There was an audience of greater proportions than could be comfortably accommodated in the Lesser Colston Hall last night [May 6] to hear a lecture on Christian Science by Francis J. Fluno, M.D., of Oakland, Cal. William N. Miller, K.C., who was in the chair, spoke words of welcome on behalf of the members of First Church of Christ, Scientist, in Bristol, and explained that their reason in offering the lecture was because it contained something that Bristol people would want to hear, something that would be of benefit. For hundreds of years mortals had been dissatisfied with their concept of God, of man, and of the universe. Regarding God as the God of good and evil, man as mortal, and the universe as material, it was inconceivable that men could have been otherwise than dissatisfied. The mixture of good and evil was subversive of perfection, and mortality and materiality must end in gloom and death. Christian Science came with glad tidings and great joy not only to the sinner, but to the sick—to all who had been bearing the curse of pain, no matter from what cause, and struggling ineffectually to be free. Christian Science was one great whole. It reformed the sinner, healed the sick, comforted the sorrowing, and unified men in one and the same way—in the way demonstrated and pointed out by Jesus Christ. It was a unity of good, and Christian Scientists were united the world over in their endeavor to heal sickness and destroy sin. Christian Science was rapidly bringing into sight a new heaven and a new earth wherein dwelt right thinking. Recently a professor, in addressing his class, said a new gospel had arisen, a gospel of healthy-mindedness. Yes, that was so. Forty years ago there was only one who understood and preached that gospel. Like the voice of one crying in the wilderness, an ideal woman had appeared and proclaimed that great fact of existence—"All is infinite Mind and its infinite manifestation, for God is All-in-all." The spiritual idea born in her consciousness gained strength and developed, so that this thought was not now confined to a few, but was generally accepted. At first few heeded it, but now this gospel of right-mindedness, right-thinking, was accepted in every quarter, through the teaching of "Science and Health with Key to the Scriptures" by Mary Baker Eddy, the Discoverer and Founder of Christian Science.—*Bristol Mercury.*

DOVER, N. H.

On Sunday, May 16, there was a lecture on Christian Science delivered in the City Opera House by Bliss Knapp. Mayor Foster presided, and in introducing the lecturer said in part,—

I realize that Christian Science today engrosses the attention of a large number of the people of this and other lands, and has grown, perhaps, more largely in recent years than any other form of secular worship. Far be it from me to decry any form of Christian worship. My earliest recollections take me back to a sainted mother, a follower of the lowly Nazarene, whose every wish was that her children be good, conscientious Christians, believers in a future destiny. Such belief is, therefore, ingrained in my nature, and I cannot find room in my heart for prejudice against any form of intelligent Christian worship. There must be virtue in a religion which has gained so many adherents of strong mentality as have the teachings of Mrs. Eddy. She is indeed a remarkable woman, and her influence has been more powerful for good than that of any woman of whom history has any knowledge. A remarkable thing about Christian Science is that it appeals to the reason of men, and has therefore gained a tremendous following among people of culture who think for themselves and are not swayed from their moorings by every passing breeze. Those of us who have not accepted Christian Science as a fundamental belief can listen to an exposition of its teachings from one who believes what he says and can give strong reasons for the faith which is within him.

I confess that I have not studied the works of Mrs. Eddy, and have perhaps been led to believe that the cardinal fundamentals of your faith have their origin in the triumph of mind over matter, to the discomfiture of *materia medica* and all other material things. I realize, however, that the foundations of your belief must be laid deeper than this, or the faith would not have been accepted by so many thousands of leaders of advanced thought in all parts of the Christian world. With a mind, therefore, free from bias, I gladly listen to the expositions of faith from those who have searched wide and deep that their judgment might be well founded, and shall hear with pleasure, and possibly with profit, the distinguished member of your cult who is here this afternoon.

Foster's Democrat.

KANSAS CITY, MO.

Before an audience of nearly six thousand people Christian Science as a religion, as a system of scientific healing, or as a logical plan for right living, was fully discussed by Bicknell Young of Chicago in his lecture yesterday afternoon [May 16] at Convention Hall, under the auspices of the three Christian Science churches of the city. Senator A. L. Cooper, who introduced the speaker, said,—

I want to express the high regard I entertain, in common with all our people, for your church, its membership, and the excellent work it is doing in this community. It has met prejudice and criticism with patience, and has steadfastly and with dignity pursued its task. This magnificent audience, composed of many, like myself, who are not Scientists, is a tribute to your sincerity as well as to the great ability and reputation of the lecturer of the day.

Kansas City Journal.

MANKATO, MINN.

Christian Science, pure and simple, was explained and described in a manner that was intensely interesting and satisfactory by Frank H. Leonard at the Opera House last night [May 18]. Senator S. D. Works presented the lecturer in the following words:—

I am sure it affords me great pleasure to introduce to you a man who will speak to you along lines of a cult that has become popular. I use the word popular advisedly, for this is a great question and one that lays hold of one of the most vital forces in human life, that of health. At present one of the great movements of modern times, and one that cannot but appeal to every thinking man, is Christian Science. Never did I believe more in Christianity than tonight. We all believe in Christianity, and we all believe in science, but when there comes to us a man who blends Christianity and science as applied to human ills, we cannot afford to be indifferent. I am perfectly free to say that I know very little about the subject of Christian Science, but believing that it comes into the world to help and bless, it is entitled to a place in our thoughts and lives, and I take pleasure in introducing the lecturer.

Mankato Free Press.

LECTURES AT OTHER PLACES.

TESTIMONIES OF HEALING.

It is with a sense of deep gratitude to God, and to our beloved Leader, Mrs. Eddy, that I take this opportunity of telling what Christian Science has done and is doing for me. It was about four years ago that I first heard of it. I was then an active church-member, and was very much against what I then supposed to be the teachings of Christian Science. I was, however, healed of an infirmity which I had had from childhood,—a swollen foot, which gave me great pain whenever I walked any distance, and often I would not be able to put my shoe on at all. I could get no relief from material means and thought I should always have to suffer from the foot, but this complaint was healed by the truth. I have no difficulty now whatever from it, and can walk any distance.

Other ills have since disappeared by the understanding of the truth as taught in Christian Science. I never knew in the old thought what it meant to be free from worry, but now I do not know what it is to worry, and every day I have more to be grateful for. Divine Love is my daily support and "I know that my redeemer liveth." I have never been so happy in my life as since I took up the study of our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. I am indeed grateful for the physical healing, and for the spiritual uplifting,—the clearer understanding of God, good. As one sees the noble work which our Leader is doing for mankind, is it any wonder that the heart goes out to her in loving gratitude? She has made the way so clear that all who will may partake of this glorious truth.

LILY M. BOTTING, London, England.

When a girl of sixteen years I was supposed to be injured through overwork, and this brought on a complication of diseases, among them a serious heart difficulty, which lasted for years and resulted in bloating on my left side and great distress. For about thirty or forty years I was unable to turn my head without turning my whole body, and I was also supposed to have spinal disease.

Some years ago my daughter was wonderfully healed through Christian Science, after years of suffering, and I could not help but acknowledge that this healing must be of God, for surely it was like the works of our Master, whom I had been taught to love and reverence from early childhood. So, when I was attacked by illness two years ago, I did not want to call a doctor, but longed to get to my daughter's home, where I knew I could receive the help I wished. With great difficulty I was taken there in a carriage, and a Christian Science practitioner was sent for. By this time the pain was so very severe that I could not bear to be touched, but I did not tell the Scientist all my complaints, as I thought it would discourage her. I did, however, mention the swelling of my legs and feet, and the difficulty with my neck.

In just two weeks I was healed, not only of the rheumatic trouble, but of the swelling, and I was able to turn my head naturally and to lift it up, nor has there been any return of any of these complaints. Besides the physical disorders I was very sad over the loss of two of my children, who died years ago. I did not seem to get over their loss at all, but since I had this treatment it is as if a load of gloom had been lifted from me. Why should I not be very grateful for what Christian Science has done for me and mine, and be ready to speak a good word for it whenever I can?

As the world counts time, I am over eighty-two years old, but I now have much better health than I have had in many years.

MRS. PHEBE L. DAVIS, Old Mystic, Conn.

I came to Christian Science for mental help as much as for physical. I was said to have tubercular lung and throat disease at the time I went to a practitioner for treatment. For about four years I had been practically an invalid, having to spend most of my time in a dry climate (Denver, Col.) under the care of two physicians, away from home and all that was most dear to me. At the time I began to investigate Christian Science, I was much better than I had been previously, but the constant worry and fear of getting worse, or of never getting well and of being so far from my friends, had put me into a terrible state mentally. I came to the conclusion that something must be done, or I would have to give up the struggle for life.

After a week's treatment in Christian Science the fear of climate had entirely left me; my voice, which had been scarcely audible, had improved, and my cough immediately began to lessen. After five weeks' treatment I felt thoroughly satisfied, and well enough to return to my home in the South. I did so, and continued the study of Christian Science. I have in a little over two years never had any treatment, other than my own study and understanding of this truth. I am well in every physical respect, but this is not half, for I have gained so much mentally and spiritually. My life, which once seemed all trial and suffering, is now one of continual peace and joy; for when trials do come I have something that never fails,—Truth, Principle,—and when thought is rightly directed, it never fails to bring harmonious results. I am indeed very grateful to Mrs. Eddy for showing us the way to health and giving us a true understanding of the Bible.

MRS. ORMAN SMITH, Paragould, Ark.

[Translated from the German.]

I give this testimony with deep gratitude for all that Christian Science has done for me and my family. For eight years I suffered from a terrible disease, which made me so weak that I was unable to do any kind of work. I was obliged to submit to an operation by which twenty-four teeth were removed; but instead of improving I grew worse, and the physicians said that an operation involving the brain was necessary. While in this desperate condition I heard of Christian Science, and after I had attended the services a few times I asked for help. After the second treatment I began to feel the power of Truth, and during two weeks' treatment I regained perfect health, for which I am infinitely thankful to God.

When my boy was four years old, he had a cough, with serious complications. As a result one eye became badly distorted, and the sight of both eyes was so much affected that he could see only by using very strong glasses. The weakness and the pain in the eyes increased every year, so that when he was about thirteen the physicians urged us to have an operation performed, but we could not consent to that. After I had been healed in Christian Science, however, I asked for help for my child, and with a few treatments the distorted eye regained its normal appearance completely, and the sight of both eyes was restored. This same boy was brought home unconscious by a physician a few weeks ago. He had met with a very severe accident on the bicycling-ground. I immediately treated him in Christian Science, and then asked a practitioner to help me. She did so, with the result that the boy could go to school four days later, completely healed. My little girl too was freed, through Christian Science, in a very short time of a distressing ailment of years' standing, and is now a strong and healthy child.

For all these blessings, and for the help that has come to me and mine through Christian Science, I thank God, and our beloved Leader, Mrs. Eddy, with all my heart.

FRAU AUGUSTE MINNA SCHLUND, Dresden-Plauen, Germany.

Digitized by Google

I should like to tell in the columns of the *Sentinel* how Christian Science, through the understanding of one of our Leader's faithful students, proved to me that man is free from the law of sin and death.

About thirteen years ago, I was on the verge of a nervous breakdown. My home training had been such that medicine did not appeal to me very strongly, although I did take some medicine and occasionally consulted a physician. The family with whom I was boarding talked with me about Christian Science, and after some persuasion I consented to have them call a practitioner, that I might have a talk with her. I took treatment for two weeks, but apparently without effect; so it was discontinued. I gave up my position as a teacher, and went to another city, there to have my thought prepared, through more suffering, for the reception of the truth. In a few months, a paralytic condition appeared in my left side, and I was in such bondage to fear that I was on the verge of despair. I consulted a physician and had massage treatment, but without relief. In this condition I wrote my former Christian Science practitioner, and received help immediately. In three days the paralytic condition had entirely disappeared. I purchased a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and began the study of this wonderful book, every page of which seemed illumined. After studying this book and other works by the same author, and with the assistance of the faithful practitioner, in about a year headaches of ten years' standing were also overcome.

It would be impossible for me to enumerate the blessings that have come to me, and through my understanding of Christian Science I have been able to help others. My gratitude to Mrs. Eddy cannot be expressed in words, it can only be shown by a life devoted to Truth and by striving to overcome all that is unlike God. As to her leadership, these lines from Goldsmith (with a slight change) seem a fitting tribute:—

> And as a bird each fond endearment tries,
> To tempt his new-fledged offspring to the skies,
> She tries each art, reproves each dull delay,
> Allures to brighter worlds, and leads the way.

FRANK H. DAME, Detroit, Mich.

Many times I have felt a great desire to make public acknowledgment, through our periodicals, of the great good and benefit that Christian Science has been and is to me and mine. For fifteen years I have tried to live a life in accord with the teachings given in "Science and Health with Key to the Scriptures" by Mrs. Eddy. I have been a member of The Mother Church eleven years, and during that time have been able to show the way to many others. For myself and family, Christian Science has been our only physician, and I want to mention two cases of quick and permanent healing that have taken place within the year.

I awoke one morning to find myself in great pain, which in an hour seemed to grow almost unbearable. I was not able to meet it quickly, so turned to a faithful Scientist for help. My husband telephoned to her about ten o'clock, and in a half hour after I was free from pain and sound asleep. I awakened at noon, healed, with the exception of a sense of weakness, which lifted gradually, and I was able to be in my place by the afternoon. At another time, my husband, who is not a Christian Scientist, had an eruption on his face, accompanied with pain so great that he could not lie down. Christian Science treatment was given him, and through the realization of God's dear love, ever-presence, and all-power, the difficulty was perfectly met in about four days' time.

To say that I am grateful to God, and to our loved Leader, seems a small thing to do. I am learning more and more that true gratitude is expressed better in deeds than in words, and that all true Christian Scientists can show love to their Leader by obeying the Scriptural injunction, "The servant of the Lord must not strive" (with personality), but by patient overcoming of self help her to establish "on earth peace, good will toward men."

MRS. GERTRUDE FRENCH, Jersey City, N. J.

With a heart always full of gratitude for what Christian Science has accomplished for me and mine, today I must give expression to it, for my thankfulness is without measure. Because of an experience which came to me quite recently, this demonstration which I offer was brought back very vividly to my thought. During the evening I chanced to be with a young man who was suffering from an offensive catarrhal trouble. I myself had endured this disease for more than twenty years, in its most aggravated form, although I was treated constantly during that time by the best specialist obtainable, but unsuccessfully. The physical suffering at times was intense, but it never compared with the mental anguish of knowing that I was rather to be shunned than sought after. This is only one of the many diseases of both mind and body from which Christian Science has freed me absolutely, and for this healing I today give heartfelt thanks.

When it comes to expressing my gratitude for the changed view-point which the study and demonstration of Christian Science have brought me respecting life and experience, words fail me, as they do when in deepest humility I desire to add my gratitude to that of the many thousands who are expressing their thanks to Mrs. Eddy for this wonderful revelation.

MAY T. GREENWOOD, Oakland, Cal.

I feel that words are inadequate to express my gratitude for what Christian Science has done for me, for it found me, less than a year ago, discouraged, disheartened, and to mortal sense a physical wreck. I suffered periodically from depression, and had frequent headaches, which often became very severe, the pain being so intense that my family dared not leave me alone when under these attacks. Hypodermic injections had to be resorted to before relief could be obtained, but the headaches became so frequent that I was obliged to give up the practice of law, in which I had been engaged for twenty years. I had also suffered for over twenty years from a bowel disorder, which finally developed into a serious form.

At last my condition became such that I went to a sanitarium, where I remained under treatment two months. The physicians gave me no encouragement to remain longer, but advised that I might be benefited by change of climate, and acting on this advice I came to California. After spending three months at health resorts in different parts of the state, without receiving any benefit, I came to San Diego to spend the winter, if I should live to do so. In this condition, when I could feel nothing but discouragement and despair, Christian Science was presented to me. I had never heard of this teaching before, therefore knew nothing about it; but it appealed strongly to me, as a last resort.

I attended the Wednesday evening testimonial meeting at the church, it being my first Christian Science service. I was encouraged to call on a practitioner next day, and with loving, helpful, and encouraging words she told me about God's love for His children. During the first treatment I felt the power of Truth in no uncertain fashion, and the bowel trouble was overcome in that one treatment. The nervous affection, and many other inharmonies, including irritability and profanity, have also faded away to their native nothingness.

I am most thankful to God, and deeply grateful to our

Digitized by Google

Leader, Mrs. Eddy, through whom this truth was revealed to us. My appreciation of the faithful and loving work done in Christian Science is indeed very great.

W. W. BARNGROVER, San Diego, Cal.

I am indeed thankful to God for the benefits and blessings I have received through Christian Science. Five years ago I was a physical wreck. I had kidney and rheumatic disease in their worst form, and for two years I was unable to walk without a cane. I was treated by three physicians, and I also spent two weeks at a hot spring in Utah, but I derived no good from this. A friend then recommended the hot springs of Arkansas, and I took baths there for nine weeks, but I only got worse, and finally returned home very much discouraged, as my recovery was not expected.

I had heard of Christian Science in 1897, from a Scientist whom I met on a train, on his way to California. He told me what it had done for him, and that it could heal all kinds of diseases, and I was comforted somewhat by his statement, for I never had much faith in drugs; but when I wanted Christian Science, seven years later, I knew not where to go to find it, so I went on taking medicine for four or five months, without any benefit, until one day when a member of the family found a copy of *The Christian Science Journal* and handed it to me. I cannot express the joy that I felt when I read the testimonies. I then knew that there was help for me also. I looked over the list of Christian Science practitioners, and gave my case to one of them, who treated me for four or five months. Through this and by the study of our text-book, in connection with the Bible, I was healed of this painful disease. Several minor ailments have also been overcome through the power of Truth.

I am indeed thankful for the physical healing, but I am more grateful for the spiritual uplifting,—to know that God is all-power, Life, Truth, and Love. Words are inadequate to express my love and gratitude to dear Mrs. Eddy, through whom this truth has been revealed.

JOHN H. REIMERS, Laramie, Wyo.

I wish to express my gratitude for two healings which I have had in Christian Science. One Sunday morning, as I was getting ready for church, I was taken with such severe pains that I nearly lost consciousness. It seemed that the conditions were the same as when I had an attack of appendicitis, only much worse. My husband called a practitioner by telephone, and inside of half an hour I was healed, dressed, and on my way to church.

A month or so later I had a severe attack of illness, so that I lost my hearing in the right ear. As I am a business woman, this seemed a dreadful misfortune. We called a practitioner, who started at once to treat me. The pain left during the day, but the hearing was not yet restored, and I had to watch the faces of those around me to guess what they were saying. At the end of the week I could hear perfectly, even better than before. To me this was a wonderful healing, but the restoration of my hearing was only a part of it. I received such an uplift spiritually that I thank God for it, and I also thank Mrs. Eddy for all that I have received through Christian Science.—MRS. EMMA MILLER, Oak Park, Ill.

[Translated from the German.]

Having often had the opportunity to prove the healing power of Christian Science, I am sending these words in its praise, and for the honor of God. My nephew, a lad seventeen years old, who has been brought up in my home, was healed of an ever-recurring eye difficulty, lung trouble, fainting-spells, etc., and for the last few years has been healthy and strong. My son, who is a devoted football player, gets injured now and then, and has always been healed through Christian Science. Formerly I used to suffer a good deal from lung trouble, but now I am able, through spiritual understanding, to overcome this complaint, as well as others, as soon as indications appear. My sister has been freed from stomach and rheumatic disorders; her daughter, from eye affection and other ills.

Christian Science has also proved a blessing to me in the business line; and I thank God with all my heart for His gracious help, and Mrs. Eddy for her discovery.

FRAU LANG, Veltheim, Ct. Zurich, Switzerland.

Since I became interested in Christian Science it has been a great help to me and my family. I have never been very strong, and a great sense of fear has made my life a burden. I had heard of Christian Science and the wonderful demonstrations that had been made through its teaching, and about six months ago I decided to investigate it for myself. Since then I have received so much help that I am convinced Christian Science is the truth. I know that as the truth unfolds to me I shall grow into a better understanding, and will finally overcome all sense of fear. My children have been greatly benefited by Christian Science. My youngest boy had a cough which disturbed him greatly all one night. The next morning I took him to a Christian Science practitioner and in one treatment he was cured. At another time he manifested the symptoms of oak poisoning and was very sick. He was, however, healed in two treatments. My other little boy suffered severely with toothache, but he was healed by Christian Science in a few minutes.

I am very grateful for these demonstrations, also that the children learn to demonstrate the truth for themselves so quickly. They attend the Christian Science Sunday School and try to put into practice what they learn. The other evening I had a very troublesome ailment and could not seem to help myself, so I asked my little boy to try to help me. He closed his eyes and declared the truth, and in a moment's time I was entirely free.

MRS. L. F. HENDERSON, Palo Alto, Cal.

Our beloved Leader, Mrs. Eddy, says in Science and Health (p. 200), that "Life is, always has been, and ever will be independent of matter;" and I have recently had a beautiful proof of God's protecting care. I turned from material remedies to Christian Science about three years ago, and although the benefits which I received from it have been very great, still I did not realize how near God is to us, till His tender care was manifested to me at the time of an accident. I was on my way to a Wednesday evening meeting, with some friends, and was about to cross a street near the church when without any warning a large touring-car came rapidly around the corner, and as I looked up the headlights were close upon me. The automobile struck me on the side, throwing me on my face, and two wheels passed over my body.

I had just been telling my friends what Christian Science had done for me, and my thought was full of God's goodness and love, so, as I saw the automobile bearing down upon me, my thought turned to God immediately for protection and help. I was perfectly conscious of everything that occurred, and felt one wheel after the other pass over me, but wonderful as it may seem to others, they felt as a featherweight to me. In an unexplainable way I seemed to be lifted up above it all. A Christian Science practitioner came up just at this time, and stayed with me as long as I needed her. I was carried into a house near by, and an ambulance was sent for to take me home.

Digitized by Google

Although my gown and underclothing were badly torn, and my jewelry bent out of shape, I was practically unharmed. My parents called a surgeon to examine me, but to his amazement he found no injuries beyond a few bruises and one arm that he thought might be seriously hurt. He therefore continued to examine it each day, until he was finally assured as to my safety.

Our dear Leader says in Science and Health (p. 560) that "the great miracle, to human sense, is divine Love;" and such it was to me. The surgeon said I was very brave, but I did not have any pain at all, and after the first night or two I slept as usual. I had no sign of fever at any time, and ate three hearty meals a day. This experience has been a most beautiful and helpful one to me, for I have been brought so much nearer to our Father-Mother God, divine Love, who is always near us. I rejoice in this beautiful proof of Love's care and protection, for it has not only helped me, but many people, who did not really know what Christian Science is, have heard of this wonderful demonstration, and have become interested by reason of it. I want to live so that my light will shine and glorify God daily. My gratitude and love to God is very great, also to Mrs. Eddy, who has brought us this wonderful truth, and helped us to know the power of divine Love. I know now that there never was an accident to God's child.—Miss Mary Eloise Decker, South Pasadena, Cal.

[Translated from the German.]

In addition to other blessings which I have received through Christion Science, I would like to tell of the following experience, which occurred in the summer of 1907. While standing on the ladder in the drying-loft, the ladder slipped and I fell with it through an open door. I lay for a few minutes on the floor, as there was no one in the house to come to my rescue; but I called upon God, who is omnipresent, for help; I then was able to get up. My daughter was absent at the time, and when my son-in-law came home at one o'clock he was frightened at my appearance and asked what had happened. When I told him, he wrote to a Christian Science practitioner and asked for absent treatment, as the injuries were seemingly very severe. I suffered much pain and could only move about with a cane, but the practitioner gave me a present treatment on the next day, and the pain soon lessened. With a few more treatments I was restored within two weeks.

I cannot thank God enough for this healing. I also thank God that He has enabled our dear Leader, Mrs. Eddy, to lead us into the way of truth.

Frau A. Boehme, Berlin, S. W., Germany.

For the many blessings which I have received through Christian Science I am very grateful, and I hope my testimony may help some other sufferer. In June, 1906, I was seriously injured while trying to hold on to a barrel of sugar which had slipped from my wagon. After several days of suffering a doctor was called, who advised me to go to a hospital, as he thought the kidneys must have been severely injured and that I would have to be operated upon. I could not make up my mind to go to the hospital, so I had Christian Science for my healing. In four weeks I was free from the injury and since then I have never been troubled with it.

Many other blessings have I had through this saving truth. When a boy of fifteen I got the full discharge of a toy cannon in my face. The eyes and face were black with powder, but through Christian Science in four days all trace of it had disappeared, and all pain left me after the first treatment. I give thanks to God, and to Mrs. Eddy for this healing truth.

Wendolin Fassler, Hopkins, Minn.

Christian Science was first brought to my attention through the healing of my wife of nervous and bowel difficulty. At that time I was suffering from a complaint diagnosed by four leading physicians of Los Angeles as disease of the kidneys and bladder. I was continually in pain, and for many years was obliged to use an air-cushion when sitting. As the only relief the doctors suggested an operation, but seeing the benefit my wife had derived from Christian Science, I decided to give it a trial, and in four weeks I was entirely cured. A few weeks after my healing, our boy of eleven was taken sick, and as I feared that Christian Science could not help a child, I called in a physician. He diagnosed the case as a serious disease of the kidneys, and for three weeks we kept the child under the doctor's care, also employing a trained nurse for the whole time. Then treatment at hot springs was advised, so three weeks more were spent there in vain. Finally we again turned to Christian Science. The diet which the physicians had prescribed was discontinued, and in three weeks the boy was entirely healed.

These are some of the many healings accomplished in our home, and all of us are surely thankful not only for the physical benefits obtained, but for the peace and rest it has brought to us in our daily life.

George A. Ralphs, Los Angeles, Cal.

I wish to express my gratitude for the healing of my boy through Christian Science treatment, after his case had been pronounced hopeless by the physicians. From childhood he was said to have weak lungs, and he also showed signs of mental weakness, at times suffering from nervous attacks bordering on insanity. He was under the care of physicians a great deal of the time, but instead of improving his condition grew gradually worse, until about four years ago, when he was declared to be suffering from an affection of the lungs in its worst form. Every available remedy was tried, but none of them afforded any help. After a consultation of physicians, and when all hope was given up, a friend advised that we try Christian Science. A practitioner was consulted, and in a short time after the treatment began the boy commenced to improve. In about two months he was entirely healed physically, also greatly improved mentally. Since his healing he has worked the greater part of the time, which he was never able to do before.

I cannot express in words my gratitude for this proof which Christian Science has given us, that God is "a very present help in trouble."

Manda Harris, Richmond, Ky.

The first real, earnest religious faith that shall arise upon the ruins of the old worn-out creeds will transform the whole of our actual social organization, because every strong and earnest faith tends to apply itself to every branch of human activity; because in every epoch of its existence the earth has ever tended to conform itself to the heaven in which it then believed; and because the whole history of humanity is but the repetition—in form and degree varying according to the diversity of the times—of the words of the dominical Christian prayer: "Thy kingdom come . . . in earth, as it is in heaven."

Joseph Mazzini.

The whole world is before us from which to choose the best; but we must choose, we cannot take everything. He who tries to take everything gets nothing.—*Outlook.*

Digitized by Google

FROM OUR EXCHANGES.

[Rev. H. Arnold Thomas, M.A., in *British Congregationalist.*]

It is good to think of what Christ Jesus was and of what he did yesterday, but it is better to believe that he is the same today. That is, then, how we are to conceive of him. He is at the right hand of the throne of God. Ah, yes, but where is that? Surely somewhere at an infinite distance from this poor earth on which we toil and suffer. We might as well think of him as being far away in the past as on that remote and inaccessible throne. But why should you speak of the throne as remote and inaccessible? It is nothing of the kind. Where is the throne? It is everywhere. It is here. It is where God is, and where is God not? To be at the right hand of the throne means not to be very far away, but to be invested with all authority and power. Do not let us banish our Lord from the world he came to redeem. He is where two or three are gathered together in his name. He is where any solitary, anxious soul is seeking help and guidance. He is in the darkest part of the valley of the shadow of death. He is everywhere where he is wanted. That is the way to think of him. That is the Christ of faith.

[John Bascom, LL.D., in *Christian Register.*]

The very gist of a religious temper is the daily discovery of a presence of wisdom and goodness in the world. Ye shall have no other God before me. Ye shall not make unto thee any graven image or any likeness of anything that is in heaven above, or that is in the earth beneath, or that is in the waters under the earth. Nothing is to come between us and God. Nothing can be so omnipresent, controlling, consoling, and resourceful as this conviction of a pervasive spiritual presence. It gives us at once the mastery of all circumstances, the power to confront and draw strength from them.

[*Christian Life,* London.]

Did not the first apostles leave behind their homes and old associations to face torment and death in their faithfulness to their Master and ours? Did not Saul of Tarsus become Paul the Christian saint because he followed unhesitatingly the light from heaven? It were well if in our own day more boldness and a nicer fidelity to conviction could seize upon the souls of thoughtful men and women, to whom the older "orthodoxy" has become to a certain extent obsolete.

[*New York Observer.*]

The thoughts of the hurrying, often worrying world need to be recalled from its worship of itself and its devotion to current opinion to a contemplation of those eternal values and those severe existences which lie beyond the reach of cavil and the harm of corruption. If our standards are great, we shall be great; if our vision is high, we shall some time stand upon the heights. The greatest thing in the world is to please God.

[*Universalist Leader.*]

Many things our Master did in the little time he tented here among us, but none was greater than this, that he changed the climate of the soul and made a warmer world of divine tenderness and pity and love where men may grow to nobler stature and to finer flowering of spirit and of experience.

[Silas McBee in *Churchman.*]

The public conscience is being awakened, but in the face of this quickening of the social conscience the tendency is growing, not diminishing, to make a sharp distinction between Christ and organized Christianity.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel.* Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel.*

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to JOHN V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

The Publishing Society has in stock a number of copies of *Sentinel* No. 6, Vol. IX., containing the article "What Our Leader Says" as last published. As this article is of abiding interest and value to the Field the Society will be glad to supply it, postpaid, at the following prices: 1 copy, 5 cents; 5 copies, 15 cents; 10 copies, 25 cents; 25 copies, 50 cents; 50 copies, 85 cents; 100 copies, $1.50.

On foreign orders add 2 cents a copy to cover postage.

The supply of *Sentinel,* Vol. IX., No. 14, is exhausted.

Digitized by Google

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

PAMPHLETS AND REPRINTS

CHRISTIAN SCIENCE, THE RESTORATION OF PRIMITIVE CHRISTIANITY. A Lecture. By CLARENCE C. EATON. 29 pages.

CHRISTIAN SCIENCE: A RELIGION OF DOING. A Lecture. By JUDGE WILLIAM G. EWING. 26 pages.

CHRISTIAN SCIENCE: A REASONABLE AND RATIONAL VIEW OF ALL THINGS. A Lecture. By FRANCIS J. FLUNO, M.D. 37 pages.

CHRISTIAN SCIENCE: THE RELIGION OF THE BIBLE. A Lecture. By JUDGE SEPTIMUS J. HANNA. 23 pages.

CHRISTIAN SCIENCE: HUMANITY'S HELPER. A Lecture. By PROF. HERMANN S. HERING. This pamphlet is also printed in German. 29 pages.

CHRISTIAN SCIENCE: ITS ADVANTAGE TO MANKIND. By EDWARD A. KIMBALL. A lecture delivered in London. This pamphlet is also printed in French. 47 pages.

CHRISTIAN SCIENCE: MAN'S DOMINION OVER EVIL. By EDWARD A. KIMBALL. A lecture delivered at Harvard University. This pamphlet is also printed in French. 28 pages.

CHRISTIAN SCIENCE: ITS NATURE AND PURPOSE. A Lecture. By BLISS KNAPP. This pamphlet is also printed in French. 25 pages.

CHRISTIAN SCIENCE: DEMONSTRABLE RELIGION. A Lecture. By FRANK H. LEONARD. 31 pages.

CHRISTIAN SCIENCE: OR, DELIVERANCE FROM EVIL. A Lecture. By REV. WILLIAM P. MCKENZIE. This pamphlet is also printed in French. 29 pages.

CHRISTIAN SCIENCE: THE CHRISTIANITY OF JESUS. A Lecture. By MRS. SUE HARPER MIMS. 28 pages.

CHRISTIAN SCIENCE: BOTH CHRISTIAN AND SCIENTIFIC. A Lecture. By REV. IRVING C. TOMLINSON. 36 pages.

CHRISTIAN SCIENCE: ITS PRINCIPLE AND METHOD. A lecture delivered in London. By BICKNELL YOUNG. 31 pages.

CHRISTIAN SCIENCE: ITS COMPASSIONATE APPEAL. Four articles reprinted from the JOURNAL. This pamphlet is also printed in German. 50 pages.

CHRISTIAN SCIENCE IS SCIENTIFIC CHRISTIANITY. A Lecture. By REV. ARTHUR R. VOSBURGH. 33 pages.

CHRISTIANITY IS SCIENCE, AND SCIENCE IS DEMONSTRABLE. A Lecture. By MISS MARY BROOKINS. 37 pages.

PROPHECY: FULFILMENT: REVELATION. By CHARLES ADOLPHUS MURRAY, Seventh Earl of Dunmore. 42 pages.

THE LOS ANGELES CASE. Testimonials given in Court as to the healing efficacy of Christian Science. 80 pages.

THE MINISTRY OF TRUTH. Five articles reprinted from the JOURNAL. This pamphlet is also printed in German. 76 pages.

PRAYER AND CONFIDENCE. Four articles reprinted from the JOURNAL. This pamphlet is also printed in German. 50 pages.

THE CHRISTIAN SCIENCE CHURCH. Its Organization and Polity. By CAROL NORTON. 38 pages.

PRICE: One copy or more, six cents; twelve copies to one address, sixty cents; fifty copies to one address, $2.25; one hundred copies, $4.00. Orders for above pamphlets may be assorted as desired.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75

Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883–1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), single copy $2.25
Twelve or more books to one address, each . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75

The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.

Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 35 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 10 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, six months, $1.20; one year, $2.00.
Ten copies to one address, each, six months, $1.15; one year, $1.90.
Twenty-five copies to one address, each, six months, $1.10; one year, $1.80.
Fifty copies to one address, each, six months, 90 cents; one year, $1.50.
These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.
Subscriptions to the SENTINEL will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid, to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.
To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.
Bound Volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

Lack of practical and commercial unity in the entire inland water system of the United States is the text of part one of the reports on transportation by water submitted to the President by Herbert Knox Smith, commissioner of corporations of the Department of Commerce and Labor. In his letter of transmission he says: "Waterways themselves and their conditions must be so improved that they shall carry a share of the nation's traffic proportioned to their real possibilities, and shall so supplement the rail system as to prevent the recurrence of disastrous traffic congestions. Our coast line is over 5,700 miles, or, with the navigable indentations of the coast, over 26,400 miles. The Great Lakes shore line of the United States is 2,760 miles, or, with the indentations, 4,329. These lakes are connected with each other, and by canals with the Atlantic ocean, St. Lawrence river, and the Mississippi river, there being however a channel of but fourteen feet depth to the St. Lawrence and this through Canadian territory, seven feet to the Atlantic through the Erie canal, and a still lesser depth to the Mississippi. There are over 200 streams in the country used to a substantial degree for navigation, with an approximate navigable mileage of 26,400, but with very little direct connection with each other except the Mississippi system. About 4,500 miles of canals have been constructed. More than one half —2,444 miles, costing over $80,000,000—has been abandoned. Transportation by water now suffers from one far-reaching disadvantage which we can largely remedy, namely, the lack of organization of our waterway system as a whole."

Electric power was used to operate a transcontinental passenger train on the Great Northern Railway through the Cascade tunnel west of Spokane, Wash., the evening of July 1. The test was satisfactory to the company's engineers and those of the General Electric Company, who had charge of the technical part of the work. There is a 2.2 per cent grade east bound in the Cascade tunnel, where passenger and freight trains frequently encountered serious difficulty in negotiating the climb through the bore. The engineering department of the Great Northern Railway has been at work since 1907 in building the 20,000 horse-power electric plant on the upper Wenatchee river, twelve miles above Leavenworth, on the main line of the Hill road, where the power for this test was generated.

In the supreme court in California, East San Jose and Los Angeles have lost tactical victories in their endeavors to regulate the bill-board nuisance by city ordinances. The general principle, however, underlying these attempts has been upheld. During the last six months proposed enactments designed to restrict the growing offense have been introduced in the Legislatures of Rhode Island, Massachusetts, New York, Pennsylvania, New Jersey, Ohio, Illinois, and Minnesota. Vigorous efforts to control the nuisance have within a few months been instituted in Chattanooga, Cleveland, St. Louis, Seattle, Pittsburg, Buffalo, Hartford, Cincinnati, Albany, Haverhill, Providence, Newark, and a score or more smaller communities.

The Aero Club of New England has made a special rate during August of $50 for each ascension, for members intending to qualify as pilots. Ten ascensions must be made and the whole amount, $500, paid in advance. The ascensions will be made in the afternoon from Fitchburg in the "Boston." To qualify as international pilots members must make ten ascensions, one of which must be at night and two of which must be alone. The night ascensions will be made from Pittsfield in the "Massachusetts."

Since the Federal Government, under the reclamation act, took up the business of irrigation, it has spent about $42,000,000 on its various projects. It is assumed that every project will in the end pay back all the Government puts into it, and even more if a policy should be adopted which would make profits possible. This would make it possible for the fund to be used for further extensions of the irrigation systems.

The International Harvester Company has announced a comprehensive plan of profit-sharing with its employees, similar to that instituted some time ago by the United States Steel Corporation, and provides for a subscription to the stock of the company by the employees, to be paid for by instalments taken from their wages.

The latest gift to the general education board of the Rockefeller Foundation is one of ten million dollars from John D. Rockefeller, making a total of fifty-three million.

The Secretary of the Interior has scaled down the estimates of his department about ten million dollars for 1910-11, leaving the estimate now at about $175,000,000.

The total attendance for the first forty-two days of the Alaska-Yukon-Pacific exposition passed the million mark, the grand total being 1,015,272.

Preparations are being made to make New York city electrically brilliant on the occasion of the Hudson-Fulton celebration Sept. 25 to Oct. 9.

From present prospects this year's farm crops are estimated as likely to reach a value of over eight billions of dollars.

International.

The decision by The Hague Tribunal of the Casablanca case between France and Germany marks another stage of progress in arbitral justice. This case arose Sept. 25, 1908, when six foreigners, deserters from the French foreign legion in Morocco, who were seeking to get home under the direction of the German consul, were forcibly taken from the consul's charge by French soldiers, by whom also the native guards of the German consulate were ill treated. The incident resulted in feelings of outraged national dignity, and in friction between the state departments of both countries. It was finally agreed to refer the matter to The Hague International Commission of Inquiry, which in rendering its decision, said: "While not placing the blame definitely upon either France or Germany, the court censures the representatives of each nation in several particulars."

The extension of the Soudan Government Railway line south of Khartoum, which forms another stage in the Cape-to-Cairo Railway, is being pushed on at the rate of ten miles a week. The line follows the course of the Blue Nile at a distance of one to three miles west of the river, and does not actually strike the Nile until the thirty-eighth mile after leaving Khartoum. The forty-seventh mile has just been reached, and the work has proved remarkably easy. The money at present allotted for its construction on this year's estimates will be sufficient to take the line to the sixty-fifth mile.

One thousand Nationalists entered Teheran at five o'clock on the morning of July 13. Three days later the Shah was dethroned, the Crown Prince was proclaimed Shah, and a regent appointed. This occupation of the Persian capital was a direct result of the insistence of the Persian people that the Shah govern the country under the constitution that was granted Jan. 1, 1907. The Shah showed an inclination to ignore the constitution which he signed when he ascended the throne, and he even went so far as to withdraw it. His course has resulted in widespread unrest in Persia.

After more than two years of negotiations an irade has been secured from the Turkish government for the transfer of the American College for Girls from Scutari upon the Asiatic side of the Bosphorus to its new commanding site above Constantinople upon the European side.

The Russian cabinet has decided that the government shall undertake the drainage of St. Petersburg and the reorganization of the water supply. Fifty million dollars will have to be raised by a loan for the work, which it is estimated will be completed in fifteen years.

The French Chamber of Deputies has adopted the motion to invite the government to call an international conference of all the Powers interested, for the purpose of securing the gradual and simultaneous reduction of the customs tariff.

The French Senate has adopted the Franco-American extradition convention.

Industrial and Commercial.

The new union passenger station of the New York, New Haven, and Hartford road at Waterbury, Conn., the largest single piece of construction work to be completed this year by the railroad company, is now in use. The new station cost the road upwards of $500,000 and is of the most advanced type for other than terminal points. An architectural feature is a tower 245 feet high, modeled after a similar tower in Italy, on which is an immense clock. The opening of the new station marks the completion of $2,000,000 worth of railroad improvements in Waterbury and vicinity in connection with the double-tracking of the old Naugatuck division between Bridgeport and Waterbury and the old Highland division between Waterbury and Hartford. It is said that the company intends to make this the main line route between New York and Boston.

Announcement is made that by Sept. 1 the entire trackage of the Frisco system between Kansas City and Springfield, two hundred miles in length, will be protected by the block signal system. Work to the same end is to begin at once between Springfield and Memphis, a distance of 284 miles, and later between Memphis and Birmingham, a distance of 251 miles. When all divisions have been block-signaled the Frisco will have 735 miles of thoroughly protected trackage, and will be the only line in the South that can make such a showing in this respect. It is said that the company will also install telephones to facilitate the handling of trains. They will be auxiliary to the telegraph wires now in use.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

"REJOICE EVERMORE."

WILLARD S. MATTOX.

TIME was when a gloomy austerity was mistaken for a sign of religion, but that time is happily fast disappearing. Men are coming to see that a cheerful visage and a cheerful mental state are not inconsistent with true religious devotion, and that, in fact, to be religious one must needs be happy. In a certain sense, one might even say unhappiness is irreligion, since it implies either lack of confidence in God and a belief in evil,—a belief in some nature opposed to good,—or else it implies that God is the originator and sender of the things that cause unhappiness.

The early Christians were happy. They were not oppressed by the demands of a dismal creed that bade them assume a somber manner as a substitute for genuine piety. Jesus' keen analysis and incisive language laid bare and rebuked the cant of the scholasticism of his time. He said, "When ye fast, be not, as the hypocrites, of a sad countenance: for they disfigure their faces, that they may appear unto men to fast. Verily I say unto you, They have their reward."

To the immediate followers of Jesus, and to the early converts to Christianity, it was quite natural to be happy. They were familiar with Paul's saying, "The fruit of the Spirit is . . . joy:" that is to say, the inevitable result of an understanding of Spirit, the necessary product of spirituality, or a right consciousness of things as they are, is joy. And whenever we find an absence of joy,—whenever we find sadness or discouragement, anxiety or fear, we have, according to the Pauline standards, little evidence of religion, little evidence of that proper comprehension of a loving Father which would express itself in calm joy, in an equable poise that is the "fruit of the Spirit."

As creeds encroached upon the simple truths of Christ's religion, as ritual and formalism began to take the place of the vital essence of Christianity, it came to be taught and believed that a dejected mien, a stern manner, and a general atmosphere of gloom were indications of true discipleship. This unfortunate teaching has lasted almost up to the present time and has been responsible for much of humanity's sickness and failure. Even our Puritan forefathers, though they saw this much, that religion brought civil liberty, did not apparently see that it meant also freedom from those false beliefs about God, and about man's relations to his creator, which deceived men by making them suppose they were serving God acceptably when they assumed a dejection they would much rather be without.

Christian Science comes today to emphasize Jesus' religion of happiness, and to restate Paul's Christian dogma, "The fruit of the Spirit is . . . joy." Mrs. Eddy says in "Miscellaneous Writings" (p. 309), "Scientists sometimes take things too intensely," and elsewhere she agrees with Talmage that "there are wit, humor, and enduring vivacity among God's people." Nor will the witty, humorous, and vivacious Christian be mistaken for what Garrick calls "our present joking, giggling race." "True joy," he says, "consists in gravity and grace."

There are, of course, as many different opinions as to what constitutes happiness, as there are individuals, but Archbishop Tillotson seems to sum it up satisfactorily when he says, "Every moment we feel our dependence upon God, and find that we can neither be happy without Him, nor think ourselves so." A pagan moralist gives a metaphysical touch to his definition of happiness as being "no other than soundness and perfection of mind." When this is taken in conjunction with Paul's admonition to "let this mind be in you, which was also in Christ Jesus," we can see how it is that happiness, like everything else in the kingdom of heaven, "is within you." The French philosopher must have caught a glimpse of this great truth when he wrote, "Happiness is in the taste, and not in the things themselves; we are happy from possessing what we like, not from possessing what others like."

Inasmuch as the Christian is endeavoring to set his affections "on things above, not on things on the earth," his happiness will be found in a divine affection, in a spiritualized consciousness. This is the transformation of tastes and habits which the Christian Scientist is endeavoring to bring about, and as it goes on, he finds that his standards of joy have changed, that what he formerly wanted and took pleasure in, he no longer cares for. But he has lost no pleasure, he has sacrificed no joy, he has given up nothing worth while, he has simply and only changed his concept of joy; and whereas his notions of happiness once involved merely a material or personal sense of being, they now are beginning to reach out for the enduring and permanent.

Christian Science thus shows how it is that happiness is subjective, a thing of consciousness, rather than a condition depending upon circumstances external to the individual. As Burns has said,—

Its no' in books, its no' in lear,
To make us truly blest;
If happiness has not her seat
And center in the breast,
We may be wise, or rich, or great,
But never can be blest.

FAITH MADE PRACTICAL.

F. MAUD TURNER.

THE Bible has undoubtedly been reverently studied and greatly appreciated by many earnest seekers after truth, but it was a closed book to the writer before she came into contact with Christian Science. In early youth a good many passages had been committed to memory, but the practical use of these passages as capable of being applied in daily life, was as remote a possibility as would have been the suggestion that the study of the multiplication table could teach a child how to walk. To Christian Science, therefore, does she offer a tribute of grateful thanks for her changed attitude toward this book, and none can be more grateful for this awakening than is she. Indeed one can

Copyright, 1909, by Mary Baker Eddy.

Digitized by Google

but pause to contemplate the marvelous change that comes over all who have gained a deeper insight into the inspired Word, through the study of Mrs. Eddy's book, Science and Health, and as a result of this study many can now truthfully utter the words of the psalmist when he says, "Thy word is a lamp unto my feet, and a light unto my path."

It is surely obvious that unless the teachings of Christ Jesus are as practical today as they were nineteen centuries ago, the narratives in the four Gospels are shorn of more than half their value. To be told that Jesus opened the eyes of the blind, gave hearing to the deaf, speech to the dumb, really amounts to mockery if the blind, deaf, and dumb cannot be cured in the same way today. To wonder why this has never been thought of, and universally practised during the past hundreds of years, is not of so much importance as it is to know that over forty years ago one did set herself the task of finding out the truth, and that her clear, unswerving allegiance to the Master's teachings has made it possible for all to avail themselves of the blessings that are awaiting each honest follower of the Master, of whom it was said that "never man spake like this man." The actual words and works of Jesus as recorded in the Gospels would probably occupy the space of but a few pages in a monthly magazine, and yet short as this is compared to the lengthy and numerous text-books of material knowledge, it will be found that no circumstance can arise, no difficulty can assail, no sorrow can oppress, which may not be mastered through some word spoken, some act performed by our loved Master.

If then it is possible that the divine power which guided Jesus is as efficacious as ever it was, what is demanded of his followers in order that they go and do likewise? May it not be that more faith is the great need. Hear what Jesus said: "Have faith in God. For verily I say unto you, That whosoever shall say unto this mountain, Be thou removed, and be thou cast into the sea; and shall not doubt in his heart, but shall believe that those things which he saith shall come to pass; he shall have whatsoever he saith. Therefore, I say unto you, What things soever ye desire, when ye pray, believe that ye receive them, and ye shall have them." Could any blind belief utter such a statement and bring out certain results? No, the faith that is required is spiritual knowledge and a declaration, an assertion, a realization of the attainment of the object desired, that positive assurance which begets success.

Is thought staggered at this? Well, why should it be? Jesus, in response to the apostles' desire that he should increase their faith, replied, "If ye had faith as a grain of mustard seed, ye might say unto this sycamine tree, Be thou plucked up by the root, and be thou planted in the sea; and it should obey you." Can this kind of faith be reached by haphazard, spasmodic, loose, and careless thinking? Jesus on one occasion told his hearers that it was needful for them always to pray and not to be faint-hearted, and by way of illustration he told them of a widow whose persistent appeals to a certain judge (who had no reverence for God or respect for man) gained his ear at last, and her rights were adjusted. Our Lord, commenting on this, points out the results of that constant appeal even to an unrighteous judge, and said that God will vindicate quickly the rights of His chosen who cry out to Him day and night. Then he adds, "Notwithstanding, although the Son of Man come, will he, after all, find the faith on the earth?" (Rotherham's translation.)

It is evident, then, that faith and trust on the part of the recipient must be without doubt, in order to receive the greatest results. Once Jesus reproached his disciples with their "little faith," on another occasion he said to a woman who came to him, "O woman, great is thy faith: be it unto thee even as thou wilt;" and to the woman who had the issue of blood he said, "Thy faith hath made thee whole;" and of the centurion whose servant was sick, Jesus said that he had not found "so great faith, no, not in Israel."

It is undoubtedly better to have a little faith than no faith at all, though we must certainly guard ourselves against being content with a "little faith." Bunyan in his "Pilgrim's Progress" introduces a character called "Little Faith," who, though he is constantly falling into difficulties, does manage to retain his "precious jewel;" Bunyan shows how this man with little faith is often brought to a standstill because he is more susceptible of alarms, more liable to assaults, because he has not the boldness or resolution which a man of greater faith would have. Difficulties overwhelm "Little Faith" because of the weakness of his faith; and his fears are more than his faith. Littleness of faith will have littleness of realization.

We find described in a familiar hymn the quality of faith which we need to grasp:—

O for a faith that will not shrink,
Though pressed by every foe;
That will not tremble on the brink
Of any earthly woe;
A faith that shines more bright and clear,
When tempests rage without;
That when in danger knows no fear,
In darkness feels no doubt.

THE CHRISTIAN SCIENCE HOME.

W. H. JENKINS.

I HAVE in mind the picture of a Christian Science home where I love to go when I feel the need of being renewed in spirit, as did the Master when he went up into the mountain to pray. The woman who has made this home what it is has been a student of Christian Science for many years. After a long period of sickness and suffering, she has come into a large degree of freedom, and like the spring which is filled from unseen reservoirs until it must overflow, making all vegetation around it green and luxuriant, this life is so filled with the consciousness of Spirit that its overflow is a blessing to many lives, and especially to those who come into the home.

In no other place can we realize so much of the presence of God as in the true Christian Science home,—that which is being made an ideal home. To me there is no more congenial place on earth, no place where it is so easy to know God aright. Here we find the Bible and the Christian Science publications, and such other clean literature as is in accord with them. In all human thought there is much to unlearn, and the sincere Christian Scientist does not wish to add any more materiality to what he already carries, and from which he must unburden himself. High class magazines and the works of some of the best writers and poets may worthily claim our attention, but we will not be tempted to read that which we are compelled to unlearn in after years. In homes where there is no understanding or practice of Christian Science, the subjects of food, clothing, the house and its furnishings, the struggle for worldly gain, and the pleasures that perish in the using, are often all that is talked about. All these, when regarded as the end of life, bring constant worry, vexation, and disappointment; the ideals given us by Christ Jesus—"Take no thought for your life;" "Seek ye first the kingdom of God, and his righteousness"—are not heeded.

The inmates of the ideal home are content with the simple life, and with only the few material things needful, although they may want these to be of good quality. In these respects Christian Scientists should be exemplars, and teach the lessons of which so many are in need. The wife may need to simplify her housekeeping, and give less time to the preparation of material food that she may have more time to feed those who hunger and

Digitized by Google

thirst after righteousness. She should be ready to carry to the weary and heavy laden the message of rest and peace, and to minister to the stranger within the gates who is in need of the healing truth. In such a home the family learn to love God by loving their fellow-men and by keeping His commandments. They realize the promise of Christ Jesus, who said, "I will come in to him, and will sup with him, and he with me."

It may be that there are those in the Christian Science home who have become weary of pursuing the fleeting mirage of material pleasures, and are finding rest not in inaction, but in learning what is the Father's business, and so find rest in spiritual employments. If there are children in this home, the parents are thankful for the understanding of Christian Science which will fit them for the great work they have to do; they are grateful for the understanding which will help them to direct wisely the unfolding or bringing out of the perfect ideal, knowing they are fitting those who will be channels through which the truth shall flow to the sin-sick and suffering, unchecked by sin and materiality.

It will interest us in this connection to read of the homes where Christ Jesus loved to go when on earth,—the homes of John, of Peter, of Lazarus, Martha, and Mary. It was the presence of the Christ that transformed these homes, and brought into them the atmosphere of health, holiness, peace, and rest. To these homes the sick came and were healed. Like these should be the Christian Science homes of today, so that there may go out from them influences for good whose full fruition we cannot yet measure.

PERFECTION.

ANNIE M. PAYNE.

On page 290 of our text-book, Science and Health, we read: "Perfection is gained only by perfection." Many a time has the present writer read this passage with a half-careless, half-wondering reflection which seemed to ask, Who then may hope to reach that blessed state? Just so did the disciples of old question, "Who then can be saved?" and the reply of Jesus is the reply here: "With men it is impossible; but not with God: for with God all things are possible!" These words from Mark's Gospel are indeed identical in substance with our Leader's assertion as here quoted. To assert that for mortals the heights of spiritual being are impossible, and that they are only possible to God, is to say in other words that perfection is gained only by perfection.

The mistake that clings so long to human consciousness, namely, that mortal belief stands for real existence and that it can achieve righteousness, is easily refuted by the simplest argument, as we may readily see. In perfect accord with the teaching of Christ Jesus, Christian Science instructs us that God is good and that He is infinite. Can good that is infinite have any taint of imperfection? Surely not. Can this infinite or all of good be conceived of as side by side with something which is evil? No. Then we must conclude both that the all of good is what is meant by perfection, and that there is nothing besides perfection. Conversely, error or evil, having no part in perfection, has no part in the all; in other words, is non-existent. Therefore no form of consciousness that assumes acquaintance with evil can at the same time be any part of the all or perfection. Nor can it grow into or become part of perfection, since this would prove perfection to have been wanting in perfection, which is impossible.

Thus the conclusion concerning mortal man is clear. Assuming, as he does, acquaintance with evil, he has no part in perfection nor can he gain perfection. This thought, at first startling, is that which ultimately brings such joy to the Christian Scientist; since through it he learns that the infinite good, which has often seemed nebulous and far off, is actually the only fact. Being all, it can only be self-revealed; but as it pours forth its eternal stream of blessing it appears to awakening mortal sense to be its own gaining of perfection, and for practical purposes it is often thus conveniently, because humanly, expressed.

CHEMISTRY AND TRUTH.

WINDSOR RICHARDS.

In Science and Health (p. 422) we are told that "mental and moral chemistry changes the material base of thought, giving more spirituality to consciousness and causing it to depend less on material evidence. . . . Thus Christian Science, by the alchemy of Spirit, destroys sin and death." A recent experience has helped to make this teaching clear to me.

A sample of zinc ore had been sent to me for analysis. The seller was under the impression that the ore contained twenty-five per cent of zinc, while the buyer was equally certain that it contained but twenty per cent zinc. The difference of five per cent was a monetary consideration which would affect the selling price, and as they could not agree as to what the percentage of zinc actually was, they determined to have a test analysis made. A quantity of the ore was pulverized in a mortar, and a portion of this weighed on a chemical balance so delicate that it would easily weigh a hair. This portion of ore was transferred to a beaker (a glass vessel) and a few cubic centimeters of strong nitric acid were added. This, with the aid of a little heat, quickly reduced the ore from its solid to a liquid state, and so rendered it susceptible to further treatment; just as we, at the call of Christian Science, are ready for treatment when we are willing to let go a little of our solid materiality.

The zinc having lost its very opaque and solid nature, the process of eliminating its various impurities was begun. One of these most easily removed was the lead, a few drops of sulphuric acid being added to precipitate this metal. This was a process which had to be accomplished with great care, as a considerable disturbance takes place in the beaker during the precipitation. The beaker was now examined in the light, and it was hard to believe that it contained a pure, undefiled zinc, as the undissolved silica and rhodonite, as well as the precipitated lead, all tended to make one believe that the vessel contained nothing more than a mass of impurities.

There were, however, other elements which had to be eliminated before the zinc could appear, and these were of a more subtle kind, as there was nothing to show that they were actually present. It was necessary, therefore, to act upon the belief which had been born of experience. I suspected the presence of iron, and this could be determined by adding a diluted solution of ammonia. The addition of the alkali to the acid solution produced a violent ebullition in the beaker, and recalled that to which Mrs. Eddy refers when she talks about the chemicalization produced on mortal minds when the truth is added; but the process was successful in precipitating the iron. On examining the solution, it was found that another impurity had been precipitated at the same time as the iron, namely alumina. A similar result is sometimes found under Christian Science treatment, when the uncovering of one error reveals another hitherto unsuspected.

The vessel now appeared to contain a very dirty mass, and it was more difficult than ever to believe from its appearance that it contained a pure metal. Before the zinc could emerge, however, there was one last impurity to be eliminated, else the entire foregoing process would be rendered useless. This last impurity was manganese,

Digitized by Google

one of the things which tended to delay the appearing of the pure zinc. A few drops of bromine were added to the solution, and again there was a tremendous upheaval, the offensive fumes being taken away by the electric fan. On examining the vessel floating particles of precipitated manganese were to be seen, rubbing elbows with similar particles of iron and alumina, while settled at the bottom of the vessel were the undissolved silica and rhodonite. The appearance of the whole mass reminded one of a glass of water when taken from a very muddy river, and the natural question which arose was, Where in all this is the pure zinc? Though it could not be perceived by the physical senses, still it was there, and would very quickly appear.

The solution was then passed through a filter paper and the liquid run into another glass vessel, and here was the reward for all the labor bestowed, for the liquid which came through, pure as water taken from a spring, was the zinc in solution, for all the impurities had been left behind in the filter paper. It was almost impossible to believe that this pure liquid was once in the muddy solution in the glass vessel, and that though it had appeared to be impure, it was all the while absolutely uncontaminated by its bad companions. However, here it was, and its appearance was hailed with joy by the analyst, who might well have begun to doubt its existence.

This laboratory experience may serve to illustrate how important it is, in our endeavor to bring out the good and eliminate the error of human consciousness, that we proceed with that intelligence and care which is considerate for all the facts and conditions of the state of thought we are addressing, so that our hoped for good result may not be turned aside or indefinitely delayed by any unwisdom in our mode of procedure, but that in our treatment of human sense we may be so patient and so discreet as to "get at last," as Mrs. Eddy has said, "the clear straining of truth," while "impurity and error are left among the lees" (Science and Health, p. 65).

THE WAY OF LOVE.

JESSIE WOOD.

My great love for animals often used to get me into trouble. Whenever I saw a man beat or abuse a horse, sometimes overloaded or sick, my indignation knew no bounds, and I would go full tilt for the driver, a proceeding which invariably brought in return his opinion of me, usually delivered in no complimentary manner—Greek meeting Greek. Under these conditions, although I meant well, nothing was accomplished in the right direction, but very much in the wrong.

Just about this time I commenced to read Science and Health, and then for the first time I learned of the eternal Mind which governs the universe and man. I saw that God gave man dominion, not over his brother but over the animal, and that he was to govern him in love, not in fear or with the lash. A short time after this I had an opportunity to put my new-born understanding into practice. One day, as I turned out of Broadway into Fulton street, I saw a great crowd of people gathered, and wagons and cars were stalled. I made my way through the crowd, and found that the center of attraction was a large dray-horse, whose refusal to go on with his load was blocking up the street. He had been lashed with the whip and otherwise ill-treated, and every driver and car-conductor was adding his condemnation. Finally some one proposed to set a fire under him, and one of the men ran into a store to get material for this purpose.

All this time I was silently declaring the truth, and in an instant my thought went back to another scene,—the cruel rabble of eighteen hundred years ago,—and there came to my remembrance those words, "Father, forgive them; for they know not what they do." It was enough; the light came, and pushing my way through the crowd to the horse, which was trembling in every limb, I put my hand on him. He turned his head completely around to see who had touched him, and instinctively he seemed to feel it was the touch of love. The driver with an oath shouted at me, but I answered not, and before the man returned to put into effect his cruel and inhuman purpose, the horse had started off without even a touch from the whip. I watched him until he turned into Broadway. Then the cars and wagons fell into line, the crowd dispersed and harmony was restored.

How grateful I felt for this visible manifestation of the power of the truth, its reliability and dignity, and its striking contrast with the futile and unreliable efforts of mortal mind.

LOCKING THE DOOR.

CHARLES HENRY PEEBLES.

A TRAVELING man who is a student of Christian Science, visited a certain city at almost regular intervals, and when in his room at the hotel seldom locked the door thereto except at night. On several occasions a person not agreeable to him would at times enter the room. On a recent trip to that city, just after entering the room assigned him in the hotel, these words of Mrs. Eddy came to him, "Stand porter at the door of thought" (Science and Health, p. 392); and he said to himself, "This means to lock the door against all that is not agreeable." So he locked the door to his room.

After a while the knob of the door was turned, and when the door failed to open the person outside knocked for entrance. He continued to knock, but receiving no invitation to come in, at length went away from the door. The traveling man remained at the hotel for several days, during which time he never locked the door of his room except at night, but the undesirable visitor never again came into the room or knocked at the door for entrance.

So is it with the belief of sin and disease when it tries to enter the door of our thought. If we "stand porter,"—lock the door,—no matter how persistently the error tries to enter our mentality, no matter how loudly it knocks there for entrance, it finds no means of entering. Our consciousness should be full of truth, full of all that is like God; we should have the same Mind "which was also in Christ Jesus," in which there is no sin, disease, or death, but therein is life, health, joy, and peace.

As one becomes better acquainted with divine Principle, he begins to come into the consciousness of sonship with God, and awakes to know the truth of being. Through purity, honesty, sincerity, right thinking, therefore through right living, he proves "here a little, and there a little," and in putting aside selfishness he daily becomes aware that the beliefs which once entered his room (his mentality) have ceased to do so, and do not even knock for admittance. He can say with the psalmist, "He that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty."

My daily prayer to Thee:
May Truth shine clearer,
May Love draw nearer,
May Christ be dearer
Than yesterday to me!

HELEN H. COLLINS.

Digitized by Google

SELECTED ARTICLES.

[Alfred Farlow in *New Bedford* (Mass.) *Mercury.*]

We would respectfully call the attention of our critic to the fact that his challenge is exactly the same in nature as the one which Satan presented to our Lord in the ancient days, and we believe our critic on due consideration will justify the assumption that it came from the same source; but that, unlike the Master, he has accepted it instead of spurning it, although it merits the same answer, namely, "Thou shalt not tempt the Lord thy God." This statement of Jesus was based upon the scientific knowledge that the working of wonders merely for the purpose of personal gratification or for the purpose of establishing human power or for the purpose of convincing mortals of a divine power, is not in keeping with God's plan.

While it is proper to refer to the demonstrations of Christian Science in healing sin and sickness as the fruitage of spiritual understanding and the proof of its demonstrability, it is also true that these results can only be brought about in a natural and intelligent manner. It is quite as important that the patient should be prepared to receive the blessing as it is that the Christian should be prepared to give it. It would be quite as unreasonable to demand of a Christian Scientist that he shall heal a given case as a proof of his ability as it is to demand that our critic himself shall reform a given sinner as a proof of his knowledge of religion. Does the gentleman believe that it is possible to reform a sinner before he is ready therefor? Let him add to his understanding that it is impossible to reform a sinner before he is ready to be reformed, the knowledge that the healing of the sick in Christian Science is in accord with an eternal law of justice and consequent on the spiritual reformation of the patient.

Moreover, Christian Scientists make no boasts as to how much they understand of the truth, nor do they undertake to compare their understanding with that of the reverend gentleman. They only insist that certain teachings of Christ Jesus are true, and that when properly understood and properly applied they heal the sick as well as the sinful, and that it is quite as incumbent upon him to prove the truthfulness of his teaching by his works as it is that the Christian Scientists shall thus prove their understanding. Christian Scientists do not attempt to treat patients without their knowledge and consent. They wait to be asked, and so far as I know never turn away any one who is worthy.

[Judge L. N. Blydenburgh in *New Haven* (Conn.) *Palladium.*]

Christian Science, as taught and practised by Mrs. Eddy and her students who are faithful to her instruction, claims to teach mankind the way to gain salvation from sin and disease. It teaches, as Jesus taught, to love your neighbor as yourself. It teaches to avoid selfishness, envy, hatred, and malice. It holds that real reform is better promoted by love of good instilled into the hearts of men, than by the fear engendered by the possibility of punishment. It recognizes the necessity of a law of restraint and punishment, but it labors to destroy the desire to do evil. It works to promote a desire to do good for the sake of good. It seeks to teach that there is no real pleasure in evil, because the results of evil are always painful and harmful. It meets disease with the truth of the allness of God and the perfection of all that God creates. It regards disease as an imperfection, the result of imperfect understanding. It declares man to be immortal and spiritual, and asserts Mind to be the causative power of all things. In other words, it asserts the dominion of Mind—realizes God as infinite Mind and regards man as God's image, idea, and reflection. As no system that can demonstrate its truth and utility can be safely ignored, it claims that the works done in the cure of disease and the destruction of sin are the test of its truth and of its God-given mission to man.

If its claims are true, no manifested jealousy on the part of those who think its prosperity and increase in adherents will take from their following, can destroy it. No adverse criticism by those who see their professional success endangered will harm it. All who desire good to prevail will approve and accept it when they understand it. It may be said of Christian Science, in the language of Gamaliel concerning the teaching and work of the apostles, "For if this counsel or this work be of men, it will come to naught: but if it be of God, ye cannot overthrow it; lest haply ye be found even to fight against God."

[Frederick Dixon in *Two Worlds.*]

Your reviewer may say, as has been said, "It was Christ's character rather than his miracles that made him beloved, and the solace of suffering humanity throughout the ages," but the miracles were the expression of this character, and exactly in proportion as man today walks in his footsteps, he does let that Mind be in him "which was also in Christ Jesus," and in doing this is able, to that extent, to "heal the sick, cleanse the lepers, raise the dead, cast out devils." It is simply impossible to read the Gospels without being impressed by the extent to which the ministry of Jesus was a ministry of physical healing. It is true that this healing was not then, any more than it is today in Christian Science, the ultimate aim of Jesus' ministry, but it was the means he took, and the means he commanded his followers to take, to draw sinful and suffering humanity nearer to God. If, he said, those about him could believe for nothing else, they must believe for the sake of the works.

It was as this healing disappeared in the gross materiality of the ages succeeding the first century of the Christian era that the divorce came about between the healing of sickness and the healing of sin. So it was when the light first dawned on the consciousness of a woman, fitted by a life of purity and selflessness to receive it. On pages 108 and 109 of Science and Health Mrs. Eddy has told the world how this came about. How her own passage in safety through the valley of the shadow of death first revealed the truth to her; how she withdrew from society and, with the Bible as her only text-book, sought patiently for three years the secret of the gospel of Jesus; she has told us there of the joy of the search, of how she finally won her way "to absolute conclusions through divine revelation, reason, and demonstration."

[William E. Brown in *Madera* (Cal.) *Tribune.*]

Among the many misconceptions as to Christian Science is the absurd and unwarranted idea that its adherents ignore sickness, suffering, and poverty as unreal, and that consequently they do not believe in philanthropy. The very opposite of this idea is the truth in regard to Christian Science teachings, which makes of those who practise them the truest philanthropists since the time of Christ.

While Christian Science teaches the unreality of sickness and poverty, it does so in the sense that they are not of God, therefore they are unreal or abnormal conditions, which may be destroyed through the understanding and application of God and His laws. In the mean time, and during the process of the destruction of these unnatural conditions, Christian Science does not ignore the wants of the needy, but always extends a helping hand until the individual reaches a point where he becomes a

Digitized by Google

self-supporting and self-respecting member of the community. Mrs. Eddy tells us that the true idea of charity is that expressed by a Talmudical philosopher: "The noblest charity is to prevent a man from accepting charity; and the best alms are to show and enable a man to dispense with alms" (Miscellaneous Writings, Preface). Christian Scientists, from the Leader down to the youngest students, strive to alleviate human suffering of all kinds.

[J. V. Dittemore in *Buffalo* (N. Y.) *Enquirer*.]

The foundation of Christian Science is the scientific demonstration of the omnipotence of God and the proof of His ever-present availability in all times of trouble. The reason for the clergyman's criticism seems to be that he wants Christian Scientists to depend on physicians instead of placing their reliance unreservedly in God. It should be understood that Christian Scientists have the greatest respect for all honest medical practitioners, but they should not be subject to criticism for applying practically in every-day experience the Scriptural teachings of reliance on God, which our critic seems to think is but a theory to be preached and not practised. Christian Scientists are proving that "with God all things are possible," and that as the realization of divine sonship is reached man's rightful inheritance of dominion over all that is discordant and imperfect will be made manifest. Just as the multitudes followed Jesus because of his wonderful works, his proof of the power of God, so today do the multitudes turn to Christian Science, ofttimes after all other means have failed, and there find that God's "hand is not shortened, that it cannot save," but that the works of the Master are again being accomplished, in fulfilment of his promises to "them that believe."

[John L. Rendall in *Scranton* (Ia.) *Journal*.]

Christian Science is based upon the word of God as given in the Bible and as explained in the Christian Science text-book, "Science and Health with Key to the Scriptures." The effort of every Christian Scientist is to live and practise Jesus' teachings in their completeness. In this there is "no evasion of truth," but the steadfast endeavor daily to live that life and to manifest only those qualities which are consistent with true Christianity. There are certain things which Christian Science has accomplished which in and of themselves constitute sufficient proof of its essential Christianity. Through its divine ministrations hundreds of thousands of people have been healed of serious and in many cases seemingly hopeless illness. Not only has this word of Truth brought physical healing to these people, but what is vastly more important, it has given them hope, faith, and confidence in God; it has purified and elevated their characters; it has reformed the sinner, redeemed those who were under the bondage of vicious appetites and false pleasures, and has brought joy and peace into homes that formerly were under the burden of despair.

Christian Science presents abundant and incontestable evidence in support of its inestimable value to humanity, and in the face of its proofs it is vain and foolish for any one to attempt to belittle its God-given mission. In considering Christian Science from the view-point of popular theology, our critic assumes the attitude of the man who looked at a white object through green glasses. The trouble was not with the object but with the glasses. Viewed from an unbiased standpoint, without prejudice and misconception or the bias of educated formalism and the narrowness of creed and dogma, Christian Science is found to be eminently Christian, a satisfactory and practical religion.

[W. J. Bonnin in *Blackpool* (Eng.) *Gazette-News*.]

Christian Science insists on obedience to the Pauline advice, "Prove all things." Christianity to be Christianity, and not a mere placid acceptance of historical record, must submit to the test its Founder laid down. "He that believeth on me, the works that I do shall he do also;" "If ye abide in me, and my words abide in you, ye shall ask what ye will, and it shall be done unto you;" "These signs shall follow them that believe; . . . they shall lay hands on the sick, and they shall recover."

So far from "denying the tenets of Christianity," Christian Science, by teaching men to discriminate between the seeming or sense realities and the true or spiritual realities, to "look not at the things which are seen, but at the things which are not seen," is leading men to see and to prove that in the measure that the spiritual truth of the Bible is comprehended, a Christian life which will comply with the Master's test may be lived today, every whit as well as in those early days before spiritual truth had become obscured by human creeds and dogma. And this comprehension is the understanding that is "the well-spring of life," the Mind of Christ. Christian Scientists learn in their study of Christian Science, or in other words as they grow in understanding, that only as they cease to worship the golden calf, materialism, and realize the omnipotence of divine Love, have they strength to overcome and nullify the supposititious power of sin and sickness.

[R. Stanhope Easterday in *Greencastle* (Ind.) *Banner*.]

Mrs. Eddy is beloved by hundreds of thousands, because through her exposition of Scripture they have come to understand and practise the Christ-method of healing, resulting in the elimination of sin and disease from their lives. For forty years she has preached the gospel through the medium of her published works, and in the estimation of the beneficiaries of her preaching, who best can judge, the practical results in the healing of all manner of sin and disease more than justify the price of the book Science and Health.

Furthermore, Mrs. Eddy's text-book on Christian Science is not, in any sense of the word, meant to be a "Bible" nor to supplant the Scriptures. It is what its name implies, a veritable "Key to the Scriptures," or a commentary on the Bible. Our critic uses commentaries in preparing his sermons, and Christian Scientists do the same, the only difference being that the Christian Scientists have found by experience that Mrs. Eddy's explanation of the Bible brings them the best results, and so they adhere thereto in their study of the Scriptures. They find the Bible made an open book in the light of Mrs. Eddy's writings, and so they love and study it more than they used to.

[Miss Ida Hodnett in *Montgomery* (Ala.) *Times*.]

All Christendom will agree that the object of the rite known as the Lord's supper is to bring men into closer touch with God, thereby lifting thought and life into a higher, purer atmosphere, resulting in nobler dealing and action than before. For this reason the rite is called the holy communion. Just here I will say that while a stated season for the public observance of communion is arranged in all the branch churches of the Christian Science denomination, the whole trend of the Christian Science religion is to establish in its adherents the mental habit of unceasing communion with infinite Mind—God. This is dwelling "in the secret place of the most High" (see the 91st Psalm), and the habit is declared by the psalmist to result in positive protection and safety even in the midst of the dire dangers of material life.

The form of the public observance of communion in

Digitized by Google

the Christian Science church is simple and reverent. It takes place after the regular service on the appointed Sunday, as is usual in other Christian churches. The congregation is invited by the First Reader to kneel in silent communion, during which period, by casting out the persistent errors of the human mind, thought is lifted to a realization of God and His Christ. This period is closed by repeating the Lord's Prayer in unison, the words being those given by Christ Jesus in the sixth chapter of the Gospel of Matthew, and those who participate endeavor to realize the meaning of this beautiful prayer.

That this form of communion is an aid in bringing them to partake of the Mind "which was also in Christ Jesus," as the apostle Paul enjoined, Christian Scientists are fully assured by the purifying influence which comes into their own lives. Better aims and motives, and the ability to put those aims into practical operation, is a result of the Christian Science endeavor to eat of the bread of Truth and drink of the wine of Love. Christian Scientists are grateful for all the help that has enabled them to be better men and women than in previous times, but they do not boast nor think themselves better than others. They are especially grateful for a clearer comprehension of the Scriptures and a greater love for reading them than they once had.

[Lloyd B. Coate in *Sidney* (O.) *News.*]

Christian Science has been instrumental in leading many people out of infidelity into the light of God and to the acceptance of the religion of Jesus Christ; Christian Science is making Bible students out of its followers, awakening within them a love for God's Word; it is leading them to a fuller acceptance of the religion of Jesus Christ, even to the extent that many are being healed in Christ's name today; it is reforming the sinner. Despite all that its enemies and critics may say, Christian Scientists are going to do all the good possible,—healing the sick, comforting the sorrowing, and leading mankind to God, thus helping to make the world better.

The fact that the enemies of Jesus said he did his works through Beelzebub the prince of the devils, did not make it so. Critics sometimes make the same accusation against Christian Science, but this does not make it so. Jesus left a rule by which to judge: he said, "By their fruits ye shall know them." What are the fruits of Christian Science when its teachings are understood and its precepts lived? Even these: more faith in God, a greater love for the Bible, and a greater desire to follow in the footsteps of Jesus the Christ. Such being the fruits, Christian Science cannot proceed from an evil source.

[Algernon Hervey-Bathurst in *Observer,* London.]

Calumny, abuse, and baseless accusations were hurled at those who nineteen hundred years ago obeyed and practised the teachings of the "great Physician" and the greatest metaphysician the world has ever seen. Today abuse is again hurled at those who are striving to prove that what the Master said is true now as then. Through the study of the Bible and the Christian Science text-book, Science and Health, men and women are being healed daily of all kinds of diseases, organic as well as functional, frequently after having received the verdict "incurable" from medical practitioners. Such results could not occur were the behavior of Christian Scientists such as is stated by our critic.

If the teachings of Christian Science were anything but true, they could not stand, and they would fall of their own weight. In this connection it will be advisable to profit by the advice of that "doctor of the law" who said, "If this counsel or this work be of men, it will come to nought: but if it be of God, ye cannot overthrow it." The great Teacher said also, "Heaven and earth shall pass away, but my words shall not pass away."

[Lindley Fogg in *Norwalk* (O.) *Herald.*]

Jesus said, "What things soever ye desire, when ye pray, believe that ye receive them, and ye shall have them." For centuries many religious people have attempted to arrive at this condition of absolute faith, but usually have in a large degree failed in its accomplishment. Why? Apparently because they have believed God to be the author of evil as well as of good, and that the power of evil is almost if not quite equal to the power of God. Christian Science insists on the Bible teaching that God is infinite, the only power; that His power is always on the side of that which is right and good and harmonious: and that His opposite has no right to claim existence or reality.

With this perfect consciousness of infinite power and goodness, man can have an absolute faith that whatever is right and good will be accomplished through an intelligent and prayerful appeal to the divine Mind. This absolute faith, based on such a sure foundation, brings relief from pain, and causes an apparently diseased bodily condition to be changed into that which is well and whole. Christian Scientists understand this to be in accord with the words of Jesus: "Ye shall know the truth, and the truth shall make you free."

[George Shaw Cook in *Rockford* (Ill.) *Register-Gazette.*]

The fact of healing through Christian Science being now quite generally admitted, critics seem to have taken up the task of proving that its philosophy is wrong. Because its philosophy, or theory, does not coincide with their views, critics assume that it is at fault, but this of course does not prove it to be so. The correctness of a theory is generally conceded to be determined by the manner in which it works out in practice, and that the theory of Christian Science has been demonstrated to be correct in hundreds of thousands of instances cannot be disproved. For critics who have no demonstrable knowledge of Christian Science to claim that they know more about its real nature and the basis of its cures than those who are daily engaged in its practice, would seem rather unreasonable, to say the least.

Christian Science does not take away the responsibility for a specific sin by pointing out the fact that all sin is of the carnal mind and is imposed upon rather than originated by the individual. On the contrary, it distinctly teaches that the individual is responsible for his own sins, and that he will eventually be punished for allowing himself to be swayed, influenced, or imposed upon by evil of any nature.

That Christian Science drives sympathy out of the heart is not true. Christian Science teaches the utmost sympathy for the sufferer and for the evil-doer, although it has no sympathy whatever with the suffering or the evil. Christian Science does not break down the sense of truthfulness by teaching its students to deny the testimony of the senses. The testimony of the senses, if accepted, would compel us to believe that the sun rises in the east and sets in the west. Would any one be in danger of becoming untruthful by denying this false testimony?

Then work, but do not worry,
And wait, but not with care;
For in the never-ending
'Tis morning now, and fair!

CHARLES W. STEVENSON.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

"THOSE THINGS WHICH YE DO HEAR AND SEE."

NOT many years ago the critics were loath to admit that Christian Science was capable of healing disease, or that any one could be healed by this or any other system which was not dependent upon drugs or the lancet. Now, while they are more or less willing to admit the healing of certain classes of disease by this means, many of them balk at the thought of this healing being Christian, forgetting, apparently, that one of the commandments given to all Christians was to heal the sick.

Not only did the Master himself combine practice with precept, but, according to the sixteenth chapter of Mark's Gospel, these healing works were to be the "signs" that should follow "them that believe,"—the proof of their Christianity. Although the authenticity of this particular chapter is denied by some scholars, yet even if their contention should be correct the legitimacy of this test is not destroyed, unless the greater part of the four Gospels is ignored and the example of Christ Jesus put aside as having no bearing upon his teachings.

That Jesus relied upon the healing work which he did to establish his claim to the Messiahship, is shown in his answer to John's disciples, and his belief that in thus healing the sick he was doing God's will, is proved by his statement, "I seek not mine own will, but the will of the Father which hath sent me." That he regarded this work as likewise incumbent upon his followers, is also set forth in John's Gospel, where he tells them, "I have chosen you, and ordained you, that ye should go and bring forth fruit;" and enjoins them that they "bear much fruit"—"herein is my Father glorified" and "so shall ye be my disciples."

Notwithstanding the epigram that "Christian Science is neither Christian nor scientific,"—made so many years ago by a clergyman who was more caustic than profound, and so often repeated by superficial critics as their own,—both the Christianity and the Science of Mrs. Eddy's teachings are becoming more and more apparent to those who take the trouble to observe the healing work that is being done in almost every quarter of the globe, and to these we commend the testimonies which appear in every issue of the *Sentinel*, as proofs of the healing, through Christian Science, of physical and mental ills of every description.

Mrs. Eddy has ever urged upon her students the necessity for demonstrating the healing power of Truth, and to do this on the basis of one God and one Christ. The great work of Christian Scientists is and always must be the healing of sickness and the overcoming of sin in themselves and others, and to do these successfully they must give allegiance to no personality. In "Miscellaneous Writings" (p. 308) we read, "I earnestly advise all Christian Scientists to remove from their observation or study the personal sense of any one, and not to dwell in thought upon their own or others' corporeality, either as good or evil." It has been through obedience to this precept of our Leader that the healing work of Christian Science has been established so successfully as to cause the critics to shift their base, and as Christian Scientists continue to hew closely to this line, further shifts or complete surrender will be forced upon these unbelievers.

ARCHIBALD MCLELLAN.

LAW AND ORDER.

THOSE who come to Christian Science usually do so in search of health, but they soon find that in order to insure its permanent possession they must attain to harmony, and in their efforts to secure this they cannot too often give heed to the familiar adage, "Order is heaven's first law." Diseases are frequently spoken of as disorders, and this is a correct designation. The healing of disease in Christian Science is therefore the restoring of order to the human mind and body by the understanding of spiritual law and its eternal order. Mrs. Eddy says that in the law of Love "nature and God are one and the natural order of heaven comes down to earth" (Science and Health, p. 118).

It is surely well worth while to pause and inquire what "the natural order of heaven" means. As we do this we instinctively recall the psalmist's words, "The heavens declare the glory of God," and we think of the law and order so gloriously expressed throughout the universe, even to the present confessedly imperfect sense of things. The Christian Scientist learns that to man is given the glory and honor of expressing the might and majesty, the law and order of divine Principle, infinite Mind. As this truth dawns upon one, he begins to experience order instead of disorder, the action of divine law instead of lawlessness, and this results not from the mere recognition of the divine order, it is gained by an intelligent sense of divine order and conformity to it.

There are some who seem to expect the establishment of health and harmony to be brought about in Christian Science by some magical process, as it were; but this is not the teaching of our text-book, Science and Health. It is true that wonderful results in the way of healing may be gained through another's understanding of Science. In this way one experiences the operation of the divine law of harmony, but it becomes his duty, and it should be his privilege and pleasure, to extend this activity to all his interests, to everything within the range of his consciousness. There is no inertia in the divine Mind, no irregularity, no failure, and there should be none for the Christian Scientist. Mrs. Eddy says, "Science reveals the possibility of achieving all good, and sets mortals at work to discover what God has already done" (Science and Health, p. 260). Science also teaches the necessity for working *as* God works,—by reflecting the divine order in orderliness and being a law unto ourselves and others.

It often happens that disorderly mental habits are responsible for ill health, poverty, and confusion. There are probably more who suffer from the results of indolence and self-indulgence than from the more open vices, but Christian Science should overcome these as readily and completely as it does the latter, teaching as it does the splendid discipline of self-denial, and the value of spiritual animation and intelligent activity. Our Leader's article "Improve Your Time" (Miscellaneous Writings, p. 230) has helped many to rise above threatened failure, debt, and disability, by showing them how to "make the most of the present." There is actually time for everything good and a place for everything good, and it is ours to prove this in daily experience. Some one has said that the divine law of his activity was "labor without perturbation, readiness without hurry, no haste, and no hesitation." If difficulties arise, we should not stop to condemn others, or even ourselves, but at once grasp and hold the true sense of God's government,—as including all right activity; and

Digitized by Google

then "go on unto perfection," for this, and nothing less, is the demand of divine law.

ANNIE M. KNOTT.

BURNING OUR BRIDGES.

IT would be rather difficult, surely, to find a serious-minded student in any department of collegiate study who is not ready to give up his old and faulty notions about things for the new and demonstrably correct views which are being imparted to him. He may have entertained very definite opinions regarding many matters pertaining to his study, but he approaches his subject with the desire to be instructed and with a corresponding willingness to part with his ignorance and his false sense of things. He is, in short, altogether teachable.

The desire to study anything is in itself a tacit acknowledgment of one's lack of information respecting it, and of his willingness to begin with its fundamentals and master them step by step, in order to progress. This attitude is so in keeping with the common-sense demands of the case, and so imperatively necessary whatever the subject of study, that we are not surprised to find Christ Jesus repeatedly putting this requirement in the strongest terms to those who were seeking spiritual truth. Said he, "If any man come to me, and hate not his father, and mother, and wife, and children, and brethren, and sisters, yea, and his own life also, he cannot be my disciple."

It would be difficult to give greater prominence than this to the necessity of a readiness to give up all that hinders our gaining the knowledge of the Christ, Truth, and our Leader but emphasizes our Lord's demand when she says: "We must not continue to admit the somethingness of superstition, but we must yield up all belief in it and be wise." "To all that is unlike unerring and eternal Mind, this Mind saith, 'Thou shalt surely die'" (Science and Health, pp. 353, 277).

The sweet reasonableness of this teaching of Christian Science, its parallelism with the exaction made in all other departments of study, leads one to see with great clearness the utter incongruity of the fact that very many of those who are seeking to know more of spiritual truth evince more or less indisposition to let go of material error. Instead of freely and studiously opening our mind and heart to the corrective truth, some of us have insisted that acknowledged falsity be inquired into and explained, a foolishness that the merest tyro of a schoolboy would never think of proposing. We have seemed to fear lest some treasured value might be imperiled as the result of an unreserved attitude toward spiritual truth. We are like the stupid youngster who, in the presence of the most convincing evidence that the earth is round, insists on thinking and speaking of it as flat, and who wants his teacher to explain to him why he so thinks and speaks!

This anomalous attitude may be accounted for in part by the inertia of wrong thinking, but it is the rather traceable to a conscious or unconscious belief in the reality of evil. The schoolboy never thinks of his wrong sense of numbers or relations as an entity, but the student of Christian Science not infrequently hangs on to a false sense of substance as though it were the most real thing in the world. Following Christ Jesus, Christian Science is overcoming this human disability in the one practical way, namely, by proving, through the annulment of asserted material laws, the falsity of the claim of material substance or reality. We cannot be saved so long as we insist on saving corporeality, the embodiment and expression of material belief; but when we come to see that so-called material things are but the projections of false sense, and the nothingness of this error is made clear by the demonstrations of Truth, we can have no more interest in its retention than has the schoolboy in his whilom two times three are seven.

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Sydney, Australia, May 31, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—At the annual meeting of First Church of Christ, Scientist, Sydney, Australia, it was unanimously agreed that a letter be sent to you, to express individually and as a church our love and gratitude, and to say humbly and fervently that we are prayerfully striving to apprehend more of that glorious teaching so beautifully expressed by you in these two lines on page 6 of Science and Health: "God is Love. More than this we cannot ask, higher we cannot look, farther we cannot go."

We feel it will interest you to hear a little about the Sydney (Australia) church. During the year we were compelled to move to a larger hall for our services, and, as this is rapidly filling, we are again looking for more ample accommodation. The Sunday School shows a very encouraging growth in numbers and interest. The lectures by Bicknell Young, given in our Town Hall, were listened to on each occasion by large and appreciative audiences. Class instruction has been given in Sydney to fifteen students, by an Australian teacher who has qualified for this work. Our greatest satisfaction however lies in this, that the sale of our text-book, Science and Health, is increasing wonderfully, and there is a steady demand for all your precious writings.

The government of the one Mind is more apparent in every department of our church work, and the Cause is growing more dear to each one of us. Each succeeding year must surely find our love, reverence, and gratitude increasing, even as our spiritual perception is awakened to perceive the eternal greatness of your life-work. Dearest Leader, what a debt of gratitude the world owes you for Christian Science, and for the marvelous organization which demonstrates the oneness of Science through you as Discoverer and Founder.

Forgive this rather long letter. It is the bursting forth of our song of thanksgiving to God, the joy of knowing that all our blessings have come through your unselfed consecration to Him. We do thank Him, and rest content in this, that because you dwell "in the secret place of the most High," you abide "under the shadow of the Almighty." Lovingly and loyally yours,

MINNIE D. SYMONDS, *Clerk.*

MRS. EDDY'S REPLY.

Box G, Brookline, Mass., July 15, 1909.

First Church of Christ, Scientist, Sydney, Australia.

Beloved Brethren:—Accept my deep thanks for your highly interesting letter. It would seem as if the whole import of Christian Science had been mirrored forth by your loving hearts, to reflect its heavenly rays over all the earth. Lovingly yours,

MARY BAKER EDDY.

Boston, Mass., July 12, 1909.

Beloved Leader:—At the risk of seeming to take a moment of your valuable time, I want to thank you for these words,—words that brought great peace in a recent sore trial,—"I do not regard this attack upon me as a trial, for when these things cease to bless they will cease to occur."

A terrible calamity seemed to fall upon me, and for several hours I could not think clearly, but the above words came to me as light shining in the darkness and gave me great "strength in this Peniel of divine Science" (Science and Health, p. 308). Your words, "Friends will be-

Digitized by Google

tray and enemies will slander, until the lesson is sufficient to exalt you" (*Ibid.*, p. 266), also helped to lift me above earth's perilous passage, and I very soon found that this experience was but a blessed opportunity to follow the injunction of the Master: "Love your enemies, bless them that curse you, do good to them that hate you, and pray for them which despitefully use you, and persecute you."

I rejoice in this spiritual uplifting for I know that every victory over self brings me closer to that final understanding of God where there shall be no more "night" of sorrow and suffering but one eternal "day"—"on earth peace, good will toward men." Again I thank you for your life, and your words, which have for so many years been leading me out of the slavery of human darkness into this glorious light, and the "liberty of the children of God." My daily prayer is for more wisdom, humility, and love, and to follow you as you follow Christ.

Lovingly and loyally, your student's student,

HELEN FRIEND-ROBINSON.

Kansas City, Mo., July 11, 1909.

Dear Mrs. Eddy:—Today it was my joyful privilege to assist in reading the communion service for the first time, in First Church of Christ, Scientist. As I looked over the church, filled to overflowing, chairs being placed for many, my heart was filled with gratitude that because of your pure thought these hungry and thirsty "little ones" might now receive the "true bread"—"that a man may eat thereof, and not die;" also the "living water." Moreover, I rejoice that the sense of universal, impersonal Love, operating through you, blesses me in giving me the opportunity of distributing to the multitude, and I wish to thank you for making it possible for me to do this. My earnest desire and endeavor is to prove by my daily life that I am a partaker (to a degree), with you, of that "one bread."

Lovingly and gratefully,

ANNAH T. NORTON.

Lowell, Mass., July 11, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Having just returned from church, where mine was again the sacred privilege of reading the Bible references in our Lesson-Sermon on "Sacrament," I cannot resist telling you how, with each recurring communion service, I realize and appreciate more and more your wonderful wisdom in dispensing with all material rites and ceremonies, thus giving us a higher and more wholesome sense of the true communion, which is wholly spiritual; and today, more than ever before, my prayer is a "fervent desire for growth in grace" (Science and Health, p. 4), that I may draw nearer and nearer to ever-present Love, better demonstrate divine Principle, sacrifice more of self, and ever be found

Your humble, obedient follower,

LILLIAN E. HONIG.

Leeds, England, July 6, 1909.

Dear Mrs. Eddy:—Gratitude and love prompt me to write and thank you for "A Correction," in the *Sentinel* of June 26. Conflicting abstractions do at times cloud the clear sense of "God with us."—"In my flesh shall I see God." But this, your well-timed instruction, will confirm and strengthen us in our work of healing the sick. For all that Christian Science has done and is doing for me in healing sickness and sin, and for this added proof of your inspired teaching and wise, loving thought, I would fain convey to you the intense love and gratitude I feel.

Yours ever loyally,

EMMA JULIA NORTH.

Chicago, Ill., July 8, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—We, the members of Sixth Church of Christ, Scientist, of Chicago, in regular semiannual business meeting assembled, desire to express to you our sincere gratitude for the many blessings which have come to us through Christian Science. We are grateful, dear Leader, for your unceasing labor of love for mankind, and trust that we as a church may continually prove by our fruits "what the understanding of God brings to man" (Science and Health, p. 496).

Yours in obedience and love,

Members of Sixth Church of Christ, Scientist,

By Committee.

New York, N. Y., July 2, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—Thank you most heartily and lovingly for the new by-law, Article XXVII., with reference to class teaching, as it appears in current number of the *Christian Science Sentinel*. It will prove most helpful to the Cause here as well as throughout the world. With the understanding of spiritual law which has come to me through the study of your writings and the literature of Christian Science, I have been enabled to free many from sin, disease, and death, during the past ten years. The superiority of a purely spiritual interpretation of the truth, as given in your teachings, is offsetting the semi-materialist's methods of intellectualism under whatever names it may appear, and is preserving the presentation of truth to humanity as it should be presented.

With loving gratitude and loyalty,

Sincerely,

ROBERT E. CARY.

New York, N. Y., July 7, 1909.

Mrs. Mary Baker Eddy.

Dearly Beloved Leader:—My heart is full of love and gratitude to you for Christian Science. It is five years this month since I attended the Sunday morning service in Second Church of Christ, Scientist, New York city. I did not come for the physical healing, but purchased a copy of "Science and Health with Key to the Scriptures." After reading a few days, when starting to read the book one evening, I did not remove my glasses, which I had worn for ten years, from the case. This healing seemed very beautiful to me, as I did not know that the book healed as you read it. I am very grateful to God, and to you, dear Leader, for some cases of instantaneous healing. Science and Health and your other writings have been my constant companions ever since, also the *Sentinel* and *Journal*.

The daily reading of the Lesson-Sermons has been to me the bread "which cometh down from heaven," and my daily prayer is that God will give me more grace, obedience, and love; and I ask divine Love to feed me with "the bread of heaven, health, holiness," that I may "be conformed to a fitness to receive the answer to [my] desire" (Miscellaneous Writings, p. 127).

With deep love, I am your student's student's student,

ANNIE SPELCY.

THE LECTURES.

SOUTHAMPTON, ENG.

The fundamentals of Christian Science were very ably expounded to an interested gathering at the Philharmonic Hall on Tuesday evening [May 11] by Francis J. Fluno, M.D., of Oakland, Cal. J. Miles Chambers, M.R.C.S., Eng., L.R.C.P., Lond., presided, and in his introductory remarks said that they were having the somewhat unusual experience that evening of being present to hear a lecturer on Christian Science who was himself a doctor of medicine, and who was introduced to them by a member of the same profession. They were, therefore, in a position to assure them that the attitude of Christian Science and of Christian Scientists toward the medical profession was that of love, and of admiration for the self-sacrifice and devotion which were shown by the great majority of those who were engaged in the medical relief of human suffering; and they, who had experienced in their own lives the healing and regenerating power of Christian Science, and had been led thereby to follow up its study, were not there to say one word in disparagement of those who were so engaged. Rather, they were there to tell them of the availability of the Christ-method of healing, which was given to the world nineteen hundred years ago in the words and works and life and ascension of Jesus Christ, the understanding and practical application of which had remained almost in abeyance since about the year 300 A.D., but which was rediscovered and rendered available to mankind rather more than forty years ago by Mary Baker Eddy, the Discoverer and Founder of Christian Science, and given again to the world in the Christian Science text-book, "Science and Health with Key to the Scriptures."

There had been many erroneous impressions formed concerning the teachings of Christian Science, and consequently many equally erroneous criticisms had found their way into circulation through the press and through ordinary conversation. Perhaps the most common of these mistaken impressions was that Christian Science is merely a system of drugless healing; but if the critics who held that belief were familiar with the lives and histories of those who practised Christian Science they would know that the aim of the teaching and the effect of the practice of Christian Science is the rescue of mankind from the thraldom of all erroneous beliefs, whether those beliefs were in the necessity of sickness or the power of evil. It was in order that these mistaken impressions might be removed by a correct presentation of the teachings of Christian Science that these lectures were given.—*Southampton Times.*

PITTSBURG, KAN.

A splendid audience welcomed the Hon. Clarence A. Buskirk of St. Louis, Mo., at La Belle Theater, May 16, at his lecture on Christian Science. He was presented by Julius M. Liepman, who said in part,—

While I am not a Christian Scientist, I have been an observer for some years of this progressive movement. This religion or philosophy, or whatever you choose to call it, has attracted my attention by the things it has done——the good it has accomplished. A religion which makes its votaries wiser, better, healthier, and consequently happier, which destroys the thousand and one cares, worries, anxieties, and perplexities of every-day life, must certainly be of great good to humanity. Humanity at large is big enough, broad enough, to consider—to listen—to hear—to investigate. An honest doubt after the fullest investigation is justified, but doubting without an effort to know the truth is prejudice—yes, even ignorance. Bigotry, intolerance, prejudice, flourish where ignorance prevails. Our greatest boast is tolerance, and any one is welcome whose object is the accomplishment of good. We are greatly indebted to the noble men and women of the country who by their teachings try to make humanity better and happier. Such a one is with us on this occasion.

Correspondence.

NASHVILLE, TENN.

A large and representative audience gathered last night [May 18] at Watkins Hall to hear Mrs. Sue Harper Mims of Atlanta lecture on "Christian Science, the Christianity of Jesus." In introducing the speaker of the evening Henry M. Mason, First Reader of the local church, spoke in part as follows:—

In presenting Christian Science to the public we do it in no proselyting spirit whatever. In our text-book, Science and Health, containing seven hundred pages of a teaching which has healed thousands upon thousands of suffering, despaired of and despairing invalids, the only statement which embodies the slightest element of solicitation is formed by these words [p. 547]: "You can prove for yourself, dear reader, the Science of healing, and so ascertain if the author has given you the correct interpretation of Scripture." Self-sacrifice and love for mankind are the crowning, distinguishing characteristics of the author of the text-book on Christian Science. Some approach to the embodiment of these traits of character in beneficiaries of this teaching is alone accountable for the motive impelling us in the promulgation of this truth.—*Nashville Banner.*

TESTIMONIES OF HEALING.

When I began to read "Science and Health with Key to the Scriptures" by Mrs. Eddy, I was an invalid and had been for several years, with a diseased condition of the bowels and stomach which had followed an attack of fever. I had physicians of all the different schools, including specialists and sanitarium treatment, but nothing seemed to check the disease, which was slowly affecting all the organs of my body. I had reached the point where dying seemed easier than living, as there appeared to be no hope of relief from my sufferings in any other way. One day a lady whom I knew but slightly asked about my health, and after telling her that I despaired of getting well, she asked me to read "Science and Health with Key to the Scriptures" and presented me with the book. I took it, and promised to read it, though I wondered what it could do for a person in my condition. I read the book, and in a few months was absolutely cured of that disease.

I was also cured of a severe case of rheumatic trouble, from which I had suffered for over seven years. I had tried everything in *materia medica*, as well as electricity, massage, etc., but had never received any permanent help therefrom. I had one week of treatment from a Christian Science practitioner for this complaint, and was healed, and I have never had any return of the disease. I also received a new understanding of God as ever-present, unchangeable, "the same Life, Love, and wisdom 'yesterday, and today, and forever'" (Science and Health, p. 283). I am indeed grateful to Mrs. Eddy for bringing us this truth which heals the sick, an understanding of God as the Life and Mind of all real being.

MRS. G. L. FOEX, Denver, Col.

[Translated from the German.]

With a grateful heart I give this testimony. A year ago I had a malady which completely robbed me of my strength, and I lost greatly in weight within a short time. I then asked a Christian Science practitioner in Frankfort a|Main for help, and was thus enabled to make the long trip from Magdeburg to that city. As I did not know the nature of the disease, I decided to have an X-ray examination. The physician stated that I had a very severe abdominal disorder, the heart and other organs being also affected. After the examination I remained for some time in Frankfort under Christian Science treatment, and by and by I realized, to my great joy, that the truth had made me free, for all my diseases had vanished like mist before the sun.

I cannot express in words the gratitude which I feel that God has again revealed to us, through our Leader, Mrs. Eddy, this glorious truth, as Christ Jesus taught it. I am also thankful for having had Christian Science explained to me so clearly that I have since been enabled, through the knowledge thus obtained, to help myself occasionally when some disorder would present itself. It will be my endeavor to live according to the teachings of Christian Science, and to apply them in my life. May God give me enlightenment!

JENNY SPEICH, Magdeburg, Germany.

Some years ago, when I was a beginner in Christian Science, one of my children was taken with a severe attack of bowel trouble. I felt I would rather have help in the case, as I had not demonstrated much in the way of healing, and my home at the time was full of guests. I wired to a Christian Science practitioner, simply asking for help, but not stating the disease, and saying, "Letter to follow." This was on a Saturday, and owing to Sunday intervening she could not get my letter till Monday.

Several people in the house, notably one lady who had had a large family of children, were greatly distressed over the child's condition, and said he should have special feeding, etc., but I made no difference and the child ate and drank what he liked. He did not take much, but apparently did not suffer any pain,—only slight discomfort,—and knowing that the practitioner was treating him (having got a reply from her), I was confident all would be well. By the Monday morning, almost as soon as the Scientist had received the letter stating the ailment, she got a wire from me, saying, "Child practically well." And there was never any return of the disease. For this demonstration of Truth's power I am deeply grateful.

A. O. MACLEOD, Invergordon Castle, Ross-shire, Scotland.

Through the spiritual understanding gained from the study of Science and Health by Mrs. Eddy, I was able to take the Bible and bring freedom to myself from a very severe attack of illness last summer. This is only one of many difficulties which have been overcome in our home. Once again I can realize what Jesus meant when he said that the truth should make us free. The more I understand Christian Science the more I love it, because it is teaching me the great need of overcoming self so that I can see the allness of divine Love. If evil is less real to us, then we can truly say that we are overcoming "the old man with his deeds." Inasmuch as Christ, Truth, is our all, are we lifted above mortal mind. God is blessing His faithful servant, our dear Leader.

MRS. EMMA PHILLIPS, Dorchester, Mass.

While living in a foreign land, a third attack of fever left me partially helpless, one side of the body being affected. During the struggle my life was long despaired of; again and again it was reported that I was dead, but my good doctor (God bless him) continued to attend me. When convalescent I found I could only move about with the aid of a cane. For months I was at the seaside, taking daily baths; finally it was also thought that a sea voyage and my native air might do much for me. I made my way back across the Atlantic, to die soon, I thought. After enduring seemingly to nature's limit, there came an eclipse of reason. While in an asylum an operation was said to be necessary, and I went to a Chicago hospital for this purpose, but after spending some little time there, it was thought that my heart was too weak for me to survive the shock.

As time went on about a score of physicians did what they could for me. Medicine was taken wholesale, as my home was with relatives who were physicians. Less than a year ago, circumstances compelled me to turn from every home comfort and strike out for myself, and a Scientist friend found me not only in the depths, but in a way homeless. With patient and untiring love she persevered in trying to help me up and on. Step by step, with every best effort, I persevered in trying to help myself to gain the firm foundation I now have in the truth. Care and pain now belong to the past; worry and fear are gone, and life is again worth living.

Words fail me in trying to express my gratitude to God, and to our dear Leader, Mrs. Eddy, for the truth of being, as revealed in Christian Science.

OLIVE HANDY, Whitewater, Wis.

In 1905 I was a mental and physical wreck, having undergone an operation so serious that it left me without any use of my left arm and hand. The various treatments known to the medical profession were resorted to, such as

Digitized by Google

medicine, electricity, massage, etc., but all to no avail. Through the earnest solicitation of a dear friend who was a student of Christian Science, I was persuaded, after being helpless four months, to turn to this healing truth and see what it could do for me. I took treatment, and although the healing was slow, yet my condition improved and I was also healed of a number of other diseases, among which were a catarrhal condition that had annoyed me for years. For the past year I have taken care of my own house, and have been able to use the once helpless arm and hand nearly as well as the other.

It is needless to say how thankful I am to God for the blessings received, as well as to our dear Mrs. Eddy, through whom we are enlightened, and have spiritual things made clear and plain to us. I only hope that this testimony may be of encouragement to some one similarly afflicted, as I am so often asked by those who saw me when helpless, what cured my arm, and also if Christian Science can cure all diseases.

HELEN P. DU VAL, Alameda, Cal.

[Translated from the German.]

Our eight-year-old boy fell at school and injured his arm near the wrist. He was brought home by the school servant, suffering great pain and unable to move the hand. I explained to the boy the truth about God's all-embracing love and the healing work of Jesus which has been revived again, and I experienced the joy of having all fear removed immediately from the boy, my wife, and myself. Shortly before, I had translated from Science and Health the paragraph on page 373 ending with the quotation, "Perfect Love casteth out fear," and this was constantly in my memory.

The arm was then examined by a physician, and set without the use of chloroform. We were glad to see how well it all went. We were told that the pain might return and some fever set in, but we felt as if the healing had already been done. I read to the boy how Jesus healed the sick, until he said he would like to rest. The pain had evidently disappeared; his appetite and sleep were quite normal and he did not have fever. The next day he himself opened the door for the physician. The latter was so astonished at his liveliness that for a while he was in doubt whether it could have been a fracture, but on the same day a photograph by X-rays was made, which showed plainly the place where the bone had knitted together. In three weeks' time the last bandage had been removed and the arm was completely healed.

I thank God with all my heart for His help, and that the healing works of Christ Jesus are again being made ours through the discovery and application of Christian Science.

ERNST REINHARDT, Frankfurt a|M., Germany.

It is gratifying to write this testimony, trusting that some seed may fall where it will take root, spring up and grow, and bring forth an hundredfold. It is a little over two years since I began the study of Christian Science. When I first heard of this wonderful teaching, a friend told me how his son had been healed. When I met this friend again we talked some more about Christian Science, and from that day I wanted to learn what it was.

I did not come into Science for physical healing, but I was dissatisfied with everything, and when the thought came to me to investigate Christian Science I asked my friend if he could direct me to a practitioner. He gave me the address of one, to whom I wrote and from whom I received a reply, stating that she was going away for some time, but she sent me the addresses of other Scientists. By this time I was very eager for Christian Science.

From the very first day that I concluded to investigate Christian Science, many sins left me,—smoking, drinking, slang, profanity, irritableness, and other errors, and I began to love my fellow-men. I bought a copy of "Science and Health with Key to the Scriptures," and began to read it. I was so eager for the truth that I literally devoured the book. I learned, after reading it through the first time, that it had to be studied, and as I began to read the Bible the light came, and the more I read and studied both the Bible and Science and Health, the more light I received, as the understanding of the Bible is brought out in its spiritual meaning by this book in a way I had never before known.

There have been many proofs of the power of divine Love. One which I wish to relate is in regard to my little daughter. She had a skin disease from birth, and my wife and her mother tried every material remedy that could be heard of, but all failed. I began to treat the little one, but my wife and others around her were much opposed to this treatment, and she did not seem to improve. This shows the truth of Mrs. Eddy's statement in Science and Health, that "it is well to be alone with God and the sick when treating disease" (p. 424). A little over a year ago, however, we moved to another town, and thus being rid of the opposing thought, in less than a week my wife forgot to use the salve. I said nothing, but continued to treat the little one, and in four weeks she was practically healed. The improvement was so noticeable by the fifth week that my wife was admiring the little girl, and said to me, "Isn't she dear?" I then asked, "What have you done with the salve?" She thought a moment and answered, "I do not know." I said, "See what God has done for us! Ought we not to be more thankful?"

Many other demonstrations I have had in my family, through the understanding that God is Life, Truth, and Love, and that He guides us through all our trials. If we ask aright, and have patience, all errors can be overthrown by going to God in prayer. I never look at the *Sentinel* without thinking of the words on the cover, "What I say unto you, I say unto all, Watch!" What a lesson is to be drawn from these words! Another beautiful lesson has come to me from the promise that Jesus bestowed: "He that believeth on me, the works that I do shall he do also." My constant prayer is for knowledge and an understanding heart, that I may help those who are sick physically and mentally, and I am indeed grateful for Christian Science.—MARTIN B. HOSTETTER, Blue Earth, Minn.

When I was groping in the darkness occasioned by a false theology, prejudice, and self-righteousness, a dear sister came to me with the "good tidings of great joy," as they had been revealed to her in Christian Science. Through her patient, loving efforts and forbearance the walls of bigotry and self-sufficiency were penetrated and at length dissolved by the rays of infinite Truth, and my consciousness was flooded with the effulgence of divine Love. I was instantaneously healed of a severe form of intestinal disorder, for which I had been under the care of a physician for several months, and also of a number of minor complaints of long standing. At the same time I was freed from a sense of hatred which had held me in bondage for over two years. These were but the beginning of the many blessings and great good that have come to me in Christian Science.

This was five years ago, and I can truly and humbly say that these have been years of peace and health and happiness. Many "crooked places" have been made straight, and "the rough places plain." I am most grateful to God for His wonderful revelations to our Leader, Mrs. Eddy, and for all the avenues through which this great good has come to me and to all mankind.

MRS. CORA B. S. RENNEKER, Cincinnati, O.

Digitized by Google

I gladly write a brief testimony of my experience in Christian Science. I met a Christian Scientist about a year ago, when I was suffering from rheumatism, and had almost lost the use of my right arm. I believed what the practitioner said, and through her understanding of the truth my arm was healed so that it is as well now as it ever was. My eight-year-old son had an attack of blood-poisoning, the result of a scratch, and he suffered greatly from it. It was nearly twenty-four hours before the Scientist came, and she stayed with him about an hour, when he was healed. The fever cooled down, he rested well, and got up next morning and walked to her home. The following day he went to school, and never suffered any ill-effect after that at all. Several other times in my home, when I have asked help from the practitioner, the great power of God to heal was proved

I have also studied the Christian Science literature and worked for myself, and have had some beautiful demonstrations. It was indeed a blessed day for me when I found Christian Science. Like thousands of others, I had tried to trust God, but I did not know how. Now I see things in a different way; I see with a spiritual sense, where before I was blinded by error. I hope the time will soon come when all will understand this truth.

MRS. L. B. SPIVEY, Durham, N. C.

I can no longer withhold my testimony. I have been a student of Christian Science for about three years, and have had continuous proof that it is the truth. I did not seek it for physical healing, but for extreme mental suffering brought on by financial troubles and sorrow. That "man's extremity is God's opportunity," has been clearly proven to me. The spiritual consciousness which enables one to see reflected in the brother the Father's image, has just been gained, and I know that with any problem we must remember the admonition, "First cast out the beam out of thine own eye; and then shalt thou see clearly to cast out the mote out of thy brother's eye." A test of this brought an immediate result in my own experience. This knowledge is bringing a wonderful peace into my life. Absolute faith in God will solve any problem, and the meaning of life is the conforming of ourselves to God's laws. The sense of separation from God is the cause of all seeming discord, and love is the rule by which we must work out all of our problems. The *Sentinel* and the *Journal* are a great help to me.

Words cannot express my gratitude for the release from bondage which I am daily experiencing. My constant prayer is that I may become a channel for all good. I am thankful to God, to our Wayshower, Christ Jesus, and to dear Mrs. Eddy.

MRS. ANNA MACDONALD, Old Orchard, Mo.

For twenty-five years I was a sufferer from severe headaches. During this period I had treatment from fourteen different medical physicians, besides an osteopath. Some of these were close personal friends, in whom I had a great deal of confidence, but they could give me only temporary relief, and that was by the continual use of opiates and other drugs. It was because of failure to gain permanent health, and in utter despair, that I came to Christian Science, in March, 1907, through a friend who sent me a copy of the *Sentinel*. After reading this I immediately decided to try Christian Science. I went to see the Scientist, who kindly loaned me a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy.

For three weeks I did little or nothing but read this book, and my regular headaches failed to appear. I then ordered a copy of the book for myself, also the Christian Science *Quarterly* and *Sentinel*, and began to read and study in order to gain all the understanding I could of divine Principle. In about three months I realized that I was perfectly cured of an injury received from a fall when I was a mere child. The agony I had endured from it, and from the use of a support all these years, was very great. The next cure was of so-called varicose veins. I know that as I work out my own salvation the body will continue to express health and harmony.

For all this healing I am more grateful than pen can tell. It is my daily prayer that I may "rise in the strength of Spirit to resist all that is unlike good" (Science and Health, p. 393). I am also thankful that our Leader has made it possible for me to follow her as she is following Christ.—IDA W. WILLIAMS, Logtown, La.

It is with a deep sense of gratitude for the revelation of the truth that makes free, and in the hope my testimony may encourage others, that I give my experience in Christian Science. A few years ago, while carrying a large cat, he became frightened and dug his claws into my forehead, making several deep scratches, so that the bone above my eye was involved. Fear of possible results seized me, and I immediately asked for Christian Science treatment. In a few minutes the pain ceased and apparently all sense of fear left me; but soon my forehead and face commenced to swell, and I realized that fear was still lurking in my consciousness. The next morning my whole system seemed to be affected, and soon after dressing, we found conditions which appeared very serious. Then, while fear and pain seemed to be so great, this question presented itself to us: Have we the understanding to meet the present need? But soon this thought came to me: God is present everywhere, and we have sufficient understanding of His law and how to apply it to destroy this error. I asked my friend to continue the treatment, and in a few minutes I knew that the victory was ours. In a very short time I felt well, and soon every manifestation of the injuries was gone—not even a scar was left.

This is only one of the many times that I have been greatly benefited by the application of the truth that has been revealed to us by Mrs. Eddy, but the physical ills from which I have been healed are as nothing beside the mental agony I was in at the time I commenced the study of Christian Science, and nothing can compare with the spiritual understanding and uplift which I have received through this study. The Bible, which I had studied faithfully for many years, has become a new and doubly precious book to me through the light which "Science and Health with Key to the Scriptures" has thrown upon it.

I am trying to show my gratitude to God, and to our dear Leader, for this truth, through which divine Love has reached my consciousness, by daily learning and living the truth.—MRS. MINNIE T. JAQUITH, Coeur d'Alene, Idaho.

[Translated from the German.]

My heart is full of praise and thanksgiving for God's infinite goodness and for all the blessings He has bestowed upon me. I suffered from rheumatic pains, which made me quite ill not only physically but mentally. Neither magnetic nor electric treatment, nor massage, under the care of different physicians during four years, could cure me, but through the sudden healing of a person with whom I was well acquainted I became interested in Christian Science. I called upon the practitioner, and after the second treatment I felt much better physically and also in a light and cheerful mood, so that I again took pleasure in life. In three weeks' time I was healed, and my fervent desire is to tell all sufferers that there is a living power which helps all those who earnestly want to be helped.

MARIE SOLAND, Basel, Switzerland.

Digitized by Google

As I am desirous of testifying to the healing power of Truth, I send this testimony. Since taking up the study of Christian Science, now over three years ago, I have been benefited in many ways, both mentally and physically. I have proved the power of Truth to heal in the case of a badly sprained thumb. I was able to use the hand at once, the pain being overcome as soon as the injury occurred. Christian Science has also destroyed other minor discords for me. I am much brighter and happier than I used to be, and I am indeed thankful for this,—thankful to God for all His goodness, and to Mrs. Eddy for the truth which has been revealed through her.

CLIVE S. CARMAN, Vancouver, B. C.

Words cannot express my gratitude for Christian Science and all it has done for me. I took my first treatment a little over a year ago, and I have been healed of so many distressing conditions that I hardly know where to begin. One thing for which I am very thankful is that I can now live in Colorado, and am better and stronger than I have ever been. For six years I did not dare come back, on account of the altitude, as each time I tried to do so I became very ill, but that has been overcome. I have been healed of a disease of the bowels from which I had suffered for eleven years, also of fainting-spells, very severe headaches, etc. Since my healing in Christian Science I have put aside glasses, which I had worn for twenty-five years. Always before, if I tried to use my eyes without glasses, even for five minutes, I suffered intensely, but now I read, sew, and use my eyes constantly, without any pain.

Our children have been helped in many ways. They have been healed of colds, severe bowel and stomach difficulties, a skin disease, and many other things. I am very thankful for the physical healing, but I am more thankful for the spiritual help, and that I am beginning to know the meaning of Jesus' words, "Ye shall know the truth, and the truth shall make you free." When I think of all the blessings which have come to me in the past year, I feel that I can never be thankful enough to God, and my heart is full of love and gratitude for the one who has given us this beautiful truth.

AMY L. FAHNESTOCK, Denver, Col.

[Translated from the German.]

Until 1904 I was afflicted with all kinds of disease, though I made every effort to gain health. Neither a physician, nor drugs, nor a sanitarium for pulmonary diseases had helped me, and I gave myself up to my fate. My father was told about Christian Science, but I did not then attach any importance to it. I was, however, urged to try this treatment, and when I did so it was like a stream of blessing coming over me, and I felt that God's hand was working here. I received some absent treatment, and after five present treatments I was completely restored in six weeks' time. I felt like one new-born, and was enabled to help others right along. I treated my sister successfully, when she was threatened with death. My mother was also treated successfully for an apoplectic attack. After I was married I seemed to be hindered by my wife's loving care, and the fear with which she surrounded me, till she herself experienced a wonderfully quick healing. After this she assisted me in thinking rightly, so that I have since been permanently well.

I am thankful to God, and also to Mrs. Eddy, who has discovered again the true source of healing,—the power of Truth.

THEODOR GRUHNS, Krogullow b. Carlsruhe, Oberschl., Germany.

[Translated from the German.]

Toward the end of December, 1905, I came to Christian Science in a wretched condition, both mentally and physically, and was freed of severe nervousness with all its woeful attending ills, so that I was again able to work. Melancholy which had weighed me down yielded, and the life which had been a burden I could now take pleasure in. I began the study of Science and Health, and was gradually healed of an abdominal disease.

I am very grateful for the deliverance from the bodily ailments, but more so for the spiritual uplift and the inward peace that have come to me through this teaching. I experienced the wonderful help Christian Science affords under trying circumstances, as I had to suffer much from antagonism to this truth, also from severe illness in my family, the members of which positively would not listen to anything about Christian Science; but I have felt God's protecting power so plainly that all the opposition only made me strive the more to trust in God and to love Him supremely. Gradually the inharmonies dissolved, the sickness in the family lessened, and I suffered less and less therefrom the more I learned that sickness and evil are unreal.

My heart is full of love and gratitude to our revered Leader, Mrs. Eddy, who has shown us the way to understand God, and that to know Him aright is eternal life.

FRAU ANNA KREKEL Hofheim b. Frankfurt a|M., Ger.

[Written for the *Sentinel*.]

THE CROWN OF DAVID'S LINE.

BEN. HAWORTH-BOOTH.

KNOW ye the noble crown of David's line,
Bearing the thirteen stars and sacred sign,—
(1, 2) The tribes of Jacob, and the vow divine;

The crown of sovereignty, whose flag unfurled*
And star-lit lamps illume a whelméd world,
Through clouds and chaos, and through thunders hurled?

It came with him, the princely pursuivant,
(3) The prophet-priest who came to build and plant
(4, 5) The branch of David's line predominant.

(6) This is the Saxon crown of Isaac's sons,
(7) Of Judah's hopes, and Israel's orisons,
The sacred cynosure of earthly thrones.

Who wears the helm of wisdom eagle-plumed,
Who breathes the frankincense of life perfumed
(8) Shall win the crown of righteousness illumed.

(9) Who wins the crown that bears the morning star,
Has crucified himself in Golgotha;
Has borne the crown of thorns and bears the scar.

Lord of the cross and crown, may we appear
Worthy the heraldry of heaven to wear,
With thy sweet Spirit for our minister!

And whoso hath this hope will find release
From self and sinfulness—a full surcease—
At one with Love divine, beneath the stars of peace.

1. Deuteronomy xxxiii., 13–17.
2. Genesis xlix., 10.
3. Jeremiah i., 10.
4. Ezekiel xvii., 3; Isaiah xi., 1; Jeremiah xxiii., 5.
5. Isaiah xli., 12.
6. Genesis xxi., 12.
7. Genesis xlix., 10.
8. 2 Timothy iv., 8.
9. Revelation ii., 28.

* The original American flag contained 13 stars (Manasseh's number), one star for each stripe.

FROM OUR EXCHANGES.

[Silas McBee in *Churchman.*]

Our Lord spoke a language and lived a life which was understood by the people, and the common people heard him gladly. He did not invite them into some vague spiritualized organization, but he enlisted them in his work, which was to go about doing good. They were his disciples, his body of disciples. There is not to be found in him or in his teaching, or in the whole of the New Testament Scriptures, any individualistic or isolated conception of Christianity or of Christian life. He dealt with every phase of life with which he came in contact, and he dealt with it as the common work of God and the brethren. It is not so with Christendom today. There is something vague and indefinable about the spiritual kingdom into which men are invited. Christendom as a whole does not work at the real and actual things of life, because in its divisions it does not work as a unit. And none of the churches of divided Christendom are willing in their corporate organized capacity to work at, much less to work out, the great social, political, industrial, and economic problems that face men and society at every turn. They insist that as spiritual forces their true domain is something apart and separate from these so-called worldly affairs. They maintain that they are great spiritual institutions, whose business it is to produce spiritual lives, which in their individual capacity will work these reforms, as economists, politicians, philanthropists, and such like. Thus the incalculable and irresistible influence of the organized family of God, that corporate life which gives to the Christian church something that was never given to the world before in its fulness is left unused.

[*New-Church Messenger.*]

No man can see truth clearly unless he believes in his heart that he can live up to it. To see it without the power of doing it would only tantalize, discourage, and condemn him. To preach to men that they must overcome their evils in their own strength is to ask them to overcome self with self, which is an impossibility. But teach them that the Lord God Almighty has come down on earth and lived out the laws of His own life in order that they might follow in His footsteps, and you have given them an inspiration that will not only enable them to live up to the truth they already understand, but to understand all the truth that He has revealed for their guidance. Those who fail in any sense to recognize the saving power of the Lord, will be inclined to fall short in their estimate of what He demands of them. Those who realize His saving and keeping power will rise to the highest conception of the wholeness, righteousness, and purity of His teaching.

[Robert Stuart MacArthur in *Standard.*]

The idea is: He that is bound up in himself, in saving his earthly life, shall lose his spiritual life; and he who in his devotion to Christ is willing to imperil, to destroy, to crucify his lower life, shall save his higher life. The truth here taught goes to the very center of our being, and strikes at our inmost self. Christ's words are thus directed against every form of selfishness. To lose our life means to lose our sinful self, and to lose our sinful self means to find Christ and eternal life.

[G. Campbell Morgan, D.D., in *Advance.*]

Men never come to restfulness, never come to victory, never come to crowning, until somehow they have found their way into immediate relationship with God, and into that relationship which is expressed in absolute surrender and submission. No man has found his way into peace who has not found his way to God.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel.*

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in this column.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the Field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

PAMPHLETS IN FRENCH.—Three new French pamphlets, "Christian Science: Le Pouvoir De L'Homme Sur Le Mal," "Christian Science: Ses Bienfaits Pour L'Humanité by Edward A. Kimball, and "Christian Science: La Délivrance Du Mal" by William P. McKenzie, are now ready for delivery to the Field.

A new catalogue has just been issued by the Society, copies of which will be mailed to our patrons on application.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES." MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed article publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE, POSTPAID: Single copy, six months, $1.20, one year, $2.00. Quantities TO ONE ADDRESS: ten copies, each, six months, $1.15, yearly, $1.90; twenty-five copies, each, six months, $1.10, yearly, $1.80; fifty copies, each, six months, 95 cents, yearly, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 40 cents for postage on each yearly subscription.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year or two years previous, cloth, $2.50; half calf or half morocco $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

The first electric train of steel cars which whizzed through the new "McAdoo tube" from the Church street terminal in New York to Jersey City last week, made the trip in two minutes and forty seconds. The two tunnels are only a step in the plan which in a comparatively brief time will make it possible for the traveler from any point in the country to go through New York city without leaving his train for cab, trolley-car, or ferry. The twin tubes connect down-town New York with the Pennsylvania railroad station on the Jersey side of the Hudson river. In a few weeks a transverse tunnel will be opened, connecting the Pennsylvania, the Erie, and the Lackawanna stations on the Jersey side. Two years from now it is hoped to have an extension finished which will connect the present upper tubes, now running from Sixth avenue and Thirty-third street to Hoboken, with the Grand Central Station at Forty-second street. The entire system has been built by private capital, and will have cost, when complete, about $70,000,000.

The Department of the Interior has classified as coal land and restored to the public domain certain unappropriated lands in the Evanston Land District, Wyoming, fixing the price for disposal of the tracts therein in some cases as high as $500 an acre. This land contains one of the finest coal veins in the West. Investigation some months ago by special agents of the department disclosed that the title to much of the most valuable coal land in that part of Wyoming had been got from the Government through a system of fraudulent operations, and suit was instituted against the patentees to recover the lands. Finally, the defendants reconveyed the lands to the Government, paying about $40,000 for coal contracted.

Herbert Knox Smith, commissioner of corporations, in transmitting the second part of his report on transportation by water to President Taft, says: "It is a public evil that the entire transportation system of the United States should be, as now, at odds with itself through destructive competition, while the transportation needs of the public suffer. State and federal work must be supplemented by private initiative, especially in terminals and equipment, and private initiative will come in only when there is reasonable chance of enough traffic to make it profitable. One of the great questions, therefore, is the question of how to secure for the inland rivers and canals a reasonable share of the country's traffic."

The United States Government maintains five agricultural experiment stations in Alaska, so situated that crops may be tested under all the climatic conditions. According to an annual report, Alaska is an agricultural country. Good hay can be produced in any quantity for winter feeding, while the native grasses can maintain live stock in excellent condition in summer. Potatoes, cabbage, cauliflower, rhubarb, turnips, lettuce, and in short, all the hardy vegetables can be grown to perfection up to and even within the Arctic Circle, as has been proved by thousands of settlers. But before Alaska can be largely settled railroads and wagon roads must be built.

A decision which has been handed down by the Appellate Division of the Supreme Court, on the application of the South Shore Traction Company from a decision of the Public Service Commission of New York, declining to approve a franchise granted to the traction company by the Board of Estimate and Apportionment, will have, if approved by the Court of Appeals, the effect of placing an important limitation upon the power which the Commission has undertaken to assert in the matter of franchise grants for surface railroads.

An aggregate of $380,404,598 in savings deposits in the national banks of the country is shown in the complete report issued by the comptroller of the currency on the returns from the national banks under the call for their condition on June 23. Of these 6,926 banks which made reports, 2,161 showed savings deposits. In the savings deposits the eastern states led with $173,712,832, the middle states next, with $109,931,214, the southern states with $44,048,395, and then New England with $33,546,051.

Letters from twenty-five governors of states in the middle West and South, urging President Taft to make a trip of inspection down the Mississippi when he goes to attend the annual convention of the Lakes-to-the-Gulf Deep Waterway Association at New Orleans in November next, have been presented to him by a special committee of the Business Men's League of St. Louis and the Lakes-to-the-Gulf Deep Waterway Association.

The second annual good roads convention, under the auspices of the Good Roads Board of the American Automobile Association, will be held in Cleveland Sept. 21 to 23 inclusive. The Good Roads Board has made preliminary plans for the convention, and has received assurances of a large representation of Government and state road experts, motorists, grangers, and others.

A recent hurricane that swept disastrously portions of the Gulf of Mexico, proved clearly the worth of Galveston's two-million-dollar sea-wall. This wall was erected along the water-front after the storm that inundated that city a few years ago.

Edward Payson Weston completed his pedestrian trip from New York to San Francisco in one hundred and four days. He had hoped to do it in an even hundred days. He is seventy years of age.

The House has passed a bill authorizing $25,000 for travel money for President Taft. The President expects to take a trip in the fall through the South and the West.

International.

The eighteenth international peace congress meets at Stockholm Aug. 29 to Sept. 5. Enormous progress has been made by the movement since 1899. At that time a few friends of peace from the United States, Great Britain, France, and two or three other European countries, met at the French capital and held the first of the modern series of international peace congresses. Their meetings passed quite unnoticed by the press and the public, or were ridiculed as the sentimental performances of visionaries. Last year in London, after nineteen years of congresses held in the great capitals and chief cities of the world, and growing in numbers and power from year to year, the pacifists met for their seventeenth international gathering. They were welcomed by the King and Queen of England and by the British Cabinet with a cordiality and generosity of hospitality rarely extended in these days to any body of philanthropic workers. This memorable congress represented more than five hundred peace organizations and a great body of peace workers throughout the world.

The Uruguayan Senate has passed a bill authorizing a concession for the construction of a railroad from Colonia, port of Uruguay, across the republic of San Luis on the Brazilian frontier. American interests are concerned in the project, which is a part of the Pan-American Railroad development going on all over South America. This line, when completed, will connect with the Brazilian system, and in due course it will be possible to travel from Rio Janeiro to Valparaiso by rail, with the exception of the short ferriage between Colonia and Buenos Ayres.

Moorish troops have attacked the Spanish forces in Melilla, Morocco. The attempt of the Spanish government to despatch troops has met with opposition at home. The Liberal press is joining in the popular protest, alleging that the war is solely for the purpose of protecting private mining interests. The newspapers demand the convocation of the Cortes and a frank statement of the government's intention.

The Clemenceau Cabinet, after making a record for length of continuance in power, was last week overthrown by the tactlessness of Clemenceau in referring to the unpreparedness of France in the crisis with Germany in the Algeciras affair.

The postal authorities of Denmark and Japan have arranged for a parcels post with the United States, by which, after Aug. 1, parcels exchanged with them will be accepted up to eighty dollars in value and eleven pounds in weight.

Industrial and Commercial.

Prospects are good for a large blueberry crop in Washington county, which contains most of the land devoted to blueberry raising in Maine, about one hundred and fifty thousand acres being known as the "blueberry barrens." The largest of the canning factories has a daily capacity of seven hundred bushels, and the average annual output is 6,250 bushels of fresh fruit.

Owing to the friction that frequently occurs in Lynn, Mass., between labor and the shoe manufacturers, a hint has been dropped that that city may lose its chief industry. Labor conditions are so increasing the cost of production, and outside competition is so keen, that Lynn is losing much of its former shoe trade and the manufacturers' profits are decreasing.

Orders amounting to $13,000,000, for the electrification of the one hundred and forty miles of the Sacramento division of the Southern Pacific Railway, a project that has been under consideration for some time, will be placed as soon as authorized by E. H. Harriman.

The condition of the Erie Railroad Company has proved so satisfactory that the salaries of officers and employees which were reduced some time ago have been restored, the restoration to be in effect as of July 1.

More than sixteen hundred tons of Siberian eggs are exported annually, many of them finding their way to the London market.

Coke and anthracite pig iron production during the first half of the current year was eleven million tons.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE WEDNESDAY EVENING MEETING.

GEORGE SIJAW COOK.

ACCORDING to the "explanatory note" found in the Christian Science *Quarterly*, "The Bible and the Christian Science text-book are our only preachers." As is well known by those who are accustomed to attend our Sunday services, Lesson-Sermons prepared by a duly appointed committee, and made up of citations from the Bible and "Science and Health with Key to the Scriptures," are read at these services. It is provided in the Church Manual (Art. III., Sect. 6) that the Readers in our churches "shall make no remarks explanatory of the Lesson-Sermon at any time." The impersonal word of Truth contained in these Lesson-Sermons and read from the desk at our Sunday services, without personal explanation or interpretation, not only elucidates the teaching of Christian Science, but it heals the sick, reforms the sinner, and comforts the sorrowing.

The selections from the Bible and from Science and Health read—also without explanation—at our Wednesday evening meetings augment and reinforce the effect of the Sunday Lesson-Sermons. It should therefore be evident to all that there is no need and little excuse for personal preaching or teaching in our Wednesday evening meetings. These meetings are primarily for the inquirer who has the need and the desire to learn whether Christian Science heals sickness and sin. He is not at first so much concerned with methods as he is with results. Therefore he is entitled to and should receive from those who have experienced something of the healing power of Truth, an honest answer to the question, "Does Christian Science heal?" This answer should be straightforward, direct, concise, and should be couched in such terms as to make it easily understood by the "wayfaring man." For this reason it is obvious that any attempt on our part to preach, teach, or talk in technical terms at these meetings is not only out of place but is an imposition upon the "stranger" within our gates, who has come perhaps for the first time to learn what Christian Science does for those who are in need of relief. No one can question that a statement of benefits received, whether these are mental, moral, or physical, has a much greater effect upon those present than any attempted exposition of the teachings of Christian Science, although a brief statement as to the spiritual thought which came with the healing is often very helpful.

There may be those among us who are in need of teaching, but even so, they should be allowed the privilege of choosing their teacher. Let our testimonies therefore be brief. Let us confine ourselves to a recital of the benefits derived from the study and practice of Christian Science. Teaching may be more safely undertaken in the classroom by authorized teachers, and such explanation of Christian Science as may be deemed necessary can better be made in the home, at the lectures given by members of the official board of lectureship, and otherwise gained through the literature of our denomination, with which our Leader has so abundantly supplied us.

HEROES.

MATHER ALMON ABBOTT.

MRS. EDDY gave a pertinent truth fitting expression when she wrote, "There is too much animal courage in society and not sufficient moral courage" (Science and Health, p. 28). We are in the habit of associating the name hero with martial conflict. In our usual conception he is the man of war, one who in the face of mortal fear does some noble action—leads a forlorn hope perchance, saves a comrade from death, or wins a splendid victory. The world always bestows praise and honor upon physical courage and endurance. So satisfactory are and ever have been the rewards given by mortals to mere physical bravery, that a courageous action is made comparatively easy. In fact, it has been said by a soldier that it requires almost more courage to flee than to advance, so great is the fear of blame.

The praise of men and the desire to be thought well of by one's fellows are dear to every heart. The knowledge that such and such a deed will command a due meed of praise has ever been the chief incentive to courageous action. It was said in the South African war that so great was the desire on the part of the officers to win the Victoria cross that many brave men exposed their lives in running needless risks. Men will face death again and again, helped by the knowledge that their world will cry, "Well done!" And it is well that it should be so. Physical courage is a splendid quality, and shows a disregard for matter and mortal fear which is eminently praiseworthy. But what of moral courage? Does this spiritual bravery command the same meed of praise?

The action that is truly great the world of its day seldom applauds. The man who takes his stand daily—nay, hourly—for the cause of right, the world often maltreats and crucifies. No banners are waved for him. No trumpets sound. No honors are added to his name. Seldom is it that the moral hero attains recognition in his own age. Only after many years does the world realize what its real benefactors have done for it. Jesus said: "Woe unto you, scribes and Pharisees, hypocrites! because ye build the tombs of the prophets, and garnish the sepulchers of the righteous, and say, If we had been in the days of our fathers, we would not have been partakers with them in the blood of the prophets. Wherefore be ye witnesses unto yourselves, that ye are the children of them which killed the prophets."

As this was true in Jesus' time, so has it been in every age, and never more true than today. This in spite of the fact that in no age has moral heroism been expressed more abundantly. Today there lives in our midst one who has displayed a moral courage so sublime that history has few examples which can compare with it. Encouraged by their Leader's bravery, a host of men and women are gradually finding themselves strong enough to show a moral heroism in itself remarkable. There are few heroes who deserve more from their fellows than the faithful Christian Scientist. Absolutely convinced, from his study of the

Copyright, 1909, by Mary Baker Eddy.

Digitized by Google

Scriptures as interpreted by Science and Health, that he has found the truth of being, he takes his stand for the right. Unlike those of the physical hero, his conflicts are not over in an hour, not in a day, but every day, every moment he is daring for the right.

Facing with undaunted courage his enemies from without, there is also the attack from within, the misjudgment of those who come to be benefited. Christian Science cures sickness by getting at the cause of sickness; that is, by casting out sin, and the Christian Scientist knows that it is required of him to be brave enough to tell his patients of their sins, to face the anger and the resentment that so often follow such disclosures, for many who will not stop to listen, go away discomforted and let their ill-will find vent in words. Many will stay to listen, but will not at heart give up their wrong-doing. The practitioner knows that unless he can accomplish this end, failure will result; and if failure does result, the world holds up its hands in protest and the Christian Scientist is blamed. But the hardest trial of all is caused by those whom he has healed and comforted in spite of themselves, but who are offended perchance by some further demand upon their materiality.

Added to these difficulties there is to be faced the general misconception of this Science which the world persists in holding, though continually opposed by the absolute proof of works a thousandfold. The sermons that are preached by those who misunderstand, the books that are written by those who have an end to serve, the opposition of *materia medica*,—all these require no little patience and love from the Christian Scientist. Nothing but the power of omnipotent good, which proves the unreality of matter and gives the self-respect of a child of God, can sustain a Christian Scientist,—make him strong and glad to labor and to wait, with unfailing patience, the fulfilment of his hopes and the justification of his faith, and thus enable him to gain the final victory.

Speak, History, who are life's victors, roll back thy long annals and say—
Are they those whom the world called the victors, who won the success of a day?
The martyrs or Nero? The Spartans who fell at Thermopylæ's tryst
Or the Persians and Xerxes? His judges or Socrates? Pilate or Christ?

OVERCOMING THE FLESH.

REV. G. A. KRATZER.

AFTER we commence the study of Christian Science, and more or less until we have completely attained the final heavenly, spiritual estate, we are subject to a conflicting sense of things. Two opposing sets of testimony about various subjects of thought assert themselves in our consciousness,—one coming from the bodily senses, the other from the spiritual logic which is based on God as premise; and while this state of affairs continues in belief, we are constantly called on to decide what testimony we are going to believe, hold to, and declare. The testimony of spiritual sense is always harmonious, and if we hold to this, and stoutly maintain and declare it, we shall be able, sooner or later, to cast out and silence any opposing, inharmonious testimony of material sense, and this for the reason that the testimony of spiritual sense is true, while the testimony of material sense is false.

Our bodily senses at any given time may be asserting to us some kind of discord, and may be asserting that discord very lustily, and may be acting like a madman within our consciousness, but if we realize the truth of being,—that God made man, and continually makes him in His own image and likeness, that man is therefore spiritual, eternal, and perfect, now and always,—and if we keep on understanding, thinking, and asserting this truth, sooner or later the false and discordant material sense will be overcome and silenced. We can win out in this contest, because as soon as we begin to know and assert the truth it is no longer the human sense, but the tireless Christ-consciousness, God-with-us, which is declaring the truth.

The reward of thus attaining and maintaining the Christ-consciousness is health, strength, plenty, and a large degree of the present realized sense of eternal life. Is it not worth while, therefore, to learn clearly what the true spiritual sense is, then to hold it in consciousness, and persistently declare it, despite the assertions of material sense and the common opinion of men, until discordant sense is silenced? So doing, our delight will be in the law of the Lord, and in that law we shall be meditating day and night. And we shall be like the tree planted by the rivers of water, that bringeth forth its fruit in its season. Our leaf also will not wither, and whatsoever we do will prosper.

NO LACK.

KATHLEEN H. MC BAIN.

No word in Christian Science comes to me with greater force than does the word "Principle," for it brings to my consciousness the new understanding of God which the study of "Science and Health with Key to the Scriptures" has revealed,—the understanding of a God of whom the psalmist says, "Thou openest thine hand, and satisfiest the desire of every living thing." If the sick man knew of this God, would he travel the world over for health, try one kind of cure after another, look to hygiene, air, and exercise for his life—I say, if he knew that God is man's Life, and never can be separated from him; that Life includes health and harmony, and that these are his for eternity?

Again, would the thief steal that which belongs to another, in order to possess it for himself, if he knew the truth of man's being,—that all good is his for all eternity and his every need supplied from the inexhaustible eternal source? Would the slave of evil desire seek pleasure in the byways and hedges of self-indulgence, if he knew that Love is the law of man's being, that Love fills all space, surrounding and satisfying and glorifying man, and that resting in this assurance he will be satisfied? Would the slave of any form of sin or sickness seek happiness and health and satisfaction in the labyrinth of matter, if he knew that the blessings of Life, Truth, and Love were his from the hands of the ever-living Father-Mother God?

Mrs. Eddy says, "It is our ignorance of God, the divine Principle, which produces apparent discord, and the right understanding of Him restores harmony" (Science and Health, p. 390). Then let us tell our brother, be he sick or sinning, the good news that Life is his; that Truth is his; that Love is his, and can never be taken from him. The sick man and the sinner need to be educated to the truth about God—man's divine Principle. In the glory of this realization there will be no lack.

THE LESSON-SERMON.

SOPHIE F. STOLZ.

WE read in the "explanatory note" of our *Quarterly* that "the Bible and the Christian Science text-book are our only preachers," and the testimonial meetings and periodicals constantly reiterate that their correlative use in the Lesson-Sermon is the basis for demonstration in disproving error by proving good. As every Christian Scientist, notwithstanding age or experience, is only a student of this eternal Science, the same tools are given all; hence it is as imperative for the pupil in the Sunday School to study

Digitized by Google

the Lesson-Sermon as it is for the parent. It is, therefore, both the privilege and duty of the parent to assist the pupil and cooperate with the Sunday School teacher by constantly stimulating the child to earnest and intelligent study of this unique preaching.

It seems most obvious that when the committee takes up a given subject, its first step is to make a topical outline. This outline comprises six thoughts in sequence, of which the first may give the premise, or introduction, the second to fifth what may be called the argument, and the sixth the conclusion or result. The argument is presented in various forms, contrast through positive and negative standpoints being its usual procedure. The work of reducing each set of Bible citations to its simplest denomination, so as to perceive the correlation in Science and Health, requires practice and concentration. These Scriptural passages and Christian Science correlatives may be likened to a pair of scales, for however apparently unlike in variety and quantity, they prove to be accurately balanced in quality and value of thought. To secure the balance or reciprocal relation, however, is a sifting, weighing, analyzing process, a process mainly of elimination. It is the finding, in the Bible citations of each section, of the thought which is emphasized and brought out in the sections as a whole, and this is comparatively easy when the citations present merely a spiritual quality or mortal mind error, but in the case of a narrative or allegory it is more difficult, and we must train the children to deduce therefrom the basic truth or quality which it exemplifies, and so rid thought of the sense of personality around which the narrative is woven. Exchange of personality for Principle is the teacher's work in life, as it will be the pupil's, and it cannot be done too early or too well.

As he learns to exchange narrative and symbol for Principle, the pupil no longer has two bewildering, unrelated, remote incidents, but through adroit leading he grasps one great ever-present truth, which makes instant and practical appeal. The full interpretation and application of this truth is found in the readings from Science and Health. This is the key which unlocks the golden treasury of the Bible, and our Leader tells us that, minus its spiritual significance, "that compilation can do no more" to dissolve the materialistic thought "than can moonbeams to melt a river of ice" (Science and Health, p. 241). In the Christian Science text-book every Bible verse will find its correlative, its answer, its application for daily living.

In the search for the correlation of thought, the Sunday School teacher finds a great need for accuracy. Our pupils as a whole are not prepared to realize that absolute accuracy is no less possible than necessary. A pupil once confessed she had never appreciated the need for "hitting the nail on the head." We either solve a problem or fail in so doing, and we, parent and teachers, must not allow the pupil to be content with accepting any Bible truth, however beautiful, apart from that spiritual value which its scientific interpretation contains. Specific error can be destroyed only by specific truth, and the pupil will never demonstrate Christian Science until he learns to differentiate with scientific accuracy.

One handicap to this desired accuracy is the pupil's limited vocabulary. The language of Science and Health is the language of Spirit, the "new tongue" to all of us, and naturally not taught in the schools. Should the parent consecrate himself to the task of assisting his child to gain a clear and practical sense of each week's Lesson, he would thus reap both for himself and his child the rich harvest of truth's unfoldment.

If, as some one has said, "the complete understanding of the words of any ten pages of good English writing is a liberal education," surely a vocabulary gleaned from Science and Health would furnish an educational equipment liberal to prodigality. Of this there is a certainty, there can never be accuracy in thought until there is accuracy in defining the words that convey thought. the child from word . . separate thought, from thought to combination by clear correlation, and step by step (section to section) to the union of thoughts in a complete exposition,—this is great gain. That done, the gap between the Golden Text (the essence of the subject) and the Sermon will be bridged, for the Responsive Reading will not seem an extraneous Biblical selection, but rather a fitting preamble or stepping-stone to the Sermon, joining the parts into a perfect whole.

All parents realize that to the average child his educational experience is more of a burden than a pleasure, and all are likely to become so absorbed in their study, in view of the fact that examinations grade their standing, that their spiritual work is made last instead of first, relegated to odd moments and stray opportunities. If, therefore, the importance of the Sunday School work were put before them, if they were brought to an apprehension that examinations in this understanding of Spirit come hourly, that Sunday School work is daily work, the last would become first not only in program but in standing, for they would undoubtedly acquire such an understanding of Mind and its possibilities that numbers and signs would melt into basic law, and words into ideas. Until they attain this ability to grasp the Principle of being they are never educated, however much of material knowledge they may boast.

If "knowledge is power," the Science of thinking is the reflection of omnipotence. Christian Science offers a Principle and panacea for the problems of the business man and the housewife as well, to young and old in every field of life's activities, and it unfailingly affords a means for the pupil to solve his school problems not only in relation to teacher and fellow-pupil, but in the development of his own capacity to think, understand, remember. Let the Sunday School pupil acquire the habit of taking daily his mental tonic and developer, the Lesson-Sermon, before going to his other work, and he will surprise himself in his rapid and painless progress. By seeking "first the kingdom of God, and his righteousness," all other things will be "added unto" him.

IMITATIONS.

WALTER SHAW.

SINCE Christian Science has proved such a success as a great healing and reformatory movement, the world has been flooded with various imitations of it. These (like other counterfeits) bear more or less resemblance to the original, and while the adage may be true that "imitation is the sincerest form of flattery," it is nevertheless desirable to be alert to the distinction between the genuine and the spurious.

Christian Science claims no patent or monopoly in the realization of the great love that God has showered upon humanity. We remember our Master's rebuke to those disciples who, seeing another doing miracles in the name of the Christ, sought to stay him because he followed not with them. Yet there is also recorded the warning that Jesus uttered concerning those who desire to climb into the sheepfold by some other way. Our Leader foresaw that the time would arrive when people would desire the benefits of Christian Science, but demand a more material teaching. The subtlety of error in these imitations is, that they are generally projected upon those who are just striving to learn their way in the truth. The writer knows some in this stage to whom literature purporting to be "just as good as Christian Science, without leaving the church," is being constantly introduced. In our early struggles to acquire more understanding of the truth we are tempted to read anything and everything that seems to bear upon this absorbing subject. I well remember sending for copies of a

Digitized by Google

certain pamphlet, which I took to the friend who was helping me, delighted to show him how much Christian Science was being appreciated. I was surprised at the way the pamphlet was received, and it took me some time to realize that my purchase was really a parody upon the truth as taught in Science and Health.

What we all need, and what we need alone, is a true apprehension of genuine, absolute Christian Science, and nothing short of this can ultimately satisfy any wise student. The writers of these various books, pamphlets, tracts, etc., may be sincere, but as the ideas expressed therein originate in the writings of Mrs. Eddy and her teachings of Christian Science, it is to be deplored that so little credit is given to their true author. These Christian Science ideas are generally filtered down to accommodate sundry time-honored beliefs, and are sometimes direct misstatements of divine Science. When such are foisted upon the unwary, they lead to confusion of thought and to difficulties which retard progress. To advance in the understanding of this truth, the present-day student has all the help he or she needs in the Lesson-Sermons and the Christian Science periodicals, and we cannot afford to miss reading any of them, if we desire to progress. Few of us care to deprive ourselves of our usual meals, for the reason that we have not yet demonstrated the ability to go without our ordinary food. Much less should we endeavor to do without or curtail the supply of spiritual nourishment contained in the authorized Christian Science literature and which should be daily assimilated.

Careful and thorough study of Christian Science leaves little time (with the average person) for a perusal of spurious literature, and a regular course of true study will certainly quench any desire for its counterfeit. Those who realize the immense amount of work to be done in each individual consciousness before we can earn the Master's commendation, "Well done, good and faithful," cannot afford to turn aside for a moment from the struggle to apprehend the absolute truth of the Christian Science teaching. With the Bible and its Key, Science and Health, as our guide, there need be no mistaking of the way. Christ, Truth, leads us ever onward from the false to the true, from the unreal to the real, up toward the glory that shall finally be revealed to all those who truly love and serve God.

What is more eloquent than an impressive silence? When we sit in the midst of a great congregation, and all heads are bowed in one beautiful, reverent accord, do we not truly realize more of God's beneficent nearness? This is the moment of our salvation—our uplift into the realm of better thinking. At such moments one may feel the everlasting arms tighten about him with a solicitude that surpasses every earthly kinship. Truth's poetry and song pervade these inspiring moments, and to these we listen, though sometimes unconsciously, and are healed. Communion like this gives a loftier rhythm to our wordless worship, such worship as moves the poet's hand to write immortal verse, or the artist's brush to portray the coming of the Christ.—CASSIUS M. LOOMIS.

I can trace the erring senses,
As they follow day by day,
To the lack of Godlike thinking
Now that light has come, I pray
That my way shall henceforth blossom
Where the senses have held sway.

ELIZABETH MALLORY.

SELECTED ARTICLES.

[Frederick Dixon in *Bridgwater* (Somerset, Eng.) *Mercury*.]

Whether he is aware of it or not our critic flings overboard the whole teaching of the idealism of natural science as completely as the idealism of Christian Science. Materialism is the theory that matter is the only reality, and that mind is entirely dependent on it. Idealism, on the other hand, insists that matter is the subjective condition of mind. Now, if the teaching of idealism is true,—and some of the greatest thinkers in the world have been and are idealists,—it is obvious that all disease, organic, functional, or nervous, originates in the human mind, and that no system of medicine which ignores the mental cause and devotes itself to the subjective material effect has any claim to be regarded as science.

The idealism of Christian Science accepts the idealism of natural science as, relatively speaking, a true explanation of physical phenomena. But it insists that the human mind itself is only a negation, or counterfeit of the divine Mind, and consequently that, though the phenomena produced by it are, relatively speaking, true to the material sense, they are none the less, speaking absolutely, merely a misconception, or counterfeit, of the spiritual reality, and that, therefore, as Paul writes, "now we see through a glass, darkly; but then face to face," or, to reduce it to the less archaic phraseology of one of our greatest scholars, "now I see imperfectly in a mirror; then I shall see the reality."

In the Christian Science text-book, "Science and Health with Key to the Scriptures," Mrs. Eddy has explained the spiritual idealism of Christ Jesus, and shown how the miracles were the object-lessons of this teaching, and how, just in proportion as the spiritual understanding of his teaching is regained today, the miracle or object-lesson becomes again possible in accordance with his promise, "He that believeth on me, the works that I do shall he do also." Sickness, no less than sorrow and sin, she has explained, is the outcome of the human belief in the power and reality of evil: that is why Jesus said, "Whether is easier, to say, Thy sins be forgiven thee; or to say, Arise, and walk?" The one, as the other, must be conquered, therefore, by destroying the belief in the power and reality of evil. This can only be done by accepting Christ Jesus as the way, and by striving to walk in that way, or, as Paul put it, by endeavoring to "let this mind be in you, which was also in Christ Jesus."

Our critic is of the opinion that prayer would be wasted on the nerve cells of the spinal cord; in plain English, he is no believer in man's ability to accept the promises of Jesus. He is evidently of the opinion of another medical critic of Christian Science, that science is confined to secondary causes, primary or spiritual causation being in the realm of the unknowable. Naturally, if you conclude it is impossible for you to know anything about a thing, you are likely to remain in ignorance of it. The great discoveries of the world have not, however, been made on these lines, and the conclusion that a Christian Scientist must be wrong because he is proceeding on lines which his critic declines to investigate and chooses to dismiss as unknowable, is to take up a position which is as preeminently unscientific as it is absurd.

Again and again in the course of his ministry Christ Jesus was met with just such criticism as this. His reply, in effect, was that if his listeners could not understand his teaching, if their material sense revolted from the spiritual truths he was unfolding to them, then they must learn from his works; and the ability to imitate those works he persistently insisted must be regarded as the test of their faith, as the demonstration of their understanding. If this test of Christianity is to be accepted, our

Digitized by Google

critic's position might fairly be described as anything in the world except Christian. Christian Science does accept Jesus' test, and Christian Scientists are striving for that understanding of the truth which will enable them more and more every day so to heal the sick and the sinner, and so to bind up the broken-hearted, that they may fulfil yet another of his commands, viz., to let their light so shine before men that they may see their good works, and glorify their Father which is in heaven.

[Lindley Fogg in *Tiffin* (O.) *Tribune.*]

Instead of using suggestion, or the control of one human mind over another, the teaching and practice of Christian Science require that directly the opposite course be followed, and that by reliance upon divine power the sufferer be made free from every sort of evil suggestion and influence through which he has been made sick. This Science is based upon the infinite goodness and power of God; the understanding that He is both able and willing to heal and to save. This understanding gives a solid foundation for that faith which is sufficient for the removal of the mountains of sickness and sin, and Christian Scientists have been able to prove their faith by their works so positively and with such uniformity that there is no longer any room for doubt as to the power and availability of Christian Science for the healing of both functional and organic diseases. Many cases of organic disease which were diagnosed and pronounced incurable by reputable physicians, have been permanently cured through Christian Science.

The healing of the sick through spiritual power had an important place in the establishment and growth of the Christian religion nineteen hundred years ago. Jesus not only healed the sick, but he commanded his disciples to do so, and he said, "He that believeth on me, the works that I do shall he do also." He further said, "Think not that I am come to destroy the law, or the prophets: I am not come to destroy, but to fulfil." It is clear that the healing of the sick by the Master was according to law. That same law is in the world today, to be known and practised by his followers, and the command "to preach the gospel and to heal the sick" is a positive command.

[H. M. Mason in *Chattanooga* (Tenn.) *News.*]

The fact that many thousands of people are demonstrating Christian Science in the healing of all manner of diseases and sins sets at naught one's reckless assertion that "the philosophy and juggling of words which sets forth this science cannot be understood." It was charged that Christ Jesus cast out devils through Beelzebub, the prince of devils, and our critic's statement that "Christian Science is the devil's last weapon" is, practically, a paraphrased reiteration of this same accusation. Both calculations were based upon misunderstanding. Christ Jesus came not to "call the righteous, but sinners to repentance." Christian Science has come to provide refuge for earth's weary and heavy-laden throng, regardless of whether they be found within or without the churches.

Paul said: "The carnal mind is enmity against God; for it is not subject to the law of God, neither indeed can be. So then they that are in the flesh cannot please God." This teaching awakens one to the fact that the physical senses do not establish the truth about God and His creation. The Christ-Science does dethrone material sense, supplanting it with spiritual illumination. "Old things are passed away; behold, all things are become new." The change, however, comes about after the manner of Biblical admonition: "Be ye transformed by the renewing of your mind."

[James Sargent in *Rochester* (N. Y.) *Union and Advertiser.*]

I am neither a member nor an attendant of a Christian Science church, but I am an honest investigator of the truth of what it claims to teach. Having read the Rev. Mr. ———'s article, recently printed in one of your contemporaries, I am greatly surprised that any minister of the gospel of Christ would stoop to the use of such language. I also wish to say that Sunday evening, May 10, I heard this same gentleman's sermon on "Christian Science in the Light of the Scriptures." I attended the service expecting to hear some logical argument by which I, not being a very close student of the Bible, might decide as to whether Christian Science has a right to base its teachings on those of that book. I must say that I was disappointed. The sermon was very like the article already referred to.

The first sentence in Mrs. Eddy's interpretation of the Lord's Prayer (based, as I suppose, on Genesis i. 27), was dwelt upon at some length, and the thought of the motherhood of God was held up to ridicule. The clergyman did not, however, show why the female, or mother, cannot claim, according to that passage, to be the image of God as well as the male, or father. The passage distinctly says that "God created man in His own image, . . . male and female created he them." If there is no mother element in God, how can the woman, or mother, claim to be the image of God? The clergyman would allow that honor only to the male portion of God's creation. The Bible does not speak of a female deity in whose image woman could have been created, so I think Mrs. Eddy more logical than the clergyman, and I prefer to think of God as possessing the qualities of both fatherhood and motherhood, as the above passage states.

Again, he said that Christian Science ignores the flesh. He did not attempt to tell us what Jesus could have meant when he said: "The flesh profiteth nothing: the words that I speak unto you, they are spirit, and they are life." Nor did he explain Paul's saying, that in the flesh "dwelleth no good thing," and that with the flesh he serves the law of sin. He said nothing about the seventh chapter of Romans from the 15th to the 25th verses (which to me sound much like Mrs. Eddy's writings in Science and Health), where Paul says, "If then I do that which I would not, . . . it is no more I that do it, but sin that dwelleth in me." He did not tell us what Jesus or Paul could possibly have meant by speaking so discouragingly of the flesh which he claims to be an essential part of God's image. Nor did he attempt to explain what Paul meant when he said the mind of the flesh, or carnal mind, is "enmity against God"—a part of God's image at war with another part. That does not seem reasonable to me, and Mrs. Eddy's logic comes nearer to satisfying me than does the clergyman's ridicule. Paul says much more on the same line, in Romans viii., which I hope to hear explained.

The clergyman said if Jesus denied death he was an impostor. I recall two occasions upon which he did deny death. He said of the centurion's daughter, "She is not dead, but sleepeth. And they laughed him to scorn, knowing that she was dead." If she was not dead as the world calls death, then Jesus performed no miracle. He said about the same words regarding Lazarus, when talking with his disciples about him. He also said that "whosoever liveth and believeth in me shall never die." The gentleman, I suppose, claims that promise, yet argued to us that he expects to die just the same. As I understand Christian Science it does not claim that mortal bodies will not go through the change called death, but that to those who understand the words taught by Jesus, which he said are "spirit" and "life," that change will not be a thought of death but of perpetual life. If Jesus were here today, and should go to a dead person and say, as he did in the case of the child, that he "is not dead," the clergyman would call him, as did the Jews, a deceiver and an impostor.

Digitized by Google

There were other statements as to the practices of Christian Scientists which from my own experience with them I know to be wrong, but which would take too much space to refer to here. On the whole I think I am nearer being a Christian Scientist than I was before I heard the sermon, as I heard nothing to overthrow their reasoning.

[John Henry Keene in *Baltimore* (Md.) *Sun.*]

Futile striving of mere imagination in the empty air of unreal speculative dogmas and abstractions was not the method of the healing of sickness and sin by Jesus. What was the secret of Jesus? "The depth saith, It is not in me: and the sea saith, It is not with me. It cannot be gotten for gold, neither shall silver be weighed for the price thereof. It cannot be valued with the gold of Ophir, with the precious onyx, or the sapphire. The gold and the crystal cannot equal it: and the exchange of it shall not be for jewels of fine gold."

It seems to be the mission of Christian Science not only to unravel the mysterious secret of Jesus, but to demonstrate its true interpretation by marvelous instances of healing. By night and by day, on the land and on the sea, wherever there is a sky above and a world around man, every kind of disease, functional or chronic, is yielding to Christian Science treatment.

No intelligent inquirer into natural phenomena can disregard the wonders Christian Science has wrought by simply following the Master's instructions and example—preaching the gospel and healing the sick. Whatever higher criticism may destroy, it cannot deprive us of this priceless legacy of Jesus.

The axe of Christian Science is laid at the roots of doubtful disputation. For disputation Christian Science substitutes demonstration. The Master's mission was to the hearts and homes of men. He said, "I am not come to destroy, but to fulfil." "I am come that ye might have life, and that ye might have it more abundantly." The instructor of the human race declared throughout his ministry that man was spiritual; that man, made in the image of God, was an heir of God and he commanded his disciples to heal the sick and preach this gospel. What gospel? The gospel of the spirituality of man. The covenant of Jesus was that his disciples should do even greater works than their Master. There were to be no limitations of time or space. They should handle serpents without harm. "I have yet many things," said Jesus, "to say unto you, but ye cannot bear them now." That is to say, you have not progressed far enough into the spiritual depths of man to probe the secret.

[W. J. Bonnin in *Southport* (Eng.) *Guardian.*]

To the world today Christian Science is represented by an ever-increasing body of people,—ordinary intelligent people, living peaceful, sober, and industrious lives, interfering with no one; not thrusting their religion on others, but affirming that Christian Science has brought to them a measure of health and happiness they knew not before, and ever willing to help their brother man to acquire the practical knowledge of God that has had such a beneficent influence on their own lives. For Christian Science is teaching people to understand that God is not a capricious, anthropomorphic lawgiver, but that, as Mrs. Eddy has written on page 2 of Science and Health, "He is unchanging wisdom and Love," that His law is a perfect law, and that as we comprehend this truth and frankly open our consciousness to it, so do we realize that this perfect law operates always for good, for harmony and happiness, and never for sin or misery or disease.

THE LECTURES.

LEWISTON, IDAHO.

Clarence C. Eaton delivered a lecture on Christian Science yesterday afternoon [May 23] at the Temple Theater, under the auspices of First Church of Christ, Scientist. He was introduced by Storey Buck of this city, who said in part,—

All people in all ages of the world have had their religions. These religions have been of two classes,—those which have assured their adherents of comfort and happiness after the death of the mortal body, and those which have given assurances of happiness in the present life. Many religions have promised both. Of the latter seem to be the teachings of Christian Scientists. As the public generally understands, Christian Science lays special stress on the comfort which comes in the present life to those who understand and follow its teachings. If it be true that this religion teaches this, it is of great importance to the world. We can well afford to give attention to any teachings which promise to lessen or abolish physical suffering.—*Lewiston Tribune.*

LOGANSPORT, IND.

The Broadway Theater was filled to capacity Sunday afternoon [May 23] when Frank H. Leonard delivered an address on Christian Science. In introducing the speaker W. T. Giffe said in part—

Over forty years ago, in what was then a little town in Massachusetts, a woman, in the stress and extremity of a great physical affliction, discovered what she then believed and what she now knows to be the Principle by which Jesus healed sickness and disease. Reared and instructed in the tenets of an orthodox religion, and possessed of rare spiritual insight, there came into her faith on that occasion such a far-reaching efficacy and spiritual illumination that the bonds which bound her were severed, and she was made whole, even in the face of abandoned hope on the part of her physician and her friends.

Having been an earnest and faithful student of the Bible all her life, she was well fitted, after such a healing, to enter upon a special and seclusive study of the Scriptures for some three or four years. This embraced a deeper study of the spiritual creation, as narrated in the first chapter of Genesis and the first four verses of the second chapter; also the sayings of the prophets, and particularly a spiritual study of the teachings of Jesus as recorded and explained by the apostles in the chapters of the New Testament. In the course of this study and investigation she was led to the logical and irresistible conclusion that the real man, made in the image and likeness of God, is spiritual—not material; hence not mortal. So she demonstrated the truth of Paul's saying that "to be spiritually minded is life and peace."

The name of this good woman is Mary Baker Eddy, now of Boston, Mass. The religion which she has founded is based upon the spiritual interpretation of the Scriptures. Its plan and purpose is not only to reform the sinner, but to alleviate pain and suffering; thus following the oft repeated command of Jesus to preach the gospel and to heal the sick. Forty years ago, Mrs. Eddy was the only known Christian Scientist on earth. Today they are unnumbered. Christian Science has quietly and lovingly triumphed over all opposition, over all its foes, and has extended itself to the corners of the earth, until now untold thousands gladly lift the voice of gratitude and praise for the blessings it has brought to them in the way of improved health and increased happiness in their lives.

LAWTON, OKLA.

The Opera House was well filled at the lecture on Christian Science by Judge Septimus J. Hanna of Colorado Springs, May 23. The lecturer was introduced by Judge J. H. Franklin, who said in part,—

I have never attended a Christian Science service, nor listened to an exposition of their tenets from the rostrum, but I have great respect for a people who worship a God of love; who worship a God who is the giver of all good, and who repudiates and smites all sin—the only true and living God; a people who believe that the ways of Christ are the ways of righteousness, and that if all men followed in the footsteps of Jesus there would be no illness, no disease, no pestilence, no misery, no pain, no sin, no sorrow among the children of men.

I have great respect for a people who calmly and logically present to their fellow-men statements of their faith, but make no further effort at proselyting, leaving to each individual liberty of conscience and of action. I respect a people who persuade none to come to them, but who minister, in the name and in the spirit of Christ, and without discrimination, to all who approach in times of mental distress or bodily infirmity. I respect a people who worship God according to the dictates of their own conscience, and who neither molest nor make afraid those of other creeds and denominations. I respect a people who preach what they practise, and practise what they preach. I respect a people who build their own churches with their own money, and who never solicit subscriptions for this purpose, inside or outside, leaving every man free to measure his own purse and his own zeal.

Some of the brightest and best men and women in America are adherents of the Christian Science Cause; and one rarely meets a follower of this faith who is not cheery of aspect, whose eye does not sparkle with love of his fellow-men, whose face does not beam with the exuberance and pleasure of life, and whose presence is not a benediction; therefore I appear here this afternoon with a mind free from bigotry and prejudice and with a heart open to conviction; and I take great pleasure in introducing Judge Hanna to this audience.—*News-Republican.*

BROOKLYN, N. Y.

Bicknell Young lectured before a representative audience which filled the Brooklyn Academy of Music on the afternoon of May 23. The lecture was given under the auspices of First Church of Christ, Scientist. Its First Reader, Harvey M. Ferris, introduced the speaker, and among other things said,—

The people of this age are demanding, in every line of thought, something besides theory; there must be proofs to substantiate the claims of every subject under investigation. Experience has taught that the physical senses cannot point out the way to eternal life. In working out the problem of being, mankind is frequently confronted with these queries: Is the God we read about in the Bible no longer in existence? Are His laws no longer operative? Are omnipotence, omniscience, and omnipresence (as applied to Deity) mere theological expressions, or are we clinging to the shadow of a blind faith, instead of possessing the substance of understanding which actuated the demonstrations of those ancient worthies whose lives are recorded in the Bible? This Bible speaks of God as eternal and unchangeable, and declares that the greatest of all blessings is an understanding of Him and His laws.

Christian Science gives us this understanding, and we are able under its teachings to prove that God's kingdom, the kingdom of good, is on earth, even as it is in heaven. Jesus declared his teaching brought not peace, but a sword, and we realize that the Science of Christianity, exposing the falsity of so-called material laws, creates a degree of antagonism in the human mind; therefore it is misunderstood, misrepresented, and attacked, even as in the days of the great Teacher.—*Correspondence.*

QUINCY, ILL.

An audience, composed for the most part of Quincy people of intelligence and culture, gathered last evening [May 24] to listen to the scholarly address on the teachings of Christian Science by Prof. Hermann S. Hering. E. M. Botsford introduced the speaker, saying in part,—

Not many years ago any man who confessed to being a Christian Scientist was looked upon with a certain degree of disfavor by the world at large. Even the most charitable of outsiders was disposed to credit him with being engrossed in a religious fad which had no real logical warrant for its existence; a chaser after a philosophical phantom that could not be defended as rational or justified by any sort of reasonable argument. The testimonies of cases of healing from disease were not accepted as facts, but were doubted, disputed, and declared to be but delusions that could not be substantiated by sufficient evidence. Today Christian Science stands before the world as a positive power for good. The thousands of cases of healing are now absolutely authentic and undisputed. Conceding the general claim that by Christian Science the world has been benefited, the moral tone of communities uplifted, and innumerable individuals relieved of distress and disease when medical skill had failed, the critics now devote themselves to a discussion and denunciation of the philosophical fundamentals on which Christian Science is based. The churches find it necessary to adopt some of the ideas and methods of the Scientists along the line of health, while at the same time declaring their basic beliefs erroneous and untrue. To prove that this religion of optimism is absolutely scientific, to give logical, rational reasons for the faith that is in him, is the province of the lecturer with us this evening.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

A NEW BY-LAW.

ARTICLE XXIII.

TEACHERS' AND PRACTITIONERS' OFFICES.—SECT. 11. Teachers and practitioners of Christian Science shall not have their offices or rooms in the branch churches, in the reading-rooms, nor in rooms connected therewith.

"NONE GOOD BUT ONE."

CHRISTIAN SCIENCE teaches, as did Jesus, that "there is none good but one, that is, God;" and when students of Christian Science are not so taught they are defrauded of the pure teachings of Mrs. Eddy. That some students have been thus defrauded is shown by the following excerpts from a composite letter written by a representative number of students to their teacher, which letter has secured the commendation of this teacher. We quote as follows:—

"Dear teacher, your teaching has revealed to me that, to be a true Christian Scientist, is to so purify my own thought that I can be subject to the Head of the Body of God, as reflected by you. Gratitude is expressed only as we become instantaneous in our response to your mental touch. 'God spake, and it was done.'"

"May a purified life attest the endless gratitude I feel for the manifestation of the Christ you have given us, while, with Mary of old I cry, Rabboni—Teacher."

"In grateful acknowledgment of your example and teaching, we, as members of your body, desire to offer this evidence of our intelligent loyalty."

"Your unselfish life, fast approaching the perfect idea of Love, is to my hungry sense of Truth, 'the bread of heaven and the water of Life.' Eating this bread and drinking this water is to me eating the body of Christ, and drinking his blood."

"And you, our blessed teacher, as the manifestation of Truth. . . . Our hearts are filled with gratitude and awe as we see in you Christianity demonstrated."

"The voice of the Father-Mother God is ever speaking through you."

"Ever on upward wing, your flight in supernal order has been so far above all touch of the finite," etc., etc.

"Your teaching, demonstrated by us, your body, constitutes the true furnishing of the 'upper room,' at this paschal meal, in 'the dawn of a new light' (Science and Health, p. 35)—the appearing of the masculine and feminine of God's creating,—the spiritual idea, the perfect man."

"You are known to us, our beloved teacher, by words which make 'our hearts burn within us,' and we, your body, quickly and gratefully respond."

"We recognize the wealth of inspiration that you have imparted to us from the highest plane of consecration and discernment of Truth, the radiation of the Sun of Righteousness."

This is emphatically not Christian Science, and Christian Scientists will note in these quotations phrases for which they can find no warrant either in the Scriptures or in any of Mrs. Eddy's writings, phrases which are inexplicable to them from the standpoint of true Christian Science, and also expressions which, in the light of the Scriptural text we have quoted, no human being should address to another and no human being should receive.

A real Christian Scientist has no concept of God or Christ other than as the one infinite God and the one Christ of the Scriptures. A human individual is not God nor His Christ, and no mortal on earth today can be Christ. Christ is the true idea of the one and only God, therefore no mortal can be the idea of divine Principle.

Mrs. Eddy teaches nothing in private that is not set forth in her books, and thousands of her students will attest this. She claims to be nothing more than the Discoverer and Founder of Christian Science, and of herself she has written in the Preface to Science and Health (p. ix.), "To-day, though rejoicing in some progress, she still finds herself a willing disciple at the heavenly gate, waiting for the Mind of Christ." There is no uncertainty about Mrs. Eddy's teachings concerning personality, as will be seen from quotations from her published writings. We quote from "Miscellaneous Writings" as follows:—

"Christian Scientists should beware of unseen snares, and adhere to the divine Principle and rules for demonstration. They must guard against the deification of finite personality" (p. 307).

"He that by reason of human love or hatred or any other cause clings to my material personality, greatly errs, stops his own progress, and loses the path to health, happiness, and heaven" (p. 308).

"Christian Science is taught through its divine Principle, which is invisible to corporeal sense. A material human likeness is the antipode of man in the image and likeness of God. Hence, a finite person is not the model for a metaphysician. I earnestly advise all Christian Scientists to remove from observation or study the personal sense of any one, and not to dwell in thought upon their own or others' corporeality, either as good or evil" (p. 308).

"God's interpretation of Himself furnishes man with the only suitable or true idea of Him; and the divine definition of Deity differs essentially from the human" (p. 258).

Again we read, in Science and Health, "Mortals are not like immortals, created in God's own image" (p. 295).

"Earnestly seek the spiritual status of man, which is outside of all material selfhood" (p. 476).

"Man is the likeness of Spirit, but a material personality is not this likeness" (p. 544).

"In founding a pathological system of Christianity, the author has labored to expound divine Principle, and not to exalt personality" (p. 464).

It is time for these students and their teacher, and other students and other teachers, if there be any in the same belief, to awake from the mesmerism of which they are the victims, and, putting aside the mistaken views of personality which have intervened to obscure their clear understanding of the teachings of Christian Science, follow "the true Light, which lighteth every man that cometh into the world."

ARCHIBALD MCLELLAN.

DAILY BREAD.

IT is now very generally admitted by religious thinkers that the "daily bread" for which we ask in the Lord's Prayer means very much more than material food. There are, however, few who would maintain that spiritual food is even more necessary than material—that we cannot in any true sense live without it; but this is what Christian

Digitized by Google

Science insists upon, and the students of Christian Science find it to be an actual fact in their daily experience. Most people believe that they can pass a whole day—or even many days—without partaking of "the bread which cometh down from heaven" and which Christ Jesus said "giveth life unto the world," and this wrong belief is without doubt responsible for much suffering, as well as sin. To use Paul's words, "For this cause many are weak and sickly among you, and many sleep [the sleep of death]."

What sort of health would one expect to have if he went to work without any food, and perhaps continued without any throughout the day? Yet this food is of far less importance to us—even to our bodily health—than is the spiritual food which we should undoubtedly seek "first." It is not enough to say that we partook of the truth yesterday; we must have our "daily bread." Mortals are too apt to think that man's heavenly Father has not provided the needed supply, while the fact is that they forget to avail themselves of it. The Israelites were commanded to gather their manna each day, and this is an object-lesson for us, with almost infinite applications. The words of truth which we read yesterday should have a higher meaning for us today, hence a broader application to our needs.

The interpretation of some passage, of a commandment possibly, which we share with others, may indeed be spiritual bread to us, though such interpretations should never be crystallized into formulas, for thus they lose their real value. The Commandments and the Beatitudes, also the statements of our text-book, are infinite in their scope, and no exposition, however clear, can exhaust their meaning or possible application. In reality, "God is His own interpreter," and this is what our Leader has recognized in providing the Lesson-Sermons; while the expositions of the Scriptures by Sunday School teachers and writers in our periodicals do not so much aim to interpret as to clear away the misconceptions of the Word which have sprung up with man-made creeds and material opinions, also to stimulate the thought of pupils and readers to demonstrate the truths contained in God's Word. The practice of truth is the important consideration, and the dispelling of the mists of false belief as to God, man, and law is of vital importance to all mankind, in that it makes intelligent practice possible.

So many make the mistake of looking to God, who is Spirit, for material things, and then wonder why there is no response to their prayers. Respecting this Mrs. Eddy says, "God gives you His spiritual ideas, and in turn, they give you daily supplies. Never ask for tomorrow: . . . if you wait, never doubting, you will have all you need every moment" (Miscellaneous Writings, p. 307). This is very significant—"all you need," including the light for each hour, and the "hidden manna" promised of old by the Spirit "to him that overcometh." Daily bread implies that trust in divine Love which keeps us close to our Father-Mother God; more, it means absolute security and certainty at every step of the way. Thousands have been led into the kingdom through our revered Leader's opening words in the Preface of Science and Health, which words impel thought to a recognition that "today is big with blessings."

ANNIE M. KNOTT.

NOTICE.

CORRESPONDENTS who have sent orders for the Hymnal to the Publishing Society during the past month or two are informed that there has been delay in securing permission to use some copyrighted hymns, and it is necessary to await the completion of arrangements before issuing any Hymnals. To avoid inquiry and correspondence, it may be stated that delivery will be made as soon as it is practicable.

LETTERS TO OUR LEADER.

New York, N. Y., July 11, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Teacher and Friend:—I want to thank you now outwardly, as I did ten years ago silently, for your article "A Correction," which was reprinted several weeks since in the *Sentinel*. I am grateful because of the good it has done in reminding me that Science requires thought to be brought down to an orderly and practical basis, and that working with abstractions and overlooking their correlatives destroys the law instead of fulfilling it. The scope of this idea, I believe, is far reaching, and the practical good your article has accomplished is inestimable.

Any one who has lived with you knows, as I do, your absolute and unqualified abhorrence of all hypocrisy which would cover over or excuse evil in any guise, your stern and severe denunciation of such practice, and your patient, loving, and long-suffering labors to open the blind eyes of such students to the imperative need of knowing the true meaning of "watching," through understanding that one must first be awake to his danger before he can realize its harmlessness and unreality. I shall be eternally grateful for this teaching which I have received. The future unity and stability of our Cause undoubtedly depends upon the correct handling of the false claim of sin, therefore I rejoice that your article has struck home, and has separated the chaff from the wheat.

I am daily striving to perfect my thought in the fulfilment of the law, and to help others so to do. I am kept exceedingly busy by the labors in behalf of this true Cause. My only ambition is to accomplish quick and better healing on the right basis, and I am learning to love more and more this supreme and all-inclusive ministry.

With deep and lasting gratitude, in which mother earnestly joins, Yours faithfully,

JOHN C. LATHROP.

Pittsburg, Pa., June 23, 1909.

Dear Leader:—My heart turns to you so often in gratitude for all you have done for me and for humanity, that I feel I must write a few words to tell you that through the study of your writings I love my Bible so much. I am more grateful to you than I can possibly express, and I want to be good; I want to "know the truth" more than I want anything else in this world.

Always faithfully yours,

FLORENCE COE DILWORTH.

Medford, Mass., July 4, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—The deep significance of this Independence Day brings to my thought, more forcibly than ever before, that independence obtained through your loving selflessness and loyalty to Principle, wherein I now rejoice, for as Jesus said, "Ye shall know the truth, and the truth shall make you free." More than five years ago, on account of prejudice through ignorance, I bitterly denounced Christian Science and its Discoverer. Listening one day to a friend's account of his healing,—mental, moral, and physical,—I was led to investigate Christian Science, and now I say, "Whereas I was blind, now I see." With the help of a faithful practitioner, and the wise counsel of a dear teacher, I have been led step by step, as St. Paul says, to "stand fast therefore in the liberty wherewith Christ hath made us free." This freedom has given me the joyous privilege of reflecting to others that "peace of God, which passeth all understanding." I count, as one of my greatest blessings, the joy of proving, with our two

Digitized by Google

young sons, the truth of the Bible as revealed to us through our text-book, "Science and Health with Key to the Scriptures."

May my life express so much gratitude to you, and to our Cause, for this understanding of the Bible, that others, as Jesus said, "may see your good works, and glorify your Father which is in heaven."

Your student's student,
EVA M. B. LOVELAND.

Memphis, Tenn., June 16, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—I cannot refrain from expressing to you my heartfelt love and gratitude for this added manifestation of wisdom and unselfed love, in pointing us to divine Principle instead of personality in the words of your message of June 7. You have shown us the "way of wisdom," and we are watching for every indication to obedience. We love you more and more for your wonderful example of humility, patience, and true Christliness. God bless you.

Loyally and lovingly,
EDWARD F. STAPLETON.

Wolfboro, N. H., June 25, 1909.

Dear Mrs. Eddy:—My thought is ever turning to you in deep gratitude for "the word in season." The recent word relative to class instruction met a great need with us here, as elsewhere. Truly God is good and greatly to be praised for all His loving-kindness and tender mercy to the children of men. Working, watching, and waiting for the greater realization of His kingdom on earth as in heaven, as revealed and demonstrated in Christian Science, I am lovingly and faithfully yours,

MRS. FRANCES A. FOX.

Chicago, Ill., June 29, 1909.

Dear Mrs. Eddy:—Your word of "correction," originally written in 1890 and republished in the *Sentinel* of June 26, will be helpful not only to the younger students, but to those who are older in the practice of Christian Science. It will help us all to avoid the too prevalent tendency to feed babes on "strong meat," and will remind us that it is better to give them first the "sincere milk of the word."

With increasing gratitude for and appreciation of your wise and loving leadership, I am

Very truly yours,
GEORGE SHAW COOK.

Covington, Ky., July 6, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—It is no small amount of gratitude to you that prompts me individually to acknowledge your worth. Your interpretation of Christ's teachings is indeed the Utopia for which I have been seeking for the past few years. In theology, as taught by our orthodox schools, I was unable to get an insight of the truth, so as to make it practical. I was for a limited time able to realize myself as God's child, but in trying to reason up to my realization I would lose it in the materiality of theology.

To be brief, I may say that I came to the acceptance of the "truth" through investigation, followed by demonstration within just a few weeks. The next thing to be considered was my pulpit work. Through my adherence to the teaching of Truth, so far as I then understood it, the pulpit work was soon a thing of the past in my experience. With a yearning to obey the Master's command, as given at the conclusion of the Gospel according to Mark, I immediately gave my time to the perusal of your monumental work, Science and Health. Without class instruction, I went into a field where Christian Science was scarcely known, and had some beautiful proofs of the power of Truth to loose those in bondage.

I wish to mention that your notice, or statement, of some weeks ago, regarding the importance of class instruction, came at a much needed time in my career, in that it relieved me of a somewhat conceited opinion that I did not need instruction, aside from Science and Health, with Truth to guide me. Since then I have had class instruction, for which I am truly grateful. I now feel that I am in the true ministry, and allied with the one Cause through which all blessings come to mankind,—the ministry of Truth.

With love and gratitude to you, as well as to the Giver of every good and perfect gift, I am

Your student,
WILLIAM H. ECTON.

San Rafael, Cal., June 14, 1909.

Dear Mrs. Eddy:—At the close of my term as Second Reader, some weeks ago, my heart went out to you for giving to women throughout the world that great privilege of reading the Word of God, and your loving interpretation of it, to a weary, sinful, and sick humanity. Five years ago, through the last illness of my husband, I was divinely led to our little branch church here, and the refuge, the comfort, the kind sympathy I found among its members, fills me with gratitude to the one who has made these things possible,—the one whom we all so tenderly cherish in loving thought. And now the great blessing of class instruction with one of your devoted students has been mine, and it seems to me my desires can never again drop to a merely material standpoint.

The "everlasting arms" of Love are surely around and about you, and we may share in this divine protection as we follow and practise your inspired teaching. Such a mighty achievement as yours, dear Leader, is almost too sublime in its grandeur for us to comprehend, yet I believe that these simple thoughts of love and appreciation which we are constantly sending to you must smooth your pathway somewhat and glorify your labors.

Faithfully yours,
NELLIE PAULL CARROLL.

Baltimore, Md., July 11, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Our Lesson for today, communion Sunday, has been such a great help to me that I cannot refrain longer from sending a few words in loving gratitude to you for your priceless gift to mankind in Christian Science. It is a great joy to know that while we are having our spiritual feast here in our own city, the other Christian Science churches and societies the world over are also sharing in the same blessed feast which your loving and ceaseless labors for mankind have made possible for us.

Words can in no measure express my gratitude to you for all the great blessings I have received in Christian Science, but your words in Science and Health, and in your other writings, are pointing out the "living Christ" to me daily, and I hope I may prove my real gratitude to you by a higher and more consecrated life in Christian Science.

Lovingly yours,
WALTER S. CROSS.

AMONG THE CHURCHES.

HORNELL, N. Y.

It will interest the Field to know that First Church of Christ, Scientist, has purchased a residence property on one of the best streets of the city, and remodeled and tastefully fitted up the lower part to meet the requirements of an audience and reading-room. We held our first service there on Sunday, April 25.—*Correspondence.*

SALINA, KAN.

First Church of Christ, Scientist, held its first service Sunday morning [June 27] at the recently purchased church building, corner of Eighth and Mulberry. The interior of the building has undergone a thorough renovation and presents a most attractive appearance, and Sunday was a happy day for the members.

The church, though quite roomy, was filled to its capacity. It is pleasant, well ventilated, and the light is excellent. There is besides the main room a study and Sunday School room, connected by folding doors. A number of Scientists from neighboring towns were present.

Salina Journal.

BILOXI, MISS.

It is safe to assert that no prettier Christian Science chapel adorns the state of Mississippi than the one recently built by the Biloxi Christian Science Society. The chapel is a bungalow-style building, painted a soft green, with mission fittings inside. It is located at the corner of Howard and Seal avenues, on a large lot purchased by the society. The spot is an ideal one, and the chapel snuggled among green grasses and majestic oaks looks like a picture of fairyland. The society has reserved space on the lot for the erection of a church, which, however, will not be undertaken until some future date.

Biloxi Daily Herald.

CAMDEN, ME.

First Church of Christ, Scientist, held its opening service in the church edifice recently purchased by them of the Universalist society of Camden, at eleven o'clock Sunday morning, July 11. This service, we understand, differed in no wise from the usual Sunday morning service of this church. Passers by note with many expressions of approval the changed appearance of the church building, as the Scientists have thoroughly repaired it, inside and out. The Scientists are certainly to be congratulated upon having such a pretty and comfortable church home. The reading-room maintained by this church will for the present be located in this church edifice.

Camden Herald.

WINFIELD, KAN.

The new cottage chapel of First Church of Christ, Scientist, of Winfield, was formally opened Sunday [June 6]. There was a large attendance at the services, which were held at eleven o'clock and at half past three. At both services the regular Lesson-Sermon was read, with the addition of the following brief history of the church, which was prepared by one of the members:—

"So far as is known, the first seeds of Christian Science in Winfield were sown by a loyal student of Mrs. Mary Baker Eddy over twenty years ago. Some healing work resulted at the time, but no organization was effected. Some years afterward a few Scientists began to meet at the home of one and another of their number, for the purpose of studying the Lesson-Sermons. This was kept up for a time, until on July 5, 1899, six Scientists, five of whom are now members of this church, organized a Christian Science society and made arrangements for furnishing and maintaining a reading-room. On the following Wednesday evening the first public service of the society was held in a little room in the Hudson Building on East Ninth avenue, ten persons being present. Since then Sunday morning and Wednesday evening services have been continued to the present time. In November, 1901, the society was disbanded, First Church of Christ, Scientist, was organized, and a charter obtained from the state.

"The history of this church is one of struggles and triumphs, apparently slow yet steady growth, but through it all there has been a persistent effort to proclaim the truth by precept and example. Three times our quarters were enlarged to accommodate the growing audience, until the entire second floor of the Hudson Building was utilized. A little more than two years ago the land on which this church stands was purchased, but not until April last was ground broken and the structure begun. The building as it now stands represents the loving devotion of a united people to a great Cause. To all who in any way have assisted in the work, a glad tribute of appreciation is hereby tendered. While loving gratitude is felt toward all connected with this undertaking, we know that nothing could have been accomplished without the application of the healing power of Truth as contained in the Bible and illumined and opened to our understanding in "Science and Health with Key to the Scriptures" by Mrs. Eddy. Let us not lose sight of the truth voiced by the psalmist: 'Except the Lord build the house, they labor in vain that build it: except the Lord keep the city, the watchman waketh but in vain.' "—*Winfield Courier.*

CRANFORD, N. J.

The dedication of First Church of Christ, Scientist, of Cranford, N. J. [June 27], is now a matter of history, and Cranford has witnessed a remarkable and impressive service—simple, yet of profound significance. Mrs. See, one of the pioneers of Christian Science in Cranford, gave a brief history of the church.

"We have met here today to dedicate this church to God—in whom 'we live, and move, and have our being;' the God who is Love; 'who forgiveth all thine iniquities; who healeth all thy diseases.' Christ Jesus taught and demonstrated the one God. When asked which was the greatest commandment, he said, 'Hear, O Israel; the Lord our God is one Lord.' Our beloved Leader, Mary Baker Eddy, in the Christian Science text-book, 'Science and Health with Key to the Scriptures,' has taught us how to love God supremely, and our neighbor as ourselves—how to make God an ever-present help in time of trouble. . . .

"We here dedicate ourselves to the great work still before us, of healing the sick, comforting the sorrowing, reforming the sinner. It is ours to bind up the broken-hearted, to proclaim liberty to the captives, and the opening of the prison to them that are bound; to comfort all that mourn; to give unto them beauty for ashes, the oil of joy for mourning, the garment of praise for the spirit of heaviness; that we may bring into universal consciousness practical, operative Christian Science."

Cranford Chronicle.

What is it to forgive? To forgive is to be to the offender as if the offense had not been; it is to love—differently, perhaps, but as much; to trust less, perhaps,—one's first trust is sometimes misplaced,—but to pity more; to understand, and so forgive.

UNA SILBERAD in "The Test," *Harper's Magazine.*

TESTIMONIES OF HEALING.

It is eight years since it was proved to me in Christian Science that there is no power apart from God, and I feel that no one has more to be thankful for than I have. I met with a bad accident by falling down stairs, breaking my ankle, and my foot was also very badly hurt. Our home doctor treated it with everything he thought would do any good, and finally he told me it never would be well so I could have the use of it. I went to Canton, Ill., and saw one of the best doctors there. When he told me the same as my home doctor, I was very much discouraged, so I started for home.

On the way I told my husband we would stop at the minister's, as the thought came to me that if he would pray with me and for me it might help me. We went there, but I did not see him. Then we came home, but the thought stayed with me that there was a greater power than medicine. I prayed that I might be led in the right way, and in a few days my daughter and I went to see a lady, an old acquaintance whom we had not met with for a long time. When we went in I was surprised to see her looking so well, and asked her what kind of medicine she had been taking. She told me that she had been healed through Christian Science, and at once I began to see a bit of light, for I remembered the thought that I had clung to so long. I saw it was the healing power of Christ, and I said to her, "Can't you help me?" She smiled and said, "I am not good enough, but I will give you some literature to read and when I see you again you will not have to use that crutch and cane."

I went home, and in two weeks my ankle was healed by reading the Christian Science *Journals*, she had given me, as the testimonies which I read showed me how to rely on God in the true way, which I had not known before. My husband and daughter immediately took up the study of Science and Health with me. We have had many wonderful demonstrations which time and space will not permit me to relate, but I wish to say that since coming into Christian Science I have enjoyed better health than I did for thirty-five years previous, and for the past eight years I have not used a drop of medicine or an application of any kind, relying wholly on divine Principle.

Words cannot express my gratitude to God, and to Mrs. Eddy, for the blessings I have received.

MRS. ANNA MCBRIDE, Monmouth, Ill.

In Psalms we read: "He sent his word, and healed them, and delivered them from their destructions." My heart overflows with gratitude for the healing power of Truth and Love, as set forth in Christian Science. It is a little over five years since I found this blessed word, as revealed to us through our dear Leader, Mrs. Eddy, and in that time it has healed me of many diseases and has delivered me from many forms of destruction. I had been under the care of several different physicians for nearly fifteen years, and found very little relief from my physical suffering. I was also sent South for further relief, but found very little benefit there. After spending one winter in El Paso, Tex., I returned home the following spring, and soon my suffering was as great as ever. When a friend asked me to try Christian Science, I made up my mind that I would, as there seemed to be nothing else left for me to try. I did so with very little faith, but I was completely healed in less than a week of a so-called incurable organic disease, also chronic stomach disorder of many years' standing, and have never had a return of either since that time. The greatest blessing to me, however, is that I am learning what God is and how to avail myself of His goodness every day.

Our little one, three years of age, has never known any other remedy than Truth and Love, and can demonstrate the healing for herself. I feel that it was her own understanding of divine Love which saved her life while visiting in the country a few weeks ago. She and a little cousin were playing in the yard, when the cousin came running to the house, screaming that our little one was in the sheep-pen and that one of the sheep had thrown her down twice before she, the little cousin, gave the alarm. The sheep-pen was quite a distance from the house, and my feeling while running to her rescue may not well be imagined. The sight that met my gaze was dreadful to contemplate, for I saw the ram seemingly beating the life out of her. I could see no way to reach her but to climb a high barb-wire fence, and how I got over it I do not know, but I did it without a scratch. I gathered her up in my arms immediately, and while I had seen the sheep strike her in the head, I could see no hurt, although I had no time to think. While I was carrying her to the house, the little one declared, "God is All, and I can't be hurt." She was perfectly conscious all the time, which to me was marvelous.

There was great confusion in the house, and as I myself was almost overcome with fright, I felt that we must be alone, so I carried the child out to a lawn-swing quite a distance from the house, saying as we went, "We will go out here, where we can be alone with God;" and she said, "God is in the house, too, mamma." While she seemed dazed from the blow she had received in the head, and very weak and faint, she repeated the Lord's Prayer with me and declared "God is the only power." She said she knew she would be all right in the morning, and by bedtime she was indeed all right and ate some food before retiring. With the exception of bruises on her head and neck and one or two on her body, she was unharmed.

I spent most of that night in prayer and thanksgiving to our God, who was proven to be a very present help in time of trouble. And I also thank our dear Leader, who has made it possible for me to know something of this God.

BARBARA E. KRUSE, Indianapolis, Ind.

It is now over three years since I first heard of Christian Science, and during that time I have had many very wonderful proofs of the power of Truth to cast out error. I had a great desire for liquor and tobacco, and thought I could not get along without them, but after two months' reading of Science and Health all desire for them disappeared. I had also been addicted to profane language, and this, too, has disappeared. I take great comfort in reading the Bible and "Science and Health with Key to the Scriptures," and I cling firmly to the truth, knowing that more light will be given. Words fail to express my gratitude to the godly woman who was able to do so much for me, and for all mankind, through Christian Science.—MAX WEISS, Seattle, Wash.

I wish to tell of a demonstration made for me by my mother. When I was four years of age, I jumped on a broken lamp-chimney, making a deep cut, over two inches in length, in the instep of my foot. It was a long time before I could wear my shoe, and at times, when walking a long distance, I would suffer great pain. All this happened before my parents came into Christian Science, but about four years ago, when this place in my foot began to give me pain again, I told my mother about it, and asked her to treat me. She did so, and in a very short time a growth began to make its appearance on the old scar. A few mornings later, as I was walking across the room, I seemed to feel something cutting my foot. I took a needle and opened the outside skin, and could feel something solid against the point of the needle. My husband being at home I called him, and he opened the place and removed

Digitized by Google

a curved piece of glass nearly half an inch long, which had been in my foot for sixteen years. It seemed as if the foot had healed just as fast as the glass had cut its way out, for the next morning after this took place it was hard to tell where the wound was.

Many other things have been overcome in our home—smallpox, broken bones, fevers, etc., through the understanding of Christian Science as given to us by our dear Leader, Mrs. Eddy.

MRS. ANNA M. YOUNG, Caldwell, Kan.

[Translated from the German.]

I cannot express in words all that Christian Science has done for me, and all the blessings which I have received and am always receiving. I should, however, like to tell with a grateful heart of the physical healing which I myself have experienced. From childhood I had been weak and sickly, and could only go through the second class at school, as further attendance would, according to the physician's statement, affect my health. In the course of years a chronic catarrhal affection of the throat and stomach was added; I also had several attacks of lung trouble. Besides all this I suffered at times from extreme nervousness and heart disease. The physician in attendance, who had also treated my late father, as well as other physicians whom I had consulted at watering-places, had given me only temporary relief, the troubles always appearing again and more severe than before. When I lost my father five years ago, I was broken down physically and mentally, as I had nursed him alone for ten years and he had been sick unto death several times.

While in this condition I heard of Christian Science and asked for treatment, and my health improved after about two months, so that I was able to attend a commercial school, which I had before been unable to do, as I was considered too weak to attend to any branch of industry. I was freed from all these troubles through Christian Science, and have learned that God heals all our diseases. I am perfectly well now, and can attend fully to my employment as a telephone operator, which is rather strenuous work, and I am contented and happy. With regard to my eyes Christian Science has proved a great blessing. I was said to have been born with weak eyes and short-sightedness, so that I had to wear glasses from childhood and had to submit to an operation on both eyes. Several noted specialists whom I consulted had told me that the short-sightedness would increase as I grew older. After I had Christian Science treatment my eyes became better, so that I do not wear glasses any more; I read, write, and do any kind of work without using them and have no trouble whatever with my eyes.

For all that Christian Science has brought to me, and above all for the spiritual uplifting, for the right thinking which I have learned, I am thankful from the depths of my heart; and next to God I am grateful to our revered Leader, Mrs. Eddy, for her wonderful work, our text-book, "Science and Health with Key to the Scriptures." Through the study of this book, which revealed to me the spiritual meaning of the Bible, I have learned to know God as ever-present, all-powerful Love, and that we abide safely in this Love. When I began to read Science and Health I knew but little English, and it seemed difficult in the beginning to read this book; but it soon became clear to me that man reflects divine intelligence, and with the help of a few English lessons I could soon read and study in Science and Health. Now this book is my constant companion and I am more and more absorbed in the wonderful truth which it contains. Every day I understand more of this truth, also what Mrs. Eddy has done and is doing for humanity; and with this understanding my gratitude and my love toward her increase.

AUGUSTE WEINERT, Berlin, Germany.

It is three years since a dear friend first spoke to me of Christian Science, and during that time I have been healed of numerous ills and feel that I would be very ungrateful if I did not acknowledge the many blessings I have received. I have been healed of an abnormal growth, said to be of a very serious character and that nothing but an operation would remove. I have also been healed of rheumatism in the acute stage, nervous and bowel disorders of years' standing, and catarrhal trouble; my hair, which was coming out, has been restored, I have gained in weight, and in fact have been helped in every respect.

Christian Science has done so much for me, that I feel I can never be grateful enough, and I hope this testimony will be the means of helping others who are still under the laws of *materia medica*. I am indeed thankful to God, to the great Wayshower, and to our dear Leader, who has been the means of bringing us this healing truth. I was a trained nurse, and during my ten years of nursing can never remember of being well a single day. Now I am free and happy, for I have an understanding of God, and know that I do not have to be ill and suffer. I am leaving *materia medica*, and hope to take up active work in Christian Science.—MARY E. BIBBER BALL, Des Moines, Ia.

I began to study Christian Science about two years ago, and I am very thankful for all the good which the constant study of the Bible and of Mrs. Eddy's books has brought to me. I was instantaneously healed of a very troublesome chronic affection of the stomach, which had grown worse and worse. The healing came by reading the 91st Psalm. I then saw the nothingness of matter, and I knew that my illness was not due to a wrong condition of the body, but solely to fear. I am very glad to be healthy and strong, but words cannot express my gratitude for the calm, the peace and harmony which come to me by the daily study of the Bible and Science and Health. For all the good that has come to me, I thank God, and our Leader, Mrs. Eddy.—MARIE DIEST, Hilversum, Holland.

I feel that I should be guilty of ingratitude, if I waited longer to give my testimony to the benefits received through Christian Science. Seven years ago, while sitting in the office of one of the best oculists of Los Angeles, who had told me there was no cure for an affection of the eyes except an operation, and feeling that I could not submit to this, I saw on a window across the street the words "Christian Science Reading-Room," and I thought, Why not try Christian Science? I knew nothing of its teaching, but I went over and, after explaining to the librarian why I had come, asked the address of a practitioner. The result was that in a few days I called on one, and in three weeks' treatment I was healed of the eye trouble, also of approaching paralysis. Since that time I have used no material remedies.

For the physical healing I am deeply grateful, but this fades into insignificance compared with the spiritual illumination which accompanied it. For years I had been seeking God in various ways, and in my first conversation with the practitioner I knew that I had found the Christ. My heart goes out in love and thankfulness to our beloved Leader, for bringing to us this glorious truth, and to all who have so lovingly helped me. I wish also to express my gratitude for our periodicals; many times, when striving to solve some problem, an article in one of them has helped me greatly.—MRS. CARRIE E. RESSLER, Monrovia, Cal.

It is five years since we first became interested in Christian Science, and in that time we have had many and varied proofs of the healing power of Truth. An experience I had with a burn proved to me that if we turn at

Digitized by Google

once to God, our demonstrations are instantaneous. I had placed a vessel containing a quart of water over a gas-jet in my dressing-room, and while waiting for the water to heat I took up Science and Health, our text-book by Mrs. Eddy, and read for some time. My attention was attracted by the sound of the boiling water, and I reached up to remove the same by taking hold of the handle, which turned, spilling the contents over my exposed shoulder and breast. Just for an instant the pain seemed unbearable, but I immediately declared the truth, and before I had half finished the scientific statement of being (Science and Health, p. 468), all pain had ceased and I was filled with such a sense of love and gratitude as words fail to express. The skin was very red and shriveled, but two hours later all evidence of the experience had disappeared.

I am most grateful to our beloved Leader, and to all those who have helped me to gain an understanding of the truth revealed through Christian Science.

LILLIE S. PAXTON, New York, N. Y.

It was not for the purpose of receiving the physical healing that I decided to investigate the subject of Christian Science, for from early childhood I had been well and strong. The help some of my friends and acquaintances gained through the understanding of this wonderful truth, as given to us in Science and Health by Mrs. Eddy, came to my notice, compelled attention, and thus led to investigation. I have enjoyed the study, and am very much helped by reading the articles in the *Sentinel* and *Journal*. In the study of this Science the Scriptures are magnified, and the truths therein are made applicable to all the problems of daily life, however difficult or exacting they may seem to be.

My gratitude to Mrs. Eddy, the worthy Discoverer and Founder of Christian Science, for her loving work in behalf of suffering humanity, is greater than I can express.

W. L. ROWLAND, Toledo, O.

For the blessings of Christian Science I feel that, like the prophet Isaiah, "I will mention the lovingkindnesses of the Lord, and the praises of the Lord, according to all that the Lord hath bestowed on us." Mere words cannot express my gratitude for Christian Science, but to live the life as taught by Jesus is the highest proof of discipleship. I would like to tell of the recent healing of my father, hoping his experience will be helpful to others of his age. He had not been strong for some time, and was suffering from heart and kidney disease, and belief in the law of old age, being seventy-six years old. This last sickness caused a great deal of fear, and after he had been confined to his bed about three weeks, the doctors said he was failing rapidly, so my mother sent for me.

On receiving the word of my father's serious condition I took the limited train that night from Reno, Nev., to Denver, Col. Not being able to read while *en route*, I kept on realizing the truth,—that God is man's Life, and how impossible it is for death to be in Life. On arriving in Denver I went directly to my father's home, and was met by mother, who took me to see him. I had to make a great effort to keep my thought fixed on God's perfect child, for my father had failed considerably since I last saw him; but he seemed to grow stronger from that time, and the next day he was still better. Within a week he was out sprinkling the lawn and flowers, and all of us rejoiced in knowing the truth that frees, for my young sister and mother recognized the benefits received. None of them had ever tried Christian Science before, but they were receptive, and my sister is beginning to understand that the truth of being has changed her whole life. Since my return to my home, my father writes me that he is growing younger daily and is reading that dear book, "Science and Health with Key to the Scriptures;" that he can now understand the Bible with the spiritual light thrown upon it by Mrs. Eddy's interpretation.

This physical healing to me seems very wonderful, but the spiritual uplift into the real means much more. The trip to my old home not only healed my father and sister, but it overcame an old family separation, an error that had held us apart for years. Love melted it all into its native nothingness, for as our consciousness was flooded with Truth and Love it was annihilation to everything unlike God, there being no other power than God, good; and we were lifted out of "chaos and old night" into the light of Love, which our dear Leader, Mrs. Eddy, is still reflecting as it is revealed to her clear consciousness.

MRS. A. LEONE REILLY, Reno, Nev.

I have been interested in Christian Science for about three years, and have received so much good that I rejoice to tell it, with the hope that it may benefit some one else who may be seeking the truth. During my first experience of Christian Science I was like most other thoughtless people, I did not have much faith in it, for I knew very little about it. I had a good deal of trouble with my eyes, and as the doctors had said that I would always have to wear glasses, I finally decided to try Christian Science. I immediately consulted a practitioner and began to study Science and Health, and in a short time my eyes were completely cured and my glasses were thrown away. My eyes are now stronger than ever before.

I also wish to mention another instance of a demonstration with our little boy. In some way he had driven a shingle nail, the full length of it, into his heel. To mortal sense it seemed very painful, but as soon as I saw what had happened I called my husband, and simply told him the facts in the case. We both declared the truth, and the bad effects were immediately overcome. There was no inflammation at all.

Words cannot express how grateful I feel toward our beloved Leader, Mrs. Eddy, for bringing us this practical truth which heals the sick.

MRS. O. C. SHELLEY, Caldwell, Kan.

It is with much gratitude that I write the following testimony in regard to the benefit I have received since taking up the study of Christian Science. For twenty years previous to that time I was in bondage to eye-glasses, but as I advanced in the understanding of Science and the all-power of God, I felt that there was no need of my wearing them any longer; so I laid the glasses aside, knowing that in the truth my sight was perfect, and I have never needed them since. For this deliverance from bondage I am deeply grateful to God, and for Christian Science as given us by Mrs. Eddy.

EMMA ALLEN WHITE, E. Braintree, Mass.

It is with heartfelt thankfulness to our Father-Mother God that I write to acknowledge something of what my wife and I owe to the teachings of Christian Science as given to the world by Mrs. Eddy. A little over two years ago we were in great distress of mind, owing to the thought that our means of livelihood had been taken from us, through no fault of our own. Just at this juncture, when we stood so much in need of wise counsel, we were first drawn to Christian Science by what was then apparently a chance meeting on shipboard with a lady who was study-

Digitized by Google

ing Science and Health, and who presently got into conversation with us and gave us our first apprehension of this great teaching.

We did not at once pursue the study, but after about three months we took it up in good earnest, and were forcibly impressed with the beauty of the subject. We were both church-members, and had been for many years, but in this Science we found what we had consciously lacked, viz., a clear understanding of the divine nature of the love of God. We perceived at once that God is Love, and we were able to understand more perfectly man's relationship to Him. Since we first began to study this grand verity we have not wavered, but have applied for, and I am thankful to say have been received into, membership with The Mother Church, and also of First Church of Christ, Scientist, Melbourne.

Time and space would fail me to tell of the many complete overcomings of physical troubles for ourselves and our children through this wondrous truth. Suffice it to say, that whereas we were formerly good patrons of physicians, surgeons, and chemists, since we have come to know the truth, the truth has indeed made us free from the laws that previously bound us to a belief of sin, sickness, and death. From the first we have not had to resort to material remedies, and although some attacks of sickness have come our way, these have been quickly vanquished by the power of divine Love, so that we now see the falsity of trusting to drugs for healing. Our way has been opened up in temporal matters, and altogether we know that we are kept by a Father's care. We could not if we would, and we would not if we could, go back to the old line of thought.

We are deeply thankful to God in that He revealed to Mrs. Eddy this truth; we are grateful to her for having given it to the world. We cannot forget the great kindness of the Christian Scientists in Melbourne, and the wonderful good they have done us by their loving sympathy. Our prayer is that God's will may be done, as in heaven so on earth, and that His kingdom may come to all.

ALFRED THORPE, Malvern, Victoria, Australia.

[Translated from the German.]

A year ago a lady called at my house and told me about Christian Science. I had been sick almost five years, and for nearly two years had to stay in bed. I had been operated on three times; the physicians, who had diagnosed my case as severe spinal trouble, gave up all hope and said that they could do no more for me. Four openings, one of them very deep, were discharging contantly, and I was continually in great pain from a bowel disorder, to which a bladder trouble was added. My practitioner, however, encouraged me, assuring me that with God nothing is impossible; and after being under treatment for six months I was delivered from all these ills. I can now attend to all my duties, and can go up and down three flights of stairs without any inconvenience. I study the Bible zealously and read the *Herold*.

For all these blessings I am infinitely thankful to God, also to Mrs. Eddy for her great discovery and that it has been made possible for us to understand this wonderful truth in the German language.

ANNA MONCH, Bautzen, Germany.

To those beginning the study of Christian Science, the meaning of the omnipresence of God is a revelation, and presents a new and tangible idea of divinity. The notion of a humanized God enthroned in the center of the universe and ruling therefrom, is gone, and Christian Science has given the knowledge that we are ever in the presence of the infinite. On page 107 of our priceless text-book, "Science and Health with Key to the Scriptures," Mrs. Eddy says, "'God with us,'—the sovereign ever-presence, delivering the children of men from every ill 'that flesh is heir to.'"

God's unfailing goodness in every hour of trial had been revealed to me in Christian Science many times, but never more forcibly than in this particular instance. An attack of illness attended by high fever presented itself to the younger member of my family. I tried to see nothing but the perfect idea, and to know that the promises of divine Love to help in time of trouble were true and sure; but so tenacious was the belief that on the third day the sense of fear seemed almost to overpower me, and I decided to call for help. Still I knew that God alone could heal, and suddenly from the seeming darkness there appeared before my vision, as in letters of gold, the message that came to the psalmist of old: "Be still, and know that I am God." Almost instantly my fear vanished. God had spoken to me, and His word, "sharper than any two-edged sword," cut asunder the bonds of error. My boy was instantaneously healed. He at once arose and dressed with the exhilaration and gladness which a recognition of the Father's presence ever brings.

My heart is full of unspeakable thankfulness for this understanding of God, who is our "very present help in trouble." It is the absolute dependence upon and obedience to the ever-present God, that has enabled our dearly loved and loving Leader unfalteringly to give to the world this knowledge and declaration of Truth. In her teachings she has given us the Christ as our daily companion; a Saviour from sin and sickness, and has established the true concept of the fatherhood of God. The realization of the omnipresence of God brings to mind these lines from Tennyson:—

Speak to Him, thou, for He hears,
And spirit with spirit can meet—
Closer is He than breathing,
And nearer than hands and feet.

IDA M. BENNETT SMITH, Somerville, Mass.

[Written for the *Sentinel*.]

THE CAUSE OF GRATITUDE.

JOHN M. DEAN.

IN fervent penitential prayer,
A conscience-stricken sinner bowed;
Nor pomp, nor ceremonial rite
With hollow form his words endowed.
O God in heaven, be merciful
To me, a sinner! Thus he cried;
His heartfelt wail met quick response,
Thought was uplifted, purified;
Christ rose within, for sin had died.

From out an anguished night of pain,
A woman lifted up her thought
To Israel's God of tender love,
And peace and healing comfort sought.
When, lo! a new-born anthem woke
The slumbering faith within her breast,
Till conquered pain gave place to praise
For Love's serene, unbroken rest—
And she arose, God's bidden guest.

Since at the chastening touch of Truth
Both sin and sickness flee,
'Tis surely but a slight return
To doubly thankful be.

Digitized by Google

FROM OUR EXCHANGES.

[*Churchman.*]

In these days more than any others, when the attention of mankind is concentrated on the development of the material resources revealed in nature and in society, there is required more than at any other time an attestation that the supreme goal of life lies outside of the sphere of the things man sees and handles. The preparation for the Christian life, whether it is to be lived in the ministry or in the ranks of the laity, should alike be impressed with the Christian spirit of optimism and hopefulness. The notion that mankind in the successive phases of human progress is drawing away from God should be rejected. There is no evidence in the New Testament to show that the church as an organization was to control the whole activities of mankind, or that movements outside of the church and independent of the church are on that account hostile to Christianity. In its best sense the church stands for opportunism. It is to adapt itself to the ever-varying needs of mankind.

[*New York Observer.*]

There is always a reward in doing good. Benevolence, whether it be of the monetary or the affectional kind, or consist of liberal gifts of wisdom, may have no market value, and may elude the arithmetic of earth, but it is rewarded. God pays, and pays well—only His disbursements are not always in earthly coin, but are oftener of a heavenly mintage, circulating not from hand to hand, but from heart to heart. When a man does aught, spiritually, to help another, God puts the joy into his heart, and a divine hand lays an unseen diadem upon his brow. That man is crowned. He is crowned then and there, and he is rewarded hereafter. He is, in the first place, rewarded immediately. His own soul is refreshed by the spiritual ministry to another, his own heart is enlarged, his own faith is consolidated, his horizon is widened, and his eternal interests are made more real and vivid to his thought. A joy, subtle, keen, unearthly, spiritual, invades and pervades his soul. God gives him joy.

[Rev. C. C. Pierce as quoted in *Pacific Unitarian.*]

"The day has gone by when a few enthusiasts, propounding a few theological dogmas, will be able to sway or help humanity. The church of the future will have room for everything that helps humanity, and everything that opens the human soul to the possibilities of the race will find a place in its creed, order, and thought. The church of the future will exist for the purpose of making human life what it ought to be, here and now, instead of forever telling people to get ready to die, and it will substitute the scientific and living method for the traditional dogmatic and authoritative mood."

[Rev. Frank L. Phalen in *Christian Register.*]

In every land beneath the sun men are awake to a new and a more vital understanding of religion and its function in human life and society. The church of God is gathering itself like an army, and moving forward in strong and irresistible determination to plant the banner of righteousness and truth and love in every home, in every street, in every civic, in every social, in every private, and in every public enterprise of the world.

[Prof. Heinrich Weinel in *Hibbert Journal.*]

Idealism, long considered dead, is everywhere beginning to awake, and a rejuvenated and renewed Christianity is preparing to go forth among the people from venerable churches and from the quiet studies of scholars, announcing and testifying to that which has been discovered in the silence where the awakened desire for deeper life has made itself felt.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel.*

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in this column.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the Field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

PAMPHLETS IN FRENCH.—Three new French pamphlets, "Christian Science: Le Pouvoir De L'Homme Sur Le Mal," "Christian Science: Ses Bienfaits Pour L'Humanité by Edward A. Kimball, and "Christian Science: La Délivrance Du Mal" by William P. McKenzie, are now ready for delivery to the Field.

A new catalogue has just been issued by the Society, copies of which will be mailed to our patrons on application.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed article. publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE, POSTPAID: Single copy, six months, $1.20. one year, $2.00. Quantities TO ONE ADDRESS: ten copies, each, six months, $1.15, yearly, $1.90; twenty-five copies, each, six months, $1.10, yearly, $1.80; fifty copies, each, six months, 95 cents, yearly, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 40 cents for postage on each yearly subscription.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year or two years previous, cloth, $2.50; half calf or half morocco $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $7.60 a year, $3.80 for six months; all other countries, $8.00 a year, $4.50 for six months. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE, POSTPAID: One or more copies, 50 cents, each, yearly. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postpaid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postpaid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico and Cuba, 10 cents a copy, 60 cents for six months, $1.00 a year; all other countries, 12 cents a copy, 75 cents for six months, $1.25 a year.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

Representative Austin of Tennessee has proposed a plan for the retirement of superannuated clerks in the classified service which is attracting attention among the civil service reformers in Washington. He has introduced a bill in the House providing for the retirement of employees in the civil service which does not require the establishment of a civil pension list or an annuity fund, but which seeks to accomplish the desired result without cost to the Government or its employees. The plan provides that boards of retirement be established in the executive departments for considering all cases where retirement is deemed expedient by the head of the department. In case of a retirement, half of the previous pay of the retired employee will be paid to himself, the remaining half to a new employee or divided between another employee promoted to the vacancy and a new one who begins at the bottom of the ladder. Under the working of the bill, an old employee who is retired at a salary of $2,000 would continue to receive half that amount.

The Academies of Science of Los Angeles, Cal., has asked the city council for an appropriation to be used in developing a remarkable deposit of bones of antediluvian animals in the asphalt beds near Holly Wood. There have been exhumed so far complete skeletons of a giant sloth; several saber-toothed tigers, a prehistoric lion of the African type, but larger; a giant camel, three species of prehistoric wolves, a horse that seems to have been larger than any that exists today, giant eagles and condors, a large number of miscellaneous rodents, a small prehistoric cat, the skull of a bird larger than an ostrich, and portions of skeletons of elephants. The greatest find was the skull of an extinct species of buffalo or prehistoric ox.

Representative Weeks of Massachusetts has reintroduced his general forest reserve bill, with some modifications made to meet objections urged against the measure in the last Congress. In its present form the bill provides for an annual appropriation of $2,000,000 from the general fund of the treasury, instead of from the receipts of the national forests, the money to be used for the purchase of land along the watersheds of navigable streams for forestry purposes. The measure authorizes the states to cooperate in forest conservation, and enables the Agricultural Department to superintend the cutting of private timber holdings. An appropriation is made for a forest fire patrol.

International.

The World's Alliance of Young Men's Christian Associations opened its seventeenth world's conference at Barmen-Elberfeld, Germany, last week, with fifteen hundred delegates from all countries, including sixty Americans, in attendance. A band met each delegation at the station and played the national anthem. The delegates marched through splendidly decorated streets, which were thronged with spectators. A large number of interpreters and three hundred boy guides assisted the visitors. Speeches of welcome were made by the burgomaster, prominent clergymen, and representatives of the civic authorities.

Louis Bleriot, the Frenchman, flew across the English Channel on the 25th ult., from Les Baraques on the French coast to Dover, a distance of twenty-one miles, in a little less than half an hour, in his little monoplane airship. As a reward for his feat he received a prize of $5,000.

The Russian Czar is making a visit to Germany, France, and England.

Industrial and Commercial.

The showing of the savings and loan features of the Baltimore & Ohio Employees' Relief Department for the fiscal year ended with June is a good one, reflecting improved conditions generally in railroad affairs. The interest rate on employees' deposits for the year was restored to the old figure of five and a half per cent. The company guarantees four per cent, and the remaining one and a half per cent represented the earnings on loans made employees for the purchase or building of homes. The employees' deposits during the year totaled $932,592, which with the accrued interest of $236,625, added $1,160,215 in the twelve months. Withdrawals of $855,339 left $4,716,573 due employees at the end of the year, a gain of $313,876. The loans made employees during the fiscal year aggregated $1,031,342—making the whole sum loaned to June 30, $8,750,553. Membership in the Baltimore & Ohio Relief Department numbers 48,870, of whom 5,940 are depositors in the savings feature.

A New York policeman has invented a novel street-sweeping device which promises great improvement in that branch of city cleaning. On either side below the frame of the machine are rotary brooms set at converging angles, and twenty inches apart at the inner ends. The dirt is thrown up between these in a row twenty inches wide. Then there is a third broom in the rear of the machine which sweeps the dirt thus placed in position for it into a broad hanging shoe between it and the forward sweepers. The dirt is carried from the shoe by a sort of endless chain of buckets and deposited in barrels on top of the machine. The machine will sweep a path more than nine feet wide and do twice the work of any similar machine on the market. It can be built for much less than any like machine and can be sold for $600, as against $1,000 and $2,000 for other machines.

The irrigation of more than two hundred thousand acres of land from one system of canals and ditches will be accomplished within three years in the lower valley of the Rio Grande. At a meeting of the several owners of the land which is to be embraced in this big system of irrigation, held there a few days ago, the articles of agreement whereby each land-owner becomes a stockholder in the enterprise in proportion to the number of acres he possesses, were signed. It is estimated that the cost of constructing the main canal and ditches will aggregate more than $2,000,000. The intake of the main canal will be located in the vicinity of Rio Grande City and the water brought down the valley by means of gravity.

The textile directory recently issued by the land and industrial department of the Southern Railway and Mobile and Ohio Railroad shows that the cotton, knitting, and woollen mills in the territory of these lines on the first of the year numbered 751, of which 584 were cotton mills, 124 knitting mills, and 43 woolen mills. In all, these plants operated 225,210 looms and 7,853,738 spindles. In 1880 all the textile plants of the South had but 667,000 spindles, barely six per cent of the total in the United States; now they are credited, in round numbers, with 10,500,000 spindles—practically fifty per cent of the number in the entire country. The capital employed has grown from $21,000,000 to nearly $300,000,000, and the number of bales of cotton annually used from 210,000 to more than 2,100,000.

"Singing sparks" is the expressive name given to an improved wireless system just perfected by the German Telefunken Wireless Telegraphy Company. The production of continuous electrical waves has been one of the chief problems of wireless telegraphy. This device, it is claimed, will entirely obviate the uncertainties with which other wireless systems hitherto have had to contend. The new method consists in sending out the vibrations which form the messages as pure musical tones, which are capable of being heard by the receiver, no matter how softly they may be attuned, and it will be possible to maintain communication by this means in spite of the most violent atmospheric disturbances.

The directors of the Kansas City, Mo., terminal station project have voted for the acceptance of the ordinance recently passed by the Kansas City Common Council, permitting the erection of a new $20,000,000 railroad terminal. It provides for a terminal of six tracks in width or less. The ordinance is subject to a referendum vote of Kansas City citizens. If the special election results favorably, ground for the new station will be broken on the Twenty-Sixth street site by Nov. 1.

An important agreement has been reached between the Compressed Air Workers' Union and the employers, by which, instead of being paid in proportion to the depth to which the caissons are sunk, the men will be paid according to the amount of air pressure in which they are compelled to work. The pay will vary from $3.50 for a day of six hours at twenty-two pounds pressure to $4.50 a day for one hour and twenty minutes' work at from forty to forty-five pounds pressure.

The Santa Fé has arranged for building a 325-mile cut-off line across the panhandle of Texas to connect its gulf system with its transcontinental line. This road will run between Brownwood and Texico. Its course from Brownwood will be northwest through a territory that is now far removed from railway facilities. It will mean practically the establishment of a new transcontinental line by the Santa Fé.

The largest switchboard in the world is to be installed in the New York terminal of the Pennsylvania Railroad. All the switches of the terminal are to be electrically controlled from this board. It is to cost $500,000.

Ninety million feet of logs of the total of one hundred and fifteen million feet cut in Maine along the Penobscot river and its tributaries this season, have arrived at the Penobscot boom.

It is expected that Montana's wool clip this year will exceed forty-five million pounds.

General.

It is announced that Dr. Karl Bovallius has discovered in British Guiana, near the Brazilian frontier, five degrees north of the equator, a cataract as great as Niagara. The cataract is on a tributary of the Ireng river and has been named Chamberlain Fall. Another great cataract was discovered a few months ago on the Hamilton river in Quebec, Canada.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE MARCH OF TRUTH.

EDEN TATEM.

In that famous work which for more than a century has successfully withstood the assaults of criticism and controversy, Gibbon relates the incident that among the Christians brought before the tribunal of the Roman emperor were two persons whose extraction was more truly noble than that of the greatest monarchs. They were the grandsons of the apostle Jude, who was himself called the brother of Jesus Christ.

While as heirs to the throne of David these men might have gained the respect of a fickle public and aroused the jealous suspicions of the governor, so simple was their manner, so humble their garb, as speedily to convince their judges that they were devoid of all worldly ambition and of any desire to disturb the peace of Rome. They acknowledged frankly their royal origin and their relation to the Messiah. They showed their hands hardened by daily toil on the farm which was their sole means of subsistence. They disclaimed all interest in things temporal, saying, "It is another and a better country that we seek, and the kingdom promised us by the Messiah is not an earthly but a heavenly." "They were dismissed," concludes Gibbon, "with compassion and contempt."

In truth, the obscurity into which the new religion seemed to have fallen might well have protected them from the suspicions of a Roman tyrant. Years had elapsed since there had arisen an idle rumor, all too faint to stir from its settled indifference the culture of the Greek and the martial greatness of the Roman, concerning a new teacher of humble origin, who on the shore of Galilee day after day unwearièdly reiterated certain simple, profound truths to a handful of untutored followers. There had been, too, stories of marvelous healing,—the blind had been made to see, the deaf to hear, the leper cleansed, the dead raised.

The Hebrew whose history was a continuous prophecy of the coming of the Messiah, had found this Galilean peasant, in the royal simplicity of his bearing, his wide humanity, and the power of his eloquence, a supreme menace to the wisest rabbis of Jerusalem. The passover had seen this alleged notorious malefactor—for them "not incarnate enough, not flesh enough, nor earth enough, nor failure enough"—crucified, and the monstrous heresy, as they supposed, crushed.

But the Messiah had builded better than they could know. The very simplicity of the method he adopted, which consisted chiefly in the patient repetition, the careful demonstration, again and again, of a few great truths to a group of young fishermen, had wrought its imperishable influence upon the history of mankind, unlocked to the human understanding the treasure-trove of Spirit, and revealed the way out of the false bondage of sense into the eternal freedom of Soul. His teaching was founded neither on religious superstition nor on human personality, but on divine Principle.

Steadily, slowly, Judaic formalism, Greek philosophy, the occultism of the East, yielded to the purifying fermentation of this new leaven which was finally to permeate all civilized society. Persecution, dissension, worldliness, combined in an attempt to destroy it; many of its followers no doubt went astray after strange gods and proved unworthy of their name, but in due time a leader was not lacking whose life of consecrated action should give battle for the right and lead to triumphant issue the struggle between Christianity and paganism, between spiritual forces and the idols of materialism.

The violent vices, follies, and inhuman selfishness of an age that gave to Rome Nero, saw Paul of Tarsus arise. Renouncing high position and a brilliant career to become a working man, with the meager means which his work as a tent-maker furnished, often alone and on foot, he journeyed through the empire, calling upon men to cease from vice, to work honestly, to live simply,—not in the name of ancestral piety or popular tradition, but in the name of the one God. He who had "sat at the feet of Gamaliel" and, distinguished for his zeal and talents, seems to have been appointed to important ecclesiastical and political offices, humbled himself. "I am made," he says, "all things to all men, that I might by all means save some."

Standing on the stair between the temple and the fortress, addressing first in Greek the commander of the garrison, then turning to speak in Hebrew to the maddened mob, or before King Agrippa giving impassioned utterance to the thoughts that crowded fast upon him, the ardor of Paul's words still sets vibrating the human heart, even as it stirred his listeners centuries ago. By him we are thrilled as perhaps by no other apostle. For us today this tent-maker lives exultantly in the valiant truth, the buoyant faith of his message: "For I am persuaded, that neither death, nor life, nor angels, nor principalities, nor powers, nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate us from the love of God."

After the death of the apostles, the active faith of the Christians had gradually waned, until about the year 325 a lukewarm credulity, formal in ritual and barren in works, hung like a heavy pall over the Christian religion. Fanaticism as well as passive acquiescence shut out the light of inspiration, and healing became to the church a lost art. But neither the decay of institutions nor the opposition of individuals can impede the onward march of truth. Behind the seeming froth and foam of mortal personality ever move the strong, steady forces of Spirit, like a resistless current sounding the perfect diapason of its unconquerable, unchangeable harmony.

The nineteenth century was to have among its religious teachers one whose thought had been kindled by a revelation of the perfect triumph of good over every appearance of evil; whose spiritual sense had been thrilled and irradiated through prayer and pure desire until material phenomena had disappeared in the realization of infinite Spirit, an all-pervading intelligence, an ever-brooding

Love. She had seen the mirage of life in matter melt away. In its place, glorified, lovely, and lovable beyond the fondest imaginings of mortal sense, there had gleamed upon the pure background of her thought, man as the spiritual idea, the eternal reflection of the one Mind,—man as perfect, as unchanging as the creator in whose image he is forever revealed.

The flower of her meditation had bloomed in the silent depth, the profound purity of her thought. Henceforth the splendor of the truth thus disclosed to her was to shape alike thought and life. Step by step she must prove for herself and then interpret to others the rudiments of a Science which, founded on the teachings of the Bible, declared the allness of God and ceased to recognize matter, disease, sin, and death save as the great negations of unreality, possessing neither Principle, entity, nor intelligence, whose existence in erring mortal experience must be grappled with and destroyed through the understanding of divine power.

More than zeal and enthusiasm are needed for the wise undertaking of a great task. The first once led to the Inquisition; the second has more than once ended in fanaticism. But to this woman's spiritual gift, keen intellect, and rare genius for serving humanity, was added the saving grace of humor,—that balance-wheel in human affairs which keeps intact a true sense of proportion, separates practical idealism from moonstruck theory, and constantly and wisely adjusts the "suffer it to be so now" to the absolute. It is akin to that courtesy of mind which refrains from jolting the feelings of our neighbor to whom literally "the rose is red, the violet blue," by alluding to them as "ideas of God;" to the tactful kindness which, even at the cost of self-sacrifice, never meets his harmless "I must hustle for a job" with cryptic remarks anent "demonstrations." Sacrifice is never loss, and the adequate reward for our self-denial in this instance should be found in the soothing assurance that our conversation has not driven our neighbor away feeling the "imperative need of silence and recollection and repose."

On page 238 of "Miscellaneous Writings," Mrs. Eddy probes the thought of the reader with the searching questions, "Have you renounced self? Are you faithful? Do you love?" In the teaching of Jesus Christ there can be found no warrant for ambition, nor does he accord to it any value in the forming of character. The whole concern of the Christian must be the quality of his thought. Before he can hope to see things in their true value, he must have renounced personal ambition and desire. In love alone is found forgetfulness of self. When his thought is no longer dazzled by the glamour of self-will, remote from the glare of the world's estimate of things, there can arise in the clear dawn of a more spiritual consciousness new aims which will glow with ever-deepening radiance.

He who desires only what God desires shall find all things working together for his good. No longer trusting to human impulse, but looking to the one Mind for guidance, he will cease to indulge in that form of "diseased self-consciousness," worry,—worry over the wraiths of yesterday, the half-gods of to-day, the gorgons of tomorrow. Who but God is here with us in the present? Will the future find Him less with us there? As for the past, a salutary lesson was recently drawn from the story of a woman in Hebrew history who, ignoring alike the command of her God and the advice of her husband, looked backward—to remain stationary forever.

Not immediately, perhaps, can we rid ourselves entirely of the tatters of worry and care, but as we open our thought more and more to the abundant energies of Spirit, we shall come to live persistently above these tangles of error, finally to forget them, and the place they once held in our consciousness shall know them no more. Edwin Markham relates the story of Emerson's reply to an agitated friend who invaded his study to announce excitedly that a comet was soon to wipe out of existence the entire solar system. "Well, well," remarked Emerson, looking serenely over the top of his Plato, "I can get along without the solar system." There is possible for each one a serenity which can meet the petty trials of daily life no less nobly than its more heroic crises, and wrest a victory from what had seemed to human sense overwhelming defeat. Freed from the fetters of unresting ambition and fruitless desire, the words, "Peace I leave with you, my peace I give unto you," will pour their message of healing into our waiting hearts.

What we become in thought is the thing that counts, and over that thing we have unlimited control. Our task may be done amid the dust of common day, yet our thought, if centered in good, despite crude effort and unfavorable circumstance shall shine forth serene and unafraid. For the earnest worker, to whom the scale of spiritual things is one and the scale of the senses is another, knows that the God to whom he consecrates his life is a God that can be counted upon; that the spiritual life is a life neither of tension nor strain, but one in which the sense of personal responsibility merges little by little into the poised consciousness of limitless power as the reflection of omnipotent Mind.

Truly may it be said of the faithful who, often without tangible reward, in the corners and the byways of the great world bind up the broken-hearted and heal, as did their Master, the sick and the sinning, "These are they who love much." They have proven triumphantly that the influence of the Nazarene is no myth in the life of the twentieth century. Today as never before he is a vital, tremendous force to be reckoned with in human affairs. Men may deny him, they may betray him, they may seek divers paths whereby to evade him—but they cannot escape him. And for them, even as for Peter, the hour of denial shall pass, and with its passing the scales of blind error fall from their eyes, and they, too, shall know and love and live.

"HE KNEW THEIR THOUGHTS."

EFFIE ANDREWS.

In the fourth chapter of John is given this testimony of the Samaritan woman respecting Christ Jesus: "Come, see a man, which told me all things that ever I did: is not this the Christ?" There are numerous references in the Gospels which go to show that the Master knew (read scientifically) the thoughts of those about him, and Mrs. Eddy says, "In like manner he discerned disease and healed the sick," and she adds, "You will reach the perfect Science of healing when you are able to read the human mind after this manner and discern the error you would destroy" (Science and Health, p. 85).

To follow the Master's command, as did the twelve when he sent them "to preach the kingdom of God, and to heal the sick," is the earnest desire of every true Christian Scientist, and they have found this to be not simply a matter of desire, but of individual growth, through spiritual consciousness and understanding, the perfect fulfilment of which would lead into the realm where Spirit dwells. In the parable of "the sower" the ground is taken into account as well as the seed. Jesus showed this discernment in Nazareth, where he did but few wonderful works because of their unbelief. Several instances are recorded where the Master was followed by great multitudes, and "he healed them all," but this does not necessarily mean that he healed every sick or disabled person he saw. John records that "a great multitude of impotent folk" were lying in the porches at the pool of Bethesda,

Digitized by Google

but Jesus addressed himself to one man only—one whom he "knew" had long been helpless. Why was this?

The rich young man "went away grieved"—unhealed of his love of materiality—but it was not because Jesus did not know the truth. In the case of this young man we are told that "Jesus beholding him loved him," but our Master read mortal mind and saw that in this instance the ground was not ready for the seed. I often think, too, of the ten lepers who were healed, and how only one of them returned to give thanks; but to him Jesus said, "Thy faith hath made thee whole." What shall we say of the other nine—those who did not return to give glory to God? Were they ready to be made whole?

How many practitioners there are who willingly give, with loving self-sacrifice, anything possible for the sick and the sinning, and they are gladdened with proofs innumerable of the infinite power of Truth to heal and to save to the uttermost. It happens, however, in some other cases, that with even more desire and devotion, if it were possible, these same practitioners are unable to reach a present result. Is it not here that Jesus' spiritual discernment, his knowing of the thought, could decide as to the patient's receptivity? Jesus heard even the unvoiced cry of one woman who touched him in the crowd that pressed upon him. He could say to the woman who had sinned, "Neither do I condemn thee;" and then tell her what her individual work was: "Go, and sin no more." The apostle Paul sounded the warning note when he said, "Be not deceived; God is not mocked: for whatsoever a man soweth, that shall he also reap;" and no amount of work on the part of another can save each one, be he practitioner or patient, from doing his own sowing and reaping.

There are no failures in Truth! Jesus loved that young man. With his spiritual sight he could see beyond the present unpreparedness of mortal mind; and though he did not save him from the experiences necessary for growth, spiritual vision revealed the forever perfect man, —God's image and likeness,—and love bridges time with eternity. I have always been glad to remember that Jesus said, "Except ye . . . become as little children, ye shall not enter into the kingdom of heaven," and I have felt a comfort in knowing that not too much is expected of a little child. Obedience to the Principle and rule of Christian Science, and that honesty which is "spiritual power" (Science and Health, p. 453), these lead to heavenly heights; and we can prove the truth as we grow.

The time has come, however, when we should claim more of that Mind which was in Christ Jesus, to be in us —"yea, to reach the range of fetterless Mind" (*Ibid.*, p. 84). We have the Bible, and our text-book, "Science and Health with Key to the Scriptures," with ample instruction; and we have a Leader who has pointed the way to increasing spiritual attainment, the while herself an object-lesson, proving even to the world, as the sense of personality is outgrown, that the spiritual ideal is becoming more manifest, here and now. Thank God for the inspiration and the light which reveal the power of infinite Mind! Let us, then, grow in the knowledge and love of God.

OVERCOMING.

WILLIAM HART SPENCER.

FOR long centuries mortal man has been circling around the outskirts of truth, with one hand reaching for the spiritual, and with the other grasping at matter for relief and happiness. Job said that "man is born unto trouble, as the sparks fly upward." This utterance is allied to the belief that matter is endowed with life within itself, a belief which is the basis for all the sin and misery in the world; and believing that it is its just due, accounts for the propensity of mortals to anticipate trouble. The seemingly real as well as the imaginary troubles with which this mortal sense is surrounded, are appalling,—every man and woman struggling with a seen or unseen foe; and wherever has been the human concept, has also been the cry for relief.

Nearly two thousand years ago, as we count time, he who called himself "the Son of man" said, "Be of good cheer; I have overcome the world." The superficial thought of overcoming the world is to overcome that which is unpleasant and distasteful to mortal mind, leaving the world intact. If such a victory were possible, it would only be in degree and not in kind, as the desire is to satiate the carnal mind with the pleasant things of sense. Notwithstanding the experiences of the years, which have shown beyond measure that the pleasures of sense are not lasting, the average person is determined to experiment for himself, and not until the search for pleasure on the lower level has been proven to be "vanity," as Solomon expressed it, are mortals in a mood to see that the things of Spirit alone are of real value.

Jesus overcame the world by conquering and putting out the false human sense,—the lie about life in matter; and what was thus gained was not for himself alone, but that the men and women in this sin-ridden world, blinded to Truth, might be enlightened, and know that this human concept of existence is not God's idea. Therefore Jesus' victory stands, and always will stand, at the parting of the ways,—the dividing-line between mortal mind and Spirit. It is a wise man who will turn, as did the Master, "from earth to heaven, from sense to Soul" (Science and Health, p. 48), before he has drained the dregs of mortal pleasure; but sooner or later the desire for better things will come, and with the desire the wish spiritually to overcome the world.

The seeming impossibility of this task is at first discouraging, but Mrs. Eddy says that "desire is prayer" (Science and Health, p. 1), and true prayer is always answered. Encouragement comes with the thought that Jesus left an exact and practical rule when he said, "If any man will come after me, let him deny himself." Formerly this was interpreted to mean that we should deny ourselves something which self liked, and was in line with many other precepts of the mournful and pessimistic order, warranted to wither hope and happiness. Unwittingly these beliefs, distasteful as they were, have been accepted as being in some mystical way a means whereby we were to offset the results of sin, and possibly to propitiate God.

To those who had neither the courage nor conviction to hew out a new line of thought, there was the feeling expressed by Daudet in one of his characters, that Christ had cast a pall over the earth, and taken all the color and pleasure out of life. Such an opinion can only come from "the pride of life,"—the belief that the human concept is of the greatest importance and that the pleasures of the senses comprise reality; but Paul says, "If a man think himself to be something, when he is nothing, he deceiveth himself." The denying of the false self is the entering wedge whereby the selfishness which stands in the way of the apprehension of God is broken down. God is Love, and His leading is in the path of peace,—not in senseless dreaming, but in active resting. Our struggle is not with God, but with our own selves, as we endeavor to break through the crust of human belief, pride, and fear.

Christian Science shows us the heritage of the real man, and that the denying of the mortal self is the opposite of mournful in its outcome, however unpleasant the process may be; for the denying tends to put down and out this false concept of self, in order that the spiritual man made in the image of God may be asserted. The sense of being in accord with the Divine, will of itself bring the highest joy. The only real happiness comes through the illumination of Spirit, whereby we are enabled to put the kingdom of God where it belongs,—in the first place in our affec-

Digitized by Google

tions. The innocent pleasures of life are legitimate and have their place, and no one is entitled to enjoy them more than the one who does not undertake to put them out of place by giving them the first place. We have grown when we know that real happiness lies beyond the material concept of pleasure and existence.

Our mistake is in persistently closing our eyes, and aimlessly fighting the air, whereas we should know that we are not battling single-handed with error, for, if we allow the Lord to open our eyes, we shall see, like the young man with Elisha, that we are surrounded with an heavenly host; not representatives of cruelty, but ideas of divine Mind (see Science and Health, p. 581), expressing the attributes of God. In the presence of such an army as this each of us may recognize his place and work in keeping clear some channel through which good may be expressed.

LOVE LEVELING POLITICS.

HELEN L. YOUNG.

THE following, from one of Shakespeare's sonnets, is said to be the finest couplet ever penned:—

. . . . Love is not love
Which alters when it alteration finds.

This thought has always appealed to me, and I have often quoted it, though unable to understand how it could be brought into one's life until I took up the study of the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. Then it began to dawn on me that God is unchanging and unchangeable Love, and as we come to understand that man is made in His image, we do not alter in our thought of love, though others may vary. The human concept of love wavers as the waves of the sea, the divine Love stands as unchanging as a rock, as unalterable as a rule in mathematics; and as we understand more and more of the God who is immutable Love, we become more and more stable and unalterable in our own expression of love and forgiveness.

Abraham Lincoln, the author of the Emancipation Proclamation, he whose memory is a benediction, was wise enough to see the light of the star of Truth in his day, and to hear the angels sing, "On earth peace, good will toward men." This modern ambassador of Christ, enriched and enlarged by love and humility, commissioned to break slavery's chains for the African people in this country, was the embodiment of love and compassion. He loved the common people because he believed the good Lord loved them. He was the friend of the downtrodden and the oppressed, and it is said that his favorite poem was Knox's "Mortality," beginning—

Oh why should the spirit of mortal be proud?

It is claimed for him, too, that his was the first voice to ring out in this country for the political emancipation of women.

Here I would speak of an experience which came to me after I had been studying Christian Science some few months. I was then living in a western state where the labor agitation was most intense, in the district where the great mining mills were later blown up, and where the trials connected therewith have more recently occupied the public thought. Probably since the days of Abraham Lincoln personal feeling has never been at such a tension. Women had been granted political freedom, and I ran for office. I was then awakening to the fact that Jesus' friends were largely the tent-makers and fishermen, and I ran on the labor ticket. This aroused the antagonism of all my friends, who proceeded one and all to vote against me, and then to contest my election. It was very difficult under these circumstances to see God as unchanging Love, but I knew that to be a consistent Christian Scientist I had to love my seeming enemies; so I began to work out my first problem in as scientific a way as I knew how. For the benefit of those who do not heal quickly and do not forgive instantly, let me say I was two years in solving this problem.

Every day of my life I went over to the post-office when the mail came in, that I might meet those men who I thought had been especially unkind to me. I never should have spoken to them again, had I not been trying to work out my problem on a Christian and scientific basis. Each time I bowed to them I would say to myself that in God's universe there is nothing but peace, love, and harmony. At first it was very difficult to say this—let alone to feel it, but to my own surprise, after awhile I found my resentment disappearing; and to my utter astonishment, later on, I found myself repeating the prayer of the Master, "Father, forgive them; for they know not what they do."

At the end of two years, when a new ticket was in preparation, a banker, in the name of corporate wealth (and I will say that the greatest corporation in the world was largely connected with it), came and offered me the nomination on that ticket, to be endorsed by my own party. He said they did not wish any one to run against me. I shall never forget the wave of thanksgiving which swept over me when I realized for the first time in my life that God is unchanging and unchangeable Love. I think I know how the children of Israel felt when Moses struck the rock and water gushed forth. I then knew that when we turn to the Rock, Christ, we find a fountain of Truth and Love pouring its healing and refreshing waters over a weary land, embittered by strife, rivalry, fear, sin, sickness, and death.

I had proved the truth of these statements in our text-book, "Love is enthroned," and "Love is the liberator" (Science and Health, pp. 454, 225), for Love had liberated us from the prejudice of political parties and ushered in the "Prince of Peace," which unifies humanity

In the Parliament of man, the Federation of the world.

Love had melted even the flintlike hardness of heart supposed to rule the money power, verifying the statement that "no power can withstand divine Love" (*Ibid.*, p. 224), the clarion call of our great Leader, whose teachings are making for the universal freedom of mankind not only politically, but physically, mentally, morally, and spiritually.

WATCHING THE ROAD.

A. C. DICKEY.

CHRIST JESUS said, "I am the way, the truth, and the life: no man cometh unto the Father, but by me." As we go about our work we often find timely lessons which, when viewed in the light of Christian Science, become of great value to us in our daily living. I was called out one night last winter during a severe blizzard. Part of the journey was made by train and part had to be made by team over the level prairie. I reached the house where help was needed about one o'clock in the morning, and found the patient much better. I knew by the look of the storm that unless I returned on the next train I would not get home for many days, so I started back, accompanied by two young boys, a little after two o'clock.

It was a very weird-looking night, the wind screaming and the snow drifting; in every direction that one could look, was the same white expanse of prairie. I sat well covered up, in the back part of the sleigh, and rather enjoyed the ride, as I had no fear and no sense of responsibility; so I chatted with the boys, but only one answered—the one who was driving said not a word. I soon began to wonder why he did not speak, and asked the reason. His answer came quick and short, "Why, I have to watch

Digitized by Google

the road!" No one knew as well as that young boy what it meant to make one false move that night. The thought came to me how much the little journey was like the greater journey "from sense to Soul" (Science and Health, p. 566). Like the snow, error is ever whirling, and would blind us if we did not carefully "watch the road."

If we would bring ourselves through the wilderness of mortal sense, and help those who are entrusted to us, we shall have "no time for gossip about false law or testimony" (*Ibid.*, p. 238). We must instead "watch the road!" Then the thought came to me how apt we are as Christian Scientists to feel ourselves well ensconced in the background, with no particular responsibility,—this great Christian Science movement going right along through storm and stress, and we never realizing what it means to our Leader, Mrs. Eddy, who is constantly watching the road, and who has so faithfully and silently kept the watch. It should make us remember not to waste time in chatting or chattering, but to be still and listen for the voice that says, "This is the way, walk ye in it." Mrs. Eddy through her loving watchfulness discovered that there was "an highway . . . and a way," and that it should be called "the way of holiness."

THE PATH WE ALL MUST TREAD.

HARRY FRANKLIN PORTER.

LIGHT was never found by searching for it in the gloom; nor was the bashful bud ever coaxed from its cloistered shelter by the lure of darkness. To putter and poke in the atmosphere of mortal mind, seeking the golden fleece of health and happiness, is to while away time in vain endeavor, it is to wander aimlessly in the land of Nod. One must come out into the open, into the warm light of Truth and Love, into the sunshine of God. Good thoughts bud and blossom only in the genial atmosphere of joyful activity; then it is that God speaks to us in tones that spiritual sense cannot mistake nor mortal sense deny.

It is quite necessary for one to be watchful and to pray without ceasing; but so doing in no wise releases one from the necessity of endeavor, patient and perpetual. What seems one's manifest duty to perform, that one must do with cheerfulness and resignation. Jesus paused not on that memorable journey from Jerusalem to Calvary, although none had ever been more heavily laden. Heart-sick, footsore, weary, deserted by his earthly friends, suffering grievously in body and in mind, he yielded not a tittle to the clamors of the flesh; he gave not up under his burden,—no, not this man of men,—nor sought to lay aside his cross. He thus taught us not to falter or stumble under the burden of our cross, or in reckless, vain abandon to balk at carrying it.

Let us not be proud and fretful, neither pause disheartened because our tasks are irksome and the present seems devoid of joy and promise. God doeth all things perfectly—thoroughly; so must we. We must finish each task, our manifest duty, well—our very best—before we can hope to rise above the humdrum into that higher and holier work, the very contemplation of which makes our hearts beat their budding wings against their prison-chambers in eagerness to fly.

Let us practise what we preach; do as we know we ought to do; execute what we undertake,—neither slighting nor shirking our evident tasks; love all things, all people,—hate, dislike nobody, naught but to sin. Living thus in the spirit of ceaseless activity, there is absolutely no power in the universe to oppose our progress or mar our harmony; for then, indeed, are we linked in unison of action with the great all-power—Love. Is not God supreme, all, and therefore Love all?

SELECTED ARTICLES.

[Frederick Dixon in *Bournemouth* (Eng.) *Visitors' Directory.*]

In the nineteen centuries which have elapsed since the commencement of the Christian era, almost innumerable phases of what is termed Christian thought have been expressed in as many innumerable dogmas, each of which has been the orthodox view just so long as popular opinion has supported it. What exact relationship, it is to be wondered, does your correspondent imagine the Christianity of St. Francis and St. Dominic bore to the Christianity of Luther and of Calvin, and what relation does he suppose the Christianity of Luther and of Calvin bore to the Christianity of Stanley or of Darwin? These are the dogma-made shades of Christianity, heretical in one century, orthodox in the next. John Wycliffe is known as "the first heretic," the Christian Scientists of today are apparently the last.

Now it so happens that there is in the Bible a definition of a Christian which the opponents of Christian Science are not too eager to quote. It is contained in the Gospel of John, in the declaration of Christ Jesus that those who believed on him would be able to do the works which he did, and it is repeated, in the Gospel of Mark, in the enumeration of the signs which should follow those who believed. In these two passages, to select these two alone, Christ Jesus made the power to heal the sick and work other miracles the test of a man's faith, and so necessarily of his Christianity. If these words represent anything more than *vox, et præterea nihil*, they are the declaration of the fact that a man's faith, and consequently his Christianity, is in exact proportion to his ability to overcome the evidence of evil and materiality; in a word, to heal the sick, to bind up the broken-hearted, and to reform the sinner, for, in the words of Christ Jesus himself, "Whether is easier, to say, Thy sins be forgiven thee; or to say, Arise, and walk?"

This is the doctrine of Christian Science as taught by Mrs. Eddy from one end to the other of the Christian Science text-book, "Science and Health with Key to the Scriptures," and anybody who is prepared to declare that it is unchristian must be prepared to prove it by something more substantial than a mere *obiter dictum*.

[W. J. Bonnin in *Blackpool* (Eng.) *Times.*]

Theology has for so long been concerned in devising creeds to bring the teaching of the Bible within the range of human understanding, in explanations and interpretations intended to satisfy the human mind and to transgress as little as possible its materialistic limitations and methods, that the reversal of this process demanded by Christian Science is often at first a little startling and disconcerting. Truth is and must ever be unerring, immutable, spiritual; it is the huma mind that is in need of change if we are to comprehend it. This is the literal meaning of repentance.

How clearly Paul saw this as the great necessity is shown by his constant insistence on it in his letters: "Be ye transformed by the renewing of your mind;" "Let this mind be in you, which was also in Christ Jesus;" "If any man think that he knoweth any thing, he knoweth nothing yet as he ought to know;" "The natural man receiveth not the things of the Spirit of God: for they are foolishness unto him: neither can he know them, because they are spiritually discerned," etc. So that the human, material mind can get in answer to its query, "What is truth?" no more enlightenment today than it did when it spoke through the lips of Pilate. The fact is that it is as impossible for that mind to comprehend Truth as it would be for one who had been in darkness all his life to comprehend the nature of light without seeing it. Consequently the only real

Digitized by Google

argument for Christian Science is the demonstration of it. The great fact of Truth and the strict logical deductions from it must be accepted; that is the province of faith. Christian Science comes to transform this faith into knowledge.

It will be seen that the statement of your correspondent, that it may be philosophically true that there is no such thing as sickness and yet be practically true that there is such a thing, amounts to a belief in two truths, each proving the other to be false. What but discord and disaster might be expected from such a stupendous contradiction? What, in fact, has resulted from it through the ages? For it is, in another form, the same old contradiction that ascribes existence and power to both good and evil, setting up a rival and hostile power to omnipotence, and would have us believe that suffering and pain are sent by a God who is Love. The woe of the world is the result. The only way that sickness can be a means of spiritual ennoblement is in its being destroyed, as a false belief, by the knowledge of the truth that all which is, is good. To affirm that the Book of life does not profess to banish sickness, but uses it as a sort of ally, is at least a little paradoxical, and forces the question: Why did Jesus and his disciples, the apostles and the early Christians, so continually and universally heal the sick? why today do we seek to get well, if thereby is destroyed a means for spiritual advancement?

To grasp the truth of spiritual reality and material unreality, of omnipotent good and powerless evil, of God who is and is Truth, and of Satan who is not and is a liar, is to believe on Christ in the way that brings salvation here and now and that proves the availability of his promise, "Ye shall know the truth, and the truth shall make you free."

[From *Central Michigan Times*, Mt. Pleasant, Mich.]

The day when anything but reason can be applied to a religious discussion has passed. In this country religious freedom is guaranteed, and an attempt to drive out a sect by others is in contradiction of the very life and purpose of the one they profess to follow. Too much charity cannot be shown. Reason will in time correct these false ideals, if indeed they be false, or it will prove their truth, if they be true. I am sorry, indeed, that the pastors of that city "where life is worth living" should unite in such narrow and unjust warfare upon a sister society.

Christ Jesus said that a tree should be judged by its fruit. By that measure why should Christian Scientists be denounced? Should I denounce as an awful thing all the creeds and the sects which disagree with me? Are we to fight constantly those who do not understand as we do? If their work is the betterment of the race, I care not how much they may differ from me, we should reach out a hand of fellowship. Time may prove that they were as near the truth as we are. Remember that charity is the highest grace of Christianity, according to the great Teacher, who said, "Father, forgive them; for they know not what they do."

I am sometimes of the opinion that there is very little of the Christ-spirit in circulation in these days. One denomination knocks another, one person envies another, and one society tries to supplant another. If a person makes a mistake we are quick to attribute it to the worst of motives, and if the finger of shame has ever been pointed at one, whether rightly or wrongly, like a pack of wolves we pounce on and kill the helpless creature, instead of reaching out the helping hand. We don't do as we would like to be done by, by a long way. O for a little charity! Not the kind that peddles out a few old cast-offs to the poor, but the charity that overlooks faults in others; charity that grants to others the same rights we claim for ourselves; charity that lifts up instead of crushing the noblest aspirations of men when not hoisted in our own particular way and according to our particular ideas.

[Alfred Farlow in *Orangeville* (Ont.) *Banner*.]

If Spirit, God, as our critic intimates, is infinite, there can be but one Spirit. The universe, including man, is spiritual, but is not Spirit. It is substantial, but is not substance. It is intelligent, but is not intelligence. The universe is not a part of the creator, but the expression or manifestation of God. God always remains God, while man always remains man. Creation always remains the expression or reflection of substance, the "image of God."

This definition of man, however, does not depreciate the importance of man or make him less an intelligent creature, for he reflects every characteristic and every attribute of God, even the rational, thinking capacity of divine Mind. Pantheism teaches that the universe, taken together as a whole, constitutes Deity. Pantheism is due to the result of an effort to establish a belief that the universe is material, and at the same time maintain the idea that God is substance and is infinite. If we assume that the universe is material and occupies space, we must either assume that a part of God is displaced or that God is subdivided to make up the universe. Both of these conclusions are erroneous and both are out of harmony with Scriptural teaching.

The only consistent deduction from the Christ-teaching is that God is All-in-all; that God is the only substance, and the universe is His reflection; that every creature of God exists as an idea in the divine Mind, and that, therefore, the material appearance of created things is only a false appearance. Sin, sickness, and death are the outcome of a misapprehension and a misuse of creation, including the false individuality of the man himself.

It is the mission of Christian Science to awaken mortal man to a consciousness of man's real being as a creature of Spirit, in order that he may follow the Scriptural admonition to "work out" his "own salvation," by putting "off the old man with his deeds" and putting on "the new man, which is renewed in knowledge after the image of him that created him."

[Olcott Haskell in *Pacific Medical Journal*.]

The Christian Scientist looks beyond the human mind to the divine Mind, God,—the Principle of man's being,—and so finds nothing which may not be trusted to the care of the creator of the universe. Christian Science is primarily a religion, and without the religious element of dependence upon God, it could do nothing.

If the practitioner of this is truly a Christian Scientist, evil influence is impossible, since the one effort is to awaken the patient to see for himself the power and perfection bestowed on man by his creator, God. Such a process is educational, and strengthens the patient's understanding and perception, thus leading him to a position where he is able to work for himself. To receive permanent healing a man must be improved mentally and morally as well as physically; indeed the physical healing is but the natural result of the truer life he has commenced to live. Some physicians are wisely warning the public against hypnotic influence; and even if results seem more difficult of attainment by a method demanding consecration to God, many would gladly seek this, in order to be sure of moral and spiritual gain at least.

[Algernon Hervey-Bathurst in *Western Mercury*, Plymouth, Eng.]

With regard to the unreality of sin and death, Christian Science teaches emphatically and proves that these things are not true; further, that our belief in them is all the reality they can ever have. We need, however, to be quite clear as to the meaning of "reality." By reality is meant that which is eternal, indestructible, created by God. An unbiased study of the Christian Science text-book,

Digitized by Google

"Science and Health with Key to the Scriptures" by Mrs. Eddy, will show how clearly the Discoverer and Founder of Christian Science points out the necessity of following in the footsteps of the Master, and of obeying implicitly his commands. Christ Jesus taught and proved that sin, sickness, and death were not to be submitted to, but overcome, and he was the Wayshower. He came to fulfil the law of God, and in so doing he healed the sick and reformed the sinner. There is no greater law than the law of God, and it is therefore evident that a right understanding of the law of God—good—reveals the unreality of any other so-called law of evil, sickness, sin, and death. Our ability to prove this is in proportion to our understanding.

The vicar pointed out that "pain, sickness, misery, and death are everywhere." Christian Scientists realize fully how real these things seem to the human consciousness, but they are learning also that the certain and only way of salvation from all these troubles is to let that Mind be in them "which was also in Christ Jesus." Were it not so, humanity would indeed be in sore straits.

[William E. Brown in *Pomona* (Cal.) *Daily Review*.]

Christian Science is founded wholly upon the Bible, and is the religion of Jesus. It is daily making practical Christians of those who seek its aid, redeeming them spiritually, physically, and morally. That which teaches us to obey the command of the Master to preach the gospel and heal the sick can scarcely be termed heresy. The great Teacher said, "Ye shall know them by their fruits." The growth of Christian Science everywhere is steady and sure. It is gathering into its ranks the weary and heavy-laden of earth, who rejoice that through Mrs. Eddy's discovery primitive Christianity is again available to heal to the uttermost all the ills of the children of men.

[E. M. Ramsay in *Glasgow* (Scot.) *News*.]

The Bible teaches that man was made good, that everything which God created was good, and that there was nothing which He did not create; that sin, disease, and all other ills are illusions, the outcome of a false sense; that Christ Jesus came to save us by showing us how to rise above these illusions, and that he promised that those who believed on him should heal as he had healed.

Mrs. Eddy holds firmly to the doctrine of the trinity as set forth in the gospel, but she believes that what is usually taught on this subject is unscriptural and therefore incorrect; she inculcates the highest possible morality, upholding no less a standard than that of the Sermon on the Mount; she accepts the whole gospel history,—the virgin birth, the crucifixion, resurrection, and ascension of our Lord. Nowhere does she say that Jesus Christ was "a mere healer of the sick;" she regards him as the Saviour, the world's redeemer; but she also points out that it was not the bodily presence of Jesus which saved the world, but the Mind which was in Christ, the Logos, the Word. "Before Abraham was, I am."

What progress hast thou made today?
I know not, friend, but since you question me
This can I say:
That you and I are both embraced
In one great wave whose onward way
Knows no resistance, pause, nor haste.
No more than God can cease to be,
Can we live, unprogressively.

KATHARINE T. PORTER.

AMONG THE CHURCHES.

MARSHALLTOWN, IA.

The last money due on the building indebtedness having been paid in, First Church of Christ, Scientist, dedicated its church edifice April 18 with simple ceremony, the regular Sunday services being preceded by the reading of a history of the church. The corner-stone was laid in the fall of 1902 and the building was completed during 1903. The cost was approximately ten thousand dollars, including the site.—*Correspondence.*

BLOOMINGTON, ILL.

The new First Church of Christ, Scientist, was filled at all of the services yesterday [May 30], on the occasion of the formal opening of the church edifice to the members and friends. A large number from out of the city were present to listen to the addresses and see the new edifice, it being estimated that there were at least two thousand people at the four services of Saturday and yesterday. Bliss Knapp of Boston lectured Saturday evening on the subject of Christian Science.

Some of the more important historical dates of the Christian Science movement in Bloomington are the following: Services held in private houses and at Washingtonian Hall from 1886, when Christian Science was introduced, to 1889; Sunday School organized May 5, 1889; first church service, 1890; first church organized Nov. 26, 1890; first church incorporated, Aug. 5, 1895; lecture by Edward A. Kimball at Chautauqua, August, 1893; purchase of Independent church, April, 1897; contract let for present church March 30, 1908; corner-stone laid July 11, 1908; informal service in new church April 4, 1909; formal opening and lectures May 29 and 30, 1909.

BELOIT, WIS.

Yesterday morning [July 5] at eight o'clock, on the corner of Bluff street and Garden lane, ground was broken for the erection of the Christian Science church, which it is expected will be completed and ready for occupancy before the close of the year. A large number of the officers and members of the church were present to participate in the event. At the suggestion of the First Reader, John E. Sargent, the definition of Church as given in Science and Health by Mrs. Eddy, was read by the chairman of the joint board, J. B. Dow, who then said in part,—

"The turning of the first sod, the breaking ground for the beginning of the erection of a church edifice for our organization, First Church of Christ, Scientist, in Beloit, possesses an interest and is pregnant with more far-reaching results than we of today can comprehend. That a grave responsibility rests upon us, and one which calls for sacrifice upon the part of each and all, will, fitly to consummate our purpose, become more apparent as the curtain rises. Our Leader has said that 'a great sacrifice of material things must precede this advanced spiritual understanding,' and without this spiritual understanding in some degree, none of us would be here this morning.

"In the economy of God we perpetuate our own happiness and well-being, by forgetting self and reaching out and ministering to the happiness and well-being of others. In the building of our church edifice, which will afford larger opportunity for others to come in with us and gain an understanding of that truth which so ministers to happiness and makes men free, we are working essentially along this line—the line of duty and the line of love—love to God and love to man.—*Beloit News.*

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

CHRISTIAN SCIENCE AND TEMPERANCE.

IN these days when so much is being said and done for the cause of temperance, the question, "What is Christian Science doing for temperance?" is frequently asked. It would seem sometimes that the inference sought to be conveyed by this question is that the Church of Christ, Scientist, as a religious organization, is doing nothing to promote the welfare of humanity along this line, because it has established no institutional method and undertaken no concerted movement to deal with this particular form of disease or sin. That such an inference cannot properly be drawn when the individual work that is being done daily by Christian Scientists is taken into consideration, is shown by the many testimonies of the healing of the liquor habit which are given at the Wednesday evening meetings and through the periodicals.

There have been thousands of such cases of healing, and as an example of the many testimonies to this effect we republish the statement made by W. P. Currigan of Denver, which appeared in a recent issue of the *Sentinel* (Vol. XI., No. 43, p. 856) as follows:—

Through love of humanity and out of gratitude to Christian Science, to whose aid I owe my redemption from the liquor habit, I contribute this unsolicited testimonial of the benefits I have received. I wish to state that I was for a period of fifteen years, prior to 1904, addicted to the constant and excessive use of liquor. So protracted had been my debauch, and so strong was my craving for alcohol, that I was incapacitated both mentally and physically for either business or labor. Upon the advice of a friend, in February, 1904, I consulted a Christian Science practitioner. She gave me one treatment, and the effect was instantaneous and all but miraculous. The appetite for liquor left me, and I have not to this day—more than four years—taken a drink or had the slightest desire for it, and this despite all manner of temptations. My health is now perfect, my strength normal, and my intellect clear. I send this testimony with the hope that others who may be in bondage as I was, may profit as I have done by this wonderful Science.

Without disparagement of other means of combating this evil, we can frankly claim for Christian Science that it is one of the most potent elements of the great wave of temperance reform which is now sweeping over the land, and its greatest merit is that it goes to the very bottom of the difficulty—heals a man physically, mentally, and morally. The work of breaking down and eradicating the evil of intemperance is one which must be done individually, and as in every case of the overcoming of evil, Principle must be demonstrated. Fear, will-power, remorse, resentment—such passions as these are not the basis upon which any reform can be established, although, unfortunately, appeal has frequently been made to them in other methods of temperance work.

Cases such as the one quoted above are unquestionable proofs of what Christian Science is doing today for temperance, and we may well ask, in the words of our Leader, apropos of an impulse to temperance, along with other good works, as a result of Christian Science teaching, "If such are the present fruits, what will the harvest be when this Science is more generally understood?" (Science and Health, p. 348).

ARCHIBALD MCLELLAN.

NEITHER YESTERDAY NOR TOMORROW.

THE presence and power of divine Truth may be thought of as having been demonstrated in the past, or as capable of being demonstrated in the future; nevertheless, one may have a deep conviction of the truth of both these propositions and yet have no tangible or saving hold on spiritual things, and for the reason that the truth is redemptively effective for each of us only in the "now" of consciousness. Here alone is its energy kinetic, its salvation achieved. As St. Paul says, "Behold, now is the accepted time; behold, now is the day of salvation."

Christian belief has ever been at serious fault in its habit of thinking great truths so persistently in the wrong tense as practically to limit all faith in their efficiency to that tense. Take for instance its teaching respecting the divine nature and ordering. Christian theology has always been trying to make it clear that God has been just and good in the past, and that He is going to be in the future; but that He is now just and good in His every manifestation, and hence that all injustice and evil are not of Him, —this, theology has practically denied in so far as it has imputed the horrors of earthquakes, etc., and the suffering of innocence through hereditary disease, to the determination of "an inscrutable Providence."

So, too, with respect to God's creative activity, the creeds have taught that in the beginning all things were made by Him, and were therefore good, and that some day all things are again to be the harmonious expression of the divine law and government; but that all being, all reality, is ideal because it is the immediate and continuous manifestation of the activity of omnipresent Mind,—this has been foreign to Christian thought. In Christian no less than in general belief, secondary causes have practically ruled God out of the universe of today.

Further, respecting man, Christian creeds have declared that at some time in the past he was spotless, the very image of God, and that through redemptive grace he may again become fitted for the fellowship of angels; but the truth that God's man is now perfect was a stranger to Christian faith when the voice of our Leader was first heard chiding and correcting belief with its logical insistence upon the present unmarred perfection of every divine idea,—that perfect man neither was, nor will be, but *is*.

Yet again,—as the result of the teaching that the ills of life are divinely imposed and render a necessary service in the formative period of Christian character,—health and happiness, freedom from the serfdom of sin, has for the most part been associated with the future, and this regardless of the fact that the great demonstrator of Christianity constantly taught that "the kingdom of God is come," and that its triumph and joy are immediately bestowed upon all who yield themselves to its sovereignty.

Christian Science voices a vigorous protest against this habit of committing the substance of good to either the past or the future. It is preeminently a present-day religion, teaching that in the measure of our apprehension of Truth all the divine activities are found to be immediate, and that in Christian metaphysics they cannot otherwise be even conceived. Now, means nearness, and nothing is more significant to all our thinking and doing than a clear apprehension of that which *is*. Christian Science discloses the immediateness and ceaselessness of that activity of divine Mind which constitutes all being and all law, and in the measure of our apprehension of this Science all the actualities of Truth and Love are found present in the "now" of redeemed consciousness. Every glad reminiscence and every quickening hope pays full tribute here, and the kingdom of heaven is indeed "at hand," as Christ Jesus declared.

JOHN B. WILLIS.

"SPIRITUAL BEAUTY."

In Science and Health we are told that "it is ignorance and false belief, based on a material sense of things, which hide spiritual beauty and goodness" (p. 304). The love of the beautiful is inseparable from human aspiration; the pity is that ignorance of spiritual reality should ever attempt to separate beauty from goodness, as is too often the case. If it were really possible to do this, beauty would cease to be, for all of God's ideas are so vitally linked together that any attempt to separate them must lead to the loss of all; that is, so long as one entertains this false belief. The recognition of this fact is at least partially expressed in that sense of proportion which is always held to be an essential of all true art.

In Second Chronicles we read that singers were appointed to "praise the beauty of holiness;" and among the prophets we find this truer sense of beauty pervading to some extent all their thought. This is especially true of Isaiah, who with glowing words describes the grandeur of spiritual realities, as the veil of sense is drawn aside. He calls upon Zion to awake and put on strength: "Shake thyself from the dust," he says; then he bids her put on her beautiful garments, and adds, "How beautiful upon the mountains are the feet of him . . . that publisheth salvation." It is also he who tells the afflicted that as the light breaks upon them their "health shall spring forth speedily." Even according to physical belief there can be no permanent beauty without health, but Mrs. Eddy says, "The embellishments of the person are poor substitutes for the charms of being, shining resplendent and eternal over age and decay" (Science and Health, p. 247).

We read that when Moses came down from the mount where he had for forty days communed with God, his face shone so that the people could not bear to look upon him; and we may well ask how this radiance, this glory, came to him. He had been receiving the law of God, which, translated into the terms that humanity could understand, meant the sternest moral prohibitions; but the spiritual sense of this law so purified Moses' consciousness that it was no wonder his face shone with the beauty of Spirit, no wonder that when he was an hundred and twenty years old, "his eye was not dim, nor his natural force abated."

A very striking utterance of the Master respecting beauty is this stern denunciation of the scribes and Pharisees: "Woe unto you, . . . for ye are like unto whited sepulchers, which indeed appear beautiful outward, but are within full of dead men's bones, and of all uncleanness." He had doubtless seen that the false sense of goodness and beauty is the grave of human hope and faith. While he did not, as it seemed, say much about beauty, his whole work tended to unfold goodness and beauty, mental, moral, and physical, where disease and deformity had marred both mind and body. The purity he taught was that of the heart, and it made the body pure. The psalmist tells up of the king's daughter who is "all glorious within;" and Peter says that the true woman seeks not "outward adorning," but "the ornament of a meek and quiet spirit, which is in the sight of God of great price."

We read that on the mount of transfiguration the disciples beheld their Master, with Moses and Elias, radiant with the glory of spiritual being, even his garments expressing the spotless purity of Spirit. The disciples could then but faintly grasp the meaning of that scene, but we rejoice that they have told us of it, and that we, like them, may grow and understand. Christian Science links us to the great, the good, the beautiful, the true, in all the ages, and with the psalmist we pray, "Let the beauty of the Lord our God be upon us."

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

Boston, Mass., July 30, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—We, the committees on publication for the United States and Canada, assembled in Boston, wish to express to you our earnest appreciation of your great kindness in making it possible for us to be received and entertained in your home today. We are profoundly grateful for the opportunity thus afforded to see you in your home, and we are especially gratified to observe our Father's loving care of you manifested in such evident good health, and to know that you are daily about His business. The pleasure of visiting your home was the more appreciated because it was unexpected, and was agreeably supplemented by the courtesy of the members of your household.

We thank you for your greeting and message. In response to your loving admonition to know you not through your personality but through your book, your writings, and your great love for us and for all mankind, as well as your constant admonition to follow you only as you follow Christ, we answer that the test of our fidelity shall be the fruits of our labors in obedience to your precepts and example.

Faithfully yours,

NORMAN E. JOHN, WILLIAM E. BROWN,
NELLIE M. JOHNSON, GEORGE SHAW COOK,
J. R. MOSLEY, *For the Committees.*

Kansas City, Mo., July 10, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—Third Church of Christ, Scientist, in semiannual meeting assembled, desires to convey to you renewed assurance of love, gratitude, and loyalty, and also of deep appreciation of your untiring efforts to protect and bless the workers in the vineyard of our Lord. In no period in the history of our Cause has the truth of your teachings been more demonstrable, for at no time has error seemingly been more rife in its efforts to persecute and destroy. Never has your own forcible statement, "The mental arrow shot from another's bow is practically harmless, unless our own thought barbs it" (Miscellaneous Writings, p. 223), been more patent; and that you are unscathed by the darts of malice and misrepresentation, is today the greatest proof of the efficacy of that truth which protects as well as heals.

That we may so live as to do credit to you and our Cause, is the sincere wish of your devoted followers.

Faithfully yours,

ALBERT E. LOMBARD, MRS. LAURA COATES REED,
MRS. LILLIE C. WOOD, *Committee.*

Dorchester, Mass., April 28, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—Many times I have desired to send you a message of love and gratitude, and today the impulse is not to be resisted. About four years ago I was in a state of mental darkness, depending absolutely upon material sense testimony, immersed in worldly pleasures, with no apparent desire for anything higher. At that time the loss of my mother awakened me to a need of something which I had not, and I began to seek. The promise which says, "Seek, and ye shall find," was amply fulfilled. The healing Christ was at hand, and led me to Christian Science. During the first reading of our text-book a wonderful spiritual unfolding took place in my consciousness. Material pleasures, so called, ceased to please or tempt, and sense testimony was proven false. Old things passed away and all became new. I began to know something of

Digitized by Google

the kingdom of heaven within, and of the peace which passeth understanding. I am seeking each day to know more of the truth which makes us free.

For this spiritual awakening with many "signs following," I am trying to show my gratitude by being a willing worker in God's vineyard. I thank God for this revelation of Truth in Christian Science and for giving you strength and courage to deliver this wonderful message of freedom and salvation to humanity.

Most lovingly and gratefully yours,

MRS. KATHERINE C. STURGIS.

[Telegram.]

Lexington, Mass., July 11, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

The Christian Science Society of Lexington, Mass., wishes on this Communion Sunday to extend its love, loyalty, and allegiance to you, acknowledging anew its gratitude for the many blessings which have come through your teachings.

Christian Science Society of Lexington, Mass.

Rutland, Vt., July 17, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—The first time that Christian Science was offered to me I was too busy trying to find God by another road to recognize the "true vine." Later I was empty enough and hungry enough to come and be filled. I was not strong or well, but supposed no one else was, a half-dead-and-alive condition being to me a part of the human experience. All I wanted was God and a religion that would ring true and bear the test of free, honest inquiry. From the time I was twelve or fourteen years old I had searched for the God the Bible promised but failed to give me. What became of those first six months after I opened Science and Health in search of Truth I do not know. I had found God. No one without having had a similar experience can understand what that meant to me. God was real and at hand,—a friend who understood and knew; Principle, true and unvarying. Nothing else mattered. I went to a practitioner; I discussed and analyzed all the possible weak points that I could find. It became clear that there were none. For the time being, earth had passed away.

While I had no doubt in regard to the physical healing, it did not seem to appeal to me in a personal way. What had I to do with indigestion, nervousness (even though it was extreme at times), etc.? I had found a friend in God! Nevertheless, before I had read very far in Science and Health eye trouble of thirteen years' standing was healed. My glasses met with an accident and were sent to the optician, but they miscarried in the mail. The first two days I had slight headaches. After that I suffered no inconvenience from pain and used my eyes as well as ever. At the end of six days, when the glasses had been found and returned, I had no use for them, and have never worn them since that time.

Before the end of my first six months' study, which was not merely study but was my revelation,—three other chronic functional troubles, that for years I had considered a part of myself, disappeared. When and how I did not know. I was pleased and grateful for these proofs of healing, but they seemed of little importance compared with the presence that was nearer than breathing. The cry of the psalmist echoed and reechoed in my heart: "One thing have I desired of the Lord, that will I seek after; that I may dwell in the house of the Lord all the days of my life, to behold the beauty of the Lord and to enquire in his temple." It was the unexpressed longing of years, and now the Principle and rule are supplied. In a comparatively short time a part of this prayer was answered in a very literal way: a home was offered me, where I ask more earnestly and intelligently for the deeper spiritual realization of David's petition. The inspired books which you have given to a waiting world, with the Bible, are my only earthly treasures.

And the general public and the press think we love you too much! It may seem out of proportion to the non-Scientist, who does not know that you have shown us the fountain-head of love. Perhaps others, like myself, had little to give before you turned us to the divine source.

Very sincerely yours,

ELIZABETH SHAW HOFFMAN.

Boston, Mass., June 18, 1909.

Dear Mrs. Eddy:—I have benefited in so many ways by your labors that to write you my thanks seems a small thing. The first reading I had was the Preface to "Miscellaneous Writings," and I was sure at once that this was a consistent religion. Since then (about eleven years ago) Christian Science has helped me physically and morally, and I have seen in my own experience problem after problem solved by its teachings.

Wishing to acknowledge to you my gratefulness for this better understanding of Life as God, I am

Yours in truth and love,

JAMES HORACE FILE.

Philadelphia, Pa., June 7, 1909.

Dear Leader:—My heart has gone out to you many times, and in this hour I cannot refrain from writing a few words of love and gratitude to you for all that your words and works have done for me. Science and Health has indeed been the "Key" which has unlocked the Bible to me, and it is teaching me the Science of being. I thank you for the blessed truth so simply and so clearly revealed to us in your writings. Trusting that I may always be worthy to be called one of your followers,

With love,

IDA A. BENNETT.

Joplin, Mo., June 3, 1909.

Mrs. Mary Baker Eddy, Boston, Mass.

Dearly Beloved Leader:—Humbly I send to you my gratitude and love for the understanding of God, and man as His image and likeness, that has been revealed to me through Christian Science. This understanding has enabled me to rise from dependence upon a mortal mind and body for happiness and health to the consciousness that "the Lord Jehovah is my strength and my song."

Only those whose thought has been lifted from a faltering faith in an incomprehensible deity to a realization that God is Life, Truth, Love, "a very present help," can know how deeply not only I but all the world is indebted to you. May He bless you more and more abundantly is my daily prayer.

Gratefully yours,

LIZZIE R. HALYARD.

NOTICE.

CORRESPONDENTS who have sent orders for the Hymnal to the Publishing Society during the past month or two are informed that there has been delay in securing permission to use some copyrighted hymns, and it is necessary to await the completion of arrangements before issuing any Hymnals. To avoid inquiry and correspondence, it may be stated that delivery will be made as soon as it is practicable.

THE LECTURES.

KNOXVILLE, TENN.

Frank H. Leonard lectured May 25 on Christian Science. He was introduced by the Hon. S. G. Heiskell, who said in part,—

We appeal to history in vain to tell us of a religion that was founded by woman, and that too when we know that without woman all religions would have perished from the earth. Woman has achieved distinction with the brush of the painter and the chisel of the sculptor, she has written fiction that will live always and poetry that appeals to all men, she has been a devotee of the fine arts in all lands, she has practised medicine and nursed the sick back to health, she has been the queen of kingdoms and the empress of empires; but with all her varied activities and all her historical devotion to some god and some religion, she has been content to follow in the religious footsteps where men have led, to worship at altars that men have erected, to shout the praises of some deity that men have portrayed, and to aspire for that hereafter which men have said would finally come.

While it has been said that no woman ever founded a religion, it was left to the nineteenth century to witness the coming of Mary Baker Eddy, who, if she was not to found a new religion, was at least to make so radical a departure in the interpretation of an established religion, and to impress herself and her doctrine so profoundly upon thousands of men and women, that she virtually stands as one of the religious founders before the world. I am not a follower of Mrs. Eddy, and I am not a believer in Christian Science, but I say that mankind is simply forced, even against its will, to recognize the masterly aggressiveness, the unflagging zeal, the tireless persistency, the intellectual adroitness, and the intrepid boldness with which this New England woman has unfurled her standard, inscribed with her doctrines, and challenged combat with the established thought of the Christian world.

Correspondence.

MEMPHIS, TENN.

In introducing Prof. Hermann S. Hering, who lectured on Christian Science at the Bijou Theater, May 27, the Hon. George S. Yerger, formerly attorney general, spoke in part as follows:—

I am sure I express the sentiment that controls each and every one of you, when I say it is with feelings of the deepest pleasure that we come to greet, to hear, and even to feel the presence of this apostle of peace, of happiness, and of optimism. In an age in which, unfortunately, fault-finding, abuse, and vituperation have become so general—and to such an extent is this true that many who seek popular favor base their hope of obtaining it upon their ability to vilify and malign their fellows—in such an age, I say, the fair, thoughtful, just man, to whatever faith he may be wedded, must admit the grace, the beauty, and the force of the lives of the faithful representatives of Christian Science. To paraphrase the lines from Proverbs, their ways are ways of cheerfulness, and all their paths are peace. The sincere Scientist keeps inviolate the laws of God and man. Tenderly merciful, sweetly charitable, they gently carry in their daily walks the gospel of love for all creatures. They actually practise the good they preach, and they live and grow in the sunshine and warmth of the Christian love they feel for their fellow-man.

But why should I, with limited knowledge of their tenets, attempt to tell you what they are, when there is one of their faith present tonight to talk to you?

Correspondence.

[Translated from *General-Anzeiger*, Frankfurt a|Main, Germany.]

FRANKFURT A/MAIN.

A lecture on Christian Science was delivered last week [June 7] by Francis J. Fluno, M.D., member of the board of lectureship of The First Church of Christ, Scientist, in Boston, Mass., formerly a practising physician of Oakland, Cal. During the year 1908 Dr. Fluno has delivered lectures in Australia and China, and is now on his way to carry the message of Christian Science into the towns of South Africa. Dr. Fluno was introduced by Frau Clara Friedrich of Dresden, one of the earliest German followers of Christian Science. She referred to this movement as an ethical and therapeutic movement which has attracted the attention as has hardly anything else during the past decade; which has met with opposition, gained influence, and yet goes on its way quietly and unswervingly, healing and saving mankind. Is this teaching only a passing phenomenon, or is it a revelation which has come to stay? A German poet has said: "There is but one science from which proceeds true life for time and eternity—the science of the redemption of mankind in God." And that is Christian Science—the revival of the religion of Jesus Christ—a return to primitive Christianity.

Dr. Fluno said that this Science is the Science of being, the law of Life, of Truth, and of Love, understood and demonstrated. It cannot fail, just as the science of numbers cannot fail. As Christian Scientists are students of this divine Science, they are gradually enabled to express it in their thoughts, in their lives and works. The Bible, and "Science and Health with Key to the Scriptures," as text-books, reveal the fact that God is the only Mind, and that the individual human mind must be corrected by this divine Mind. This Science is therefore the direct opposite of hypnotism, because, instead of teaching many minds, which would rule one another, it teaches the one Mind—God's Mind, in which is no evil, no sickness, no sin nor death. It is the scientific understanding of the law of Life, brought into a system and made practical not only in the healing of bodily ills, of sin and all evil, but in their destruction and banishment from the face of the earth. In this teaching one does not find life to be a burden laden with sickliness, surrounded by obscurity, and darkened by fear, but one finds life worth the living. Health is found in the place of sickness, and almighty Love in the place of fear.

LECTURES AT OTHER PLACES.

TESTIMONIES OF HEALING.

I should like others to know the joy and peace which Christian Science has brought to my home. For two years it seemed as though God had forsaken us. Five doctors had failed to cure my husband of a nervous breakdown, and he was obliged to retire from business. Just when the last doctor had suggested hypnotism, a Christian Scientist friend happened to call, and she told us that nothing was too difficult for God to heal, and went at once, missing her midday meal, to get a practitioner. I bought a copy of the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and opened it out of curiosity, but the Preface was so beautiful that I read it right through, and on to a few pages of the chapter on Prayer, when suddenly everything was illumined, and I knew I had found the truth for which I had been seeking all my life. My heart overflowed with gratitude, and I at once took off a ring which I had worn for rheumatism, threw away my eye-glasses, and all medicines, including hair tonics, and was healed instantaneously of a bad cough, which had greatly broken my rest for six years, a diseased lung, an internal weakness, etc. Four months later, three hours' reading of the "little book" put away a severe gastric attack. One Wednesday evening I went to the service at First Church of Christ, Scientist, London, without any voice, but was healed during the service and was able to sing the last hymn quite clearly.

I have read little or nothing but Christian Science literature since the day I had the text-book, and my greatest happiness is to read the Bible (which I have always loved, but never before understood) with it, as this truth makes it all so clear, and gives me understanding. For all the healing I am very grateful, but I know that the only way in which I can show my gratitude for the spiritual understanding is to follow in the way pointed out by our Leader,—to live the truth,—and this I am daily striving to do. My husband's health has been restored, and he is now doing his own work. My maid also has been healed of many ailments through the reading of the text-book. Ever since I can remember I have wished that I could have lived when Jesus was on earth, but now my thanksgiving is that I am living in this age when Mrs. Eddy has, by her unselfish and pure life, again declared and demonstrated for the good of mankind the great truths which Jesus taught. I am grateful, too, for having been privileged to help others.

ALMA HEPWORTH, London, England.

Through the social glass and medical prescriptions I had formed an appetite for liquor, and I frequently took too much of it. After a space I felt bad, and then I took more drink, as it seemed to revive me; but after the effect of it had worked off I felt the need of yet more, and before I knew it I would be again intoxicated. After some years I got so sick that I could not work. Surely "the way of the transgressor is hard." I was paying the penalty for not keeping the commandments of God. My once happy home was to me a veritable hell. I had made it so myself in part. I left it voluntarily, because I could not endure the thought of eating bread I had not earned. My conscience drove me out.

I have said I was sick. I had been so for many years, but could find no help. I did, however, find help when I took up Christian Science, and with it came health and happiness. I am a debter to God first, then to our beloved Leader, who gave us the explanation of the Scriptures that through demonstration is proven true. In Science and Health, we learn how the "old man" is put off. The "new man" is not a drunkard, and he is not sick. Ten years seems a long time without a drink, but I do not crave it any longer. The "old man" smoked and used strong drink, also strong language, but divine Love took away all desire for them. It has been said that the price of the text-book, Science and Health, is high, but if I had had all the money in the world I could not otherwise have found my freedom from the slavery to false appetite. Jesus said we should "render to Cæsar the things that are Cæsar's, and to God the things that are God's." Through Science and Health I found divine Love and my freedom.

NEWTON A. OLESON, Pontiac, Mich.

[Translated from the German.]

I want to testify with a grateful heart to the healing of our little boy through Christian Science. When he was three years old he had a bad case of hernia. The physician whom we consulted at that time said that the hernia might heal with the years if the boy wore a truss continually, but although he did so, and without it was unable to walk at all, and would suffer the greatest pain, this condition remained unchanged. When the child was six and a half years old I took him again to the physician to be examined. The physician said that the boy now had double hernia, and that an early operation would probably be the best thing, as he would otherwise be afflicted with it all his life. Then God showed us the way to Christian Science. In the beginning of the year 1909 we attended a Wednesday evening meeting for the first time, and have continued to be regular attendants also of the Sunday services. Through an earnest reading of *Der Herold* we have come to some understanding of this truth. I went with the boy to a Christian Science practitioner, and with one treatment he was healed of the rupture. Our gratitude to God, and to our noble Leader, is unbounded.

I would also like to tell of a case in which I treated my family and myself. I became very ill on Thursday before Easter,—had high fever, pain, great difficulty in swallowing; in fact, all the attendant symptoms of acute throat trouble. I treated myself with my slight understanding of the truth, and had not the least fear. I knew that God helps us to overcome every ill if we love Him supremely, trust in Him, and pray earnestly. My condition improved perceptibly, and to my great joy on the first Easter holiday I could go out, although I was still a little weak. Meanwhile our three little children as well as my husband had been taken ill with the same symptoms. The children were all delirious, and the symptoms were very alarming, but I had not the slightest fear. Jesus' words, "Lo, I am with you alway, even unto the end of the world," came to my mind, and I worked as well as I knew how. The children went to sleep, and when they awoke next morning the fever had left them and they were able to get up and play. Their throats healed gradually; and in the afternoon I went out with them for a walk. My husband too was immediately freed of all the symptoms of the disease.

I am exceedingly grateful to Mrs. Eddy for the understanding which we have gained through Christian Science, and we thank God that He has shown us the way to the Christ-healing.

FRAU HELENE BENECKE, Berlin, Germany.

One morning my little boy, four years of age, was unable to get up and be dressed. He seemed to be very ill, vomiting several times, and he had a very high fever. He gradually grew worse during the morning, and by noon I was very much alarmed, so as soon as I could get ready I went to see a practitioner. It was about two o'clock when I arrived at her house and asked her to treat him, and about four o'clock he awoke and asked for something to

Digitized by Google

eat. He ate a cupful of broth and asked for more, which was also given him. At six o'clock he was sitting up in a chair, and insisted upon sitting at the table with us and eating again. That was the last of his sickness. He ran around the house for a while in the evening, then went to bed, slept soundly all night, and in the morning was perfectly well.—MRS. JOHN H. GUY, E. Braintree, Mass.

I wish to express my gratitude for the many benefits received through Christian Science, and hope my experience will be a help to others who may be in as great need of Christian Science as was I. Although I had known something of this teaching for several years, and believed it to be the truth, I was living anything but a Christian life up to the time I called upon a practitioner to treat me for boils, a disorder which had been giving me a good deal of trouble for some time. This disease was healed, but best of all I was also healed of some of the sins to which I had been subject.

The **desire** to do better began to grow on me, with the result that after a few months' earnest study of Christian Science I have been able to rise above fear, uncertainty, and sin in a remarkable degree. The temptations which a few months ago seemed to master me, have now no power; in fact, there is no temptation at all, even when placed in the same circumstances. I seem to be a new man, and the whole world looks different. I sometimes think it must be a new world, and that the old one has passed away. This condition has not been gained without hard work and struggles, also what seemed to be sacrifices; but I can now see that nothing was sacrificed, it was all gain. I hope to prove my gratitude for this great truth by living as near as possible that life which Jesus taught us to live, and which is pointed out today by our dear Leader, Mrs. Eddy. May I learn to reflect the Love that is God.—GEORGE E. ADAMS, Savannah, Ga.

Of old the psalmist sang, "What shall I render unto the Lord for all his benefits toward me;" and Mary, "highly favored" of God, said, "My soul doth magnify the Lord, and my spirit hath rejoiced in God my Saviour. . . . For he that is mighty hath done to me great things; and holy is his name." Truly I too have great reason to be thankful for this message of divine Love that has been revealed to us in Christian Science. This truth has healed me of heart disease and an affection of the lungs, and for twenty years has been the only medicine for myself and family. We have indeed proved it "a very present help" in every time of need.

I became a member of a church when quite young, and am thankful for the good received in that church, but when sickness came and there was said to be no help for me, I wondered why God did not heal us now as He healed the sick and helpless in Jesus' time. I have since learned that I was then praying to an "unknown God," and Jesus said, "This is life eternal, that they might know thee the only true God." I have seen many phases of disease flee before this understanding of God as the only Life, but I think the most beautiful experience I ever had was when I was healed,—when the blind eyes were opened, just a little, and I began as a child to see God's universe,—whereas, before, I was sick and weak, now I am well and strong; whereas all was trouble and sorrow, now all is joy and peace. The half can never be told. About twelve years ago I had all my upper teeth extracted, and last May a friend and I went to a dentist to have some more extracted. The friend had fourteen removed, and I had ten, all with no other help than Christian Science, and in both cases the operation was nearly painless. The dentists were very much surprised.

The Christian Science *Sentinel, Journal,* and *Quarterly* have been a great help; I often wonder how we ever got along without them, and as to our dear Leader, how can I express my gratitude to her? I can only do so by striving to follow in the footsteps of the Master, as she has taught us, and my one humble desire is to be a true Christian Scientist.—MRS. ELIZABETH HORN, Ash, Ont., Can.

I think it is time for me to tell what Christian Science has done for me. About four years ago it found us in a bad condition; our home was a miserable place on account of sickness. I was very ill with a rheumatic attack, and to mortal sense the end was near at hand. I thought then, that if death would relieve me, it was welcome, for I had suffered so much that I longed to die. Then I would think about my three little children, and I felt that if God would just spare me to care for them I would be glad. I also thought that God had afflicted me, but I am now sorry that I ever charged God with sending evil in that way.

When the doctors had given me up and said they could do nothing more for me, we then turned to Christian Science as the last resort. We left God until the last, but He should have been first. My husband sent after a Christian Science practitioner, and when she came I thought she was the most pleasant looking woman I had ever seen. She was the first Scientist that I met, and she told me I did not have to suffer. I did not then understand this, but she treated me, also read to me, and stayed all night with me. Next morning, with a little help from her, I turned for the first time without a lot of misery, as I had been nearly helpless for six weeks.

Christian Science has made a new home for us, and has made me a new woman, and now the Bible and "Science and Health with Key to the Scriptures" are my daily companions. We take the *Sentinel* and *Journal,* and they are welcome visitors at our home. We do not see now how we ever did without Christian Science. I cannot find words to express how glad I am for this Science. I give God the praise, and I am very grateful to dear Mrs. Eddy. I am striving to be worthy of the name Christian Scientist.

MRS. RHODA BROWNING, Vashti, Tex.

The Word has been "made flesh" to me; therefore I can confidently say, "The Lord is my shepherd; I shall not want." I have felt for a number of years that I should give my testimony for the truth in Christian Science. Twelve years ago I was given absent treatment by a practitioner in Los Angeles, Cal., and was healed of a digestive disorder and heart disease when all other remedies had failed. I had lost flesh until I was a mere skeleton when I wrote to my cousin for treatment. I knew very little about Christian Science, only that this cousin had been most wonderfully healed, several years before, through Christian Science, of a serious affection of the lungs. I also knew of her demonstrations afterward in her father's family.

Like many others, I had religious prejudice to overcome, but after reading "Science and Health with Key to the Scriptures" by Mrs. Eddy, it was very plain to me that Christ's religion of healing was once more being demonstrated. Now when I read the Bible with Science and Health, it is with a different understanding than formerly. I have never had the privilege of attending a Christian Science church, but I take the literature, and my husband and I read the Lesson-Sermon together each Sunday, as he is in sympathy with me. My demonstrations have been limited, but I feel that "divine Love always has met and always will meet every human need" (Science and Health, p. 494) in my case.

Last summer, while the cousin already mentioned was

Digitized by Google

visiting at my home, my five-year-old granddaughter, while playing, cut her bare foot badly on a rusty tin can. She came in crying, and we washed the blood off and bound up the foot. My cousin held the child on her lap a few minutes, and she quit crying and was soon running about at play, and never even complained of the injury. The wound soon healed, and all who witnessed it thought it a beautiful demonstration of the divine power in healing. I am very thankful for the light that has been given me through Christian Science.

ALICE A. MILLS, Okeene, Okla.

[Translated from the German.]

About fifteen years ago I fell and injured my foot. It continued to cause me great pain, and I had much medical advice, but all in vain. I was then fortunate enough to have my attention called to Christian Science, and I immediately applied to a practitioner. After the first treatment I at once felt a decided improvement, so that I could go up and down stairs without pain, and after a short time I was completely healed. I then diligently read the *Herold,* with the hope of getting nearer the truth.

I thank our heavenly Father for my health, and for this revelation of Truth, and I am grateful to Mrs. Eddy. The spiritual blessing which Truth brings is far greater than the physical healing.

F. B. HOFMEIER BUTTIKER, Basel, Switzerland.

After taking up the study of Christian Science, I often wondered if I could be faithful if great danger were to threaten one of my children, and a short time ago I was put to the test. My little son was taken with what seemed to be an ordinary sore throat, but as my work did not appear to relieve him, I called for a practitioner. Very soon it seemed wise to have a physician's diagnosis, so a doctor was called. After an examination he looked grave, and finally he told me that he thought my boy had a fever and throat affection together; that he considered him a very sick child, and before leaving he intimated that he had seen children not so ill as he dead within two hours; leaving me to draw my own conclusions.

Right then and there I demonstrated for myself that I was not afraid to leave my boy in God's care, knowing that the omnipresent power of God was stronger than any law of *materia medica.* The physician was asked to notify the board of health, in order that they might take whatever steps they deemed necessary in the case. This, however, was late in the afternoon, and they were unable to take the matter up until half past ten the next morning. That night the battle with disease and the medical law was fought and won, and it was demonstrated that "the power of Christian Science and divine Love is omnipotent. It is indeed adequate to unclasp the hold and to destroy disease, sin, and death" (Science and Health, p. 412). The next morning, when the physician called to take a culture of the throat, no evidence was to be found, and we were not quarantined, though during the remainder of the time we kept a strict self-imposed quarantine for the benefit of outsiders. In eight days the same physician was again called, and pronounced it safe for my little boy to be released from his room. All the disagreeable after effects usually supposed to follow this fever were met and overcome, and in two weeks he was back at school.

I am grateful for this experience, inasmuch as it demonstrated to me that we can with perfect assurance trust our all to God, knowing that our loving heavenly Father never fails us when we "ask in faith, nothing wavering." I am grateful for the loving and faithful work of our dear Leader, through whose discovery of Christian Science this experience was made possible.

FANNIE C. LAIRD, Los Angeles, Cal.

It is only three years since I came from darkness into the light of Christian Science, and to me the spiritual uplifting has been wonderful, to say nothing of the physical benefits which I have received. I think I am safe in saying that I did not know what Christian Science was until I began to attend the services, three years ago.

On the evening of April 18, 1908, I retired for the night with a sense of headache, sore throat, etc., and when I awoke the next morning I found that my body was completely covered with a rash. After many difficulties had been overcome, word was conveyed to a Christian Science practitioner of my condition, and she at once gave me absent treatment; but the parties with whom I was staying, not being Christian Scientists, became frightened and called in a doctor, against my wishes. The physician made a thorough examination, and pronounced my ailment suspiciously like small-pox. He told me to stay in bed and await further development. The next day he returned, with two other physicians, one being the health officer; but much to their surprise they found that the rash had entirely disappeared and that I was feeling fine. I had no medical aid whatever.

I owe much to Christian Science, and gratitude to Mrs. Eddy for the help it has brought me. Thanks be to God, for the revelation of this wonderful truth.

ARTHUR WICHMAN, Morton, Minn.

Before coming into Christian Science I had no church home, as I could not harmonize my thought of God with that which was preached by the popular church. Yet I was not an infidel, for I believed in a Supreme Being, a higher intelligence that governed the universe and man. Like Thomas I demanded, Show me God, what He is, and where to be found. I wanted a God who was love, more tender than any earthly parent; not a God of destruction, who gave all the heartaches of which men accused Him. Yet I lived on in mystery, hoping for the revelation which I felt sure would come. I studied the Bible only to be able to argue against everlasting punishment, predestination, ritualism, etc., all of which was not pleasant or lovable to think of, but I did want all to grow in grace here and hereafter. I had been taught that at death the body was like a bird's nest. The better part of each had departed to a higher realm.

When I went to Chicago in August, 1898, I determined to investigate Christian Science before returning. I was planning for an opportunity to do this alone when, quite to my surprise, a very dear lady, one of Mrs. Eddy's students, called at the home where I was visiting. I at once recognized what I called the working of God in answer to my desire to know the truth about Christian Science, and I made quick use of the opportunity to ask questions. I was told that the whole truth was in the Bible, as Jesus taught it, and that Science and Health was the "Key" which would show to the world that the Bible was no longer a sealed book, but that it was the word of God to man, the chart of life, revealing God and His Christ, and man as God's image or reflection. She told me of the Ten Commandments, that they were all in one, and one in all. She led me to Christ's Sermon on the Mount, then to the eighth chapter of Romans, and showed me how Christian Science was a practical religion—telling me to seek, and I should find; strive, and I would enter.

I bought a copy of Science and Health and at once began its study, and what revelations I found! I was not at that time interested in the treatment; it was the religion that I was seeking for, and it was all so beautiful that I was content. I little knew that it was the theology which healed. When I was puzzled on any point, I would go to a practitioner for a treatment, just to get an answer to my questions. Soon different complaints began to leave

Digitized by Google

me, until I was freed from severe rheumatic and nervous disorders, also a chronic affection of the stomach, and a heart trouble which for three years had prevented me from lying on my left side. All these disappeared without special treatment. I at once sought for a higher understanding through class instruction, and for eight years I have given my entire time to church work and healing. I do know that Christian Science never fails, no more than can mathematics. If it seems to fail, it is for want of more of the Christ Science.

I am truly grateful that there lives in this day a woman who has been so pure and holy, and near enough to God, as to apprehend the spiritual truth of the Bible and let it be manifested in her life; and then, through her understanding, to a sin-sick world.

HULDAH M. RICHMOND, Kansas City, Mo.

I consider it a great privilege to tell what Christian Science has done for me. I had a painless childbirth, and the doctor who attended me could not understand this; he said pain was necessary. I had no bad after effects and was up on the third day. The doctor called on the fifth day, and said there was no need of his calling any more. I am nursing this baby, which seems a great privilege, as I was not able to nurse either of my other two children. The doctors had said I could never again bear a child, as a result of my former experiences. I am able to do all my housework, washing and ironing included, which I was unable to do before, requiring to have help all the time.

MRS. C. O. WHITE, Bisbee, Ariz.

In 1902 I saw the first ray of light in the form of a copy of the *Christian Science Sentinel*. I had been a sufferer for seven years and was just ready to give up. I had been under some kind of medical treatment all of the time; had tried baths, electricity, and change of climate, but all of these things seemed to have a tendency to drag me down, until I was so weak and thin that I attracted attention wherever I went. At last I was so ill that I could not walk, and the doctors said I could not get well, as I had a growth which was located where they could not operate. I was told that I had a disease which was absorbing the blood, and my heart gave me a great deal of trouble. I could not eat or sleep, and was very unhappy, as I had no hope of ever getting well. I also suffered from rheumatic and stomach disorders.

I found out by reading the *Sentinel* that I could be healed through Christian Science, so my husband bought a copy of that wondrous book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and we began to read it. As first I was so very weak that I could scarcely hold the book, but I would read as long as I could, and then wait patiently for my husband to get through with his work so that he could read to me. I soon engaged a Christian Science practitioner, one who I knew had been doing what seemed to me very wonderful healing, and after a comparatively short time I was entirely healed. I had suffered for seven years, though I tried everything I heard of, and I gave each remedy a fair trial. My healing in Christian Science was a little slow, but to think that I now am in perfect health is wonderful.

I have never taken any medicine since I first began the treatment, as I was always able to meet every circumstance by the application of Christian Science,—the truth pure and unadulterated. I always said that Christian Science would heal me, or nothing else would; and it did. I thank God, and I thank Mrs. Eddy, for Christian Science.

MRS. LAURA J. BLASE, Youngstown, O.

When I remember how helpful the testimonies of others have been to me, I can hesitate no longer about sending mine, for some poor sufferers may need to know of just such a case in order to be led to the truth. For ten years I had been considered a semiinvalid by family and friends. I had constant headache and a weak back, was extremely nervous, had poor eyesight, also bronchial, stomach, and bowel disorders. Different doctors, change of climate, electricity, massage, etc., gave me no permanent help, and finally I became almost helpless and was wasted to a mere skeleton. The stomach disorder had become very alarming, and the pain was almost beyond endurance. I nearly died from hemorrhage, and the doctor said my only hope was in an operation, but to this my husband would not consent, feeling that I would not survive the shock. An opiate was administered, so that I could be taken to Duluth, Minn., where I lay under the care of a specialist for three months, at the end of which time I was sent to the home of my parents at Cloquet, Minn., to die—all hope was gone.

I remained there about two weeks, growing weaker and with pain more intense, if possible, until one day the end seemed very near, and the family gathered around the bed, expecting it any moment. I, however, revived a little, and my father went down town. He met a friend who was a Christian Scientist, and she said to him, "Why don't you try Christian Science?" He replied that we had never thought of it. When he came home and mentioned the conversation, my husband said, "Anything!" and my sister immediately telephoned to a practitioner at Duluth. She told my sister to get a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and read to me, and that she would give me absent treatment. The next day I was up, dressed, and ate dinner with the family. They watched me closely that afternoon, expecting bad results, but I felt none and have been well ever since—nearly two years. The first three months after taking up Christian Science I gained greatly in flesh. After that the gain was slower, especially when I neglected my study. I was brought up as a Christian from the cradle, but I never knew such peace and joy as now. The Bible seems like a new book.

While I am most grateful for the physical healing, it is not to be compared with the spiritual uplifting. If there was no other way for me to find the truth, I am thankful for the suffering which compelled me to turn to Christian Science. I am now doing my own housework and performing duties which I had not undertaken in years. I find that if I study our Lesson faithfully every day, and try to understand it, I gain rapidly. I thank God for leading me to this healing truth, and dear Mrs. Eddy for the "little book" that led me to the blessed fountain whence flows health and peace for all God's children.

MRS. NORA MORGAN MCPHEE, Lake Nebagamon, Wis.

[Written for the *Sentinel*.]

PROTECTION.

JOSEPHINE VAN HOUTEN.

REST, O heart, the Father leads us
All the way!
Love divine protects and feeds us
Every day.

When our earth-born thoughts deceive us,
Then we pray!
Father, by Thy truth uplift us
From the clay.

Then we rise on Truth's sure pinion
Into light!
There to claim God-giv'n dominion
As our right.

FROM OUR EXCHANGES.

[*Christian World*, London.]

The industry of loving carries with it in a surprising way the industry of cheerfulness. The world's melancholy is largely a laziness. People are sad because they are too idle to toil inwardly. Do you suppose joy is going to drop into you simply because you open your mouth? Life is not constructed on those lines. Joy is the product of the disciplined, hard-working soul. It is an extract of the inner chemistry, a science which you must learn. Examine yourself when that heavy cloud of depression rests upon you, and ask whether it is as much an affair of outward circumstance as of defect and neglect in your inner machinery. It is the greatest gift of the gods, this command of our internal weather. You cannot disperse the cloud that floats a mile above you. But this fog inside you has no business there. It is movable, as you will perceive if you try. Ours is an age of depression, and the main reason of it lies in the sheer neglect of the soul's activities.

[*Christian Intelligencer.*]

There is a use of rest that has to do with the man himself, with character. It gives his soul a vision hour. The thing that militates most against the Spirit in the world today is that men do not take time to think. They are so distracted by the surface things of life that they miss its deep, spiritual, internal treasures. They miss God in the whirlwind and the fire of their enthusiasm. He comes to them in the still, small voice of the solitude. By the hours of reflection upon the profound truths of life and eternity, by the quietness in which the man consciously stands in the presence of the eternal where the world is shut out, and he listens to God's voice, the soul goes on to clearer vision and to sturdier strength. The Master once said to his disciples when they were much pressed with labor: "Come ye yourselves apart unto a desert place, and rest a while."

[Robert Stuart MacArthur, D.D., in *Christian Intelligencer.*]

The face often is the man. The soul looks out through the eyes; the heart often voices itself by the lips. A shining face is suggestive of a peaceful spirit, and a musical voice of a properly attuned soul. It thus comes to pass that when men have lived with God they carry the very glory of God in their faces. Moses did not know that his face was shining. This is the very charm of his shining face. Others saw the shining; but he did not know it. The truth was attested by Aaron and by the children of Israel generally. They were dazzled and awed by what they saw. Goodness always commands respect.

[*Interior.*]

Every man must work out his own salvation. You never really find God and eternal life till you can say, "This God is my God, whom I shall see for myself, and mine eyes shall behold, and not another's." "Blessed are the poor in spirit: for theirs is the kingdom of heaven;" but shame on the spiritual paupers, for they exhaust the church's vitality in doing for them what they ought to do for themselves, and, more than any other cause, keep back the answer to the prayer, "Thy kingdom come."

[*Pacific Christian Advocate.*]

Is it not more than a little strange that the church through the centuries has given so much attention to speculative doctrinal teachings and so greatly neglected the importance of Christlike living and conduct? We know so little of theology and of divine thought and purpose, which is God's side anyway, but we ought to have learned through the ages a great deal about proper living.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel*.

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in this column.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the Field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

PAMPHLETS IN FRENCH.—Three new French pamphlets, "Christian Science: Le Pouvoir De L'Homme Sur Le Mal," "Christian Science: Ses Bienfaits Pour L'Humanité by Edward A. Kimball, and "Christian Science: La Délivrance Du Mal" by William P. McKenzie, are now ready for delivery to the Field.

A new catalogue has just been issued by the Society, copies of which will be mailed to our patrons on application.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE, POSTPAID: Single copy, six months, $1.20, one year, $2.00. Quantities TO ONE ADDRESS: ten copies, each, six months, $1.15, yearly, $1.90; twenty-five copies, each, six months, $1.10, yearly, $1.80; fifty copies, each, six months, 95 cents, yearly, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 40 cents for postage on each yearly subscription.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year or two years previous, cloth, $2.50; half calf or half morocco $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE, POSTPAID: One or more copies, 50 cents, each, yearly. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postpaid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postpaid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico and Cuba, 10 cents a copy, 60 cents for six months, $1.00 a year; all other countries, 12 cents a copy, 75 cents for six months, $1.25 a year.

Subscriptions to the SENTINEL will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid, to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.
To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.
Bound Volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

The third largest reflecting telescope in the United States is on its way from Cambridge, Mass., where it was made, to Flagstaff, Ariz. It is designed especially for planetary photography and will first be used in photographing Mars when the planet will be nearest the earth next month. The mirror is of forty inches clear aperture, seven inches thick, and weighs nine hundred and seven pounds. It was made from one piece of glass and has a focal length of eighty-one feet four inches. By means of a convex lens an equivalent focus of 1,050 feet may be secured. The mirror is mounted in a cell of unique design, constructed of zinc and iron in such a way that it maintains a uniform diameter at all temperatures.

Postmaster General Hitchcock is endeavoring to improve the appearance and quality of the United States postal card. Postal cards are now manufactured under a private contract which has yet five months to run, but already bids have been invited and opened for furnishing them to the department for four years from Jan. 1. Seventy-five million cards must be turned out each month. It is the desire of the postmaster general to change the printing on the cards, and possibly the color of the paper, so that they will compare favorably with the postals of the other countries composing the Universal Postal Union.

The "McAdoo Tunnels" between New York and New Jersey have abandoned as a failure "cars for women," and the Public Service Commission has refused to grant the application of several women's reform leagues for similar cars in the New York subway. In making this ruling the commission says: "Undoubtedly women suffer inconvenience and sometimes indignities in the subway cars, but we do not believe that the operation of special cars will ameliorate these conditions. Moreover, we do not believe that there is any preponderant demand among the women of the city for special cars."

Carrying an aggregate appropriation of $1,100,000, or $660,000 more than as originally reported, the conference report on the urgent deficiency appropriation bill was adopted by the House last week. Considerable opposition was directed against the provisions of the bill respecting the establishment of a Customs Court, and providing for the purchase of automobiles for the Vice-President and the Speaker, but all attempts to send the bill back to the conferees for amendment were defeated. The bill, as passed, made no provision for the payment of salaries of judges and officers of the court.

The Gunnison tunnel in Colorado, recently completed by the Government, will bring some two hundred thousand acres of land under cultivation. The tunnel from entrance to entrance is six miles in length. The survey lines at the point of meeting differed 0.32 foot in level, 0.04 foot in alignment, and 0.86 foot in distance.

Over eight hundred vessels, big and little, are expected to take part in the Hudson-Fulton river parade. The Atlantic ports from New England to Norfolk have been drawn upon for reinforcements, and it is stated that not a single licensed passenger steamer remains unchartered for the opening day, Sept. 25.

At the close of business on July 31, the monthly statement showed that the national debt, less cash in the treasury, amounted to $917,530,857. The interest-bearing debt is $913,317,490.

The new "Lincoln" one-cent pieces were put into circulation last week. Owing to the alleged illegal appearance on the coin of the initials of the designer, a new die may be ordered cut.

The Payne tariff bill, which has been under consideration by Congress since March, was finally adopted by both Houses on Aug. 5 and immediately signed by President Taft.

Because of the prohibition wave there was a decrease of $5,290,773 in the internal revenue from whisky during the fiscal year ending June 30 last.

The Alabama House has passed the bill agreeing to an income tax amendment of the Constitution of the United States.

The new state law prohibiting the sale of cigarettes in Minnesota went into effect last week.

International.

The Russian imperial yacht Standart, bringing the Emperor and Empress from Cherbourg to Cowes on a visit to King Edward, anchored in the Cowes Roadstead Aug. 1. Their majesties were given an imposing official welcome. Not only were King Edward and Queen Alexandra, the Prince and Princess of Wales, and a large gathering of other members of the royal family present to greet their guests, but one hundred and fifty of the pick of the British war fleet, dressed in flags from stem to stern and flying the Russian ensign, encircled the anchorage allotted to the Standart.

Henry Farman recently made a cross-country flight in his aeroplane from Chalons, France, to Suippes, at an average height of one hundred and fifty feet. The distance, which is about forty miles, was covered in one hour, five minutes and thirty seconds, and constitutes a record.

The report of the delegates from the United States to the world's convention of the Y. M. C. A., at Barmen-Eberfeld, Germany, showed that there are 1,039 organizations, 446,000 members, and $50,000,000 of Y. M. C. A. property in that country.

Plans have been completed for the consolidation of all the cement companies in Canada. The new company will be known as the Canadian Consolidated Cement Co., and will have a capitalization of $25,000,000.

The central committee, having in charge the earthquake fund, announces that all but $25,000 of the total of $5,205,000 subscribed for the relief of the victims in Southern Italy, has been expended.

King Manuel of Portugal has accepted an invitation from King Edward, couched in most cordial terms, to visit England in the early autumn.

Industrial and Commercial.

The Pennsylvania Railroad has placed in position the last piece of stone in the exterior of its new station in New York city. This involved the completion of stonework enclosing some eight acres of ground. To enclose this vast area has necessitated the building of exterior walls aggregating nearly half a mile, and has required 490,000 cubic feet of pink granite. In addition there have been utilized inside the concourse 60,000 cubic feet of stone. It took 1,140 freight cars to transport these 47,000 tons of stone from Milford, Mass. In addition to the granite the construction of this building has called for the use of 27,000 tons of steel. There have also been set in place some 15,000,000 bricks, weighing a total of 48,000 tons. The first stone of the masonry work on the building was laid June 15, 1908.

A device has been invented in England by which the speed of automobiles may be automatically controlled. The attachment removes the clutch when the speed of the car slightly exceeds the arranged limit. When necessary the brake is automatically applied so that the speed is reduced to just below the arranged limit. The brake is then quickly but gently removed and the clutch again put in. The apparatus is put in action or out of gear in an instant. It fits in a compact aluminum box and takes up but little space.

So rapid has been the extension of block signaling on the lines of the Pennsylvania Railroad Company, that they have established signal schools to train men specially for the signal service. Apprentices serve a three-years course. The first year is spent in mechanical work with the construction gangs; the second year in the office of the supervisor of signals; and the third year will be devoted to outside work on electric and other signal appliances.

One hundred and seventy-four automobiles, of the total appraised value of $421,661.37, were imported during July into the United States at New York. Nine hundred and seventy-eight cars valued at $2,032,148.60 have been imported since the first of January.

The appraised value of precious stones imported into the United States at the port of New York during July of this year was $5,112,957.11.

General.

A discovery of great interest was made not long since at Pompeii, where the excavation work is being steadily carried on. Under the ash deposits there was found an extensive villa of handsome construction and ornamented with fine frescoes. The villa contains several statues and other works of sculpture, both Greek and Roman, besides rich furniture which is well ornamented, and also many vases of different kinds. There were also found coffers filled with gold and silver money. In the basement are great amphoræ which were used for storage purposes, and in the triclinium the tables were prepared for a banquet of thirty persons. An abundance of silverware is one of the features of the discovery, and it is said to be equal in weight and artistic character to the silverware discovered in the villa of Boscoreale, and now possessed by the Louvre.

That mammoth caves, containing caverns large enough in which to place a city office building, with natural stone bridges exceeding in beauty and grandeur those of Utah and Virginia, exist in northwestern Arizona, is officially announced by Prof. Edgar T. Hewett, director of the branch of the school of Mexican archæology, located at Santa Fé, N. M. Stories of the existence of these wonderful natural caverns have been told by Indians of that section for centuries, but were thought by white men to be merely legends of the aborigines.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE PURPOSE OF THE LAW.

WILLIS F. GROSS.

THE life and teachings of the Master revealed the Christ to human consciousness. His works were in demonstration of his words, and in these works those who had eyes to see beheld the proof of God as ever present and able to help in every time of need. Obedience to the law and the prophets had prepared the world for the coming of the Christ, who was revealed just as soon as the hearts of men were ready for the blessing. At the very beginning of his ministry Jesus declared that he had not come to destroy the law and the prophets, but to add to the great good already accomplished and to teach humanity that the time for the fulfilment of the promises of Scripture was at hand.

The law as given by Moses is based upon the right concept of God and man. It exerts a restraining influence on the actions and thoughts of men. It is a rebuke to that which is wrong and makes possible the discernment of the right. When the law was given to the children of Israel in the wilderness, it was as high a revelation of Truth as they were able to receive at that time. The law, with its numerous demands upon them, was in such striking contrast with the life that they had lived in Egypt, that it was with the greatest difficulty they were able to comprehend even in small degree what was required of them. The revelation of Truth was as the brightness of the noonday sun, and Moses "put a veil over his face, that the children of Israel could not steadfastly look to the end of that which is abolished."

The purpose of the law is clearly revealed in the words of Paul when he wrote to the Galatians: "The law was our schoolmaster to bring us unto Christ." He goes on to say that the time comes in human experience when the law is no longer needed: "But after that faith [or spiritual understanding] is come, we are no longer under a schoolmaster." Humanity has need of the law until sufficient spiritual understanding is gained to enable men to act from Principle at all times. Christ and not the law should govern men, but if the Christ is not discerned, the law is the only thing that will insure progress. Truth must be presented in such a manner that it can be comprehended in part at least, or it is as the seed that falls by the wayside. The children of Israel were in bondage to the Egyptians because they did not know the true God. If they had understood Him, this understanding would have delivered them, even as they were delivered through the understanding of another when God sent Moses to show them the way out of bondage.

The purpose of the law when it was delivered to Moses was to reveal the true God to the children of Israel and to save them from the idolatrous beliefs and practices of the Egyptians. Its mission today is to uncover and destroy the various erroneous beliefs which have caused humanity to fall down and worship many gods. A person is not an idolator knowingly. He could not worship or have faith in anything that he understood was devoid of intelligence, power, or reality. Because he believes that the object toward which his thought is directed is real and has power and perhaps intelligence, he has faith in it and is willing to rely upon it. The "Thou shalt not" of the law serves to arrest thought and action and to turn the gaze in the right direction.

Obedience to the Ten Commandments makes it possible for humanity to comprehend and love God. How can the man who has gods many—believes in more than one power or creator—have any right conception of the one infinite Being? The understanding of what God is, forbids man to have other gods. The revelation of God to the individual consciousness comes as a direct command not to do a certain thing. If the divinely awakened one is obedient, he is rewarded by a clearer realization of what God is and what He does; but if he refuses to obey, he continues in darkness and pays the penalty for his disobedience. Through obedience to the law one is instructed in righteousness, and he comprehends more clearly what is necessary on his part to find the reign of harmony within.

The law points the way to Christ, and when Christ, Truth, is discerned the work of the law is accomplished. If it were not for the belief in error—the sense of reality, pleasure, and power in evil—the law would not be necessary. The false sense must be rebuked; in other words, mortals must be made to see that the indulgence of evil results in suffering. The fear of punishment may be the only reason the sinner has for turning from sin. This motive is not an exalted one, but it is better to refrain from evil through fear of consequences than to continue its indulgence. So long as mortals continue in sin there is little hope of progress, but when for any reason they have turned from evil, a step in the right direction has been taken. If one demand of the law has been complied with, other demands are recognized that were before unknown, and when the way is pointed out it is possible to walk therein.

To begin with, the work of the law may be largely negative in character. It points out what may not be done, but it is paving the way for instruction in righteousness. Negative goodness will not suffice, for good is positive; but it is not possible for good to develop in that consciousness which is the embodiment of evil. The sense of evil must be rooted out to make room for good, and if mortals are not ready for the gospel they must learn obedience to the law. However, the law as it is at first comprehended does not reveal the reality of being wherein is no sense of evil. The fulfilling of the law, wherein the oneness and allness of infinite good is realized, is the work of Christ. When Christ instead of the law governs a man, he thinks and acts from an entirely different standpoint. His righteousness is not merely a refraining from evil; it includes the doing of good. The consequences of wrong-doing have no terror for him, for he has learned that all pleasure and satisfaction is in good and there is no pleasure in evil. If the penalty for wrong-doing were removed it

Digitized by Google

would make no difference to him, for Christ, Truth, and not the law, prevents the indulgence of evil.

In Christian Science the Christ is revealed to humanity, and the work of overcoming sickness and sin is carried on most successfully. Obedience to the law in its highest sense is possible only as the gospel is understood—and demonstrated. Christian Science rightly interprets both the law and the gospel, and the healing works accomplished in the early centuries of the Christian era are being repeated today, proving that the saving Christ has come to all who are prepared to receive Truth. In all ages the law is the schoolmaster bringing humanity to Christ. When spiritual understanding is gained, "Christ is the end of the law for righteousness to every one that believeth."

"LOVE YOUR ENEMIES."

EMMELINE HASKELL.

DOES the sun shine because flowers greet it, or is it not rather that flowers bloom because the sun causes them to unfold? Mortal thought would reverse the facts of being; it bids us wait until divine qualities appear, that then we may love those who manifest them. Shall we ever see reality in that way? A subtle error lurks under the suggestion that we must not try to love where we have not seen something lovely, which is like forbidding us to carry a light into any dark place. How shall we ever see anything lovely until the reflection of divine Love in us opens the way? The psalmist says, "In thy light shall we see light."

In looking back over past experiences, we may find that this plausible error has darkened much of our way, but as we have gained in knowledge, and in one instance after another have seen earth's righteousnesses to be but "filthy rags," we have repeatedly discovered that the human heart is "deceitful above all things, and desperately wicked." Where then could we find that which was so admirable that we might rightfully love it? Our Leader bids us beware lest we be "overwhelmed by a sense of the odiousness of sin" (Science and Health, p. 366), but this false sense has too frequently obtruded at the very time when we were struggling to find and to see only God's perfect man. We know that in order to cast out error we must displace it with truth and love, but how could this love be available if we were to exercise it only where we first found something lovely to bring it into expression?

Jesus smote this error into nothingness when he said, "Love your enemies, . . . For if ye love them which love you, what reward have ye?" Truly indeed, to love only such as love us would present no help in this our extremity; but to love our enemies opens the door to divine realities. The very thing which we imagined difficult of attainment, if not impossible, is found to be simple and natural, when reduced to practice, for this love is divinely natural to all men when not barred out by the mistakes of human reason; and the Master's command, "Love your enemies," proves a perfect panacea for ungodliness.

Let those who doubt the inestimable value of such an experience try the experiment. "Love your enemies," or those who are unattractive or repugnant to you, asking no return. Love simply because you love to love, and because God is Love and you rejoice to reflect Him, upon dark places or fair; then presently a strange thing will come to pass,—you will gain more than you asked or thought, for when you loved the friends whom human sense esteemed winsome and beautiful, the joy was not unalloyed, error soon pointed to flaws in your relations with them, and turned your joy to pain; but if you seek nothing, rejoicing only to let the light of divine Love shine, behold, where human sense had pictured an enemy the beginning of a new revealment will dawn upon you, not because of laborious seeking or theorizing, but because Love makes manifest that which human eye could not find nor intellect comprehend, something intangible but most real, and you will know that the new heavens and the new earth are being perceived by your consciousness through obedience to the divine command, "Love your enemies."

THE DETECTION OF EVIL.

WILLIAM W. PORTER.

To the Christian Scientist this query is quite sure to present itself, sooner or later; to wit, If evil is unreal, and has no power, why should it be necessary to guard against its supposed reality?

The attitude of the Christian Scientist with respect to the claims of evil in this connection is relatively that of the receiving teller in an institution of banking. The essential qualifications of the receiving teller have been inculcated through long, arduous, and progressive years of service, wherein the individual has demonstrated his fitness and ability to discharge the duties of the position. Among the duties of the bank servitor is that of attending to those who desire to deposit funds in the bank, and in the discharge of this duty he is expected to exercise constant and searching vigilance, alertness, and discernment, to the end that bad or counterfeit money be not accepted along with and under the guise of good money.

So expert becomes this officer of the bank, that he instantly detects and throws out a counterfeit piece of silver or bill as soon as it is seen or touched. The ability to do this is an essential qualification for the office, as a failure to detect the counterfeit upon presentation may subject the teller to the expense necessary to protect the bank from loss. In any event, such a failure is evidence of carelessness, and similar repeated instances show a lack of fitness for the important work under consideration. It is interesting to know that the teller has attained his remarkable ability to detect bad or counterfeit money through instant and constant alertness and watchfulness, which in time becomes, in a degree, an intuitive process of thought. The teller having been engaged by his bank to receive, to handle good money, his integrity, protection, and retention depend upon his receiving only good money; therefore he is constantly alert to detect and repudiate, and stamp the counterfeit or bad money as such, when it is presented to him under the guise of perfectly good money.

The counterfeit is not genuine money, but it simulates the true and real; therefore it is this simulation that the watchfulness of the receiving teller must detect for his own preservation. The assumption on the part of the teller that, because the counterfeit is not a genuine bill, it has no existence (as a counterfeit, or "claim"), will sooner or later result in the taking in of bad money; whereupon the ability of the teller will be brought into serious question. Or the assumption that, because of superior ability to detect the counterfeit, watchfulness against its presentation need not be constantly exercised, would lead to the same result. It is the necessity for self-preservation, as well as his integrity, his loyalty, his duty, which impels the teller to incessant and unending vigilance, and with the progress of this vigilance comes keener efficiency and greater ability to detect bad money as presented; but so long as bad or counterfeit money is in circulation and liable to be presented (and this will continue so long as lack of watchfulness upon the part of the people in general permits it to deceive), just so long the unceasing alertness and watchfulness of the receiving teller must continue in behalf of the interests of the bank and of self-preservation.

There ought to be, of course, no counterfeit money, and the time will come when there will not be any; but in the present stage of experience, and until perfect government

Digitized by Google

through regular progressive steps is attained, may we not as Christian Scientists ask ourselves what should be the logical attitude toward counterfeit money of the receiving teller who desires to retain his position. "Yes," one says, "but how are we to know when this vigilant outlook against the counterfeit may be relaxed?" The natural answer is, when the counterfeit ceases to be presented; and this will be when, through invariable alertness, detection, and rejection, it shall have been demonstrated that the counterfeit has no further power to deceive; when it is without seeming value to itself or any one.

It is also of interest to note in this connection, that as the counterfeit or claim of evil is detected and destroyed, none of the real, the true, is injured in the least; on the contrary, its value is enhanced. Our Leader says, "You uncover sin, not in order to injure, but in order to bless the corporeal man; and a right motive has its reward" (Science and Health, p. 453).

"A DAY IN THY COURTS."

EMILY H. GARDNER.

IT has long been my desire to send something to our periodicals which should in some measure express my appreciation and gratitude for the good that Christian Science has brought into my life, and it occurred to me to give one day's experience. In 1905 my sister and I left Chicago for California. We visited several cities on the coast, and during our stay at one of these I met a lady on whose face was the expression of fear and despair. When she expressed a desire for help in Christian Science, I gladly consented to do what I could, and it was a joyful experience to see the change in her from day to day, during the two weeks that remained of our stay.

Later on, while at San Francisco, I received a letter from her expressing her gratitude. We were just leaving for a trip to Sutro Heights and the Cliff House, and this happy, joyous letter brightened the whole day for me. The foliage took on an added freshness and seemed more velvety in richness, the delicately tinted flowers more exquisite, the branches of the trees swayed more gracefully in the breeze, the beautiful geraniums and roses were more brilliant, the lovely flowers more fragrant. The very faces of the statuary in the parks seemed to be illuminated, and the sweet notes of the feathered songsters as they flew above us brought me a message of love. There was an undertone of joy, praise, and thanksgiving in the roar of the breakers on the rock-bound shore. As I sat there, thinking of the grandeur and beauty around me, this verse from one of Mrs. Eddy's poems (*Journal*, July, 1899) came to me:—

Come to me, peace on earth!
From out life's billowy sea,—
A wave of welcome birth—
The Life that lives in Thee.
O Love divine!
The Heart of Thine
Is all I need to comfort mine.

We returned to the city just as the sun was passing out of sight. It was a magnificent scene. We left the ocean, and crossed the bar, where a flood of light from the setting sun cast a path of gold across the bay, touched with its splendor the government buildings on the islands, including the fort, and crowned the mountain in the distance with a diadem of gold. Then the blue waters of the bay underneath—what a magnificent panorama! I was looking at it through material eyes, but the great love that had flooded my consciousness all day whispered to me, "What is the spiritual meaning of this? Is there not a promise in this beautiful picture that is before you?"

I turned my face toward the ocean, and these thoughts came to me: The ever restless waters of the great ocean represent my past life, which was darkened by sin, sickness, sorrow, and loss. Was I not ever restless and troubled? The reflection of light across the bar represents to me the first gleam of this grand truth,—Christian Science,—which says to the troubled waters, Peace, be still! The quiet peaceful waters of the bay separated me from the old life, and I landed at the fort, where I am guarded and protected by Truth and Love. From there I begin my journey to the mountain-top, where the sunlight of Truth shines forever. It is indeed glorious, and I know it will ever illuminate my pathway to the summit.

Looking at this scene through a spiritualized sense, what a change! It was beautiful before, but now there was a radiance and brightness that almost eclipsed the material view, and I stood, as it were, on the mount of transfiguration, lost to all that was going on about me. I realized then what it means to know that there is no material universe.

A flood, as of gold, sweeps o'er the bay,
While slowly the daylight fades away.
I bid it stay yet a moment more—
Shed more of its glory on life's shore—
And, lo, two gates in the west are wrought!
And one is of gold, and one of thought.

One opes to the sea, with all its fears;
And one to the life of golden years.
They stretch afar, and between them gleams
The setting sun—its radiant beams
A glorious promise o'er the deep,
While my thoughts of Love their vigil keep!

"CONSIDER THE LILIES."

JESSE PICKARD.

PONDERING the promise of supply so well illustrated by our Master, as given in the sixth chapter of Matthew's Gospel, I was recently impressed by the simile in a way which to me was new and beautiful. That God's justice is also all-merciful is discerned only as the divine idea, that God is Love, dawns upon the human thought. The loving care here illustrated has always been quite evident, but the part taken by the lilies in deserving this protection had never before come to me so strongly.

Perhaps Jesus chose such a beautiful subject in order to point out the fact that the law of reflection was here fulfilled, that the flowers did their part in expressing God's qualities, and so beautifying the earth. Gently breathing into the surrounding atmosphere the beauty and fragrance betokening God's natural love, they quietly depend upon divine law for their very being. Mrs. Eddy says, "Whatever holds human thought in line with unselfed love, receives directly the divine power" (Science and Health, p. 192).

It remains only for us to make use of this teaching. The law of supply demands that we express such qualities of divine Mind as will shed upon all within the radius of our atmosphere of thought the purity and love illustrating and demonstrating man's divine sonship. This is our part in God's program. This is the requirement of divine Principle. It is far from a lazy reliance upon an unknown benefactor, but is a recognition and fulfilment of eternal law. Every idea of God is designed to reflect Love, and under these conditions all are bountifully supplied. "He hath shewed thee, O man, what is good; and what doth the Lord require of thee, but to do justly, and to love mercy, and to walk humbly with thy God?"

Digitized by Google

"WHICH HAVE EARS, AND HEAR NOT."

DAISY BEDFORD.

It is interesting to note how constantly Jesus based his teaching upon the objects which surrounded him at the time he was instructing either his disciples or the multitude,—the fowls of the air, the flowers of the field, the wind, the sea, all in their turn served as illustrations to convey his meaning. In Science, with the understanding that in the world God governs and controls, every incident no matter how small is of value, we often find an answer to many problems which arise in our minds, and learn many valuable lessons from that which is around us.

One illustration occurs to the writer. She was wondering why so often some inquirers into Christian Science almost from the first seem to assimilate and demonstrate its teaching, while others who have been in the midst of the field and have probably been healed, appear so unresponsive. Occasionally one hears it said, "Oh, yes! Christian Science is a beautiful religion; but there is a lot in it that I cannot accept." Like the Israelites, who when their needs were met in the wilderness grumbled at that which was provided, until error destroyed itself in fire, plague, in all manner of sickness and disease, we open our mouths wide that the Lord may fill them, forgetting how necessary it is to remember what Mrs. Eddy says, "But murmur not over Truth, if you find its digestion bitter" (Science and Health, p. 559).

The illustration which seemed so helpful was this: Looking in the fire, the writer noticed that in the center of the fireplace there was a bright blaze, but at the extreme edge on each side the glow had given way to gray ash, with the exception of one or two small pieces of coal, which evidently had recently been placed there. In the center, where flames were brightly burning, lay a large piece of coal, absolutely untouched, as it seemed, by the flames, not a spark visible. The pieces of coal, however, although so far from the central blaze, were smoking vigorously, prepared at any moment to burst into flame could they come into touch with that which should ignite them. With a gentle touch this was accomplished, the slightest movement in the direction of the central blaze was sufficient for the immediate reflection of light and heat. Not so with the large piece of coal, which required several very vigorous knocks before it showed any signs of burning.

How often do we require the hard knocks of adversity, sickness, disease, and seeming loss, before we will be aroused from our condition of apathy and slothful slumbering, before we will be concerned about the things of God and His Christ! We refuse to hear the "still small voice,"—Truth speaking to the human heart, telling us to work while yet it is day. Around us we see proofs of Christian Science healing, we hear the words of him who spake as never man spake before, only like Festus to put off listening to a more convenient season; while those who at first were not asked to the feast, having been sought for and found in the highways and byways, accept gladly the invitation we have so churlishly refused, to go in and sup with the Christ-idea. It will be well for us, when we at last realize we are left outside, shut out from the marriage supper, if we find a place of repentance, seeking it with tears.

Then our illustration takes us farther, to what the apostle teaches us in that wondrous thirteenth chapter of First Corinthians: that though we are busy in every seeming good work, whether as members of church organizations or not; though at the call of duty we are willing to give our bodies to be burned, and have not love, it profited us nothing. We shall only appear, if without love, as an opaque body, giving out neither light nor heat; so careful of our one talent that we neglect to make use of it in such a way as will increase its value a thousandfold. Let us not think that to be a member of a church committee or what not, being busy about many things, is the whole fulfilment of the law of true reflection.

In the Bethany home Mary of the receptive thought sat meekly at the feet of the Master, listening to the healing truth, while Martha, burdened with the material cares self-inflicted, was wishful to bind them also on her sister and would have Jesus rebuke her for her seeming indifference to his material needs. The Master's gentle rebuke, "Mary hath chosen that good part," teaches us what is necessary for the demonstration of absolute Science. It is not the running hither and thither, it is the listening attitude of the child Samuel, the attitude of Jesus, ever listening for the Father's voice; it never tells us to neglect work, only to realize more and more that the Father doeth the work—our part is to be still and know, and in knowing to reflect the Love that passeth knowledge.

APPRECIATION OF THE MONITOR.

We are privileged to print the following letter, recently received by the managing editor of *The Christian Science Monitor* from a friend on the Pacific coast. That the *Monitor* is appreciated as a "newsful paper" by others than the English gentleman is shown by numerous letters of commendation which come to this office from satisfied readers in all parts of the United States and Canada, and even from across the sea.—Editor.

San Rafael, Cal., July 31, 1909.

Editor of *The Christian Science Monitor*,
Boston, Mass.

Dear Sir:—In our last Wednesday evening meeting one of our members, an English gentleman, said a few words regarding our Christian Science daily which were so appreciative and true that I have asked his permission to send them to you. He said,—

"*The Christian Science Monitor* fills a position unique among newspapers. I have had to know a good deal about journalistic work, and see occasionally the well-conducted and ably written English publications, both metropolitan and provincial, but I never feel that the time I spend on the *Monitor* is wasted. Eschewing so much that other papers print, it is yet the most newsful paper that I know. Another feature to which I should like to call attention is the ability, breadth of view, and variety shown in the editorial or leading articles. There is a tendency—for which the French have coined the word *Chauvinism*—to allow the affairs of one's own country to engross attention to the exclusion of the wider world movements. The *Monitor* is notably superior to this weakness. Indeed, so intimate is the knowledge displayed of the inner springs of the great political changes going on in Europe, that the writer, or writers, must be closely in touch with men who know. Few, very few Americans have either studied or cared to study European affairs with such interest and closeness as to follow the ambitions of the heads of royal houses or the aims of the great foreign ministers, and it is the evidence in the *Monitor's* editorials of the possession of this information,—which is, to say the least, unusual,—that particularly attracts my attention."

I should like to express our thankfulness for the *Monitor's* editorial regarding "Comic Supplements," in the issue of July 24. There is a legitimate field for wit, and for good cartoons, but we agree with the *Monitor* that "something less reckless and questionable in the humorous department of papers should be fostered."

Yours respectfully,
Mrs. Emmeline Haskell.

SELECTED ARTICLES.

[Frederick Dixon in *Western Mercury*, Plymouth, Eng.]

The command to heal the sick as well as to preach the gospel was given with the utmost distinctness by Christ Jesus, and is recorded directly in three of the Gospels, while in not one of these Gospels is there the slightest excuse for the attempt to confine the command to any particular time or persons.

Jesus said of the man sick of the palsy: "Whether is easier, to say, Thy sins be forgiven thee; or to say, Rise up, and walk?" Obviously a man only escapes the effects of sin and sickness in proportion as he expels from his own consciousness the belief in the power of evil, and so gains the Mind that was in Christ Jesus. "The way," writes Mrs. Eddy, on page 327 of Science and Health, "to escape the misery of sin is to cease sinning. There is no other way." This way will not, however, be made easier; it will, on the contrary, be made positively impossible if we start with the assumption that evil has power and is real. That only is real which is God-made. To dispute this is to impale yourself on one or the other horn of the dilemma that God created evil, or that there is another creator besides God.

All there is to say about evil was summed up by Christ Jesus when he described it as a lie, and the only power a lie can ever seem to possess is the temporary sense of power bestowed on it as long as the deception lasts. The human consciousness is trained and educated into a belief in evil, in sorrow and sickness and sin, and exactly in proportion as the truth dawns upon it that God, that good is infinite, the lie that evil is real or has power begins to fade away, and there comes the freedom from any belief in the power or reality of evil comprised in the declaration of Jesus that "the kingdom of God is within you."

Our critic will find it a good deal easier to assume that Christ is a person than to explain what he means by the personality of Christ. If he means that the Trinity consists of three infinite beings shaped like men, he is assuming something for which he has no authority in the Bible. The Christian Science view of personality is stated with perfect clearness by Mrs. Eddy on page 19 of "No and Yes": "God is infinite. He is neither a limited mind nor a limited body. God is Love; and Love is Principle, not person. What the person of the infinite is, we know not; but we are gratefully and lovingly conscious of the fatherliness of this Supreme Being." There is nothing in this which is not in perfect harmony with the Bible.

Finally, may I say that the pouring out of Bible texts into a letter is simply waste of time. Cut out of their contexts, they can be made to seem to confirm as many dogmas as there are people to father them. Christ Jesus declared quite clearly that Christians would be known by their fruits, and he defined a Christian with equal clearness as one who was able to do the works which he had done. Precisely in proportion as a man proves his ability to do those works does he, judged by this test, prove his Christianity.

[Howard C. Van Meter in *Portland* (Ore.) *Labor Press*.]

In referring to Christian Science as "Mrs. Eddy's doctrine that evil does not exist," and "Mrs. Eddy assures them that their sins do not exist," the conclusion being that such teaching permits an individual to act evilly and not recognize the responsibility of it, you fail to comprehend its true meaning. If such were the case, your criticism would be legitimate; but it is not. The design of Mrs. Eddy's writings is to help humanity in overcoming evil and its effects, sin, disease, and death, and at the outset attention is called to the fact that the admission of their reality, through a wrong sense of what reality is, handicaps the effort to overcome them. So it is declared that reality properly applies to that which expresses the nature of an unchangeable God, who is good, and that unreality applies to that which is contrary thereto.

Evil is not good and cannot be good, and the classification of it and its effects as unreal does not in any sense license its indulgence, but is rather an encouragement toward its destruction. On page 339 of the text-book, "Science and Health with Key to the Scriptures," is the following: "A sinner can receive no encouragement from the fact that Science demonstrates the unreality of evil, for the sinner would make a reality of sin,—would make that real which is unreal, and thus heap up 'wrath against the day of wrath.'"

All should appreciate that error of any kind must be a mistaken sense of something that is true, and when the truth is recognized that which had seemed to be real as error will naturally disappear, and this recognition can come only as the individual works from the standpoint of one supreme infinite God, as the sole cause and creator of all reality.

[*New England Craftsman*.]

Mrs. Mary Baker Eddy, the Founder of the Christian Science church, has made a generous contribution of five hundred dollars to the Massachusetts Masonic Home. We have before found pleasure in noting Mrs. Eddy's favorable opinion of freemasonry, and her generous action speaks louder than words in testimony of the sincerity of her belief in its value. We hope her example may stimulate others of the opposite sex who have the means to do likewise.

[Gray Montgomery in *Denver* (Col.) *Republican*.]

Jesus said, "God is a Spirit: and they that worship him must worship him in spirit and in truth." Until we attain the correct spiritual understanding of God we can never do the works which Jesus said shall follow as "signs:" which proof he gave John that he was the Messiah.

Mrs. Eddy does not assert that our Saviour "at the ascension went out of existence." To use precisely our critic's own words, "the Lord did disappear at his ascension to mortal sight," but in Christian Science we learn that though his fleshly body ceased to exist, his pure spiritual self, the image and likeness of God, infinite Spirit, always continues to exist as an eternal, immanent reality. His real self, his pure mind, was the Son of God, the reflection of the Father. It is inconceivable that God's own Son could be forever existent in a fleshly form, in matter. Christ Jesus proved the flesh to be unreal when his mortal body disappeared at the ascension, thereby laying aside, rising above, all materiality.

There is no record of Jesus ever saying that he "with the wounds of the crucifixion visible in his body" would be "seated upon the throne of God and that he will some day return to this earth" with a physical body to judge the living and the dead. Should Jesus come again, would not those who profess to love him fail to recognize him as a corporeal being? Today they even neglect to obey his specific command to heal the sick as well as to preach the gospel,—a command which is one and inseparable.

Jesus never deified his human self, but pointedly rebuked one who kneeled to him by saying, "Why callest thou me good? there is none good but one, that is, God." Furthermore, Jesus also said, "The kingdom of God is within you." Each one can become conscious of the reign of absolute harmony here, if he is good and spiritual enough to bring into his own experience the truth which Jesus taught and practised.

[W. J. Bonnin in *Birkdale and Southport* (Eng.) *Review.*]

When we talk of salvation, what do we mean? Salvation from what? The answer of Christian Science is that the only salvation is a practical salvation, that a hope of salvation is no salvation, and that sin and the fruits of sin, —wretchedness and misery, disease, disappointment, and despair,—all these go to make the hell from which humanity sighs for salvation. Salvation here and now, salvation today, in direct contradiction to the monstrous doctrine that death is a necessary preliminary, is the end and aim, the test, the function, and the message of Christianity. Is this an evil teaching? Peter's words, it will be remembered, were uttered in reference to the healing of the impotent man. His conception of salvation was no theoretical or visionary one. He and the cripple who had sat for alms at the Beautiful gate must have realized that salvation according to Christianity was no post-mortem condition of bliss, but a demonstration that God is indeed a very present help in trouble.

Christian Science affirms that the same power for salvation is available today. How? By the power of Christ, the knowledge of the truth. Peter once said to a man who had been paralyzed for eight years, "Æneas, Jesus Christ maketh thee whole;" and the man found it was so. Now, it could not have been the mere words, any more than the personality of the speaker, that had healed him. What could have exercised the power but the thought that Peter held, the knowledge of Truth? And what was this but letting that Mind govern him which was also in Christ Jesus? What but realizing the absolute truth about man's eternal spiritual existence, man made in the image and likeness of God, His child, subject only to His perfect law of omnipotent love? Christian Science is teaching men that this same understanding may be attained today, and that as it is attained it is manifested by our overcoming the evil which has dominated mankind through our material beliefs, for we learn that these beliefs, the great world-dream that there is or can be any inherent reality or power in what is unlike omnipotent God, Spirit, constitute the one evil or the evil one, Satan, branded forever by our Lord as a liar. And what is a liar but that which would persuade us to believe what is not instead of what is? And what is it that persuades us that matter is reality? Our material senses, which can tell us nothing of God, the supreme reality.

[J. V. Dittemore in *Yonkers* (N. Y.) *Herald.*]

Our critic says that the testimonials of physical healing by Christian Science are, in the great majority of cases, entirely worthless. This statement is not fair either to the medical profession or to Christian Science. Few turn to Christian Science until after they have exhausted all hope of recovery through other systems. To say that these people had nothing the matter with them during the years they have been under the care of physicians, constitutes an arraignment of the medical profession which no Christian Scientist would make. Most physicians are humanitarians, deserving proper appreciation of their splendid efforts toward the amelioration of human suffering.

If this critic has not yet been able to understand Christian Science, he should not blame his failure on Mrs. Eddy, but should take heart from the thousands who have understood it, and try again.

[*Cedar Falls* (Ia.) *Record.*]

The more the utterances of Christ Jesus are studied the more forcible becomes the fact that he was the world's greatest orator. He drew such crowds as could no other man of his time, used faultless diction, and clinched his arguments with parables and similes with a force and precision that find no counterpart in literature today. His address to the "multitude" was irresistible, and the force of his utterances has stood the test of time and the assaults of unfriendly criticism until today he stands out in history as the world's greatest public speaker as well as the world's redeemer.

If that wonderful "Sermon on the Mount" could have been reported in full, as would have been the case if delivered in these days of shorthand reporters and daily press facilities, it would doubtless be found to contain in eloquent diction a thousand notable utterances that were lost to the generations that followed because of the inadequacy of the reports that were inscribed by the sacred historian. The Bible contains but a smattering of what Jesus said and did. John reminds us that the world would not be able to contain all the books that would be necessary to hold all his utterances and teachings. Of course this was a figure of speech, but it confirms the statement that the world lost all reference to many notable addresses.

Whatever may be thought of his divine attributes by the skeptics and unbelievers, it must be admitted by all that Christ Jesus is the greatest character of all the centuries, and at no time in the world's history has there been so nearly a universal belief in his divinity as now. His spirit dominates the edict of kings, his precepts are the groundwork of judicial decrees, his teachings are the basis of all moral law, and his dominion is from the ends of the earth. Men may cavil and dispute over alleged discrepancies in accounts given of him in the Gospels, but the influence of his life and the claims of his divine mission are the potent factors that dominate the world today, and none but divinity could exert such power.

[John L. Rendall in *Iowa City* (Ia.) *Republican.*]

It is very true that to the human sense of things, sickness, sorrow, discord, evil of various sorts, seem to abound and to counterfeit reality, but the hope and expectancy of all Christian people is that some day, under some circumstances, that which is real will be so manifested as to destroy forever these phases of mortal belief. There is a hope existent within each individual of something better, of something beyond the merely material, and this hope has found its expression in the prevalent teachings concerning the kingdom of heaven, wherein it is recognized that all must be and is spiritually and infinitely good. Jesus said: "The kingdom of God is within you." Mrs. Eddy's statement that "God [Spirit] is All" (Science and Health, p. 366), is identical with the Scriptural statement, "I am God [Spirit], and there is none else."

This assertion of the allness of Spirit does not destroy anything, but resolves all things into their true condition and identity, namely, that of spiritual reality, perfection, and permanency. It is clearly recognized that every mortal or material concept is subject to destruction, to disintegration, to complete annihilation; it therefore remains as an evident fact that if there be anything permanent it must be in the realm of the spiritual. The mortal concept called matter will at some time be displaced by a diviner sense of things, wherein matter appears and the reality of Spirit is made manifest. In this nothing is lost, but all is gained.

It is not expected by Christian Scientists that this will be brought about very soon. The Bible teaching is "line upon line; here a little, and there a little." Through clearer concepts of the "realities supernal" Christian Scientists are gaining more of that which is worth while, more of that which constitutes the real man in his relation to God; and to the extent of this spiritual growth man finds himself, not subject to the so-called conditions of matter, but as St. Paul puts it, subject to "the higher powers," finding herein that "there is no power but of God."

[Royal D. Stearns in *Lincoln* (Neb.) *News.*]

The measure of the fulfilment of Bible teachings, as manifested in the daily experience of its devotees, furnishes the best proof of the efficiency of any denominational belief as a practical religion.

Christ Jesus recognized the proper standard when he said, "By their fruits ye shall know them." Christian Scientists are always willing to be tested by this standard. The ultimate success attained in the development of Christian character must be determined in that way; and we naturally point to the fruitage of Christian Science practice as the best proof of the efficacy of its teachings. The teaching and practice of Christian Science is based exclusively on the Scriptures, the teaching of Christ. Nothing else enters into it. It requires of its adherents the most conscientious observance of the Golden Rule and the Sermon on the Mount as evidence of Christian character.

The Christian Science prayer is the prayer of understanding and not of blind faith; it is the prayer that realizes that God's work was done at the beginning, and was perfectly done. The Christian Scientist recognizes God as the only creator, Life, power, and Principle, and His creation as spiritual and eternal, even as He is Spirit and because of this the only reality. We believe that the command of Christ to his followers, "to preach the kingdom of God, and to heal the sick," applies to all time; even as the command, "Go ye therefore, and teach all nations, . . . Teaching them to observe all things whatsoever I have commanded you; and, lo, I am with you alway, even unto the end of the world," applies to all time.

Christian Scientists ars using entirely the method instituted by the Master, and depend upon the power of God, rightly understood, for the healing of every kind of ailment known to humanity. If it is the purpose of the churches to go back to the primitive faith, why divide the Christ garment? Why is there any more need for psychological assistance now than there was nineteen hundred years ago? It should be understood, according to Christian Science, that when Christ overcame sin and error he overcame that which had no right to be; that when he overcame sickness he overcame that which had no right to be; that he did not destroy anything that God had established, or anything that had actual entity in God's kingdom. Christ came not to destroy, but to fulfil the law.

[From an editorial in *Battle Creek* (Mich.) *Enquirer.*]

Mrs. Eddy's present commanding position is one wholly due to foundational inspiration. The world has been better for her being. Battle Creek is better for having among its people the many who have learned peace and love and truth from her teachings.

[Alfred Farlow in *Sandusky* (O.) *Star-Journal.*]

Our critic declares that the Christian Science text-book is absolutely irrefutable because it is utterly meaningless. This amounts to nothing more than the simple admission on his part that he has not comprehended the book. It is likewise an admission that he has failed to do what thousands of others have accomplished. In this country alone enough persons to make up a thousand congregations of reasonable size have understood the Christian Science text-book sufficiently to be healed of sin and sickness and to heal others thereby. As to the literary merits of the Christian Science text-book, we submit that one of the distinguishing features of any bit of literature is its effectiveness—what it does. The Christian Science text-book has accomplished much good in the world. It has lifted thousands of persons out of despair. This is evidence that Mrs. Eddy has stated her ideas in such a manner as to make them understood.

Christian Science is farther from pantheism than any other teaching. It is impossible to maintain a pantheistic belief on its premises. Christian Science has been practised for more than forty years, and it has been followed by beneficial results. Its record therefore has been the exact opposite of the record which our critic alleges is that of the Hindu philosophy. Hence his argument that the Hindu philosophy is based upon selfishness and knows no sympathy and no compassion, constitutes evidence that it is the exact opposite of Christian Science, since Christian Science generates the highest form of sympathy, compassion, and unselfishness.

[Herbert M. Beck in *Little Rock* (Ark.) *Gazette.*]

No comparison of method or value is intended, and none exists between the Bible and the Christian Science text-book, "Science and Health with Key to the Scriptures," by Mrs. Eddy. Comparison of the two books, however, for the fair and studious reading of each in the light of the other, has resulted to many thousands in a triumphant awakening of consciousness to the practical presence of the ever-living and omnipotent God, good. This is the evidence that Christian Science "garbles" no word of Scripture and "abrogates" no doctrine thereof—the sick find themselves healed, almost the dead are raised up, and the poor find that the gospel of victory has been preached to them.

Christian Science does not regard the love of God as any passing or uncertain quantity, nor that it has any less effectual presence or power in the world today than it had two thousand years ago; that His effectual help is equally present in time of trouble, and upon the same terms this day with any day—this age with any age; it expects them "that believe" on Christ Jesus to do the "works" that he did, and it shows them how to do it.

[Written for the *Sentinel.*]

A SONG OF PEACE.

LUMAN A. FIELD.

If in hushed stillness of the starlit night
Thou givest rest,
Or in the well-filled hours of joyous light
Work'st Thy behest,
It matters not, since Thou, O Love, art ev'rywhere,
Enfolding me in Thine unfailing care.

Thus am I shielded by Thy gracious power,
In peace, at rest,
And so protected through each passing hour,
My work is blest.
Thou, Love divine, art found to be my refuge sure,
My strong defense, my staff, my rock secure.

Because Thou always freest me from fear,
I rest in Thee.
Because Thou always art to me so near,
I work with Thee.
And living thus, I shall behold, with joy untold,
Love's true reflection, strong and clear, unfold.

In the sure sense of love which Thou dost send,
My rest is sweet;
In the abundant strength which Thou dost lend,
My work's complete.
New songs of praise arise, as gifts, so truly fair,
Reveal the peace in Love's o'erbrooding care.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

BOTH GOSPEL AND WORKS NEEDED.

THE Duluth *News Tribune*, in discussing the appeal which the church necessarily must make to mankind in order to maintain, or rather regain, its place in their affections and fulfil its mission in the satisfaction of their spiritual hunger, says editorially:—

Damnation as once interpreted, and salvation as once promised, have lost their power of appeal, and authority has gone with them. This does not mean that men are less emotional, less swayed by sentiment, but that they are less superstitious, more intelligent and more rational. It means that the appeal must be by other methods, with greater subtlety and with a more human motive. The moving force must be primarily subjective rather than objective; it must be personal, but, above all else, it must still be spiritual, for, scoff as they may, every man admits in the end the hunger of the spirit and the dominance of that side of him which he might deliberately starve to death if he could.

How to reach, to feed, to nourish and make predominant this spiritual part of man is now, as ever, the church's problem. It can no longer be done by command; we doubt if it can be by over prominence of the material needs, as is the tendency of the institutional church where it is most fully developed. . . . How to get men to come to a church is one problem, and there mainly lies the changed condition. Once come, to hold them, to make them come again, holds no other secret nor mystery than that which is as old as religion. It must be from what they hear, from the appeal through the ear, the mind, the sentiment.

Many times within the past twenty years various questions that have arisen in social and political affairs have been discussed by clergymen and others from the standpoint of what they believed Jesus would do were he on earth today, and while much personal opinion has been exploited in this way, much good has been done in turning thought to Christ Jesus as the great Teacher and Wayshower, the divine exponent of the will of the Father. Nor could there be a more appropriate subject for the inquiry, "What would Jesus do?" than the one which the *News Tribune* here discusses.

Surely this original Christian was the best authority on all things pertaining to the spiritual needs and aspirations of mankind, and the record of his ministry is so well preserved that there can be no question as to his method in the gospel he taught and the works he wrought during those three brief years. Plainly his plan was to reinforce his preaching by practical demonstration of the Principle which he taught, and there is no reason to believe that his course would be changed were he on earth today, for if Jesus was then doing, as he said, "the will of the Father," that is what he would do now. What this will of the Father was, he proved by his works of healing, and it is only logical to assert that these works of healing must be done by Christians today as certainly as they were done by the Christians of the primitive church.

It is barely thirty years since the Church of Christ, Scientist, was organized,—a church "designed to commemorate the word and works of our Master, which should reinstate primitive Christianity and its lost element of healing" (Manual, p. 17). The growth of the Christian Science movement in those thirty years has abundantly proved that what mankind wants and needs is the gospel and the works of Christ Jesus; and to the extent that this gospel is preached and these works are done in all Christian churches, to that extent will the complaint that men are not interested in religion be eliminated.

ARCHIBALD MCLELLAN.

HEALTH LAWS.

IT is quite customary for parents to impress upon their children at an early period the importance of observing health laws, and there is nothing wrong about this if a correct sense of what constitutes these laws is entertained. Unfortunately, results go to show that in too many instances certain human opinions pass current as health laws which are instead disease laws; as, for instance, when a child is taught to fear cold, damp, contagion, some kinds of food, etc. The effect of these theories is very often an ever-increasing bondage to the body, until the sufferer finds deliverance through Christian Science and comes to understand that these so-called laws have no divine authority, and that obedience to the real health laws gives freedom, not bondage. There is a wide difference between the "Thou shalt nots" which relate to the moral and spiritual, and those restricted to the plane of material belief.

There are of course real health laws with which children and adults alike should be familiar, and these should be reverently studied and rigidly obeyed. First of these is that great fundamental law: "Thou shalt have no other gods before me." A sincere effort to understand and obey this law reveals the spiritual fact that "power belongeth unto God" alone; hence, that evil is powerless to make any one either sick or sinful. The psalmist says to those who desire long life, that they "may see good": "Keep thy tongue from evil, . . . Depart from evil, and do good; seek peace, and pursue it,"—an excellent health law surely, and one which Peter quoted long years after it was written. Here is another, given by Isaiah! The prophet describes graphically the one who is secure amidst the tumults of mortal sense, saying that it is he who "stoppeth his ears from hearing of blood, and shutteth his eyes from seeing evil; he shall dwell on high: . . . bread shall be given him; his waters shall be sure." The whole passage is exquisite in its strength and beauty, and as a health law it has profound significance.

Mortals have too long heedlessly taken in poisons through the eyes and ears, quite regardless of the many warnings given in the Scriptures, especially the Master's words: "Take heed what ye hear." The ministry of Christian Science, as inaugurated by our revered Leader, is indeed "merciful and faithful," to quote from Hebrews. On every page of her extensive writings she shows how health may be gained and retained by the spiritualization of thought, and these teachings appeal to child and adult alike when the spiritual sense is awakened. We learn that truth is the most efficacious remedy for sin, sorrow, and suffering, and Jesus' words, "Be not afraid," are ever before thought. We cease to fear evil in the ratio that we realize the omnipresence and omnipotence of divine Love.

It would seem as if many outsiders failed to appreciate the intent of the testimonies published in our periodicals. The aim is to make these testimonies of healing, not testimonies of disease, though the tendency on the part of many erstwhile sufferers is to dwell upon the details of the dark dream from which Truth awakens us. There are perhaps few who see that the emphasis should be placed upon the healing, and not upon the disease or sin which was overcome by the truth, although it is indeed difficult to express this overcoming in human language, for, as Paul says, "eye hath not seen, nor ear heard, . . . the things which God hath prepared." Mortals have many words with which to tell of the ills that beset them, and which God hath *not* prepared. They ask that these ills shall be named and classified, and so made more permanent, when Christian Science teaches that we should instead follow Paul's advice, to be "wise unto that which is good, and simple concerning evil. And the God of peace shall bruise Satan under your feet shortly": this, as the result of obeying God's spiritual health laws.

ABILITY AND AVAILABILITY.

IN no respect does Christian Science more certainly remold human thought than in its teaching respecting the range and compass of man's capabilities. The realization that he is indissolubly linked to God, and that therefore in Christ all things are his, as Paul avers, gives a sense of the possibilities of individual achievement which makes even the Master's statement, "The works that I do shall he do also," seem a mere matter of course. Jesus was ever trying to awaken his disciples to the recognition of their unmeasured freedom to be and to do when quickened and impelled by a right sense of God and of man in His likeness. Speaking for the coming of this inspiring Christ-idea, he said to them, "I give unto you power . . . over all the power of the enemy." Their apprehension of Truth was not to remain a mere perception of ability, but to become an inspiring consciousness of availability which should be commensurate with the demands of every human exigency and need.

The distinction between ability and availability is clear, its apprehension exceedingly important. One means capacity, the other effectiveness. One is latent potentiality, the other dynamic energy. One is the engine complete but cold; the other is the same engine with a blazing furnace and ready for its work. One is the acquirement of the academician who is in possession of all the facts and of the law of their relations, the other is the mastery of the man of affairs who is translating expert information into beneficent accomplishment. One is the knowledge gained through the perception of truth, the other this knowledge plus wisdom, the tact and technique essential to the demonstration of truth under human conditions.

With a daring which expressed his fully-tested understanding of God and of the day's demand, Paul said, "I can do all things through Christ which strengtheneth me." In his life ability was proven and glorified in availability, and when we remember how largely professed Christians as a body are found wanting in this respect today, we are impelled to say that the absence of this characteristic of Christ Jesus and his early disciples constitutes the greatest sin of the modern saint.

We do well to remember in this connection that our responsibility is determined by our knowledge of privilege and opportunity in Christ, and not by what we may think we can do toward utilizing this knowledge. This fact is constantly referred to by the scripture writers and it is this fact which must ever give peculiar significance to the name "a Christian Scientist." The contention of our Leader from the beginning has been that believers in Christ should make their God-given and God-sustained ability available, as did the early disciples; that no true Christian Scientist can be contentedly inactive, or dependent upon others to work out his problems. This may be said to be the fundamental meaning of the Christian Science movement, and the would-be Christian Scientist who is not mightily impressed thereby has not yet grasped its most vital and significant teaching.

The call of humanity is wistful and world-wide for an adequate and available faith in Christ, that saving apprehension of Truth by which Peter and Paul made their lives tell for the kingdom of God on earth, and we can express the value and authority of Christian Science in no way that will be satisfactory to men save through the healing and redemptive works which glorified the Christian faith of the first century and which shall prove again that in Christ ability and availability, the apprehension of truth and the utilization of truth, are made at-one. The secret of spiritual availability was made known by St. Paul when he said to the Ephesians that "according to the power that worketh in us," God "is able to do exceeding abundantly above all that we ask or think."

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Galesburg, Ill., Aug. 2, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Dear Leader:—In joyful obedience to the new by-law, Article XXIII., Sect. 2, as published in the last issue of the *Sentinel*, I have today handed to the clerk of our church my resignation as librarian of our local reading-room. My office as practitioner adjoins the reading-room and I have had charge of both. This by-law again fulfils the law, namely, "Thou shalt love thy neighbor as thyself," and "Thou shalt not tempt thy brother," for herein is given the opportunity to all who have entered the work as practitioners to work equally, showing partiality or advantage toward none, and love toward all. The temptation of jealousy and envy is likewise eliminated.

I sincerely and gratefully express to you my joy and appreciation for the great love and wisdom which has given birth to this by-law. I am profoundly grateful to God for giving to us a Leader who knows no respect of persons, but with Christlike love for one and all points out and leads the way up to that blessed height where strife, contention, jealousy, and "who shall be greatest" are unknown, and the spirit of Love as revealed in yesterday's beautiful Lesson, fills every heart. Therefore, I thank you for this new by-law and rejoice in being obedient to it.

Within an hour after reading the new by-law I had found a desirable office suite, and as soon as our directors can make provision for the care of the reading-room I shall remove to my new quarters.

Gratefully your student's student,

J. NEWTON CONGER.

Kansas City, Mo., July 31, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—I have recently passed through an experience that has made me yearn to express my love and veneration for you, my revered Leader in Christian Science. While attending the National Educational Association in Denver, the first of this month, I came under a serious attack of illness. I had such a sense of pain that I seemed unable to make a declaration of truth, except as I read it from Science and Health. By persistently clinging to the truth therein contained, reading and repeating those passages which explain man as reflection, the illness was overcome and I was able to take the necessary steps to reach home.

My indebtedness to you, and my gratitude, mingled with reverence, cannot be measured, for revealing to the waiting thought of this age the truth of man as reflection. The understanding that the real man has always reflected God and eternally must do so, lifts us above the false beliefs of sense and transforms us by the renewing of our mind.

"The substance, Life, intelligence, Truth, and Love, which constitute Deity, are reflected by His creation" (Science and Health, p. 509). For statements such as this thousands call you blessed, and know that in you is being fulfilled the prophecy: "For I will make you a name and a praise among all people of the earth."

Most affectionately yours,

JOSEPHINE HEERMANS.

St. Louis, Mo., July 29, 1909.

Dear Mrs. Eddy:—I want to write you how much more I now appreciate and love you than I ever did before. I have just finished reading "The Life of Mary Baker Eddy" by Sybil Wilbur, and realize that until I read that book I knew comparatively nothing about your life. When

Digitized by Google

I read of your struggles, your unflinching and unwavering faith in God, amid trials that at times seemed almost insurmountable, your loyalty to Truth, your willingness to sacrifice all material comforts and pleasures for right, the firm stand you took when even your nearest and most devoted students deserted you; and now, when you could have all honors, your graceful retirement from all earthly glory, for the continuance of your marvelous work for the good of mankind, I felt a sense of shame that I should ever complain when Science seemed to work slowly in my experience, that I should manifest impatience when things did not work out at the time in which human will had set that they should be worked out, and I feel an infinite amount of gratitude to you, our dear Leader, who have climbed alone the rocky upward path that leads to peace, health, and happiness, and are ever leading us onward and upward by your wonderful example of patience and meekness.

Very lovingly yours,
MARGUERITE CALDWELL.

New York, N. Y., July 12, 1909.

Dearly Beloved Leader:—It is with hearts overflowing with gratitude, that we, the directors of the Christian Science reading-rooms of New York city, announce to you the opening of a new reading-room June 1, 1909, at 206 Broadway, corner of Fulton street. The establishing of this room, in the heart of the great financial district, was necessary to meet a need that has been most apparent to us for some time past, and the growth of the work in the short time this room has been open, shows that the demand is being met. In addition to this progressive step, we report another forward move. On July 1, 1909, the 34th street room was opened evenings, except Wednesday, from 8 to 10. We have also been able to keep this room open holidays, day and evening, at our present location, —a thing impossible while we were located at 23d street, —and the results have been most satisfactory on these occasions, both in regard to attendance and sale of literature.

Each day and hour impels us to give joyful thanks to our God, for His gift to this age, of you our peerless Leader, who maintain the Cause of Christian Science with such wondrous wisdom and stately dignity.

With tenderest love,

Ever your loyal followers,
THE BOARD OF DIRECTORS.
FLORENCE S. TYLER, *Secretary,*
ELLA B. RIDEING, *Chairman.*

Chicago, Ill., July 24, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—This tribute to you and to the Cause of Christian Science is the flowering of eight years' experience in the growing comprehension of scientific being. Before Truth touched my thoughts to greater issues, I believed, with thousands of others, that the problem of life could only be worked out on a material basis. As a consequence of this belief I early turned my thought toward educational pursuits, and as a final preparation was taking a degree in a medical college of this city. While I could see this endeavor was not ultimate, still I struggled on, hoping to work out a modicum of relief and comfort to the world of suffering and woe.

Early in the year 1901 your wonderful book, "Science and Health with Key to the Scriptures," was handed to me, and at first with scorn, then with condescension, I opened its sacred pages, only to find—what—not theory and practice, but Principle and practice; not a modicum of comfort, but "the Comforter," that leadeth into all truth; not discouragement, unsatisfied longings, unrealized ambitions and ideals, but encouragement, satisfaction, and realization. By the mere reading of Science and Health I was healed of organic and functional diseases, and was lifted up and out of the limitations of school-taught means and methods.

It is, therefore, with the profoundest gratitude that I bear witness to the healing and regenerating influence of Christian Science in my life, and I thank you for the splendid example your life is to us in our every need. Believe me, with love, always

Very sincerely,
ALTHA M. SMITH.

New London, Conn., Aug. 2, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—At a meeting of First Church of Christ, Scientist, of New London, Conn., held Sunday evening Aug. 1, a unanimous vote was passed to express to you, our revered Leader, our deep appreciation of the new by-law, published in the *Christian Science Sentinel* of July 31, relative to teachers' and practitioners' offices.

The two upper floors of the building owned by this church had been converted into two apartments, which were occupied by several of our women practitioners. While these apartments had no close connection with the auditorium and reading-room below, still it was the conviction of the practitioners and other church members that the new by-law affected our situation. We feel that it will rejoice your heart to know that through willingness to yield prompt and joyful obedience to this rule, we have been blessed in the clearer apprehension of the great protection which obedience to this by-law will bring to our Cause; and, in a degree, at least, we have seen more clearly God's gracious care and wisdom as reflected by you.

We are confident that the divine Love which enabled you to perceive this need of the Cause, will care for each one who gives ready obedience to the demand. That this branch of your planting may continue to manifest an unswerving allegiance to the Mother Vine, in instant and loving adherence to every rule and by-law laid down for the government of the branch churches, is our deep desire.

Again, beloved Leader, we thank you for this added proof of your faithfulness to God and your watchfulness for the preservation of pure Christianity.

LAURA COOLEY TUCKER, *Chairman,*
RUTH MAY JENNINGS, *Clerk,*
Committee.

Dover, N. J., Aug. 1, 1909.

Beloved Leader:—For many years I have wanted to write you my sincere thanks for what Science has done for me, but knowing how full each hour of your life must be, I have refrained from doing so. Yesterday, while reading the new by-law concerning practitioners' offices in reading-rooms, a great flood of light came to me. I saw at once the great good to be accomplished by this step—also the error to be avoided—and I resolved at once to say thank you for having made this possible for us.

Eleven years ago I was led to this fountain of Life, and your teaching has indeed done much for me, leading me out of the darkest Egypt where the senses and false theology had engulfed me. My teacher has been most loving, but firm, in constantly turning me away from personality to Principle. Under other conditions I would be loath to leave the little "upper room" where we began two years ago with seven in number. It has indeed been a place where trials have melted away to the triumphant march of Truth. Your bidding will make the move easy. God bless you, dearest of all earthly friends.

Lovingly your student's student,
AGNES E. GRIMES.

THE LECTURES.

WINCHESTER, KY.

Before a fair-sized audience at the Opera House, last night [May 28], Frank H. Leonard of Brooklyn, N. Y., lectured on Christian Science. He was introduced by W. A. Beatty, who said in part,—

In all generations of the world since history began, man has searched for the truth. Five hundred years before Christ, in far-away India, Buddha was groping and searching for the light. After his death a still more enlightened people followed, and then Jesus Christ came and walked by the sea of Galilee and taught the people. Today we have Mrs. Eddy, who is teaching, according to her followers, something of the truth of Christ, of the real truth. Personally I am not a Christian Scientist; all I know is, that we who are not Christian Scientists may look and listen and be enlightened as to the belief of this people.—*Correspondence.*

CHATTANOOGA, TENN.

About six hundred people listened to a lecture on Christian Science at the Bijou Theater Friday night, May 28, given by Prof. Hermann S. Hering. The lecturer was introduced by the Hon. Alexander W. Chambliss, who said in part,—

While many of you, like myself, have not accepted this faith, which is comparatively new, yet we do not fail to recognize that thousands and thousands of noble-hearted, sweet-spirited men and women all over the world do accept these views and love this faith and feel themselves to have been inestimably blessed and helped and their lives brightened and sweetened by its teachings. Whatever in this world appeals for and to the best in us, whatever has for its object the spiritualization and development of the love-spirit in humanity, must have good in it and ought to be, of course, welcomed and nurtured by us all.

Correspondence.

WARSAW, IND.

Taking as his subject "Christian Science," Judge William G. Ewing, late of the Chicago superior bench, delivered a lecture under the auspices of the local church on Sunday afternoon [June 6] at the Opera House in Warsaw, the auditorium being practically filled by Warsaw people and many residing elsewhere who came to hear more of Christian Science. The speaker was introduced by Jacob A. Henry, who said in part,—

Moses gave us the Ten Commandments, prefixing each with a negative admonition, "Thou shalt not." Jesus summed these up in two commandments, prefixing each with a positive injunction, "Thou shalt." In the twenty-second chapter of Matthew we read that "one of them, which was a lawyer, asked him a question, tempting him, and saying, Master, which is the great commandment in the law? Jesus said unto him, Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind. This is the first and great commandment. And the second is like unto it, Thou shalt love thy neighbor as thyself. On these two commandments hang all the law and the prophets." Upon the commandments of Moses all the moral laws of Christendom are predicated, but based upon their spiritual interpretation, as given by Jesus, we find no human mandate. Love cannot be controlled by laws of fear. There is but one law that can compel obedience to Love, and that is the spiritual law of God, who is Himself Love.

Christian Science is in the world today demonstrating this spiritual law of Love—demonstrating it, not in the barrenness of its letter, but in the fruitfulness of its work. It is therefore in humble and reverential obedience to the command of our Master, and with hearts filled with love, that we have brought to you today one who is competent to tell you of the logic of that love and the beauty of its demonstration.—*Warsaw Times.*

FORTUNA, CAL.

Fortuna Christian Science church was well filled with residents of Fortuna and the various towns of Eel river valley Sunday afternoon [June 6], when Clarence C. Eaton of Tacoma delivered an intensely interesting and scholarly address on Christian Science. He was introduced by Henry Hansen of San Francisco, who said in part,—

There is one question of more than usual importance before the world. It is a question to which a correct and conclusive answer must be had before humanity can emerge out of bondage into the liberty of the sons and daughters of God. This question, "What is truth?" was asked nearly twenty centuries ago, and it was directed to one who both could and did answer the question correctly, though his answer the world rejected, and has sought its solution along the lines of philosophical and so-called scientific reasoning; but as yet, to many at least, the question still remains unanswered. In this age of active inquiry and scientific research, invention, and advancement, constant demands are being made upon the public thought for recognition by different systems of more or less importance. Not least of these claimants upon public attention is the Christian Science movement, and we believe that Christian Science has come to answer and is answering correctly that ancient question.—*Humboldt Beacon.*

CANON CITY, COL.

A representative audience which completely filled the Canon City Opera House listened to a lecture given last evening [June 15] by Miss Mary Brookins of Minneapolis, on "Christian Science, the True Interpretation of Being." On behalf of First Church of Christ, Scientist, of this city, under whose auspices the lecture was given, Judge Kent Eldred, in introducing the lecturer, said,—

Christian Science, as I understand it, bases its belief firmly on the Bible, and the divine truths therein contained, truths which help to smooth the pathway of human life and prepare us for a higher plane of thought and right living among our fellow-men, and the practice of its precepts will gain us the highest reward—eternal life. Warm-hearted, intelligent, and practical Christianity appeals to all of us.—*Canon City Cannon.*

LECTURES AT OTHER PLACES.

Norton, Kan.—Frank H. Leonard, Jan. 1.
Grand Junction, Col.—Judge William G. Ewing, May 4.
Montrose, Col.—Judge William G. Ewing, May 6.
Durango, Col.—Judge William G. Ewing, May 9.
Prescott, Ariz.—Judge William G. Ewing, May 13.
Mesa, Ariz.—Judge William G. Ewing, May 15.
Minneapolis, Minn. (Fourth Church).—Clarence C. Eaton, May 16.

TESTIMONIES OF HEALING.

I have long desired to give my testimony of blessings received through Christian Science, but words can convey only a faint idea of them. I first heard of this teaching about eleven years ago. As I was then in good health and very happy, a church-member, and trying to live a Christian life as I understood it, I thought I did not need Christian Science, although I could readily see the great change which had taken place in the dear one who presented the truth to me. The reading of "Science and Health with Key to the Scriptures" by Mrs. Eddy, was sweet music to my ears, as the beautiful words came forth from lips cleansed of profanity and made to praise God by voicing His truth.

From time to time I read the literature, for possibly three years, when another Christian Scientist was a welcome guest at my home. This visit was a very enjoyable event, for I had all my questions answered so clearly and rationally that I became hungry to know more of Christian Science. Not long after that I procured a copy of Science and Health, and ever since then it has been the most closely read book in my home. By its study the Bible has become more interesting than before; light has been shed upon its pages, and gradually the misty sense of life and the future has cleared away and the real appears. The healthy tone and ideal life-inspiration of Science and Health were enough to keep me interested, until the truth it taught dawned on my consciousness. The first benefit I received was the overcoming of melancholy attacks, through my thoughts being filled with the good I daily read. Thus it was that Mrs. Eddy's statement was proven to me even before I expected: "The way to extract error from mortal mind is to pour in truth through flood-tides of Love" (Science and Health, p. 201). I enjoyed such a spiritual uplift that I ceased to do my work from a sense of duty, but rather as a privilege, thereby to reflect God as Love, especially to the dear ones in the home.

One day, I read in the *Journal* a testimony of eyesight being restored through the daily study of Science and Health. I was surprised, yet believing. As I had worn spectacles about six years for a serious trouble, I felt encouraged that I, too, might be healed, though I had been told by a specialist that I must always wear glasses. So in faith "believing" I took up the study in earnest, thinking that herein was the truth which makes free. The first day I laid the glasses off my eyes did not feel at all tired, so then I only wore them for special work, but not for reading. Finally I laid them aside entirely, and have not used them for five years. I know that I gained in spiritual perception, which was manifest in clear sight, and I do my work, whatever I wish, regardless of the time of day. It has been a great joy to me to see so clearly as to be of use in the Cause and serve as Second Reader for a year and a half in our society here.

At one time, in the town where we lived, an epidemic of illness appeared among the school children, but our children were not in the least affected, though attending school regularly. We made the 91st Psalm the basis of our prayer, and we did not fear, but trusted God as their protector. We were very grateful indeed at that time for the knowledge of the truth we had gained in Christian Science. Another time, a great sense of weariness was instantly overcome by my recalling and meditating for a moment upon these words of our Leader, "The Discoverer of Christian Science finds the path less difficult when she has the high goal always before her thoughts, than when she counts her footsteps in endeavoring to reach it" (Science and Health, p. 426). It is such a blessing to be able to answer the questions asked by the little ones, concerning God, Christ Jesus, the church, etc., for they quickly grasp the clear statements of our text-book.

I am indeed grateful for having been helped to gain an understanding of this Science. My heart ever thanks God for manifesting His love to this age through Mrs. Eddy, giving her such support in her need as has made her strong in His strength, wise in His wisdom, and victorious through divine Truth.

MRS. EMERETTA S. VAN DINE, Chester, N. H.

[Translated from the German.]

With a grateful heart I testify to the blessings which have come to me through Christian Science. From early childhood I suffered much from nervous debility, to which was added a stomach trouble that caused me great pain whenever I ate, and I could scarcely retain any food. This trying disorder had tormented me for about two years, when God led me to meet a Christian Science practitioner who is now in Dresden. She explained to me that God is Love, that Love creates good only, and that therefore I could eat anything without fear. This was said with strong conviction, and I felt that it must be true. Clad with this faith, I began to eat even of those dishes which otherwise seemed least to agree with me; and it was like a miracle, for I immediately found myself better. This was five years ago, and since that time I can eat freely of every kind of food, and I have never again felt any such trouble. The nervous debility also has ceased to torment me, and during the past three years I have taken upon myself a heavy obligation which I could not have fulfilled without the recognition that God is the source of my strength. I have also had further proofs of the truth in being able to help my fellow-beings.

Thus I have come to the conviction that the truth still heals today as it did while Jesus was on earth. I formerly believed in and read the Bible, but not with the understanding which I now have. I greatly enjoy reading the *Herold*, and I take much pleasure in learning to read Mrs. Eddy's wonderful book "Science and Health with Key to the Scriptures." How I rejoice over every sentence which I understand! I did not know one word of English formerly; in fact, knew German, my mother tongue, only. I wish I could tell all my fellow-beings that for me "old things are passed away; behold all things are become new." I cannot thank enough our heavenly Father, also Mrs. Eddy, that I have gained this understanding of Truth.

EMMA ZSCHACHLITZ, Schandau b|Dresden, Germany.

I wish to express my appreciation of what has been given me in Christian Science, and my love and gratitude for our Leader, Mrs. Eddy. I became interested in Science about four years ago, not so much for the purpose of learning more about God as for the purpose of criticizing. Whenever I heard of cures made by Christian Science I had a feeling of dislike, but I soon learned that this was all within myself and that it was not because Science is not good. At the time I became interested I was trying to seek happiness in a life of material pleasure. I was a slave to liquor and tobacco to the extent that I thought I needed them all the time. The combination of these, with many other old beliefs, gave me a very bad disposition, from which I suffered a great deal. I was absolutely cured of the appetite for drink and tobacco, without ever since having the least desire for either, and by reading Science and Health and getting treatment I have been relieved of sickness.

I feel more love for all mankind, and this has come through a better understanding of God and His mani-

Digitized by Google

festations. Christian Science has given me unlimited help in a business way. It has helped me to comprehend and accomplish things which I could not have done before. Where I used to fear everything that confronted me, now I feel that I may rely upon the divine protection and guidance. Christian Science has given me an insight into the Bible which I never had before. I have a great deal to be thankful for, and I want so to live that I may be a good example to others who need help. I am very grateful to our Leader for the knowledge of Christian Science which has brought so much light into my life.

MILES A. GOODYEAR, Tomah, Wis.

I wish to express my deep obligations to divine Truth and Love, and my thanks and gratitude for the many helpful articles in our periodicals during the past year. Many times the reading of these good thoughts has given me renewed courage, has lifted me above the clouds of sense, and shown me again how to "rise in the strength of Spirit to resist all that is unlike good" (Science and Health, p. 393).

In 1897, after four years of suffering, in which I received no help or encouragement from *materia medica*, material remedies, or hygiene, I heard of a case, very similar to my own, which was healed in one treatment by Christian Science. For several years I had been intensely prejudiced against what I thought was Christian Science, and would not listen to any one who talked it. I was very careful not to touch Science and Health, which lay on the table and was constantly read by the family, but after living in the home of these dear people eighteen months, I had been compelled to recognize that they were living their religion in their daily life, and that they had a religion which seemed to satisfy and to be very practical. With this conviction my prejudice had become sufficiently softened to enable me in an hour of extremity to go to a practitioner and ask for treatment. Within a very short time I was perfectly healed of many ailments, from some of which I had been told I would never be free. With the third treatment I was enabled to take off my glasses, and have never used them since.

With this healing there came a great revelation of Truth, which seemed to lift me above the mortal realm of existence for many months; but, as we all find, I had to come down to the valley and begin my journey upward by overcoming the mortal self; and, as Paul says, I have found it a warfare, "not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places." Christian Science has been my only weapon of defense in this warfare, and it has ever been sufficient for the need.

I would again express my gratitude to all of the contributors to the periodicals, and to dear Mrs. Eddy, who through a life of self-sacrifice has made these blessings possible.—MATTIE T. SHARP, San Diego, Cal.

It is with a heart full of gratitude for what Christian Science has done and is doing for me, that I give this testimony. For sixteen years I had suffered from a severe form of heart disease, so complicated and baffling that we turned from the regular practising physician to specialists, trying first one, then another, till each in turn had said he could do nothing for me. At this point I felt that if the physician then attending me should give me up, there was indeed no chance for me, as everything had been done that medical science could do.

Finally this dreaded day came. I had been ill for two weeks, had eaten nothing in that time, and when the pain and difficulty of breathing ceased, sinking-spells set in. The doctor had been with me several times during the day, each time changing the medicine. It was in August and a very warm day, so I was brought out on the veranda. In the afternoon at two o'clock the doctor came again, and this time I saw he had given up hope. I was young and clung to life, but it seemed now that all was over. He left me, saying he would return in an hour. As he reached his carriage I saw my next-door neighbor, a stranger to me, speaking with him. After a few moments she turned and came to me, saying that she knew my physician and he had said she might sit with me. She then introduced the subject of Christian Science, telling me of its benefits till five o'clock. All this time I was having sinking-spells every few minutes, so that considerable of her talk escaped me; but still I got a little, and after a while I noticed that I had been seeing her for some time and was hearing all she said. I realized that I was better, but gave no credit to Science.

Finally she asked if I would let her come to me if another attack of the heart trouble should occur, and I said I would. She then walked to the end of the veranda, and I got up and followed her to say good-by. I was unconscious of having done this, until she had left me, saying, "Now I would eat a nice supper; just the things you would like the best." This seemed absurd, for I had no appetite, and besides I was too weak to get supper as the practitioner had suggested. I reasoned that my neighbor was a stranger and very unsympathetic, but as she walked into her house I walked into mine and to the kitchen, where I began to make hot biscuit, and suddenly felt intensely hungry. My husband came in at this point, and I had great difficulty in proving to him that I was all right and not mentally unbalanced. He had left me too weak to walk across the floor, and to see me with bright eyes, hungry, and as strong as ever, was more than he could understand; but when later I spoke of Christian Science, he was more than willing for me to try it. Even the physician seconded my taking it up, for as he said, no human power could help me. I am now entirely free from the attacks, and in the six years of this study both my husband and myself have been freed of several ills.

Some time after, I was taken quite suddenly one evening with a severe attack of gastric trouble. I immediately called a Christian Science practitioner, and in twenty-four hours the fever had entirely left me, though I continued to be very ill for several weeks. For the first five weeks the bowels were totally inactive, and I learned that during this time some of the neighboring physicians declared it impossible for a person to live in that condition, let alone the severity of this particular case, which, as can be readily believed, was very interesting to them. However, at this time the bowels suddenly resumed a normal condition, as though there had been no trouble, and I was able to be out in a short time.

I was indeed thankful to be able to know, through the clear spiritual teaching of Mrs. Eddy, that though to mortal sense there had seemed to be danger, there really was none; and that God is in reality the only physician. Every day I thank God for this great truth, and I sincerely hope that these words will encourage those who may be hesitating to accept it.

ALICE H. FERGUSON, Omaha, Neb.

[Translated from the German.]

Like so many others I have been delivered from the sufferings of years through Christian Science. I had much sorrow and care because of a son who was sickly from early childhood. We went from one physician to another. He submitted to operations repeatedly and had medical treatment constantly. This care for my only child, and the anxiety and fear which I experienced, made me wretched. I felt a constant heavy pressure in the head, so that it

Digitized by Google

seemed impossible for me to think clearly. Nearly every week I had an attack of headache which would keep me in bed, and my stomach, too, was very much affected.

Through an acquaintance I heard of Christian Science and also began to read *Der Herold*. We applied to a Christian Science practitioner and asked for help for my son. He was helped temporarily, but later on his old complaint, a wound behind the ear, where he had been operated upon, began again to trouble him, and he spoke about making a trip to see a physician. I decided instead to go to Dresden, so as to get more information about Christian Science, and I requested a practitioner there to treat my son. So far as he was concerned, however, the lady advised me to talk it over with him first. The next day I made the trip home, strengthened and comforted by all I had heard.

Since that day I have been absolutely well; none of my old troubles have returned, and although treatment was not given to my son directly, all his old complaints disappeared within a short time. The Christian Science practitioner held fast to the truth that all the misery and the sickness of the past years were only dream-shadows, which had never existed in divine reality, and this truth freed myself and my son at the same time from the load which had weighed upon us for fifteen years. I cannot thank God enough that I have found the truth which has been revealed to all the world through Mrs. Eddy.

FRAU AGNES MUELLER, Eibenstock in Sachsen, Germany.

I wish to express my gratitude for all that Christian Science has done and is continually doing for me and the world. Four years ago last January I suffered from a disease for which I was treated by a physician. I was a very sick person at that time, coughed day and night, could neither eat nor sleep, and could sit up for only a little while at a time. The first Sunday in February of the same year a Christian Science practitioner was called to the house. After she came the second time I was entirely healed of this cough, and in two weeks I was well. I also had another most wonderful demonstration in April of the same year, in that I received perfect eyesight after I had worn glasses for nine years. I was then sixty years of age and have had normal eyesight and good health ever since. I am more than grateful to God, and I am very thankful to Mrs. Eddy for Christian Science.

MISS MATTIE HANNA, Mankato, Minn.

We came into Christian Science for the healing of our son. We were away from home and were driven by an approaching storm into a home where a Christian Scientist lived. She and her little boy had been healed in Christian Science, and she came at our solicitation to our home and stayed three weeks. I learned from her that it was the religion for which I had been looking. I had often thought how Christ's disciples healed the sick, and asked, Are we not his disciples? I thought something was wrong, but I did not know what. Now, through the study of "Science and Health with Key to the Scriptures" by Mrs. Eddy, I have learned the true way.

My son had an attack of fever, and after he was able to be about he did not gain as he should. The doctor and nurse did all they could to restore his health with material remedies, but to no lasting avail, and after awhile we sent him to a hospital. He seemed better for a short time only, and then we tried electricity, but nothing did any good. He was greatly wasted and would not eat. There being no Christian Science practitioner living near, I took him to Richmond, Ind. We were there one week and then returned home, and after this, whenever from time to time I wrote of his condition, there would be marked improvement. The kidney and bowel disorders disappeared at once, and just before the complete healing took place he was examined by a physician, who said he was normal except there might be some little disturbance of the bowels; but that it was not safe to have him at home, and that we should take him to a hospital. They were making preparations to take him, when I telephoned to the Christian Science practitioner. He began to improve, and I never saw any one gain so fast. He is now a large, robust, healthy man, and works in the hospital. Our hearts go out in gratitude for the healing of one we all loved. I would add that very many of those who saw our son remarked that they never thought he would get well.

I will also tell of my own healing. I had been suffering for a week with a severe attack of stomach trouble, and the morning I was to start with my son for Richmond, I thought I could not go; but the dear Scientist who was at our house helped me, and I became easier and started. I thought when I got down there I would also ask for Christian Science treatment for myself, as I had had this difficulty for years. Sometimes it was so severe that I would eat almost nothing for a week. I took one treatment, and the practitioner said, "Now you must eat." I thought she did not know what she was talking about, but I was obedient, and what I ate did not hurt me and I have never had any return of the disease. This occurred over two years ago, and I have had many other demonstrations of God's power over mortal ills.

While the physical healing gives much to be grateful for, it cannot be compared with the spiritual uplifting, which is beyond words. I am grateful for the understanding I now have of the truth of being. When I first began to read, I did not understand much, but I was anxious to learn, and went over the Lessons with the children. We are a family of six, and we have not taken any medicine in the two years and are very much healthier and happier, for we know from whence cometh our help. Science and Health certainly does unlock the Scriptures. The Bible is a new book in our home. I used to pray that I might love the Bible more, and now that I understand it, I read it with unbounded pleasure. We are indeed grateful to Mrs. Eddy, for the study of her book shows us what God is and man's relation to Him.

MABEL A. M. STANLEY, Bryant, Ind.

I first took up the study of Christian Science during the summer of 1907, and I am happy to say that in that short time I have learned more from its teachings of what life really is than in all my previous study. I came to Christian Science first of all for physical healing, and the results were such as left no doubt in my mind as to the truth of its teachings.

I had taken medicine for nearly thirty years for one disease alone; indeed the doctor had told me that same week that I could not possibly do without it, but I was healed of that particular ailment with one treatment in Christian Science. This in itself was sufficient to show me that there was something very grand and good about it, and I determined to look into it for myself. That was in June, 1907, and in July I was laid up with an attack of bronchial trouble, which was met and overcome in a few days by absent treatment. I had been subject to this complaint for forty years, and had suffered tortures almost beyond endurance with material remedies, including blisters, etc. Let any one imagine the condition of the body after such treatment, and compare it with the quiet and prayerful treatment of Christian Science. Is it any wonder, after I had caught the tiniest glimpse of its beautiful teachings, that I was willing to accept a Christianity which treats every case of sickness so lovingly and overcomes it through the power of Truth.

In August I was seized with a sharp attack of illness,

Digitized by Google

and my husband wanted to send for a doctor; but he waited one day, at my request, to see what absent treatment in Christian Science would do. I was then so much better that he no longer wished for medicine, and very soon I was about again. In September I had a wonderful experience. I went to visit my daughter in Durham and took with me a little granddaughter. When we had been there three weeks the little girl was taken so ill that no food would stay on her stomach. The second day it was beginning to look serious, for I could see that a liver trouble was quickly developing. I was very much upset at the turn her illness was taking, and though my experience in Christian Science was so limited that I dared not venture to apply it, yet I did not want to call a doctor. One of the neighbors suggested I should give the child some medicine, which I did with great reluctance. It all came back again, however, and I thanked God from my heart that it had done so, for I felt I had done wrong. I at once decided to do my utmost with my slight knowledge of Christian Science, and leave the rest to God; and I was well repaid. Sleep was out of the question for two nights, but I kept my thought steadfastly fixed on the work before me, placing all confidence in God, and on the fourth day the sickness ceased. On the fifth day we were able to take our journey home, nearly one hundred and fifty miles, without any inconvenience whatever. It was some few days before the skin became natural, but at the end of a week's time the child was eating heartily. This was a grand experience for me, and it gave me more courage to go on, for I knew that it was God working with me.

To say that I was thankful would be saying very little, for I was full to overflowing at the manifestations of God's great love and power at this time. Since then I have been able to overcome many smaller ills for myself through the application of the truth, though in December, 1907, I had a return of my old enemy, the bronchial trouble, but this was soon overcome through the loving help of a practitioner. To me it has been a time of wonderful and happy experiences and it has also brought much happiness into my life. I am truly grateful to the kind friends who have often spoken so lovingly, cheerfully, and encouragingly to me when at times I have felt depressed. The truth spoken has given me many an uplift and helped me to press on. Although many years ago I had been termed a broken reed by doctors, I thank God that instead I am now trying to bud forth into newness of life. I love Christian Science, and hope some day I may be worthy to be known as a Christian Scientist.

SARAH JANE EATOCK, Hindley, Lancashire, England,

I gratefully testify to the fact that I was healed about six years ago of a bowel disorder and severe headaches to which I had been subject for twenty years. I had taken medicine daily, consulted many doctors, and tried various other remedies, with only the result that I was daily growing worse, until I took up the study of "Science and Health with Key to the Scriptures" by Mrs. Eddy. I was also treated by a kind practitioner, and was healed of both these complaints.

I am indeed grateful for this healing and for many other benefits received since from the daily study and application of the rules of Science. My most earnest desire now is to possess more of the Christ-spirit, to reflect divine Love, and thus to help my fellow-men.

MRS. ANNIE M. LATIMER, New Orleans, La.

It is with a heart overflowing with gratitude and love to God, to our blessed Master, Christ Jesus, and to our beloved Leader, Mrs. Eddy, that I attempt to express something of the joy, peace, and many other blessings which I have received since "Science and Health with Key to the Scriptures" was brought to my notice by a friend. From the time I began to go to school I had the thought of weakness and sickness to combat constantly, and I came to be regarded as not strong like other girls. While very desirous to attain much in the way of education, I would repeatedly be obliged to stay out of school on account of illness, and finally had to give up when in my senior year. I have seen what were my fondest hopes frustrated by this sense of ill health, as well as by the incorrect point of view as to what is real, and what is therefore really desirable.

During my first reading of our text-book, Science and Health, I was healed of a chronic bowel disorder of nine years' standing, after having been treated by several physicians and one eminent specialist. Each one of these good men did all he could for me, I truly believe, and the treatment of most of them seemed to help me for a short time, but I was obliged to diet, be careful, and take medicine most of the time. Now I eat everything that I like which is set before me, knowing that "not that which goeth into the mouth defileth a man; but that which cometh out of the mouth, this defileth a man."

I also experienced a great spiritual uplift, the joy and peace of which cannot be told in words, and while drinking in the blessed truth which one finds in our text-book, which is truly the "Key to the Scriptures," I felt relief from the sense of weakness and exhaustion, as well as from the fear which had for so long seemed to be with me. I have gained in flesh, and have strength to do anything that it is my duty to do, knowing that God is my strength. Many other ills have been overcome, among them a predisposition to catch cold. The sense of fear, doubt, care, worry, anxiety, discouragement, disappointment, sin, and sorrow, has been greatly lessened, and I know will be wholly overcome as I fully realize the great truth that Science reveals to us, namely, that "God is All-in-all."

My one desire now is so to study and make practical the teachings of Christian Scence that I may prove my sincerity and gratitude. It is nearly two years since I have taken any material remedies, and since my first reading of our text-book; and I never expected to be as well and happy on this earth as I have been during that time. I enjoy the privilege of being a member of The Mother Church, and am also a member of our branch church here.

MISS MARY ALICE TRUMBULL, Batavia, N. Y.

Trusting that this testimony will be of benefit to others, I feel that I should give it in gratitude for what Christian Science has done for my little girl. She was troubled with weak eyes and near-sightedness, and was also believed to have a humor in her blood. I took her to a Christian Science practitioner, who gave her one week's treatment, and she has had no trouble since. The child had been told that she must have glasses in her school work, but when her eyes were tested, after she had been treated by Christian Science, they were found to be normal. I am very thankful to God for Christian Science, also to Mrs. Eddy, its Founder, for the many benefits I have received through this wonderful truth.

MRS. ANNA CRAMER, North Yakima, Wash.

I had been suffering from my eyes for over a year, not being able to use them without glasses, and very strong ones at that, when I went to a Christian Science practitioner and was cured in one treatment. This was three years ago, and I have had no return of the trouble since. Christian Science has also helped me in other ways, and I am most thankful to be able to give my testimony to the value of the perfect way of understanding God, as revealed to us through Mrs. Eddy.

LOLA B. LAWRY, Pacific Grove, Cal.

FROM OUR EXCHANGES.

[Allan Hoben in *American Journal of Theology.*]

The church rightly demands that any new theology shall guarantee militant and heroic qualities on a par at least with those which have prevailed under the inspiration of the old beliefs. Both for her proper self-respect and the free release of her powers she aspires to a unique religion that is needed by the whole world; and she will not willingly be shorn of a dignity with which an unparalleled obligation to all humanity has endowed her. For this reason the church awaits a reconstruction that is vital, imperial, and irresistibly dynamic; while she stands stubbornly aloof from all restatements that are concessions only. To be sure, scientific scholarship must determine whether the facts permit the satisfaction of such a demand, but the church will persist in demanding that any proffered reconstruction shall possess the utmost vitality; and whenever that vitality is conclusively demonstrated by the champions of advanced views the church will take cognizance of it and will—with painful deliberation, to be sure—lay hold of whatever means added effectiveness in her task of promoting the kingdom of God in the earth.

[Rev. H. Arnold Thomas, M.A., in *British Congregationalist.*]

What Paul was doing, he was doing in God's name. The truth that he was declaring was God's truth. It was from God that he had received his commission. God was ever present with him. The grace of God was never withheld from him. It was God's affair from first to last, and success in the end was therefore certain. How should a man not be bold in these circumstances. And this is what the church today is wanting—boldness, the note of authority and the accent of conviction, confidence in her mission and courage to bear witness against every form of wickedness, and to publish both the law and the gospel of the kingdom to those that will listen, and to those that turn away with scorn. How the clear vision is to be obtained is a question that needs much to be pondered. But that the vision is the one thing needed few will be found to deny. We shall be a feeble folk and shall make little way until we are once more established in God, and until we are sure that the gospel we are preaching is in very truth the gospel of God and nothing less glorious and mighty.

[Rev. Frank L. Phalen in *Christian Register.*]

In these days of the twentieth century every thoughtful person who is awake to the signs of the times and the issues of the hour must see that idle dreaming or sentimental puttering about little things can no longer pass for religious thought or work. The hour has come and now is when those who are in earnest must have done with half-hearted and conventional dalliance with the church and religion, and begin to take the gospel of Jesus seriously and joyfully as an immediate call to responsibility and action; not about a problematical future in celestial realms, but about social and civic and public conditions right here in our own streets and neighborhoods.

[*Zion's Herald.*]

The true appraisement of men is not to be had by estimating the amount of their holdings of bank stock or measuring their brains, but by an appreciation of their moral qualities, their spiritual sensibility, their power to do the right things, and the fruits of their life. Only a few may have wealth, but all may have worth.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel.*

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in this column.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

Correspondents who have sent orders for the Hymnal to the Publishing Society during the past month or two are informed that there has been delay in securing permission to use some copyrighted hymns, and it is necessary to await the completion of arrangements before issuing any Hymnals. To avoid inquiry and correspondence, it may be stated that delivery will be made as soon as it is practicable.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the Field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

PAMPHLETS IN FRENCH.—Three new French pamphlets, "Christian Science: Le Pouvoir De L'Homme Sur Le Mal," "Christian Science: Ses Bienfaits Pour L'Humanité by Edward A. Kimball, and "Christian Science: La Délivrance Du Mal" by William P. McKenzie, are now ready for delivery to the Field.

A new catalogue has just been issued by the Society, copies of which will be mailed to our patrons on application.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herold,* whether articles, poems, or testimonies, must be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE, POSTPAID: Single copy, six months, $1.20, one year, $2.00. Quantities TO ONE ADDRESS: ten copies, each, six months, $1.15, yearly, $1.90; twenty-five copies, each, six months, $1.10, yearly, $1.80; fifty copies, each, six months, 95 cents, yearly, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 40 cents for postage on each yearly subscription.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year or two years previous, cloth, $2.50; half calf or half morocco $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE, POSTPAID: One or more copies, 50 cents, each, yearly. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postpaid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postpaid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico and Cuba, 10 cents a copy, 60 cents for six months, $1.00 a year; all other countries, 12 cents a copy, 75 cents for six months, $1.25 a year.

Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy. $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, six months, $1.20; one year, $2.00.

Ten copies to one address, each, six months, $1.15; one year, $1.90.

Twenty-five copies to one address, each, six months, $1.10; one year, $1.80.

Fifty copies to one address, each, six months, 90 cents; one year, $1.50.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Subscriptions to the SENTINEL will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid, to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.

Bound Volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second class mail matter.

ITEMS OF INTEREST.

National.

Seven of the members of the national waterways commission, a commission authorized by Congress to investigate the waterways of Europe and Canada as well as those of the United States, for the purpose of making recommendations for the improvement of the rivers, harbors, and canals of our own country, have sailed from New York on a ten week investigation and examination of the waterways of Europe. The first month in Europe will consist of visits of a few days each to Berlin, Dresden, Prague, Vienna, Budapest, Belgrade, Munich, and Strassburg. From the latter point the party will go on a four day trip up the Rhine. Holland, its dykes and canals, will be visited from Sept. 15 to 17. The balance of the trip embraces visits to Belgium, Paris, and London.

The president of the Chicago Great Western Railroad, one of the few prominent railroad men who favored the passage of the Hepburn rate bill, now charges that the railroads are constantly evading the law by ingenious classifications, which are placing the smaller shipper at just as great disadvantage as he was before the giving of rebates became a crime punished by heavy penalties. "Wherever a commodity rate is published," he says, "a classified rate on the same article is also published, and in the majority of cases only those shippers for whom the commodity rate was made understand such a rate exists, while the other shippers pay the higher rate by classification to which such commodity belongs."

Suggestions for the elimination of delays in civil suits are contained in a report signed by five justices of the New York supreme court just made public. The committee was appointed some time ago to investigate the situation, and after conferring with their associates and prominent members of the bar, made eight specific recommendations to simplify the mass of material before the courts.

Favorable action by the Connecticut General Assembly on a public utilities bill similar to that obtaining in New York, which was especially advocated by the late Governor Lilley, will not be had at the present session, as the original bill and the substitute bill have been tabled.

The United States and Argentina have signed a treaty dealing with the subjects of reciprocity and the naturalization of the citizens of the two countries. The treaty is still subject to ratification.

The resolution to ratify the income tax amendment has been adopted unanimously by the Alabama Senate. Governor Comer will sign the resolution. The House passed the bill last week.

The Secretary of War has approved the recommendations for the allotment of funds for barracks and quarters of the seacoast defenses, aggregating $1,528,326.

The schedules and bookings of President Taft's two-month trip through the West and South are being arranged by the New York Central Railroad.

International.

The balloon Sirius has succeeded in flying over the Alps. The airship left Chamouni, France, under the pilotage of M. Spelterine, who had with him three passengers. The Sirius traversed Mont Blanc and soared over the Aiguille du Dru and the Aiguille Verte. The highest altitude attained on the voyage was 18,373 feet, or a little less than three and a half miles. The distance covered was nearly two hundred miles. A successful balloon trip over Mont Blanc and the Alps was made in November of 1906 by two Italian aeronauts in the balloon Milano. The greatest altitude reached on this trip was 20,500 feet, and it covered a distance of 175 miles in three hours. The record for height in a balloon has hitherto been held by two Englishmen, Messrs. Coxwell and Glaisher, who in 1862 ascended to a height of 37,000 feet, or about seven miles. In 1875 M. Tissandier, a Frenchman, rose more than five miles into the air. Last week the Albatross established a new record for height by ascending a distance of 38,714 feet. At the highest elevation the temperature reached twenty-four degrees below zero, Fahrenheit.

In a statement just given out the committee of one hundred of New York city asserted that it would make the conditions of the city magistrates' courts an issue in the mayoralty campaign this year. It is charged by the committee that there is not only frequent miscarriage of justice in these courts, but that the breeding of anarchy in this country can properly be laid to the incompetent administration of the magistrates' courts. The committee asserts that while these bad conditions are due to the magistrates themselves, the responsibility rests indirectly on the administration by which they are appointed, and that the only way a reform can be brought about it to elect a mayor "who will recognize his responsibility in this matter and make appointments to the bench with regard not to political considerations but to the requirements of service in presiding over what has been properly called 'the court of the common people.'"

The Chinese government has signed a contract with a New York company for the installation of a complete telephone system in Peking at a cost of $150,000. The plant will have an ultimate capacity of twenty thousand lines, but only twenty-five hundred will be set up at first. The company will employ Chinese as far as possible in its construction work and will drill government employees in the details of operation. The contract is regarded as significant of China's changing attitude toward western civilization. There are said to be now not more than two thousand telephones in the entire empire, and these largely in the foreign settlements.

The third international tax conference will be held in Louisville, Ky., Sept. 21-24. The president in his address will recommend the adoption of a resolution requesting Congress to repeal the law taxing corporations, so that this source of revenue may be reserved for the exclusive use of the several states. A similar resolution on the subject of a Federal inheritance tax was adopted by the first and second conferences. A resolution will be submitted to the conference approving the proposed amendment to the Constitution of the United States on the subject of a Federal income tax, applicable to all incomes.

Japan has made her reply to the last Chinese communication regarding the reconstruction of the Antung-Moukden Railroad, in which Peking agreed that the line be of standard gauge, and suggested the resumption of negotiations on the other points at issue. Tokio accepts these proposals, and expresses the desire that the negotiations be resumed at Moukden, where they were broken off by China. The work of reconstructing the road is now progressing rapidly and without friction.

Chinese Minister Wu Ting Fang has been recalled from Washington and ordered to Peking for further assignment. His successor will be Chan Yin Tang, formerly *charge d'affaires* in Madrid, and now deputy vice-president of foreign affairs. Mr. Wu now is in Peru, to which country he has been accredited along with the United States.

At a recent meeting held at Peking between the American *charge d'affaires*, representatives of the German, British, and French groups of bankers, and Liang Tun-Yen, president of the board of foreign affairs, assurances were given that the United States would get one fourth of the total of the loan for the construction of the Hankow-Sze-Chuen Railroad.

The Duke of the Abruzzi has established another record in mountain climbing. He ascended Mt. Godwin-Austen to a height of 24,000 feet. Perfect weather was enjoyed during the ascent. Godwin-Austen is the highest known summit in the world except Mount Everest, which has an altitude of 28,265 feet.

The repairs on the airship shed of the Walter Wellman Polar expedition at Spitzbergen, which was badly damaged by a storm last June, have been completed and a gas apparatus has been installed. Mr. Wellman commenced the inflation of the balloon July 31.

Industrial and Commercial.

Concessions have been asked and elaborate plans made for the projected new power plant at the foot of the Long Sault Rapids. The plant is to be constructed and managed jointly by two companies, the Long Sault Development Company on the American side, and the St. Lawrence River Company on the Canadian side. The scheme involves the building of a huge dam over four thousand feet in length, from the lower part of the Long Sault Rapids to the upper end of Barnhart's Island, to divert the waters of the Sault toward the power-houses; the construction of three power-houses, a lift-lock, the straightening of the course of various channels of the river, and many other operations, which will probably involve an expenditure of some $20,000,000 during the period of constructive work. It is expected that fully one hundred thousand horse-power can be developed.

The Baltimore and Ohio Railroad Company, in carrying out its increase of equipment, has closed contracts for one thousand composite gondola cars, two thousand coke cars of one hundred thousand pounds capacity, and six hundred all-steel hopper cars of like capacity, forty-five passenger coaches, and five combined passenger and baggage cars, ten baggage cars, five café and parlor cars, five all-steel postal cars.

More than fifteen million miles of single wire are used by the people of the United States in communicating with each other over the various telephone and telegraph systems. Of this number 12,007,369 miles are operated by the telephone systems, and 3,072,851 miles by telegraph companies. This length of single wire would encircle the earth at the equator more than six hundred times. Over the telegraph wires in 1907 there were flashed 308,470,509 messages, of which 5,869,317 were cablegrams.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

PHILIP THE EVANGELIST.

SUE H. MIMS.

THE very remarkable but quiet fidelity and healing work of Philip the evangelist have been somewhat overshadowed by the more brilliant records of the earlier disciples, and one incident of his career was so in advance of the times that the materialism of the age has ignored or misunderstood it. We read in Acts, eighth chapter: "Then Philip went down to the city of Samaria, and preached Christ unto them. And the people with one accord gave heed unto those things which Philip spake, hearing and seeing the miracles which he did. For unclean spirits, crying with loud voice, came out of many that were possessed with them: and many taken with palsies, and that were lame, were healed." We then read that Philip met the sorcerer called Simon, who was converted, and after he was baptized "continued with Philip, and wondered, beholding the miracles and signs which were done." Our Leader tells us that Jesus "refuted all opponents with his healing power" (Science and Health, p. 18), and in following him we too must refute the seeming antagonism of today by the healing works.

Next follows perhaps the most beautiful incident in all the recorded acts of the apostles: "And the angel of the Lord spake unto Philip, saying, Arise, and go toward the south unto the way that goeth down from Jerusalem unto Gaza, which is desert. And he arose and went: and, behold, a man of Ethiopia, an eunuch of great authority . . . was returning, and sitting in his chariot read Esaias the prophet." Being still led of the Spirit, Philip joined himself to the eunuch in his chariot, and said unto him, "Understandest thou what thou readest?" And the eunuch then desired of Philip that he tell him of whom this Scripture was written. "Then Philip opened his mouth, . . . and preached unto him Jesus." So far in this beautiful incident we see "the preparations of the heart" that enabled Philip to hear the divine voice directing him, "Arise, and go. . . . And he arose and went" in immediate and unquestioning obedience.

On page 77 of "Miscellaneous Writings" we are told what Philip's preaching to the eunuch meant, and it has often seemed to me that if our dear Leader had never written anything else than this one marvelous explanation of what it means "to *believe*," the world would still owe her unspeakable gratitude. In this one luminous page, with

> Thoughts that breathe and words that burn,

she gives the whole plan of salvation. We learn not only of God manifest through man, but of "the eternal unity of man and God, as the divine Principle and spiritual idea." It leads, as she further tells us, to the apprehension of that supersensible splendor of Soul in which "God is made manifest in the flesh, and thus it destroys all sense of sin, sickness, and death,—when the brightness of His glory encompasseth all being."

From this inspiring statement as to what Philip meant, we can readily comprehend that the eunuch had not only the baptism of water, but he also received that spiritual baptism defined on page 581 of Science and Health as "purification by Spirit; submergence in Spirit. We are 'willing rather to be absent from the body, and present with the Lord.'" This leads up to the culminating demonstration of the evangelist, which, because misunderstood, has been almost entirely neglected. We read that "when they were come up out of the water, the Spirit of the Lord caught away Philip, that the eunuch saw him no more: . . . But Philip was found at Azotus."

In the Bible dictionaries the leading of Philip by the Spirit to the finding of the eunuch, the inspiration of Spirit in his explanation of Jesus, are fully recognized; but there is no appreciable recognition of the strange and most interesting final event, namely, the demonstration of Philip's sudden disappearance to the eunuch, and his being found at Azotus, a distant village. In this day of aerial navigation, of the persistent efforts of the human mind to attain the conquest of the air by material methods, to lessen time, space, and distance, this incident of Philip's experience assumes a deeper significance, a vastly more important bearing on the possibilities of scientific being.

Is Science spiritual or material—is it Spirit that governs, or human invention? No one can read the seventy-seventh page of "Miscellaneous Writings," drink of its vital, life-giving drafts of spiritual inspiration, perceive its transcendent beauty and power, without recognizing that such a comprehension of Christ and of pure spiritual being as Philip proved that he possessed by his mighty works, must have so transported him (by the splendors of his own sense of the supersensible) that he rose out of his bodily consciousness, and found himself at Azotus, unconscious of physical effort. In Science and Health (p. 84), we read, "To understand that Mind is infinite, not bounded by corporeality, not dependent upon the ear and eye for sound or sight nor upon muscles and bones for locomotion, is a step toward the Mind-science by which we discern man's nature and existence." And again (p. 90), "Divest yourself of the thought that there can be substance in matter, and the movements and transitions now possible for mortal mind will be found to be equally possible for the body."

Even Tennyson's beautiful vision of

> Bright argosies of purple twilight,
> Dropping down with costly bales,

pales before the glimpse of spiritual man, free from the limitations and fetters of materialism, which beckons mortals onward to the supersensible glory when "the astronomer will no longer look up to the stars,—he will look out from them upon the universe" (Science and Health, p. 125). How deeply grateful, beyond words to express, should we be that in this grand hour, despite the chaos of mortal struggle, there comes to us the glorious revelation of scientific being. Truth, revealed to us through our beloved Leader, shows the true way to the conquest of all limitation, and opens the vision to behold the "glories of earth and heaven and man" (*Ibid.*, p. 264).

THE WINDOWS OF HEAVEN.

M. G. INGLIS.

WHAT and where is heaven? All have a hope of heaven in the dim recesses of their consciousness, for all certainly have a great unrest within them, an unrest which the world cannot satisfy, and which perforce leads them to seek for something that will give peace and lasting contentment; yet how few there are that search till they find. St. Augustine said, "Thou hast made us for Thyself, O Lord, and our heart is restless until it finds rest again in Thee."

What we are all seeking is harmony. In "Science and Health with Key to the Scriptures" Mrs. Eddy has given us the true definition of heaven: "Harmony; the reign of Spirit; government by divine Principle; spirituality; bliss; the atmosphere of Soul" (p. 587). All through the Bible God is spoken of as inhabiting heaven,—that is, dwelling in harmony,—and we are also told that the kingdom of God is within man. As we study our text-book and begin to realize more clearly that God, good, is the only power and that He rules now,—"a very present help,"—we shall experience the joy of bringing to others the glad tidings that good is the only reality and is here now, and that evil has neither place nor power. All space is filled with the presence of God; therefore, in spite of the seeming discord, there is an unchanging harmony, and all space is in reality filled with harmony. In proportion as we cling to the understanding of the omnipresence of God in our consciousness, we shall attain to harmony,—be attuned to the infinite Mind.

We read in Malachi: "Bring ye all the tithes into the storehouse, that there may be meat in mine house, and prove me now herewith, saith the Lord of hosts, if I will not open you the windows of heaven, and pour you out a blessing, that there shall not be room enough to receive it." What are the tithes that God, divine Mind, asks us to bring to Him? St. Paul says, "I beseech you, therefore, brethren, that ye present your bodies a living sacrifice, holy, acceptable unto God." Full of meaning is this word "holy." We cannot present hearts surcharged with error or clouded with thoughts of self; a belief of life apart from God, lived according to material laws, which leaves God out of His own temple. Each one of us knows what part of our all is being withheld. To the young ruler, it seemed difficult to lay his riches on God's altar. To some that particular demand might appear easy of fulfilment; to others, material sense in all its alluring forms might be the stumbling-block, and assume such a density that the divine law of Love would be lost sight of.

In Isaiah we read: "Say . . . to them that are in darkness, Shew yourselves." That is, show your real, true selves, hidden only by the clouds of error—show the upright man that God has made. The wise man says, "Lo, this only have I found, that God hath made man upright; but they have sought out many inventions." The real man is God's own image and likeness,—all perfect,—and reflects nothing but divine Love; therefore the command means, Show yourselves as sons and daughters of God, living in the light which is radiated through the windows of harmony. Heaven is not confined to any part of space, but is in all consciousness of good, and only good; so let us bask in the sunlight of good, and by so doing take some of it into the hearts and lives of those who seem to be in darkness, which is an unreal state of consciousness that is banished by the sunshine of love.

If we offer to God vessels "meet for the master's use,"—emptied of desire for self-glorification,—He will fill them so full of blessing that it will overflow into all the hearts ready to receive it. When we ourselves are filled with the blessings of love, joy, peace, health, and harmony, we shall "run, and not be weary; and . . . shall walk, and not faint;" we shall be equipped to carry the good news to others, and so fulfil the law of Christ,—reveal heaven here and now.

THE VISION OF THE HEIGHTS.

ADA J. MILLER.

IN a recent lecture Dr. Hale, director of the Carnegie Solar Observatory on Mt. Wilson, showed two pictures of the same nebula, one taken from an observatory at an altitude of twelve hundred feet, the other from the Mt. Wilson observatory at an altitude of six thousand feet. In the first picture there were but few sharp light points; in the second, the haziness had largely vanished and myriads of stars were visible. Dr. Hale showed these pictures to illustrate the advantage to astronomical observation of being as far as possible above the immediate earth-atmosphere, where clearness of vision is practically impossible.

If this be true of the astronomer's observations, is it not doubly true of the Christian Scientist's work? Clear vision, fuller discernment of the truth, unchanging spiritual light,—these are not possible in the earth-atmosphere—the atmosphere that is heavy with thoughts of greed, envy, jealousy, dishonesty, injustice, and ingratitude. One may discern the truth from the midst of these conditions, but it will be to him a nebulous light until he climbs to the heights and reaches a plane of thought above these lower strata where the baser qualities of mortal thought seethe and ferment. As he climbs, thought by thought, the earth-mists vanish, and the truth which had appeared nebulous becomes clear-cut and scintillates with light.

The earth-atmosphere surrounds the globe to a height variously estimated at seventy-five to two hundred miles. This material symbol of the depths in which we are submerged in mortal mind is interesting because of its suggestive possibilities of ascent. Surely there are "heights ever farther removed," and Jesus' inspiring message, "Be of good cheer; I have overcome the world," rings back to us and speeds us upward in the thought-journey which is ever leading us on to clearer views of Truth; leading us up to that height whereon alone lies repose—the constant, conscious at-one-ment with God.

FORGIVENESS.

GEORGE I. FISKE.

CHRISTIAN SCIENCE gives us a higher thought in regard to a multitude of things. The unfolding which comes along many lines brings a new light on the subject of forgiveness. We have been accustomed to pray, "Forgive us our debts, as we forgive our debtors," and the question comes up as to whether we were entirely sincere in this prayer, before we understood the true meaning of forgiveness. Did we really want God to forgive us in the way we forgive others? How this passage is illumined when its spiritual interpretation comes to us—"Love is reflected in love" (Science and Health, p. 17)! Can we forgive without reflecting love? No! Forgiveness is then a work of love, and nothing short of this deserves the name. Mrs. Eddy writes, "The way to extract error from mortal mind is to pour in truth through flood-tides of Love" (*Ibid.*, p. 201).

A perfect example of forgiveness is presented in Jesus, who even on the cross prayed for those who were crucifying him, "Father, forgive them; for they know not what they do." He indeed manifested true forgiveness in reflecting love alone. One of the most helpful and necessary footsteps to be taken in bringing the blessings of a forgiving spirit into our lives is the recognition of the true child of God and of the false basis of the error. Let

Digitized by Google

us take this thought of forgiveness, make it practical, and see how often the seeming hatred, jealousy, or whatever the wrong thought may be, will disappear. We shall come to the point where our thought goes out in love and pity toward those who would harm us, knowing that we are safe and that a wrong thought only hurts the one who harbors it. Gradually we learn that others cannot harm us unless they make us think wrong, and we fail to let Truth and Love control our thought.

Another beautiful example of forgiveness is presented to us in the account of Stephen, when he was stoned for his faith in Christ's teachings. This prayer was similar to that of our Master on the cross,—"Lord, lay not this sin to their charge." History repeated itself when, in the midst of unjust criticism and cruel misrepresentation, in an article entitled "Harvest," which appeared in the *Independent* (Nov. 22, 1906), our Leader, Mrs. Eddy, wrote, "Those words of our dear, departing Saviour, breathing love for his enemies, fill my heart: 'Father, forgive them; for they know not what they do.'"

We sometimes hear the remark, "I can forgive, but I cannot forget." There can be no true forgiveness in such a thought as this, since it does not reflect love. It is also said by some, "I could have forgiven, if this had not been added to the first injury." Jesus' standard of forgiveness is, "I say not unto thee, Until seven times: but, Until seventy times seven." Even "seven" stands for completeness, and "seventy times seven" leaves absolutely no escape from the demand for true and complete forgiveness.

Failure to understand the true ideal and to measure up to this ideal, shuts out much of light and love which might be ours. Jesus said, "If ye forgive not men their trespasses, neither will your Father forgive your trespasses." If the love of God is not reflected on others by us, this love cannot long be consciously present to bless us. As one of our hymns expresses it,—

Ceasing to give, we cease to have;
Such is the law of love.

As the scientific sense of forgiveness unfolds to us we see that it means healing. Jesus said, "Whether is it easier to say to the sick of the palsy, Thy sins be forgiven thee; or to say, Arise, and take up thy bed, and walk?" When we forgive in the true sense we see man as the perfect child of God, and in healing this is also true. Our revered Leader says: "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick" (Science and Health, p. 476).

DECLARING THE TRUTH.

REV. G. WARRE CORNISH.

It is curious to notice that in the Greek New Testament there are no less than sixteen different Greek verbs which are translated in our Authorized Version by the single word "declare." Of these sixteen different words, six are various forms of the word which means "message," "news," "gospel," "evangel," "angel;" *e.g.*, we read in the first epistle of John: "That which we have seen and heard, declare we unto you." Two of the Greek words mean "to show," (make plain), "bring to light," the word "phenomenon" being a form of the same word. Another means "to make lucid, or clear." Two others mean "to narrate, expound, explain;" here the primal sense of the word is "to lead," afterward applied to the mental process of passing through a chain of inferences, or, in narrative, of events. Another word not infrequently used simply means "to make known," the active form of the word "knowledge, science." Another means "to define, determine." This is the word used in the passage, "Declared to be the Son of God with power." This accounts for thirteen of the forms. Of the three remaining verbs, one means again "to make plain or clear," another "to lay a matter before some one;" only one has the merely literal force of "to speak," "utter."

All this is interesting in view of the common use of the phrase "declaring the truth," which sometimes only means a more or less emphatic verbal utterance. It brings out the fulness of the sense implied by this declaration. "Declaring" means all that these different Greek verbs mean; viz., conveying the message, the good news, making it plain, bringing it to light, elucidating, illustrating it, unfolding it and making it known. It also points to that "scientific statement of being," as it is named in Science and Health, which is of such vast import to humanity.

THE BOW IN THE CLOUD.

DAISY WOODWARD.

While dwelling upon the innumerable blessings and wonders of Christian Science, the writer has frequently been reminded of the words, "I do set my bow in the cloud,"—a "token" of that covenant which was to be "for perpetual generations." We are all familiar with the beauty and brilliancy of a rainbow seen in the sky. Perhaps the day has been dark, the atmosphere heavily laden with moisture, causing a veil of mist to obscure the landscape. To quote from a well known poet,—

All day the low-hung clouds have dropped
Their garnered fulness down;
All day that soft gray mist hath wrapped
Hill, valley, grove, and town;

The air feels oppressive, and the rain has been gradually increasing until now it descends in torrents.

Suddenly, from behind great banks of passing cloud the sun bursts forth—and what a transformation! The beautiful bow of promise has appeared, its exquisite colors blending softly as the tints of an opal. The eye is delighted with the glorious arch of purest color; and forgetting the clouds, whose darkness only heightens the splendor of the seven-hued rainbow, the beholder fixes his enraptured gaze upon this wondrous spectacle, and while drinking in its radiance, rejoices in the fulfilment of that gracious promise, "I do set my bow in the cloud."

Has not this experience come to each one of us, when the clouds of mortal sense have gathered around us? Our lives have seemed laden with care, worry, fear, and sorrow; the way has seemed dark with trials and temptations, dismal forebodings and doubts, and the mists of material belief seem to close in around us, enveloping us in the darkness of despair! Then suddenly the sunlight of Truth shines forth in all the fulness of its splendor, revealing those divine hues which blend harmoniously and merge into the white light of purity. The cold, damp mists disperse before the warmth of Love, doubts and forebodings melt away before the radiant hue of spiritual understanding, darkness disappears before the all-transforming light of Truth, and fear gives place to hope. As Mrs. Eddy says in one of her poems (Miscellaneous Writings, p. 388),—

'Twas Love whose finger traced aloud
A bow of promise on the cloud.

Recognizing this truth, we turn in loving praise and thankfulness to our Father, who has set His bow in the cloud, and with heartfelt gratitude to our dear Leader, who through loving patient toil has made it possible for us humbly to look up and see its glories for ourselves.

MOUNTAIN CLIMBING.

L. M. CURTIS.

NEAR my old home in Vermont stands Mt. Killington, and I have climbed its rugged sides many times. The experiences which one has in mountain climbing are so similar to those which we have in attempting to reach the heights in Christian Science, that since taking up its study I have often been reminded of those early trips. In going up the mountain we always had to keep very close to our guide, or there was danger of our wandering into the wrong path and being lost; so in Christian Science we learn very early in our study that we have to keep close to divine Principle, or there is danger of wandering into wrong paths, thus getting into difficulties from which it is hard to extricate ourselves. Mrs. Eddy says in one of her hymns (Miscellaneous Writings, p. 398),—

I will listen for Thy voice,
Lest my footsteps stray;
I will follow and rejoice
All the rugged way.

Moreover, as we went on up the mountain we often saw directly in front of us what seemed an impassable barrier, a huge boulder; but we always found, on coming up to the rock, that there was a path leading around and up in such a way that we soon found ourselves above it. So in Christian Science we often forget that we are living "just for today," and looking ahead we see what appears like an insurmountable obstacle in our pathway; but if we do as our Leader has bidden us, "Cling steadfastly to God and His idea" (Science and Health, p. 495), and persistently declare the truth, we shall always find a way out of the difficulty, and sooner or later the problem will be solved.

In going up Mt. Killington we sometimes had to ascend a hill, then go down into a valley, over another hill and again into a valley, and it often seemed as though we were making no progress upward. So, too, in Christian Science we sometimes reach a high place, and it seems as if we could never descend into a valley again. We feel as did Peter on the mount of transfiguration, as though we must stay there always. Then perhaps a difficult problem arises, and we seem to go down into the valley to solve it. Perhaps we become discouraged and feel that we are making no progress, but in our mountain climbing we found on looking back that even when we were in the valleys we were really on higher ground than we had been on some of the peaks below. So, in Christian Science, by looking back—it may be six months or a year—we can see that we are on higher ground than we were a year ago. We read in the 24th Psalm, "Who shall ascend into the hill of the Lord? or who shall stand in his holy place? He that hath clean hands, and a pure heart;" and it is only by purifying ourselves that we can really reach "the heights of holiness."

As we drew near to the top of the mountain, we came upon a spring of clear, cold water, where we sat down and rested and refreshed ourselves for the steep climb yet before us. To many, our Wednesday evening meetings are like that spring of refreshing water. Many times, when first taking up the study of this Science, I have gone to the meeting with such a sense of weariness and discouragement that it seemed as though I could go no farther, but some testimony would be given,—a little draft of the "water of life"—which helped me, and I would go home rested and strengthened for the journey of the week. Then I remembered that some little streams have their rise away up on the mountain, and as they journey down they unite and form a river, which empties into an immense reservoir and thus forms the water-supply for a city. This water goes into all the homes of the town, and thus they are cleansed and the people refreshed by the stream from the far-off mountain. The Wednesday evening meeting is like a reservoir of living water, and all who attend these meetings can be channels for carrying the water into their homes, which are sure to be made purer and happier through the influences that come to them from these gatherings; indeed we often have testimonies to the effect that homes have been completely transformed through such influences.

When we finally reached the top of the mountain and looked back over the path by which we had come, we could see that the very things which we had looked upon as hindrances on the way had really been stepping-stones to help us reach the heights; and as we looked at the beautiful valley spread out at our feet, with its many villages and lakes here and there, as we looked at the lesser mountains piled at our feet, and saw the misty outline of many others away off in the distance, how slight seemed the hardships of the journey when compared with the lovely view. And so it is in Christian Science! As we go higher and higher in our study, we see more and more of the beautiful things that our heavenly Father has prepared for those who love Him, and when these things are revealed to us, how small then seem the problems which we have been obliged to solve. When we finally sat down on the top of the mountain, we sang some old songs, and it seemed as though the hills and valleys joined in the singing. I was reminded of the words of Isaiah: "Ye shall go out with joy, and be led forth with peace: the mountains and the hills shall break forth before you into singing, and all the trees of the field shall clap their hands."

A few years ago I heard a distinguished educator give a talk on Japan, in the course of which he said: "One morning, I stood looking at their sacred Mt. Fujiyama, with its snow-capped peak and the streams of water flowing down the sides of the mount and forming a large river at its base; and I thought, So stands the mount of Christianity in the world, and little streams of truth are flowing down to all the people of the earth." It seemed to me that the vision which he had was a vision of scientific Christianity, for we know that Christian Science is seen to be far above materiality, and its streams of truth are flowing to refresh all the nations of the earth. In Micah we read that "in the last days it shall come to pass, that the mountain of the house of the Lord shall be established in the top of the mountains, and it shall be exalted above the hills; and people shall flow unto it. And many nations shall come, and say, Come, and let us go up to the mountain of the Lord." Again, in Isaiah we read: "They shall not hurt nor destroy in all my holy mountain: for the earth shall be full of the knowledge of the Lord, as the waters cover the sea."

[Written for the *Sentinel*.]

WILDERNESS BLESSINGS.

GERTRUDE RING HOMANS.

WITH me 'twas evening in a desert place,
And hungry thoughts in a great multitude
Questioned earnestly each his neighbor's face,—
If they should not depart by slow foot-pace
Into some village to buy needful food.

E'en the disciples having speech with him
Had not the faith to ask for daily bread
Until he bade "Give," in the twilight dim,
"Ye them to eat," and loaded to the brim
Twelve baskets when the healéd throng were fed.

Sweet sacred lesson! May no wilderness
Affright me, since God's bounteous love is there.
And oh, the joy, if in the patient press
Mine were the loaves and fishes He should bless
For every famished brother's liberal share.

SELECTED ARTICLES.

[Frederick Dixon in *Bath* (Eng.) *Herald.*]

If there is anything certain about the teaching of Christ Jesus, it is the way in which he dwelt upon the possibilities of the present. "This is life eternal," he said, "that they might know thee the only true God, and Jesus Christ, whom thou hast sent," words which distinctly declare that it was possible for man to gain this knowledge in this present life, since, as he explained at another time, "the kingdom of God is within you," or "in the midst of you." "This kingdom of God," Mrs. Eddy writes, on page 576 of Science and Health, " 'is within you,'—is within reach of man's consciousness here, and the spiritual idea reveals it." The understanding of the spiritual idea is that knowledge of the truth which Christ Jesus declared would make men free.

The opposition which the gospel of Christ met with in the first century is very like the opposition which Christian Science is meeting today, in the determined criticism of its theology and the repudiation of its healing. So long as the healing continued, the primitive church remained an outcast, for the healing necessitated the denial of materiality and required the sustained spiritual alertness necessary for the realization of man's true spiritual selfhood. The full significance of this dawns slowly upon the human consciousness, for, in order to understand the utter nothingness of any delusion it is necessary to understand the whole truth. This was surely what Paul meant when he wrote to the church in Corinth, "Now we see through a glass, darkly; but then face to face." Paul knew well enough that the things which he saw about him were enigmas which he was only partially able to understand. But he knew also that the more he acquired of the Mind of Christ, the clearer his appreciation of the spiritual would become, and that for the misconception of the spiritual seen through the blurred mist of the material senses, there would be substituted man formed in the image and likeness of God.

[W. J. Bonnin in *Birkdale and Southport* (Eng.) *Pioneer.*]

Starting from the premises, disclosed by Scripture and conceded by Christians generally, that God is good, that He is omnipotent, omniscient, and omnipresent, that He is Life and Truth and Love, Christian Science establishes its position and proves its teaching by the infallible process of deduction. The truths thus established may not agree with what our physical senses would have us believe to be the truths of God's creation, but to exhibit and expose this disagreement and to demonstrate that what is not in accord with eternal divine Truth cannot itself be true, eternal, and real, is the mission of Christian Science. Naturally, to an age well-nigh submerged in materialism, this teaching comes with almost as great a shock as it produced when it was first propounded nineteen centuries ago. He who preached, "It is the spirit that quickeneth; the flesh profiteth nothing," declared in those words the fundamental truth of his teaching, the scientific definition of reality.

Humanity has through the ages been educated to accept the testimony of the senses as indisputable evidence of truth. Christian Science comes to teach mankind that in proportion as spiritual understanding is unfolded, so will this sense testimony be discarded as evidence only of what is temporal, destructible, and supposititious. The cry of the psalmist for understanding, the prayer of Solomon for wisdom, the Pauline advice to let that Mind be in us "which was also in Christ Jesus,"—what do they all stand for? Do they not signify that man, the child of God, has a capacity for a higher form of understanding than merely human knowledge? Do they not indicate that this spiritual knowledge is the knowledge requisite to comprehend God's truth? "If any man think that he knoweth any thing, he knoweth nothing yet as he ought to know," wrote Paul. The study of Christian Science fosters and develops this understanding, and as its students progress in it they begin to see how man, created in God's image and likeness, and given dominion over all the earth, is in his true self able to rise above material limitations, how sin and misery and sickness have no power beyond what they have by erring mortal beliefs been invested with, and how mankind is not rightfully harassed by them.

[Gray Montgomery in *Denver* (Col.) *Republican.*]

The second tenet of the Christian Science church reads: "We acknowledge and adore one supreme and infinite God. We acknowledge His Son, one Christ; the Holy Ghost or divine Comforter; and man in God's image and likeness" (Science and Health, p. 497). The Holy Ghost is the understanding of Truth, the same unfoldment of Life, Truth, and Love that enabled the prophets of old to write the Scriptures.

The Bible informs us that the conception of Jesus was of the Holy Ghost. Mary's understanding of God as the only Father enabled her to give to the world its long-expected Saviour. The Bible also tells us that "Zacharias was filled with the Holy Ghost, and prophesied;" that "Peter, filled with the Holy Ghost," taught Christianity to the "elders of Israel;" that "Saul, filled with the Holy Ghost," rebuked Elymas the sorcerer. Jesus, filled with the Holy Ghost, that is, possessing the perfect understanding of God, reformed the sinner, and healed the helpless invalid by awakening him from the dream of life in matter to the fact of his real life in God, thus changing his thoughts from fear to a realization of God's protecting love and power. By restoring the dead to life, and by his own resurrection, he proved that the understanding of Truth, the Holy Ghost, can overcome even the last enemy. And today Christian Scientists, accepting all of the Bible teaching, are again performing, in a measure, similar reformative, regenerative, and healing works.

By the power of divine Science, the understanding of perfect God and His perfect universe, Jesus lifted the thought of his disciples above the material concept of existence to that spiritual sense which enabled them to repeat their Master's wonderful deeds. At his ascension, our Master's human body disappeared, and his spiritual individuality, the Christ-embodiment, appeared as his real spiritual self. This teaching is not a denial of Christ, but rather a confirmation of the eternal or real substance of Christ. Jesus was the highest human concept of the Christ, and when the human element disappeared from mortal sight his real spiritual entity, the Christ-man in the image and likeness of God, dawned upon the consciousness of his followers; and as Mrs. Eddy teaches (Science and Health, p. 31), "it is the living Christ, the practical Truth, which makes Jesus 'the resurrection and the life' to all who follow him in deed."

[R. Stanhope Easterday in *Ft. Wayne* (Ind.) *News.*]

Christian Science is a revival of primitive Christianity, and its healings are today as in Jesus' day the direct result of the impartation to erring human minds of the wholesome, uplifting, vivifying influence of divine Truth and Love, which heals physically by uplifting spiritually. Such a wholesome regenerative process has in it not one taint of mesmerism or the paralyzing domination of one erring, finite human mind over another.

In the light of the foregoing, moreover, it is easily to be seen that Christian Science cannot possibly do harm, as was erroneously alleged by our critic; while it should be further noted that the list of diseases already healed

Digitized by Google

in Christian Science includes practically all the so-called "incurable" forms, which latter, the majority of them organic, cannot reasonably be classed as "imaginary." It is doubtless true, as with the rest of us, that "there are many things which the medical profession does not know," and among these we might reasonably classify "the things of the Spirit of God," which cannot be learned in the laboratory nor hammered out with a pestle, but must be "spiritually discerned." The man who has been healed spiritually, however, and without drugs, is not willing to concede that Mrs. Eddy's system of spiritual healing is based on "sheer nonsense." The results, the "fruits," belie the statement.

In conclusion, with all due deference to the medical profession and acknowledging the legitimate place of its supporters in ministering to a race which as yet knows not God well enough to rely confidently upon Spirit for healing, we must point the fact that constantly fluctuating theories and methods throughout its entire four thousand years of history do not give assurance that absolute "truth" permeates and bases its gigantic and world-wide superstructure of experimentation and practice. We will agree, however, that there should be no "other foundation than truth in the practice and study" of a system that so intimately concerns the temporal welfare, comfort, and life of mankind. For this reason the Christian Scientist feels in duty bound to press on in his pursuit of absolute, spiritual truth, reassured by the Scriptural promise, "Ye shall know the truth and the truth shall make you free."

[George Shaw Cook in *Chicago Post.*]

Christian Scientists do believe in a remedy, but not in the use of material remedies. Their remedy is to turn unreservedly in the time of physical as well as mental distress to God, who, as David said, "healeth all thy diseases; who forgiveth all thine iniquities." Christian Scientists, therefore, do believe in prayer. They are learning to "pray without ceasing," and, furthermore, they have abundant proof on every hand that the right kind of prayer is efficacious.

[John L. Rendall in *Independence* (Ia.) *Conservative.*]

Christian Science and hypnotism are not in any degree or particular analogous. They are distinctly opposite in precept and practice, in premise and conclusion. Hypnotism is based upon supposed control of one mortal or human mind over another, and works through suggestion, etc. Christian Science, on the other hand, recognizes the control of but one Mind, even God, the creator of all things. It teaches that each individual man reflects in its completeness that Mind "which was also in Christ Jesus," therefore that he cannot be subjected to suggestions or other supposed control inimical to his welfare. Christian Science teaches man the certainty of God's infinite presence, availability, and power at all times and under all circumstances, and that man is subject only to the power of God; as St. Paul states it, "Let every soul be subject unto the higher powers. For there is no power but of God: the powers that be are ordained of God." In "Science and Health with Key to the Scriptures" by Mary Baker Eddy, a very clear distinction is drawn between the teachings of hypnotism and those of unadulterated, scientific Christianity.

Oh, wait no more on worry, companion not with care,
Ever the morning dawneth and dawneth everywhere;
And when the heart is open to loveliness and truth,
From every wind of heaven comes the world's eternal youth.

ANON.

THE LECTURES.

MARSHALLTOWN, IA.

Judge William G. Ewing of Chicago delivered a lecture on Christian Science at the Odeon last night [June 8]. It was refreshing and inspiring to listen to the words of a man who preaches the gospel of love and not of hate, who tells you of the goodness with which the world is filled and which men may have simply by persistently claiming it. It was inspiring, though one might not always agree with the speaker in his conclusions. The man who sees the good, the beautiful, and the true in all of nature's handiwork, who is filled with appreciation for all that has been done by science, art, and religion for the betterment of mankind, has a message for humanity, and they realize it when they hear him speak, even though they may differ widely from his beliefs as to things spiritual. Judge Ewing was introduced by James McNally of the *Herald,* who said in part,—

I am not a Scientist, and after being compelled to listen for the past six weeks to a gospel of denunciation and condemnation, I am not altogether sure that I am a Christian. Certainly I have neither part nor share in, nor sympathy for, nor understanding of, the monstrous doctrine that condemns men to eternal torment. If there is a God who would condemn any of His children to eternal torment, He is no God of mine. I will also say that I have very many friends who are Scientists, and there is not an intellectual runt among them all. The membership of this church will compare most favorably with any other sect in the world.

Marshalltown Herald.

JANESVILLE, WIS.

Prof. Hermann S. Hering lectured here on Christian Science June 8. He was introduced by the Hon. George Grimm, circuit judge, who said in part,—

Christian Science is this day challenging the attention of the thinking men of the world. Those who have studied it sufficiently to get a fair understanding of its fundamentals have ceased to scoff and ridicule, and if we are to test its teachings by the rule given us by the Master, when warning his disciples against false teachers, namely, "By their fruits ye shall know them,"—shall know whether their teaching is true or false, is of God or of evil,—then surely they cannot be far from the truth. So far as my observation of Christian Scientists goes, I have found them to be a happy, optimistic people, who try to live in every act and thought of their daily lives the gospel of Love, who see in each fellow-man the best there is in him,—the spiritual image and likeness of God and a brother. I have never heard them denounce those who seek their salvation in other churches or by other means, or to speak ill or resentfully even of those who traduce them.

I regret that the day is not long past when I sorely misjudged them. All my life I had striven to be charitable in my judgment of others, and to follow the Golden Rule, but I awoke one day to find that I, who had prided myself upon my impartiality and freedom from prejudice, was far from being free from venom where the subject of Christian Science was concerned. The lawyer's training tends to make him broad-gauge and to free him from prejudice, and in a trial judge prejudice is wholly out of place. All men are equal before the law, and a disposition to harbor bias or prejudice unfits a man for being a just and upright judge. That I am here tonight I adduce as proof that I have mastered another one of my prejudices. I will and ought to say further that my study of

Digitized by Google

Christian Science has given me a truer understanding of life, and has made me love God and my fellow-men more. This is the only tribute I shall pay to Christian Science tonight, but it is broad enough to cover the whole ground.—*Correspondence.*

SALT LAKE CITY, UTAH.

An audience that occupied about all the seat space in the Colonial Theater heard Miss Mary Brookins last night [June 17] deliver a lecture on Christian Science. Oscar L. Cox, secretary of the Y. M. C. A. of Salt Lake, introduced Miss Brookins, reading from a carefully prepared speech. He said in part,—

Utah's welfare demands the spirit of religious tolerance which the Christian Science church has shown by inviting me to speak a word of preface this evening, for I am one whom somewhat careful thought has caused to accept the statement of religious truth as put forth by another denomination than your own. No man should fail these days to secure active identification with that church which receives the largest measure of his intellectual approval and which stirs his heart to repentant shame for yesterday's failure and to courageous planning for today's victory. He need not attempt to coerce his intellect into the acceptance of his present or any other profession—the intellect cannot be coerced. It must be fed with fact and then followed.

I am glad that it is my honor to present the speaker of the evening, not as representing my personal view-point on religious matters, since I work with another church group, but because she comes to us with the ripe culture of thought and study, bringing the Christian Science view-point to our attention in such a manner that we may be intelligent in its consideration.—*Telegram.*

DENVER, COL.

Frank H. Leonard lectured on the subject of Christian Science, June 17 and 18. The first evening he was introduced by Henry H. Hurley, First Reader of Second Church, who said in part,—

A million men may have a million concepts of God, yet the Scriptures declare, "Hear, O Israel: The Lord our God is one Lord." Moses, through consecrated living, gained a spiritual understanding of God and His laws, which enabled him to lead the children of Israel out of their bondage. Daniel was delivered safely from the lions' den because of his wondrous knowledge of God and the protecting influence of His presence. Jesus of Nazareth brought to this earth the full understanding of God and His laws. This full understanding of God enabled Jesus and his students to heal the sick, reform the sinner, and raise the dead, in direct opposition to material laws, thus proving his doctrine to be the truth. And he said, "Ye shall know the truth, and the truth shall make you free"—free from sin, disease, and death.

Mrs. Eddy, the Discoverer and Founder of Christian Science, has brought again to a waiting world this doctrine of works instead of words. Christian Science is teaching mankind a demonstrable knowledge of God and His laws, and is offering proofs instead of promises, fruits instead of husks, and the kingdom of heaven at hand instead of an uncertain future-world salvation.—*Denver Post.*

The second evening the lecturer was introduced by William Mahin, First Reader of First Church, in part as follows,—

Many existing conditions seem to indicate a decline of interest in religious matters, and yet the sale of Bibles has greatly increased during recent years. Furthermore, there has never been a time when the essentials of true religion—the spirit of the Golden Rule—have taken such hold of political, business, and domestic affairs. Civic righteousness has become a favorite theme of public speakers and magazine writers, and business methods that were little questioned a few years ago are severely condemned today. Why is it, then, that one great and active denomination in the report of its city mission work shows a falling off of over fifty per cent in converts, and an actual decrease of membership during the past few years? One eminent minister answers this question by saying, "The plain truth is that we are not bringing the full force of our religion to bear upon the hearts and lives of the people." Another says, "The world will not be satisfied with our religious professions until we attack the causes of poverty and disease with the same enthusiasm and persistency that we palliate the symptoms." Our Leader, Mrs. Eddy, expresses the same thought in Science and Health (p. 241), where she says, "The error of the ages is preaching without practice."

The fact is that the world is yearning for a religion that will show it how to solve the problems of today; that will reveal to it a God who is "a very present help in trouble;" that will demonstrate to it the meaning of Jesus' declaration: "The kingdom of God is within you." Tens of thousands in this and other lands believe that they have found such a religion in Christian Science. It has lifted them out of a hell of misery. It has shown them the way of life. It has taught them that salvation is not restricted to a distant and uncertain future state of existence, but that it may be progressively experienced here and now.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

EDWARD A. KIMBALL, C. S. D.

THE late Edward A. Kimball, C.S.D., our beloved brother whose passing away we announce with profound sympathy, was well known to Christian Scientists all over the world, and was greatly beloved by them for his loyalty and helpfulness to the Cause of Christian Science, which commanded his most earnest and intelligent devotion and labors.

Not only was Mr. Kimball a successful teacher and practitioner of Christian Science, but he was a member of the Christian Science board of lectureship from its organization, and in the work of this board he displayed the same marked ability and effectiveness which characterized his work as a teacher and practitioner.

Mr. Kimball was fortunate in being a personal student of Mrs. Eddy in the Massachusetts Metaphysical College, and later was honored by her with an appointment as teacher in this college under her direction. One could ask no greater reward for faithful service than the commendation written by Mrs. Eddy when Mr. Kimball tendered his resignation from this important position after five years of service: "The long term of the incumbent teacher in the board of education, Edward A. Kimball, C.S.D., expires in June next, when he retires crowned with honors—his teacher and Leader loving him, and the race benefited by his labors."

Mr. Kimball was healed by Christian Science over twenty years ago, after his condition had been pronounced hopeless, and in the years of vigorous health to which he then succeeded, he devoted his magnificent abilities, as an exponent of the truth which had healed him, to the advancement of Christian Science, because he was convinced of its truth and of its practical value to all who would accept it. That his work was of value to mankind is attested by the many to whom he brought the healing and saving truth of Christian Science as taught by Mrs. Eddy; and it is true of our brother, as she has said of another, that he "is not dead, neither does he sleep nor rest from his labors in divine Science; and his works do follow him. Evil has no power to harm, to hinder, or to destroy the real spiritual man."

ARCHIBALD MCLELLAN.

BARNACLES.

THE naval narratives of the world teem with references to England's early seamen, Drake, Hawkins, and their kin, not only because of their fearlessness, their far-seeking, venturesome spirit, but because of the cleverness with which they handled their little caravels. The skill and daring of these "bronzed British tars" counted for much, no doubt, in their mastery of every sea, but their habit of hieing betimes to some secluded cove, there to tilt their crafts abeam long enough to scrape every barnacle from their keels,—this also had greatly to do with that fleetness of sail which contributed so largely to their achievements and fame; and today their wisdom in this regard is duly registered in the fact that the modern "greyhound" of the sea wins a furlong for every moment of her chase by being cleaned now and then to the skin.

All this illustrates the more important fact that in the realm of thought patient and planned-for removal of the retarding accumulations of material belief has very definitely to do with the satisfactoriness and success of every spiritual undertaking. Pride, the love of place, self-sufficiency and wilfulness, together with every other scion of selfishness and falsity,—these are the mental accretions that must be "put away" as Paul says, before consciousness finds its true freedom for diviner flight.

The barnacles of human belief abound in the quiet seas of credulous childhood and youth, where the sky seems most fair, the breeze most favoring. They are found too in the waters of mature ease and self-complacency, and they attach themselves to the body of human thought so insidiously, and multiply with such marvelous rapidity that, ere he is aware, many a promising voyager has lost his spiritual alertness, his ability to stem opposing tides, and so become a prey to the confusing and dangerous drifts of mortal thought.

To this state of mental and spiritual logyness Christian Science comes with awakening, freedom-bringing significance. It enables one not only to see the relation to present determinations and habits of early-acquired and unquestioningly accepted notions about things, and the inevitable failure of the most strenuous efforts to get on in truth while tenaciously clinging to error, but it shows how we may escape from these impeding increments of long-time belief. Upon the need of a "willingness to give up human beliefs," "to leave the old for the new" (Science and Health, pp. 24, 324) if one would progress rapidly in the knowledge of spiritual things, Mrs. Eddy lays the strongest emphasis; and in this she rebukes that very general impulse and disposition, even of the well-meaning, which makes them so much more ready to accept a new and nobler concept of things than to let go of the disabling views and opinions which have become their familiar companions.

This is no less true of many Christian Scientists than of other professed Christians. They were attracted by the possibility of health and freedom which Christian Science presented, and they have accepted its idealism theoretically, and grown enthusiastic, perchance, over its teaching and demonstrations; but they still give evidence, both in their words and deeds, that unnumbered material beliefs are holding unresisted sway in their thought. No earnest student, however, of Christian Science can long remain ignorant of the fact that contentment to leave the barnacles of false sense undisturbed in their attachment to and identification with his thought, is one of the greatest disabilities to spiritual growth, and as he puts forth patient and honest endeavor to remove them by the apprehension of the truth of being his rate of spiritual advance will be steadily increased.

JOHN B. WILLIS.

SCIENTIFIC ACCURACY.

THERE can be no question that the spirit of the age tends toward scientific methods in all directions, and this is well. Christian Scientists gladly acknowledge the many valuable contributions to human knowledge which have been made in the last half century, through insistence upon scientific accuracy in both study and work. They can the better appreciate the necessity for accuracy because they know that the Principle of Christian Science demands this, and no less than this in thought, word, and deed. It is therefore a matter of surprise that after many admonitions some people continue to disregard the rule relative to the non-use of formulas by Christian Scientists.

Quite recently the attention of the editors has been called

Digitized by Google

to the fact that typewritten articles are in circulation in various places, the statements in which, it is claimed, have been copied from articles published in the *Journal* or *Sentinel*, but as neither date, volume, nor page is given, it is well-nigh impossible to trace these statements to their asserted source. All that can be done is to examine them carefully, in order to see if they correspond with the teachings of our text-book, "Science and Health with Key to the Scriptures." Where this has been done, the result shows that very serious misstatements have been offered to unsuspecting readers. Here is one, taken from a typewritten sheet: "Now, if man is God's child, he is nothing more or less than a part of the eternal, universal good," etc. What is the teaching of our text-book on this point? On page 336 of Science and Health, Mrs. Eddy says: "God is indivisible. A portion of God could not enter man; neither could God's fulness be reflected by a single man, else God would be manifestly finite, lose the deific character, and become less than God."

Nearly all of these so-called "copied" statements are lacking in scientific accuracy, and they may therefore be characterized as counterfeits of the truth. It were well for all students of Christian Science to ponder our Leader's words in "Miscellaneous Writings" (p. 302): "Behind the scenes lurks an evil which you can prevent: it is a purpose to kill the reformation begun and increasing through the instructions of Science and Health." We would all surely shrink from harming ourselves and others in this way, and why should any be tempted to give out formulas when their use is forbidden? Even if statements from our periodicals were correctly quoted, there are many good reasons why these should not be taken from their context and given out in an irresponsible manner, without the volume, page, or line. What would be the result if detached sentences or paragraphs were taken from a standard work on engineering or chemistry, and these incorrectly quoted and circulated in such a way that the original statements could not be traced? Yet Christian Science deals with the most vital problems ever presented to humanity, and nothing can be of greater importance than to see that its teachings are preserved in their purity; that they are accurately stated and faithfully demonstrated.

In all religious history there is nothing more pathetic than Paul's words to Timothy, words written when he was awaiting execution under Nero. He says, "Hold fast the form of sound words, which thou hast heard of me, in faith and love which is in Christ Jesus. That good thing which was committed unto thee keep by the Holy Ghost which dwelleth in us." Then he warns Timothy against those "who concerning the truth have erred." Even in that dread hour the preservation of the healing and saving truth outweighed for him every personal consideration, and shall we of the present day care less for the form of sound words delivered unto us? Should we not ponder well this charge: "O Timothy, keep that which is committed to thy trust"?

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

Asheville, N. C., Aug. 8, 1909.

Beloved Leader:—We, the members of the Christian Science society of Asheville, N. C., send you our devoted love and gratitude for your marvelous example and demonstration of divine Love, and for the final and complete revelation of Truth which God has given to the world through you.

Theories, which thousands cherish,
Pass like clouds that sweep the sky;
Creeds and dogmas all may perish;
Truth herself can never die.
Christian Science Hymnal.

You are teaching us to comprehend the faith and patience of Jesus: "Heaven and earth shall pass away, but my words shall not pass away."

With sincere and tender affection,

ELIZABETH EARL JONES,
ANNIE C. BRIDGERS,
Committee.

Delanson, N. Y., Aug. 3, 1909.

Beloved Leader:—May I express to you my deep gratitude for our text-book, "Science and Health with Key to the Scriptures." For fourteen years it has been my daily friend and companion, in my former work of teaching little children, and in six years of work for the Cause of Christian Science in Germany. I am constantly impressed with the fact of how much better—more clearly, more concisely, and more beautifully—you have expressed the truth it contains, than any one else can. My highest thoughts of love and gratitude, and every treatment, audible or silent, come to me clothed in the language of Science and Health. Having been educated from childhood to familiarity with the text of the Bible, I find this wonderful book the golden key to all its treasures.

Beloved Leader, words cannot express my gratitude to you for your holy life and for your loving, watchful care over us, your church. May it be a tiny crumb of comfort to you to know that one, among the thousands you have "redeemed unto God," is trying to "follow and rejoice" along the way that is less rugged because you have traveled it first.

Your loving, loyal follower,
ANNE LE BARON DRUMM.

Chicago, Ill., Aug. 7, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—As the board of directors of Sixth Church of Christ, Scientist, of Chicago, we desire to convey to you, in behalf of the members, gratitude and appreciation for the new by-law regarding reading-rooms.

It seemed to meet especially a need in our field, for in the week preceding the issuance of the by-law, the arrangement to have practitioners in connection with our local reading-room had been completed. Although we were very enthusiastic over our new plan, we are grateful for having had uncovered to us that which might have hindered our greatest spiritual growth. At our meeting this evening we decided to notify the practitioners at once of our intention to adhere strictly to the new by-law, and that their connection with the reading-room as practitioners ceased from this date.

Board of Directors of Sixth Church of Christ, Scientist, Chicago.

DELIA HOWE, *Clerk.*

Toledo, O., July 21, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—We, the members of Second Church of Christ, Scientist, Toledo, O., desire to express to you our loving gratitude for the blessings that have come to us through the study of your writings. We realize that only as we, individually, turn away from personality to divine Principle for guidance, and strive each day to build up in consciousness the church defined in Science and Health (p. 583), "which affords proof of its utility" by healing the sick; and as we fulfil the promise we have made in the sixth tenet, "To watch, and pray for that Mind to be in us which was also in Christ Jesus; to do unto others as we would have them do unto us; and to be merciful, just, and pure" (Science and Health, p. 497); and only as we study

Digitized by Google

diligently and prayerfully the Manual, and are obedient thereto, are we helping to build the true church—the church triumphant.

Lovingly and loyally,
MARIE CHALMERS FORD,
PAUL ARTHUR HARSCH,
Committee.

Memphis, Tenn., Aug. 4, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—My heart is overflowing with gratitude for the meekness, humility, and selflessness with which you are leading us from personality to Principle, out of darkness into the light of Truth. I clearly see this is our salvation. For all of your late articles, and for the by-laws, I thank you. They have appeared at the time most needed and are guides to righteousness. Obedience is the "open sesame" to the treasures of Truth, and my daily prayer is to yield glad, joyful obedience to all of your teachings, thereby gaining grace for the day.

Lovingly and loyally,
ANNIE G. NEHLS.

Parsons, Kan., July 17, 1909.

Dear Mrs. Eddy:—My heart overflows in gratitude to God, and to you, His beloved messenger, for giving us that wonderful text-book, "Science and Health with Key to the Scriptures." Words are inadequate to express the joy that its teaching has brought to me, and to the many others of which I hear so often. This book is certainly the "Key" which unlocks the Scriptures, for never before was I able to demonstrate the power of divine Love in the overcoming of sin and sickness. You have proved to us that "God is Love," and in Him "is no darkness at all;" and you have surely shown us how to prove it for ourselves. I can never express thanks enough to God for leading us so firmly to Truth through you, dear Mrs. Eddy. Christian Science has healed me physically and uplifted me spiritually, and I am certainly happy to tell you and others what it has done for me.

Most sincerely,
FLORENCE REINHART.

Boston, Mass., July 26, 1909.

Beloved Leader:—This afternoon I visited our new publishing house for the first time. It was all so interesting, and I wish you could see it. We went to the press room just as the last edition of the *Monitor* was coming out. It would please you to see the perfect order and the workmen's happy faces; the great roll of paper at one end of the press and the folded newspapers coming out at the other end. One young man was whistling so happily that I spoke of him, and was told he is an usher in The Mother Church. The engine-room was clean and orderly, and the rooms throughout the building very bright. One of the workers said they wished every subscriber to the building fund could know how the workers appreciated the new quarters, and my heart is full of gratitude to you, dear Leader, for the work that has made all these things possible.

I am more grateful each day for all your love to me, and so glad I could have the great privilege of being with you. Mr. Scott joins me in tender love to you.

Lovingly your student,
MINNIE A. SCOTT.

Trondhjem, Norway, July 29, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Humbly I wish to express my gratitude for the great light which has dawned upon me since I commenced to study your teachings. The first time I read in Science and Health I was instantaneously healed, by the quickening work of Truth, of a disease of long standing, and since then all things have become new. In nearly thirty years of life I know of no greater change in my life than was brought about when a friend in Paris, France, loaned me your book one evening. How wonderfully Love works! At first I wanted to undertake great things. I would, presumptuously, translate your books. I wanted to bring about wonderful healing, and all of it immediately. Since then I have learned, sometimes with humiliation, that to follow you, as you follow Christ, means patience and unceasing watchfulness, as well as persistent effort to be, rather than to do, and that there is nothing to Christian Science but love.

I want to thank you this once in words for your faithfulness, for the bright and beautiful vista of the future, and then to trust absolute Principle for the proof of my gratitude.

With tender respect,
CARL S. SATHER.

New York, N. Y., July 27, 1909.

Dear Leader:—Just a few words, to express my gratitude for *The Christian Science Monitor* and the wholesome reading it imparts, and particularly for the article on Christian Science, which I find most helpful and look forward to each morning, as a message full of truth. The *Monitor*, with its broad charity, and good food for all, will grow, and to "the full grain in the ear."

Faithfully yours,
(MRS.) ROBERTA V. SANNER.

London, England, July 2, 1909.

Dear Leader:—It seems so impossible to frame any words in which to express one's gratitude and love to you for what you have done and are doing. This morning it seems as if joy must find expression in a letter of thanks. You have taught me to delight "in the law of the Lord," and real happiness has been realized; and though at times there seems to be a desperate struggle with self, the visits to the mountain-tops are more and more prolonged, where mortal sense is lost in spiritual sight.

Yours in the one great love,
B. C. TALBOT.

Chicago, Ill., Aug. 5, 1909.

Dear Mrs. Eddy:—My heart is so full of love and gratitude to you today, that I feel I must try to tell you of it. I have been studying Christian Science about five years, and they have been the happiest years I have ever known. I learned early in my study of Christian Science to look on each (seeming) trial as a blessing,—for they are all blessings in disguise,—and if I looked hard enough and long enough (if necessary), that I would see the blessing and give thanks. So I have gotten into the habit of giving thanks for the power of Truth, whenever anything seems to attack me, and my demonstrations have almost always been instantaneous. I am grateful every day for the lessons of love and obedience that I am learning constantly. This morning, after repeating some selections from Science and Health, these words came to me: God gave man dominion. I said: Yes, God gave me dominion over this and every other condition, and nothing mortal or material can hold me down. Then perfect harmony prevailed, and I felt that I must express my gratitude to you, even if in so small a way. I realize that I am showing my gratitude to you best as I live each day to the best of my understanding and strive to love more and to be obedient.

Sincerely,
JANE C. VAN HOESEN.

AMONG THE CHURCHES.

PORTLAND, ME.

Ground was recently broken on Neal street for the Christian Science church. The building that is to be erected by the Portland society is to be a handsome edifice, and in keeping with the architecture and finish of the dwellings in that section of the city. The foundation is to be of concrete and the building is to be of fireproof construction.

Portland Transcript.

MILL VALLEY, CAL.

The Christian Scientists of Mill Valley have already commenced to hold services in their new church on the corner of Lovell and Olive avenues. The church building is not quite complete, but such progress has been made in its construction that it has been found possible to make use of it on Sundays, so the old place of gathering has been abandoned and the new put into use before the final work has passed from under the builders' hands.

San Francisco Chronicle.

SAN DIEGO, CAL.

A new Christian Science church is to be built in this city, at a cost of fifty thousand dollars. The need for a greatly enlarged structure is very pressing, the present house of worship at Third and Ash streets being far from adequate to accommodate the numbers who try to gain admission to every service. At the Sunday services every seat is taken, the vestibule is filled, and many are seated on the Readers' platform, while on Wednesday night large numbers are sometimes left standing in the street.—*San Diego Union.*

ST. LOUIS, MO.

The new home of Fourth Church of Christ, Scientist, which is to be one of the most artistic buildings of its kind in the city, will be ready for occupancy next May. A permit for the erection of the building was issued yesterday [July 13], and the work of excavating has already begun. The church is to stand at 5569 Page avenue, on a lot 135 x 160 feet, and the building will cover practically all the ground. The lower floor will be occupied by the Sunday School and will have accommodations for seven hundred persons. The auditorium will seat one thousand. The building will cost one hundred thousand dollars. Fourth Church is scarcely a year and a half old.

Globe-Democrat.

CAMDEN, ME.

The opening of the new home of First Church of Christ, Scientist, of Camden, was held on Sunday morning, July 11. A large congregation attended the dedicatory service, and the interior of the edifice was decorated appropriately.

Although the Scientists have been using the church building for several years, it is only last April that they purchased the property from the Universalist society, and since acquiring it have made extensive alterations and improvements. The interior of the building has been entirely done over, the whole effect being softened by the light from windows of imported muffled glass. The rostrum has been rebuilt and two retiring-rooms, one at either end of the platform, have been added. Electric lights have been installed and the pulpit has been somewhat enlarged. A free reading-room, which is maintained by the society, is open to the public every day, with the exception of Sundays and holidays. Outside the edifice has been newly painted, considerable grading has been done on the grounds, and a new cement walk and steps add greatly to the general appearance of the new home.

Bangor Daily News.

BROOKLYN, N. Y.

The old church building of First Church of Christ, Scientist, at Lafayette avenue and Taaffe place, is for sale, because it is too small for the needs of the church. It has a seating capacity of five hundred and the congregation has grown to nearly double this number. The building has not been in active use for nearly a year, and the congregation has been using the Church of Our Father during this time, and even that building has scarcely been large enough.

The members will move into their handsome new church building at New York avenue and Dean street about the latter part of September. This is one of the finest church edifices in Brooklyn.—*Brooklyn Daily Eagle.*

SAN FRANCISCO, CAL.

Second Church of Christ, Scientist, in the Mission district, has had such a rapid growth in its congregation that it has become necessary to secure a new building. The attendance, which was large when the church was organized in November last, has steadily increased, especially at the Wednesday evening meetings, and the removal to a more commodious place of gathering has become mandatory. Those in charge of the church's interests have determined to move for the present into Kendrick's Hall, on Valencia street, near Sixteenth, where the auditorium is larger and the location superior to that now occupied. The hall has a seating capacity of six hundred. The reading-rooms are, however, to remain where they have been situated since the commencement of Scientist work in the Mission district.

San Francisco Chronicle.

JACKSON, MICH.

The services with which the Christian Science church was dedicated Sunday [July 11] did not differ from the regular services, except for a brief address by Frederick Chanel, First Reader, and a history of the local church by Mrs. Lena Miller, Second Reader. According to the usage of the denomination, the church, which has been in use since 1902, when it was purchased from the Hebrew congregation, could not be dedicated until it was free from debt. This having been accomplished, the dedication followed.

Mr. Chanel expressed the gratification of the members at the consummation of this part of their labor of love, and the pleasure felt in dedicating the church to God for the service of humanity. He also acknowledged the debt to Mrs. Eddy, Discoverer and Founder of Christian Science, and writer of the Christian Science text-book, Science and Health. "As our Jackson organization," said Mr. Chanel, "is a branch of The Mother Church, we have therefore the same mission to perform. The practical and tangible proof of the utility of this church rests with its individual members. In proportion as its members manifest love for God and man,—love which is imaged forth in our lives in forms of spirituality, goodness, uprightness of character, and unselfishness; love which heals the sick and reclaims the sinner,—in that proportion will the mission of this church be fulfilled.

"But while we are rejoicing in the demonstration over the law of limitation, we must not lose sight of the fact that the material church is but an organization to meet the present-day need. The real church is in Mind, a structure of Truth and Love, for the time cometh when the church will exist in the affections alone, for in the words of the Scripture the time cometh 'when they shall teach no more every man his neighbor, and every man his brother, saying, Know the Lord: for they shall all know me, from the least of them unto the greatest.' 'For the earth shall be full of the knowledge of the Lord, as the waters cover the sea.' "—*Jackson Patriot.*

TESTIMONIES OF HEALING.

[Translated from the German.]

Being encouraged by the many proofs of divine Love I have received, and strengthened by a firm trust in God, from whom emanates all good, all being, I give the following testimony. My desire is that through the reading of these lines a cup of water in Christ's name may be proffered to some suffering fellow-being.

Less than a year ago I first heard of Christian Science in consequence of a severe illness of my wife. I first read the pamphlet "Prayer and Confidence," and it immediately became clear to me that if one discerns the truth about God, good, according to the scientific statements of Christian Science, and adheres to it; that is, if one lets himself be governed by Spirit, the Scriptural promise that God "forgiveth all thine iniquities," and "healeth all thy diseases," is fulfilled. Through this reading wonderful promises had already been fulfilled for me, and I did not hesitate to take up the study of Science and Health. Although I was not in the least familiar with the English language, I entertained absolutely no doubt but that this book had to do with spiritual truth. From the above-mentioned pamphlet I had gained confidence as never before in my life, and Science and Health was now to disclose to me the whole truth. I recognized that I could only demonstrate Christian Science by obeying and loving the truth, and that nothing is gained by criticism and disobedience. With these views I began the study of Science and Health.

After the first four weeks I had a wonderful result through the power of divine Love. A little orphan girl, one year old, was living with her mother's parents, who did all they could for her; but the thought prevailed that the child was not healthy to start with, and shortly after she was sent to the orphan-house, but as she became very ill they could not keep her there. And truly, people who saw the child wept, so wretched were her looks. I heard all these things, went to see the child, talked to her, told her that God's children need not be sick but should be happy, because God is good and kind. I stayed with her for about fifteen minutes, played with her, and told her, as well as her grandmother, only good and beautiful things about God, and when I left I felt that a change for the better had taken place. The child, who at first was lying listless in her little cot, tried to smile and began to move her little hands, trying to wave them as I left. Half a year has elapsed since, and the puny child has become a strong and healthy little girl. For the past three months she has been running about with the other children of the neighborhood, who formerly were not allowed to play with her for fear of contagion. I myself realized in a wonderful way the meaning of God's kingdom on earth through this experience.

I want to tell of another instance when I was able to prove Christian Science practically. While at work in the laboratory breaking some quartz, a small piece of the stone flew into my eye. It hurt me some the first few minutes, so that I had to close my eye; but I tried to realize the presence of infinite Love, that there cannot be any disease, sin, or death in God, and in about five minutes I could use the eye again as before. I went on with my work; the fellow-workmen who had witnessed the incident said nothing, as they know that I endeavor to live Christian Science, and I myself did not think any more about the matter. In the afternoon I sneezed repeatedly, my eye was watering somewhat, and in the presence of my fellow-workmen I took out of the eye without pain a small and sharp piece of quartz. This was wonderful to me; I recognized that God always helps without any material means, and that we need but to call for His help in the right way. Christian Science has been a help to me under all circumstances where I could prove it practically, that is, when I saw the truth clearly. It helped me to overcome a severe attack of illness last April, without shortening my office hours and other work.

My wife was suddenly taken with a severe fainting-spell. I was a good deal frightened at first, but reassured her, declaring that all is Mind, God; that God is always with us, and where God is everything is harmonious. She soon opened her eyes, and I laid her on the bed, then studied some of the Lesson-Sermon. The attack returned an hour later, but with God's help it was soon overcome. At another time my wife injured her leg and foot somewhat in falling, and felt very weak. However, she asked for the Bible, so as to study the 91st Psalm. I went to see a Christian Science practitioner, who gave her absent treatment, and in the afternoon she was able to get up and move about without any inconvenience whatever. Toward evening the practitioner called, and we studied together from Science and Health; then she gave us both treatment, and a beautiful evening closed the day.

I thank our beloved Leader, Mrs. Eddy, with an overflowing heart for all the blessings that she has revealed to me and to those around me through her unselfish love for God, Truth, for mankind, and for all of God's creatures. I am willing to take up the cross and follow Christ, so as to become a useful member of society.

JOHANNES MEDING, Wiesbaden, Germany.

[Translated from the German.]

Last year in October I was taken ill with severe neuralgic trouble in the head. Nothing was left untried to alleviate the pain; I took the strongest medicines, and electric treatment was resorted to, but all without success. I was confined to my bed for six weeks, had no sleep on account of the pain, and as I could not take solid food—in fact I did not dare to do so, as according to the physician's statement other troubles might then set in—I became unable to stand on my feet. The physician, who had taken the greatest pains to restore my health, finally said that the trouble might last several months longer, and even then a relapse might occur any time. He said that the best advice he could give was for me to go to the hospital. This thought was dreadful to me, but man's extremity is often God's opportunity.

About this time my husband heard of Christian Science, and we asked a practitioner to call. After the first treatment I slept a few hours during the night; after the second treatment I was able to walk a little with assistance. After a few more treatments I could go out alone. The pain disappeared and I improved perceptibly. A slight relapse occurred once, but it was soon overcome. Since that time I have had many proofs of the power of divine Love. I also feel better than ever before. I cannot thank God enough that He has inspired Mrs. Eddy to give us the Christian Science text-book, Science and Health, which shows us the way to health and happiness. I am daily striving to understand God better, that I may become and remain a good Christian woman.

FRAU IDA MEDING, Wiesbaden, Germany.

One of our Lesson-Sermons brought so forcibly to me the fact that God's individual ideas are, by loving decree of infinite, eternal wisdom, inseparably associated with their fruits, that I have since felt not only an awakened desire to manifest more of the "fruit of the Spirit," as defined by Paul, but the paramount necessity of so doing away with the "fruit of the tree of the knowledge of good and evil", as to perceive and bring forth those fruits which are the product solely of the "pure thought emanating from divine Mind" (Science and Health, p. 508).

Digitized by Google

I feel that I owe this desire wholly to the operation of Christian Science, and it is a privilege to express my deep gratitude for that which has not only kept me well for the past ten years, but which has taught me by merciful steps that "the Lord our God is one Lord," and that I can have, and need, no other good than that which comes by the revelation of divine Science from this infinite creator. The message which I hope this testimony will convey to some weary struggler with the problems of sense, is that "the God of Abraham, the God of Isaac, and the God of Jacob," the God of Moses and the prophets and He whom Christ Jesus glorified, is without all peradventure the God of our beloved Leader, Mrs. Eddy, the Discoverer and Founder of Christian Science; and God, Spirit, Mind, is present now as of old to lead out of the bondage of suffering sense into "the glorious liberty of the children of God." We know now, as Moses knew, that although we cannot see His face with the physical sense, nevertheless we may spiritually understand Him, and He does hide His own "in the cleft of the rock" as He passes by, and we do witness the "signs following."

Every week's Lesson gives me new cause for gratitude to our revered Leader for her patient and painstaking labor, under divine guidance, to make plain to the world by practice and precept her priceless discovery of God's spiritual laws and of their scientific operation. The study of "Science and Health with Key to the Scriptures" by Mrs. Eddy, topically, with the aid of the Concordance, also brings added spiritual illumination, which convinces the earnest student that the text-book of Christian Science could not possibly have been brought forth by the sum total of human knowledge, but that it is inspired. When, after earnest study, one finds circumscribed methods of thought, superstitions and prejudices of long standing, melting suddenly away before some gleam of infinite meaning, and when one realizes that what is revealed by this process was self-evident to the inspired thought of our Leader years ago, the far-reaching import of her mission is partially realized. I am one of thousands who know from experience that the "angel of his presence" does go with him who reads and ponders the Scriptures, as interpreted by this book, with heart intent upon knowing God's way; that Christ, Truth, abideth with us now forever, saying, "Come unto me, all ye that labor and are heavy laden, and I will give you rest."

MILTON B. MARKS, Terre Haute, Ind.

For more than ten years I was troubled with what is considered an obstinate skin disease. I tried first one remedy and then another, as they were suggested to me; also doctor after doctor, with no success whatever, in fact I was constantly growing worse. At last I began to get discouraged, and especially when the last doctor, after treating me for more than three months, suggested that I consult a specialist. Just about three weeks previous to this I had been loaned a book which turned out to be a Christian Science story. Becoming greatly interested in it, I made the assertion to my doctor that I was going to have something which would cure me. The doctor asked me what it was, and when I told him that it was Christian Science, he laughed at me. This was on Monday. Wednesday I looked up the Christian Science church in Wilmington and attended the service that night.

My reception was so cordial, and the people seemed so earnest and sincere, that, as the veracity of those who spoke that evening could not be doubted in the least, I decided to find some one to give me treatment. After the service one of the members, whom I afterward found to be a practitioner, willingly agreed to explain this wonderful Science to me. This he did the following evening, and began giving me absent treatment the next morning, assuring me that God would heal me. Prior to this time I had worn bandages for at least three months, and had not been able to wear a pair of cuffs for more than ten months; but I wore a pair the next Sunday, when I attended the morning and evening services, and in about four weeks I was entirely healed of the eruption.

Up to this time I had been an inveterate smoker, but within five days after my first talk with the practitioner I gave up smoking, having lost all desire for tobacco, and since then have never had the least wish to use it. Christian Science has also been of inestimable assistance to me in a business way. For a matter of ten months I had been endeavoring to better my position, but with no apparent success. In less than six weeks, however, after beginning with Science, I secured and now hold a position that I thought I would be fortunate to get ten years hence, and I find that by using what knowledge I have of Christian Science, I am working successfully in my new position. During this time I have been able to overcome an attack of toothache. Not only was I released from the sense of pain; but also from a feeling of sensitiveness which I had experienced for more than a year. In this I endeavored to know that the pain was unreal and also that it would not be necessary to consult a dentist afterward, for I believe that if Truth is able to remove pain, it can at the same time remove the supposed cause of pain.

For all these many "signs" that are following, I am sincerely grateful, but all the physical helps are of small value in comparison with the spiritual comfort which I now enjoy. Since I was twelve years old I have tried to be a faithful church-member, but somehow I could not find the peace which I thought should follow my efforts in this direction, and at last I gave up church entirely; yet was worried as to what answers I should make to the questions that I knew would soon be asked me by my dear little girl, questions which I knew I was unable to answer intelligently or truthfully. Now, thanks to the purity and spirituality of our dear Leader, Mrs. Eddy, I have a knowledge that is better than gold; "yea, than much fine gold."

I am grateful for all these blessings from above, and am endeavoring to pass them on to others, for I have found what is meant by the words, "It is more blessed to give than to receive." I always had the impression that this referred to material giving, but now I know that it refers much more to the spiritual.

CLEMENT H. LIPPINCOTT, Wilmington, Del.

It is with deep gratitude that I wish to tell of the blessings which Christian Science has given me, though words cannot express the peace it has brought into my life. I wish to tell of a demonstration over some severe burns. About six months ago my little daughter's dress caught fire while she was near a bonfire. Hearing the screams of the children, I ran out and found her sitting on the ground near the front of the house. She had run from the back yard, a distance of about one hundred feet, with the flames surrounding her. I put the fire out with my hands. The child's clothing from the waist to the knees was burned off, excepting the woolen underwear, which was burned through in some places, and her back was terribly burned. In five minutes a Christian Science practitioner was treating her, and in about twenty minutes she was asleep. She suffered no pain, and when she awoke smiled and talked to her father about the accident. One of my hands was very badly burned, but I also experienced no pain. In five weeks we were both entirely healed, and although it seemed at first that my hand would be disfigured, there is now not a scar, and they are disappearing one by one from my little girl.

This is only one of the many demonstrations of Truth's power which we have experienced, and I am thankful to God, and grateful to dear Mrs. Eddy, for these blessings.

MRS. MABEL A. STEVENSON, Alhambra, Cal.

Digitized by Google

I wish to express my gratitude for what Christian Science has done for me. I have been a student of the literature for several years, and have received many blessings through the truth, yet have never before made public acknowledgment. A few months ago a practitioner was called in, as I was suffering from what seemed to be a very severe attack of throat trouble with other complications. While talking to the Scientist, I told her of being a slave to the tobacco habit, of using it since boyhood, and that the habit was hereditary. I had tried several times to break away from it, but had failed, and had been told by physicians that I would not live long if I did not use the weed. The practitioner took up the case, and in a few treatments the desire for tobacco left me, as did also the throat trouble. I have suffered no inconvenience through abstaining from the use of tobacco.

I cannot be too thankful for this demonstration of the power of Truth, and for many other blessings which have come to me.—W. S. NEECE, Seattle, Wash.

I am grateful for my healing, which was slow, but, thank God, a healing of the deadly sin of self-righteousness. I am grateful for Christian Science, which exposes the nothingness of the human belief in goodness, and reveals the glory of God.

MRS. FER[illegible]MINE P. BECKWITH, Pendleton, Ore.

Having tried several of the best physicians in this city, and also having them send to New York for remedies which they said had never been known to fail, I had finally to give up and accept Christian Science treatment, which I had several times been advised to try. I am happy to say that through the treatment an intestinal disorder has entirely disappeared. I feel like a new man, thanks to Christian Science.—JAMES L. BOWIE, New Bedford, Mass.

It is with a heart full of thankfulness to God for what He has done for me that I send my testimony to the *Sentinel*. I can say, "Thanks be to God, which giveth us the victory through our Lord Jesus Christ," for through the power He has given us we can overcome all the ills of this life and realize that there is no power in evil. I was speaking to a doctor of my wonderful healing and he remarked that the time for miracles was when Christ Jesus was establishing his divinity, but I know that we can feel the ever-loving help of our heavenly Father now the same as when Jesus was among men. Left helpless and hopeless by one of our best physicians, about a year ago, I was made to feel that miracles were being performed on me by Christian Science when I was relieved of pain that nothing but opiates had hitherto been able to allay.

How I rejoice in knowing what it means to be God's child, and that I could be healed by this blessed truth. After having tried the effects of climate all over our great country, I have at last been healed of a sciatic infirmity, from which I was not able to walk across my room. I was also healed of a lung affection of fifteen years' standing. In three treatments I was healed of an acute attack, when I was lying on a bed of pain, waiting for death to relieve me. A Christian Science practitioner came to me like a ray of sunshine, and I was immediately healed. The other diseases yielded more slowly, and but for the blessed promise, "Lo, I am with you alway," I should have given up. Then I remembered that the way to draw to myself greater blessings was by giving thanks for the smallest blessings of which I was conscious. Today I can praise God for the new hope that has come to me, and for the great spiritual healing I have received, as well as for the physical benefits. To those whose healing is slow I would say, Do not give up, but cling to the truth! The prophet Isaiah says, "Then shall thy light break forth as the morning, and thine health shall spring forth speedily;" and the Master said, "The words that I speak unto you, they are spirit, and they are life."

I am so thankful to our Leader, Mrs. Eddy, for the revelation of the Christ within, which is indeed "the hope of glory." The brightness of Truth's presence casts out all the darkness of error, and then the whole body is full of light. I acknowledge God at all times as the one source of my understanding, and I strive to obey Paul's admonition, "Stand fast therefore in the liberty wherewith Christ hath made us free, and be not entangled again with the yoke of bondage."—MRS. MAE HOLBROOK, El Paso, Tex.

Words cannot tell what Christian Science has done for me. After I had suffered for six years with internal diseases, the physician said I would have to go to a hospital for an operation. This was done, but the operation did not bring me the health I so much desired. I continued to suffer, and was thinking of returning to the hospital for a second operation when I went to Reading for a visit. While there Christian Science was presented to me, and I was taken to see a practitioner. I can truthfully say that I was healed in four days, as a supporter which I had worn for two years was discarded within this time, and I have since been able to do all my own housework without the slightest return of the trouble. In February, 1908, I took up the work of nursing, and while I have not taken a course as a trained nurse, I have been able to help others with my improved thought. I am grateful to God, and to our dear Leader, Mrs. Eddy, for bringing us this great truth which heals and uplifts mankind.

MRS. ROY GEORGE, Wiconisco, Pa.

During several years of my early married life, I endured many ills of the flesh and suffered many things of many physicians. I was afflicted with chronic liver trouble, and a stomach disorder so acute that for a number of years I ate no solid food without paying a penalty in extra suffering. I also had a large goitre, which caused such intense suffering that I could not lie down. The physician gave me very little hope of recovery.

At this time we were invited to attend a Christian Science service, which we did, and I was very much interested. Shortly after this I asked for treatment, and although my healing was somewhat slow, I can now say that I am an entirely well woman. My heart is filled with thankfulness to God, also to Mrs. Eddy, through whom we have gained an understanding of divine Principle as revealed in Christian Science.—MRS. E. C. MORRIS, Batavia, N. Y.

From my earliest remembrance I was a sufferer from nervous affection of the digestive system, and other ailments which were not reached through *materia medica*. It was not unusual for me to hear people say, when they thought I was too young to understand, that I would not live to be grown. When I think of the fear and anxiety that my dear mother had for me, it is with regret that she did not know the true creation, that "man *is*, not *shall be*, perfect and immortal" (Science and Health, p. 428).

At the age of fifteen, being without earthly parents and with no one to take any special interest in me, I was sent away to school. Under the change of scene and manner of living I grew stronger, though I could never get rid of the thought that I would sooner or later have the chronic

Digitized by Google

disease from which my mother suffered for years, and from which she passed into another existence; and in consequence of this wrong thinking, it was only a few years until I was again under the care of physicians. Upon the advice of local physicians I was taken to Philadelphia and treated for six months by a well-known specialist of that city. I went home much better, and hoped I would be well, but it was only a matter of time until I was again in a hospital. This, too, helped me only temporarily, and later I went to still another hospital. In each of these places I feel sure the physicians did all for me that human power could do, but I was not cured.

It was when I was at the seashore, seeking health again, that I was advised to try Christian Science. I did not follow this advice at once, but two years later, when I believed I could not live more than a few months at best, I went to a practitioner for help. She told me to get a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy. I did so; and as I remember now, the next morning I felt a desire to read this wonderful book. Though I did not understand it at once, nor get well at once, I kept on, and at the end of seven months with the help of a practitioner I was healed of all my diseases. The promise in Revelation was fulfilled for me: "The leaves of the tree were for the healing of the nations."

It has been eleven years since this glorious truth came to me,—the truth which has been a shield and buckler in every time of need. The desire to read the text-book, Science and Health, with my Bible, has increased daily, and I have proven for myself and others, by demonstration, that "the word of God is quick, and powerful, and sharper than any twoedged sword, piercing even to the dividing asunder of soul and spirit, and of the joints and marrow, and is a discerner of the thoughts and intents of the heart."

MRS. ALICE B. POWELL, Asheville, N. C.

This is to certify that Christian Science treatment cured my two children of a distressing skin disease, distributed over parts of the body and face. In spite of very unfavorable surroundings the healing was perfect, though it took several months' constant work on the part of the practitioner.

Christian Science treatment has also cured my little son of a fever in its last stages. Reports were circulated that he had not survived his removal from the hotel to the practitioner's house, and next day inquiries were made on the streets as to what hour during the night the child had passed away. On the eighth day he was so completely restored that he walked to his new boarding-house, a fourth of a mile distant, and played on the street the rest of the day with his little playmates.

ISAAC P. WOOTAN, De Funiak Springs, Fla.

I write this in loving gratitude for the by-law extending the age limit of the Christian Science Sunday School pupils. When I first took up Christian Science I had attended the Sunday School but a few weeks when I was told that only children under fifteen years of age were admitted. I had been just long enough to realize the blessings that were to be gained here by the child who really wanted the truth. I longed for the truth, and was badly in need of healing. I remember the teacher told me that my eyes could be healed and I should soon have no need of glasses. Let it suffice to say that it was only a short time till my eyes were perfectly well. In the few weeks I was in the Sunday School I gained more knowledge of God than I had in all my life before. When I heard the new by-law read that went into effect last year, it was with a deep sense of joy that I realized one of my greatest desires had been gratified. To have the privilege of being a Sunday School pupil is one of the greatest blessings that can come to a student in Christian Science. It arouses us into energy and activity in recognizing God's demands.

I am very thankful to God, and grateful to our Leader for this healing truth. It is being proved to me daily that "divine Love always has met and always will meet every human need" (Science and Health, p. 494).

DELAWARE Y. SLATER, Kansas City, Mo.

In the spring of 1908, I was taken very ill with a nervous and muscular affection of the body, and also a very severe bowel complaint. I called a Christian Science practitioner, and received help almost immediately. At the time of this attack I was practically helpless, but within a few minutes after notifying the practitioner I was wonderfully relieved, so much so that I got up and prepared my supper. The trouble vanished very rapidly, and I have been in better health than at any time since the birth of my baby, nearly a year ago. I am so thankful for this blessed truth that makes us free from all discord.

MRS. W. B. BRICKER, Steelton, Pa.

Never have I so appreciated the truths of Christian Science, or the wonderfully unselfed life of Mrs. Eddy, as in the past two months. The suffering through which I struggled at my mother's passing on, seemed insurmountable, and error trooped close on every side; but Truth always stands ready to deliver, and no amount of mortal thought could keep God's child from her own. My demonstrations have been many and convincing. Most wonderful of all, to me, seems the absolute unreality of any separation between my loved mother and myself. I am grateful indeed for this wonderful demonstration of the truth, for we were so much to each other that in the old thought I would have been inconsolable.

Coming into Christian Science nearly three years ago, my physical healing seemed wonderful. As I advance now, the wonder ceases, and I find that truly it is divinely natural. Headaches, which never ceased except by the use of opiates, brought on by so-called organic troubles of the most serious type, were all met within six days by reading Science and Health. Gratitude flows in my every thought,—to God, to Mrs. Eddy, and to the faithful followers who have helped me on my way toward the towering might of Truth. Coming out from Boston, not long ago, a glaring billboard caught my eye, advertising in glowing terms a well-known remedy. Directly in line, and towering above, rose the dome of The Mother Church, emblematic to me of the comparison between the spiritual and material. No matter how much material means may promise, the spiritual goes beyond, into the pure depths of divine Love. Not the least of my blessings is the stand my husband takes, side by side in thought with me, and that step enables me to take my stand here beside my aged father. The power of Truth leads on, and if we cleave ever to the right, all avenues will be opened to us.

Ever to reflect divine Love toward those who seem to hate us, is my daily prayer. To follow in Christ's footsteps, as Mrs. Eddy has shown us in her own eventful life, is my endeavor, so that thereby I may prove my gratitude for all that has been done for me through Christian Science.

HENRIETTA JACKSON POWELL, Winfield, Kan.

Tonight the stars are out again,
After the low-hung clouds and rain!
  Thus peace must follow strife,
  And death yield place to life,
And harmony supplant our sense of pain.

WARWICK JAMES PRICE.

FROM OUR EXCHANGES.

[*Christian World*, London.]

We can only keep good by the incessant effort to be better. There is no standing still. You go on or you go down. Note, too,—and it is a glorious fact to note,—that, however meager a moral and spiritual nature you start with, it can be indefinitely developed by an honest daily endeavor. You can, for instance, cultivate your heart, cultivate the love of your fellow-man. You can do it by a steady inward striving; by a determined extrusion of thoughts and feelings that are contrary to love. You can resolve not to speak ill or to think ill of your brother; to pay him as much respect when he is absent as when he is present. You can develop the habit of putting yourself mentally into his place, of realizing his difficulties, his sorrows. And it is amazing to find how this industry, honestly followed, develops in us; how it opens up branch industries which offer similar products.

[Rev. Frederick A. Bisbee, D.D., in *Universalist Leader*.]

The great need of the world is not more money, not more laws, not more offices, not more schemes for human betterment, but more of just plain, good, true men; men who are full grown in every department of their being; men of individual, personal righteousness; men of integrity and character; men with a sensitive conscience. The best office in the world will fail unless you have a good man to administer it; the greatest wealth is a curse except a good man manage it. Every social system ever instituted has met wreck because of the failure of the individual man in it; or met success in proportion to the good men in it. All of our evils, social, economic, political, have their primary cause in evil men. The only way to reform the world is to reform the men in it. Put enough good men into your community, and they will solve your problems.

[Rev. L. C. Littell in *New York Observer*.]

Material civilization is busy finding out God's reservoirs of supply. This knowledge, supplemented by securing means to bring it to the surface, to the spot where most needed, and distributing it, is our work. Supply does not create a demand. We, as Christians, are as well stocked for doing good as a coal-mine; but that never warmed any one or made a home more comfortable, or the world better; it must be brought to the surface and distributed; that is the work of the owner of the mine. A buried gospel is of no more use—it is simply power unemployed and going to waste; and he has received command from the Master—"Occupy till I come."

[Rev. Herbert A. Jump in *Congregationalist and Christian World*.]

This imitative approach to God by the way of ministering deed, this "doing all the good we can to all the people we can in all the ways we can as long as ever we can," is sometimes underrated by the ritualistic souls, but it remains nevertheless the best authenticated highway into the divine presence. If ye do the will, ye shall know. Acquaintance with Christ will come from the reproduction of the Christ-life of helpfulness in the world today. From wherever you are you can move straight into the glory of a deep experience of God, if only you pursue this program of being busy with love-deeds.

[J. G. Townsend, D.D., in *Christian Register*.]

Religion may be defined as our sense of God, our faith in the eternal truth, the eternal beauty. It is man's passion for the perfect, his unquenchable desire to improve. It is his desire to construct, to create. It is the prayer of the soul to break through the animal husk and rise into a larger, fuller, more beautiful life.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel*.

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in this column.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

Correspondents who have sent orders for the Hymnal to the Publishing Society during the past month or two are informed that there has been delay in securing permission to use some copyrighted hymns, and it is necessary to await the completion of arrangements before issuing any Hymnals. To avoid inquiry and correspondence, it may be stated that delivery will be made as soon as it is practicable.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the Field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

PAMPHLETS IN FRENCH.—Three new French pamphlets, "Christian Science: Le Pouvoir De L'Homme Sur Le Mal," "Christian Science: Ses Bienfaits Pour L'Humanité by Edward A. Kimball, and "Christian Science: La Délivrance Du Mal" by William P. McKenzie, are now ready for delivery to the Field.

A new catalogue (Number Sixteen) has just been issued by the Society, copies of which will be mailed to our patrons on application.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, must be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE, POSTPAID: Single copy, six months, $1.20, one year, $2.00. Quantities TO ONE ADDRESS: ten copies, each, six months, $1.15, yearly, $1.90; twenty-five copies, each, six months, $1.10, yearly, $1.80; fifty copies, each, six months, 95 cents, yearly, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 40 cents for postage on each yearly subscription.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; In the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year or two years previous, cloth, $2.50; half calf or half morocco $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE, POSTPAID: One or more copies, 50 cents, each, yearly. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postpaid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postpaid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico and Cuba, 10 cents a copy, 60 cents for six months, $1.00 a year; all other countries, 12 cents a copy, 75 cents for six months, $1.25 a year.

Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75

Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883-1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), single copy $2.25
Twelve or more books to one address, each . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75

The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.

Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science: its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, six months, $1.20; one year, $2.00.
Ten copies to one address, each, six months, $1.15; one year, $1.90.
Twenty-five copies to one address, each, six months, $1.10; one year, $1.80.
Fifty copies to one address, each, six months, 90 cents; one year, $1.50.
These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.
Subscriptions to the SENTINEL will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid, to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.
To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.
Bound Volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

The interstate commerce commission will start west in about a month on one of the most important trips it has made since the passage of the Hepburn law. It will conduct hearings which will involve freight rates from New York and other eastern points through to many far western shipping centers and to the Pacific coast. Local rates also will be involved. The first hearing will be at Spokane Oct. 4. Other hearings will be at Reno, Salt Lake City, Portland, Seattle, San Francisco, and Billings. So important are the controversies involved that the whole commission will make the trip and will be gone six weeks or more. One of the questions involved is whether the railroads shall be allowed to charge higher through rates to interior cities like Spokane, Salt Lake City, and Reno than to the Pacific coast cities. It is possible the whole structure of freight rates applicable to the Rocky Mountain region and the coast will have to be overhauled, both as to local rates and through rates from eastern points.

By requiring letter carriers to "double up" their routes during the dull season of July and August, instead of employing substitutes, Postmaster General Hitchcock expects to save the Government not less than $250,000 in the cost of carriers' vacations during the present fiscal year. Post office employees are allowed by law fifteen days' leave of absence with pay each year. It has been the general practice for many years to employ a substitute for every day a letter carrier was on leave of absence. As there are twenty-six thousand carriers in the service, and as the cost of sub-service for the fifteen days and two Sundays allowed the carrier for his vacation is about $40, the actual cost of the carriers' vacation is a little more than $1,000,000. During July and August the volume of mail, in the large cities especially, is considerably reduced, enabling carriers to "double up," so that in some instances during those months two carriers serve three routes.

To add to public safety in railway travel by raising the standard of steel rails now produced, a conference far-reaching in importance has just been held between the assistant secretary of commerce and labor, the chief of the Bureau of Standards, and a sub-committee of the American Railway Engineering and Maintenance of Ways Association. The conference worked out a cooperative plan by which a scientific inquiry will be commenced immediately to investigate the physical properties of the steel rail and to ascertain what is needed to bring it up to the highest possible standard of efficiency. The experiments will be conducted by the Government with a view of solving the scientific points involved.

The Massachusetts state forester has accepted the offer of certain railway companies to assist in fighting forest fires. The president of the New England Investment and Security Company states in his order to the managers of the trolley lines under his control: "Inasmuch as our various country lines depend in a large measure for their attractiveness upon the forests through which they run, it is very essential that we cooperate to the fullest extent with the state authorities in their endeavor to suppress the forest fires." Considerable territory is covered by this order, as the company controls about fifteen street railway companies.

With the selection of Pueblo, Col., as the next meeting-place, and the adoption of resolutions commending both the efforts of Gifford Pinchot and F. H. Newell, chiefs of the forestry and the reclamation bureaus respectively, asking a billion-dollar irrigation fund from Congress and commending the Mississippi deep waterways, the seventh national irrigation congress closed last week at Spokane, Wash. The convention also favors one billion dollars for drainage, one billion for deep waterways, one billion for good roads, and one billion for forest preservation.

The president of the Chicago school board says: "Fraternities and societies have no place in the public school system. If we have to depopulate the high schools we shall crush the fraternities and societies. The public schools are democratic institutions, supported by the people, for all the children, independent of class, race, or religion. When organizations of 15 or 16-year-old boys or girls set themselves up as social censors and are permitted to exist, it is the beginning of the sapping of the foundation of our public school system."

It is estimated that the cost of holding the special session of Congress to pass the tariff bill was at least $500,000. The expenses of the Government printing office, it is estimated, will add $300,000 more. The principal item of expense of the session was mileage, amounting on account of representatives to $154,000, and of senators $47,000. Extra pay for employees of Congress involved an expenditure of nearly $100,000.

A hearing will begin soon in Seattle, Wash., to consider alleged frauds in connection with coal lands in Alaska. That more than two hundred thousand acres of rich coal lands in Alaska, some of them having veins sixty-five feet in thickness, have been filed upon by dummy entrymen, procured through agents of six large corporations, the Land Office has evidence to prove, according to information made public.

Bids have been opened at the Bureau of Insular Affairs for one million and a half dollars Philippine improvement bonds. There were only six bids, the highest for the whole amount being the Riggs National Bank of Washington on behalf of the National City Bank of New York and the Mercantile Trust Company of St. Louis, at $100.28.

Approximately 163,600 acres of non-irrigable land, located in the vicinity of New Castle, Wyo., have been designated by the Secretary of the Interior for settlement under the enlarged homestead act.

International.

American participation in the Hankow-Sze-Chuen Railroad loan has been definitely settled at the offices of the Foreign Board. The loan is to be increased from $27,500,000 to $30,000,000, and of this latter amount American bankers are to get one quarter, the other three quarters going to British, French, and German interests. Americans are to have an equal opportunity to supply material for both the Sze-Chuen and the Canton lines and the branches; they will appoint subordinate engineers, and they will have also one half of all future loans of the Sze-Chuen Railroad and its branches, with the corresponding advantages. The final settlement of the issue pending so long, is a victory for the State Department of the United States, which all along has declared it to be an undeniable right that American capital should share in the financing of the Sze-Chuen and other railroads.

A well-directed shot fired by one of the parties of bluejackets which landed at Canea, Crete, from the international squadron anchored in the harbor, brought down the flagstaff of the Canea fort and with it the Greek flag that has threatened to bring about war between Turkey and Greece. The Greek flag was raised a few weeks ago by the people of Crete, in defiance of the sovereignty of Turkey, and as an evidence of their desire for union with the kingdom of Greece.

The head of Islam in Turkey has ordered that the priests are to impress upon all true believers the fact that the modern and approved interpretation of their religion invites and requires that they respect the freedom of conscience in others not of their belief. This order of the religious head of Islam will be enforced by the Young Turk government.

Industrial and Commercial.

Work has been commenced on the greatest piece of tunneling work ever attempted in Canada, the two tunnels on the main line of the Canadian Pacific between Field and Hector. The work means the excavation of 650,000 cubic yards of rock, the boring of about one and a half miles of tunnels through mountains ten thousand feet high, and the building of two bridges over the Kicking Horse river. It will reduce this grade from 4.5 to a maximum of 2.2, doubling the traction power of the locomotives.

The old Union Station in Chicago is to be replaced by a $25,000,000 structure, and will be in addition to the $20,000,000 terminal which the Chicago and Northwestern Railroad is building. The railroads planning the project are the Pennsylvania, the Chicago and Alton, the Chicago, Milwaukee, and St. Paul, and the Chicago, Burlington, and Quincy. A modern $30,000,000 terminal at State and Twelfth streets is under consideration by officers of the Chicago and Western Indiana Railroad.

Nowhere in the world are such heavy passenger and freight trains hauled as in the United States. Not long ago a train three thousand feet long, containing 85 cars loaded with 4,451 tons of coal, was hauled from Altoona to Enola, Pa. Trial was made to determine what loads could be moved over the middle division, where the maximum grade has recently been cut down to 0.2 per cent. The train was hauled for 124 miles at an average speed of seventeen miles per hour by a single freight locomotive.

The Canadian Consolidated Cement Company, through which will be effected a merger of about twelve plants in the Dominion, controlling approximately sixty-six per cent of Canada's cement output, will be capitalized for $30,000,000.

With proposed additions to existing spindles New Bedford, Mass., will have a total in 1910 of 2,737,811, and Fall River 3,695,604. Capital invested in the cotton industry in the former city amounts to $29,000,000 and in the latter $35,000,000.

The Cunard liner Lusitania has just crossed by the long course in 4 days 16 hours 40 minutes, nearly three hours better than her best previous performance.

A new fast express, the Twentieth Century Limited, makes the distance between Boston and Chicago in twenty and one half hours.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

DOING SOMETHING.

CLARENCE W. CHADWICK.

IT is not always an easy matter to do something unless one knows how to do it. The art of knowing precedes the art of doing. Doing something naturally suggests action, and action suggests intelligence or mind. Nothing is done without activity. To do something, then, one must understand what activity is and who or what it is that acts. Is it mind or matter that acts, performs, and brings to pass?

Christian Science is proving to countless thousands that divine Mind is in reality the sole actor in the universe; that matter is devoid of intelligence or mind, and for this reason it cannot act or do something. Upon this practical proof of the mindlessness or non-intelligence of matter hinges the salvation of the human race, for it reveals the all-important fact that good is the only activity, consequently that evil cannot act or do anything. However unreasonable this statement may seem to the bond-servants of matter, it is nevertheless susceptible of proof in the daily practical experience of any sincere seeker of truth.

To understand that good alone has power, that it is the only energizing force and influence in the universe, is the greatest boon that could come to mankind. Upon no other basis can the omnipotence of God be explained. For centuries professing Christians have declared their belief in an almighty God, and in the same breath have admitted that evil also has power to act. This abnormality of belief has resulted from the false premise of a good-and-evil intelligence or mind, a mind that is just as capable of thinking evil as good. The activity of good must certainly be sustained by divine Principle, and since this Principle is God, all power, action, and cause must reside in God; in divine Mind, not in matter.

When humanity humbly turns to Mind for all cause and effect, and begins to correct the wrong thinking that ensues so long as matter is invested with power to think and to act, it will begin to apprehend what the Master meant when he said, "I am the light of the world: he that followeth me shall not walk in darkness, but shall have the light of life." Had Jesus believed in a secondary power called evil, he would not have shed the light of spiritual transcendency upon the misguided consciousness of mortals, and the human race would have remained in darkness. To him Spirit or Mind was the sole activity of the universe. He declared that God is this Spirit, and that of himself he could do nothing; that God alone performs the healing works. He knew that matter, in order to heal, would have to possess the power to act, and that such power belongs wholly to Spirit, God. When he relied upon Spirit or Mind to heal, he understood that something was being done for those who called for help. He never accused any one who turned to God for healing, of neglecting what was needful. He never told any poor sufferer that he was "experimenting" or "taking chances" when he placed himself unreservedly in God's care, but he did say, "Come unto me, all ye that labor and are heavy laden, and I will give you rest."

In striking contrast with the Master's implicit trust in divine Mind, as possessing all power and activity, is the mental attitude of those who have been taught to look into mindless matter for cause and effect and who still believe that matter can act and produce action. Some years ago a woman was arrested and brought into court, under the charge of insanity, for having refused medical attendance for her husband, who had been rendered unconscious and was supposed to have sustained internal injuries from an accident. Both parties were firm believers in Christian Science, and the wife, knowing what the wishes of her husband would be, summoned a competent Science practitioner. The man recovered rapidly from his injuries. In face of the undeniable fact that something had been done for the man, a doctor who was an eye-witness to the experience pressed the charge of insanity, and in court secured as a witness a certain alienist who testified that a refusal on the part of any one to accept medical aid under such circumstances was to him an evidence of insanity. The court listened to the evidence, but found no charge against the woman, adjudging her perfectly sane. The ignorant assumption of the "carnal mind" was that, unless plasters and pills and powders were resorted to, the man would be left to die without anything being done for him. Even the complete recovery of the man did not convince this so-called "mind" that omnipotent intelligence had anything to do with the result.

The devotees of the god of medicine have even gone so far as to lodge the charge of manslaughter against Christian Scientists for permitting (?) certain cases to pass on without medical assistance. Neither the theory nor practice of *materia medica* would authorize the statement that such cases would have recovered under medical treatment. Who is best capable of deciding of what "proper treatment" consists, the willing vassal of matter who avowedly has no faith in, nor understanding of the divine Mind to do anything, or the one who has found out that the one Mind is the only active and healing influence known to man, and who has been enabled to prove his faith by his works in numerous instances where *materia medica* offered no hope of recovery? Is the Christian's prayer that says, "I know that thou hearest me always," a meaningless abstraction, or is it an ever-available means of communication with the infinite God who is Love, who doeth all things well, "who healeth all thy diseases"?

The materialist may claim that it is all right to pray to God for help, but that it is the height of folly to ignore any material means at one's command. By this is meant that Spirit may be asked to do the work, but that all faith and confidence in anything being accomplished must be confined to the use of visible, material means. Is this the Christian's standard of obedience to an omnipotent and omnipresent God? Is the situation changed by assuming that this God, who is infinite Spirit, blesses material ways and means and provides them for His children? Would not such contention be equivalent to saying that God never endowed man with any capacity or ability to comprehend

Copyright, 1909, by Mary Baker Eddy.

Digitized by Google

or to keep in touch with his creator? Is there anything in the teachings of the Bible to encourage the supposition that Spirit and matter are on friendly terms? Would any true Christian claim that the five physical senses, so called, can acquaint man with God's spiritual ways and means? Is a knowledge of matter or evil the connecting link between God and man? Do good and evil blend in cause or effect, and is God inert, powerless, and matter the only actor? Are drugging and manipulation means of grace?

Some day humanity will awake to realize that it is the "serpent" of material sense, *alias* the "carnal mind," that has suggested to them the superiority of matter over Spirit; that has caused them to turn away from the only living and true God of Christ Jesus to one which has neither Principle, law, truth, life, nor intelligence. Matter, being but the resultant of erroneous thought, even according to the admissions of the material scientists, is neither active nor causative, and cannot do anything. With the advance of spiritualized thought the time is coming when honest thinkers will see that to those who refuse scientific treatment,—such as the Master employed and urged upon all his followers,—it might be legitimately said, "You have dismally failed to do anything for your patient; he has been allowed to die without proper treatment, and you will be held accountable before the court of advancing spiritual thought for criminal neglect."

Let the humanitarian ponder this subject, let him look it squarely in the face, and see if he is accomplishing the greatest possible good for his fellow-man by clinging to and advocating the use of so-called material means,—that which obscures the nature, essence, and activity of spiritual power. If he is seeking first the spiritual kingdom, he must soon learn that good alone has power to act,—to do something; and that Spirit was never in partnership with matter, nor made manifest through the use of material means. Let him look deeply into Christian Science, and he will be able to "prove what is that good, and acceptable, and perfect, will of God." Only as he learns to work as God works, can it be truthfully said that he is really doing something for the good of humanity.

CROSS AND CROWN.

BERT A. MILLER.

THE Master said, "He that taketh not his cross, and followeth after me, is not worthy of me." We may well ask ourselves whether we are doing this by living lives of goodness and thinking thoughts of love. In taking up the cross we must be willing to cut off the right hand and pluck out the right eye, to cast out of thought all envy, jealousy, malice, prejudice,—everything that "loveth or maketh a lie." This duty is not difficult when we know that God works with us, and that we are never tempted more than we are able to bear; that with the temptation comes a sure way of escape,—the understanding to demonstrate over the error,—be it sickness or sin.

Jesus' constant endeavor was to do "the will of the Father," and the Father's will was that "every one which seeth the Son, and believeth on him, may have everlasting life." He came preaching the gospel and healing all manner of diseases among the people,—freeing them from the bondage of sin and suffering. This great teacher and healer said, "If the Son therefore shall make you free, ye shall be free indeed." Discords resulting from disease are gladly given up, but not so with sins, especially those which have been made bosom companions for years, and which are believed to give a sense of pleasure and satisfaction. They are only given up and overcome by a mighty struggle with self; but this is a battle which must be fought and a victory won, before we can receive the blessing or wear the crown.

This, to sense, may seem to be a cross, but after the victory over self is won, there comes into our consciousness that joy and peace of which the world knows nothing. We may think we are willing to take up the cross and follow in the footsteps of the blessed Master, but it requires more than simply a willingness and desire to do so. We have perhaps for years been so associated with others, our environment has been such, that we have unconsciously accepted beliefs which are not really our own; we have simply acquiesced in many things, been mesmerized with the surroundings and have drifted with the tide. When the command comes to us to take up the cross and follow Christ, Truth, the following leads in an entirely opposite direction from the one in which we have been going, and when we come to put our uplifted desires into actual practice it requires an effort much greater than we had anticipated, for we are now pulling against the current, battling with sense and self; but if we have sufficient faith in God, are depending on divine Love to sustain and aid us in the conflict, we are sure to win, and there is nothing to compare with such a victory.

The apostle James says, "Blessed is the man that endureth temptation: for when he is tried, he shall receive the crown of life, which the Lord hath promised to them that love him." If buffeted about, ridiculed and pierced by false pride, even tempted to give up the struggle, we should remember that our Wayshower suffered greater persecutions and bore the cross for us that it might be possible for all to receive the crown for service faithfully performed and sin and disease overcome. On page 22 of our text-book, "Science and Health with Key to the Scriptures," Mrs. Eddy writes, "If your endeavors are beset by fearful odds, and you receive no present reward, go not back to error, nor become a sluggard in the race." And again, on page 254, "If you launch your bark upon the ever-agitated but healthful waters of truth, you will encounter storms. Your good will be evil spoken of. This is the cross. Take it up and bear it, for through it you win and wear the crown."

When tempted to give up the struggle, we may well think of her who, though persecuted and maligned all these years, by the enemies of Truth, has been tender, loving, and true, returning blessing for cursing and always admonishing us to love our enemies, to have charity and long-suffering for others' shortcomings. Her crown of rejoicing will surely shine forth as the stars in the firmament of heaven, and may we be as worthy to receive the blessed assurance, "Well done, thou good and faithful servant: . . . enter thou into the joy of thy lord."

THE SPIRITUAL ARTIST.

MARY L. DUDLEY.

IT is generally recognized that one who has skill in practising the arts and in applying their laws is an artist. He not only appreciates the beautiful, but gives it expression beyond the adverse decision of critics. The artist's production approaches perfection in the degree that it is true, true to the standard required by the laws of art. It was unnecessary for Giotto to do more than to draw with one stroke the perfect circle, to win his appointment in the great work of adorning St. Peter's cathedral. Not what he knew about drawing a circle, but his consummate ability to prove his knowledge was what gave the master stroke.

Mrs. Eddy says, "Beauty is a thing of life, which dwells forever in the eternal Mind and reflects the charms of His goodness in expression, form, outline, and color" (Science and Health, p. 247). In this we see the source of the inspiring lines of Keats in his "Ode to a Grecian Urn":

Digitized by Google

Beauty is truth, truth beauty,—that is all
Ye know on earth, and all ye need to know.

Accepting this, what may we say of him who devotes himself to the Cause of Truth, which unfolds true beauty, and who gives evidence of skill in applying its laws? May not he, too, be properly styled an artist?

What evidences are there of such skill? Here is a fellow-man who is manifesting discord; he is weak, restless, racked with pain, sleepless, despairing. There comes to him one skilled in applying the laws of Truth—a spiritually minded craftsman. What takes place? The discordant conditions vanish; the weak one becomes strong; ease and peace now prevail, instead of pain and unrest; despair changes to hope and courage; complaints and moans to gratitude and praise. Surely, health, vigor, normal activity—these are something to defy the critic's sneer, these must win the approval of those who seek a manifestation of the power of Truth.

There has been given us a standard by which to measure all effort. He who was (and is) "the way, the truth, and the life," has supplied the standard, and in the degree that one approaches the perfection of this standard—the Mind which was also in Christ Jesus—to that degree he attains the rank of superiority. And shall not such a master, who may, like Giotto, prove by one loving touch his command of Truth's laws, be regarded as a true artist?

REGARDING TESTIMONIES.

AUGUSTA REINSTEIN.

We often hear it said by Christian Scientists that while they are deeply grateful for benefits and blessings received, fear keeps them from so testifying at the Wednesday evening meetings. A little analysis will show that there is no reason for this condition of thought, and perhaps my own experience and method of procedure may be of some little assistance and encouragement. The great Teacher constantly sounded the key-note of harmony, saying, "Be not afraid;" while Paul writes, "For God hath not given us the spirit of fear; but of power, and of love, and of a sound mind;" and in Isaiah we are admonished: "Fear thou not; for I am with thee: be not dismayed; for I am thy God: I will strengthen thee; yea, I will help thee; yea, I will uphold thee with the right hand of my righteousness." We should fear only to do wrong.

We would consider ourselves lacking at least in good manners did we fail to acknowledge, by either spoken or written word, any gift or kindness. Then should we not be more rather than less gracious to the Giver of all gifts —to Him who gives our daily bread and what we need for all days? The knowledge that we are doing right should sustain us. It can never be difficult to do right. It can only be difficult, both before and after, to do wrong.

To prove to those who are fearful that the first attempt may not be easy, I will say that before my first experience I was able to eat but little dinner, and that when I reached the church I was greatly perturbed; but once upon the floor, a great calm descended upon me. I was conscious only of a desire to voice the truth, and in doing this we can always be sure of the guidance of God and the helpful thought of every earnest Scientist present.

Mrs. Eddy tells us that "we are all capable of more than we do;" and she also says, "A just acknowledgment of Truth and of what it has done for us is an effective help. If pride, superstition, or any error prevents the honest recognition of benefits received, this will be a hindrance to the recovery of the sick and the success of the student" (Science and Health, pp. 89, 372). If not manifesting perfect harmony at the time of testifying, I have found that in doing my duty and thus helping others, harmony has invariably and immediately been restored. I have always believed myself possessed of a lively sense of gratitude, but now I realize that I am not and never can be sufficiently grateful for the manifold blessings bestowed upon me, for gratitude calls for much more than its verbal utterance.

Hardly less imperative than the giving of testimony is the care to deliver it in a voice that can be heard distinctly. The failure to do this is certainly due to a lack of consideration for others. An article published in the *Sentinel* advised our giving some preparation to our testimonies. This meets my views as to the best way of doing good. In the giving of testimonies great care should be taken to have every thought scientifically correct, and to gain time to inquire about any uncertain thought, even if it be weeks and sometimes months before the testimony is delivered. While we are all one family, the true selfhood of each is an individual idea of God and expresses that individuality in his own way. I doubt not that the more advanced Scientists are spiritually impelled to testify without any previous preparation of this kind.

While one may be waiting for the (to him) most vital demonstration to be made, he may be able to give much help to others by voicing other experiences. This help should not be delayed, for many weary and thirsty ones come to our services—needing perhaps the words that we of all others can give, and our Leader bids us "give them a cup of cold water in Christ's name, and never fear the consequences" (Science and Health, p. 570).

THE TRUE AND THE COUNTERFEIT.

CHARLES GRANT MILLER.

It is a common belief of mortal mind that we realize joy only by contrast with sorrow, that we recognize health only through sickness, and that we know good only because of unfortunate experiences in evil. If this theory were true, then sorrow, sickness, and other evils would not be evils at all, but real, necessary, and therefore right—an impossible hypothesis. But the theory is not true. It is not even partially nor relatively true. It is the exact opposite of the truth. Mrs. Eddy tells us, on page 337 of Science and Health, "The visible universe and material man are the poor counterfeits of the invisible universe and spiritual man. Eternal things (verities) are God's thoughts as they exist in the spiritual realm of the real."

The president of a bank, when asked by a young clerk how he could learn to distinguish the bad bills from the good ones, said, "Get familiar with the good bills and you will recognize the bad ones at sight." Here is a volume of wise admonition summed up in a single sentence. This homely, pointed advice applies not only to the detection of counterfeit money, but with equal force to the detection of the counterfeit and false in all departments of life. The man who is accustomed to handling good corn, good wheat, good potatoes, has no difficulty in detecting the faulty. The skilful egg-handler passes the eggs before the light with a rhythmic rapidity that is amazing, and yet an imperfect egg instantly breaks his routine; so also to a trained musician, a false note comes like a stab of pain. In a word, whatever his occupation, he who is fully engaged in doing the right thing will have no difficulty in recognizing the wrong, since right and wrong present an absolute unlikeness or contrast. He who is most accustomed to the light cannot fail to recognize the difference between light and darkness. He also finds that light is needed in order to estimate anything aright.

There is only one way to guard against the bad, the imperfect, the untrue, and that is by knowing the good, the perfect, the true, and keeping it constantly in thought, even as Moses admonished the children of Israel: "When thou sittest in thine house, and when thou walkest by the way, and when thou liest down, and when thou risest up."

THE HARVEST AND THE LABORERS.

LILLIAN EDEN.

IDLENESS is impossible to the earnest student of Christian Science. To those who are working in the truth and for the truth, there is no hurrying nor lack of time, neither is there any time to waste in dreaming. There is work for us all. In the ninth chapter of Matthew we read that Jesus said to his disciples: "The harvest truly is plenteous, but the laborers are few;" and so it is today. The harvest is unlimited; the laborers realize this, and work on; but we must all realize it.

We cannot be content to sit back and say, "Christian Science has healed me; I am so glad I have found the truth; it is very beautiful;" nor to be satisfied to attend church regularly, recommend Christian Science to sick friends, and declare ourselves Scientists. We are not Christian Scientists merely because we believe Christian Science. It is necessary for us to understand it, and to be followers of Christ. We do not follow Christ by merely believing on him, nor can we truly love God without expressing that love, not alone by words, but by works. It is not fair to the laborers that we should reap the harvest without doing our share of the work, and it is not fair to the Cause of Christian Science that we should seek the truth merely for the help and protection which it offers.

Moreover, it is not fair to ourselves that we should continue to depend upon others to help us, instead of learning to do our own work and meet our own problems. When we have learned to do this, we are prepared to help others, and may follow Christ by joining the band of laborers in the Father's vineyard. So long as we work faithfully, always realizing that divine Love is the only power, we cannot fail, for we have the Master's assurance: "The harvest truly is plenteous."

PROTECTION.

EVELINE ARCHER.

IT is joy to express our deep gratitude for what Christian Science has done for us, and for the warmth, the strength, with which it clothes us each day. In our human experiences the thought of the psalmist, "He shall cover thee with his feathers," is such a protection, drawing us ever into closer communion with enfolding Love.

The old crusaders said, "It is the will of God," and this firm belief vitalized their efforts. As Christian Scientists we can joyously say, "*Deus vult*," as we learn to achieve victories over the household tyrants—sickness, sin, and death—through the Science of Life. Safe under His wings, we can travel hopefully and gain a victory every day. Tenderly do I thank our beloved Leader, who has taught us how we may rest in action, under the cover of His wings.

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be Nov. 5, 1909. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Oct. 20, 1909.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June, 1909, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk*,
Falmouth, Norway, and St. Paul streets, Boston, Mass.

SELECTED ARTICLES.

[Alfred Farlow in *Great Falls* (Mont.) *Tribune*.]

According to a report which appeared in a recent issue of the *Tribune*, a paper read before the Montana federation of women's clubs advocated compulsory medical examination of all children who are permitted to attend public or private schools, as a means of caring for defective and diseased children and safeguarding the health of the community.

The important question is, What is the real cause of the disease which is to be detected and overcome? It should, be noted that at this particular period there exists a great diversity of opinion on this subject, not only with the various classes who believe in non-drugging systems, but with the medical fraternity as to the real nature of disease and the proper method of handling it. For this reason, to place the regulation of the health of children under government control would meet with objections from many classes, for the reason that the physician appointed to make the examination would necessarily be from some particular medical school, not acceptable to all classes. This would tend to force upon the community at large some particular system which is not representative thereof, and which would therefore amount to an intrusion upon individual privilege.

It may be said, so far as this point is concerned, that the examination by one school of physicians is likely to be in accord with that of other schools, but there is more to be considered than the mere physical condition and environment of the child in connection with his troubles. The mental condition may be far more responsible for the physical defects of a child than anything else, and physical examinations are not likely to disclose such causes. On the contrary, we think it is safe to say that in many instances they might add to the trouble by fostering unnecessary apprehensions. I am of the opinion that we should experiment first by improving the spiritual conditions of the children, teaching them purity of consciousness and conduct as a means of health and strength.

Children of tender years should be kept away, as far as possible, from the contemplation of disease. It has been demonstrated that those children who know the least about disease, and who therefore have it least in consciousness, are likely to be more healthy in body. To subject children in the public school to medical examination by school physicians begets in them a fear of having disease detected on their persons and in consequence being subject to expulsion. It compels the children to live too much in the contemplation of disease. It induces avoidable fear and dread of disease, and all physicians admit that fear is, to say the least, one of the prime instigators of disease.

The minds of children should be filled with those things that lift them above the contemplation of sickness and vice. It is quite as proper that young children in the schools should be left free from the minute analysis and discussion of disease as it is that their minds should be free from such thoughts as they get from reading "yellow" literature. I believe that the practice of subjecting children to those measures which create a dread of disease should be kept out of the public schools, and the parents should be permitted to make their own choice of a physician who shall examine their children. I see no reason why a teacher should not be permitted to report to parents any defect or disorder, whether physical or mental, that may be sufficiently pronounced as to be noticeable.

But while the proposition of the unlimited and universal examination of children may for some reasons be a good thing, I am of the opinion that the objections are sufficiently overwhelming to render the proposition undesirable. Physicians disagree widely as to the real nature of dis-

Digitized by Google

eases, especially contagious diseases. Some declare that contagious diseases are occasioned by malignant germs, while others affirm that the germs are scavengers of malignant disease, and the opinion as to how and why disease is communicable is somewhat varied, so that there is danger at this experimental period of overlooking the real trouble which needs to be removed and taking those steps which are more harmful than remedial.

If we commence any movement toward the compulsory treatment of disease, there is no telling where we shall end. It seems to me there are at least two things which may be considered sufficiently individual not to be tampered with by the public; that is, freedom of choice of religion and freedom of choice of medicine.

[R. Stanhope Easterday in *Vincennes* (Ind.) *Capitol.*]

In an attempt to "discriminate" between the true and the false in Christian Science teaching, our critic among other statements makes this: "Christian Science has exalted the [human] mind-power to the throne of absolute rulership over the states and conditions of the body." If this were true the basic teaching of Christian Science would be little short of the exercise of will-power or self-mesmerism. Inasmuch, however, as it is conceded even by our critic that by such superficial process of "imagination" a genuine case of organic or functional disease was never healed, and whereas practically every known form of ailment has been healed through Christian Science, it is quite evident that our brother errs in his original premise as to genuine Christian Science teaching and practice, in consequence whereof all his deductions are erroneous.

For instance, nothing could be farther from a correct view than the gentleman's conception that from the Christian Science standpoint "sickness is just an imagination." It is not recorded in the New Testament that Jesus ever said to the sick and the afflicted, "You only think you are sick." When on the other hand one afflicted with loathsome leprosy made the pathetic appeal, "Lord, if thou wilt, thou canst make me clean," our Saviour "put forth his hand, and touched him, saying, I will; be thou clean." It would have taken a strong imagination to have enabled one to touch a leper, and our Lord's specific command, "Be thou clean," implied that in the estimation of the Master the poor fellow really needed cleansing. The effort is being made in Christian Science to heal as Jesus healed.

When our critic declares, referring evidently to Christian Science methods, "whatever formulas of thought or life that will help toward this result are to be used," he further evidences the fact that he is unfamiliar with Christian Science methods. It will be recalled that when Jesus was questioned as to how he accomplished his healings, he replied: "My Father worketh hitherto, and I work. . . . The Son can do nothing of himself." Christian Science heals the sick today as they were healed in our Lord's time and for almost three centuries thereafter, by the influence upon human thought of wholesome, uplifting, vivifying, spiritual truth and love, inherent in that Mind "which was also in Christ Jesus." Human will has no part in the process, imagination is not a factor, the human mind is not taken into account, and mesmerism and hypnotism, the despotic control of one finite, erring human mind over another, is not resorted to. When our Lord's disciples failed on one occasion to heal a case and asked the Master why, he significantly replied, "This kind goeth not out but by prayer and fasting." The Christian Scientist finds that morality rather than intellectuality conduces to healing. The dictum of Scripture is, "Take no thought for the body," but "Ye shall know the truth, and the truth shall make you free." A knowledge of the truth means an approximation to rightness, or righteousness, and it is to the righteous that promise of peace and long life comes.

Christian Scientists do not claim that they have "discovered a new truth." They claim that Mrs. Eddy discovered the art of primitive, apostolic, spiritual healing as practised by Jesus and the early church. While it is readily to be conceded that "a merry heart doeth good like a medicine," and that ancient and modern philosophers touch upon the truths exemplified so forcefully in our Lord's ministry, still it goes without saying that with all this known, neither physicians nor philosophers of this or of bygone ages have coped successfully with disease as did Jesus, and it is simply blasphemous to intimate that Jesus performed his remarkable healings through the influence of hilarity or hypnotism.

[Frederick Dixon in *Medical Press*, London.]

Science and Health is published at a price which is not in the least extravagant, and I have never known a single person who has not been able to obtain it without difficulty. The critic suggests that the price of the book is kept up for mercenary purposes. Only last week a correspondent wrote objecting that he could not obtain a copy of Science and Health in a foreign language, and asking why its circulation was prohibited by a refusal to have it translated into foreign languages. If the aim of the publishers of Science and Health is to make money out of it, imagine the enormous amount of revenue they are cutting off by refusing to have it translated into other languages; and, in precisely the same way, if their object is to make money, how could they make money better than by flooding the world with cheap editions? Furthermore, there is attached to every Christian Science church a free circulating library, from which any one who is interested in Science and Health can borrow it for nothing. I am not aware that the publishers of Farrar's "Life of Christ," or Renan's "Life of Jesus,"—to take the two examples selected by the critic himself,—ever opened their doors to the public and said, "You can come and borrow these books for nothing, and read them, and afterward buy them or not, as you may desire." It should be perfectly possible to differ absolutely from your neighbor, without it being necessary to impute either ignorance, fraud, or greed.

[*Blackpool Times and Fylde Observer*, England.]

The Rev. C. M. Shaw, pastor of the United Methodist church, Springfield road, Blackpool, has resigned his position, and the resignation has been accepted by Conference with great regret. The Conference committee did their best to persuade Mr. Shaw to continue as a minister of the church, but he replied that his mind was made up, and he thought it better to decide at once. The resignation has already taken effect, and Mr. Shaw will not again occupy the pulpit at Springfield road. The wrench is a sudden one, and will be keenly felt by the congregation. Mr. Shaw has only been in Blackpool twelve months, but during that time he has made strong attachments, and has won high esteem as a thoughtful, scholarly preacher and a kindly pastor.

The reason for resignation is that Mr. Shaw has been converted to Christian Science, and his religious views have undergone such a change that he could no longer subscribe to the tenets of the United Methodist church. Last night Mr. Shaw granted a brief interview to a representative of the *Blackpool Times*, after a twelve-hour journey from Plymouth, where he met the Conference. He did not wish to say more at present than that he had resigned, and that he had become a Christian Scientist. He pointed out that Christian Science regarded sin and evil differently from the evangelical church, and the vicarious sacrifice was not a part of its doctrine. For some time, he said, he had been deeply impressed by the teachings of Christian Science. There had, of course, been a lot said and written

Digitized by Google

about Christian Science that made it appear ridiculous, but the more one went into it and investigated, the more one was led to see what wonderful truth there is in it. There is no faith so misrepresented, and no leaders of any movement so much maligned.

Mr. Shaw's references to authorities, to the literature of the movement, the criticisms and replies, showed that he has entered very thoroughly into the subject, and he is wholly convinced of the truth of Christian Science. He admitted the difficulty of stating in a few words, in popular language, the position of Christian Science, and preferred not to make any such statement at present. Asked as to his plans for the future, Mr. Shaw said they were a little undecided. Probably he would remain in Blackpool for a while, but he could not say definitely.

Mr. Shaw has been eighteen years in the ministry of the United Methodist church (Methodist New Connexion). He was born at Springfield, near Oldham, on the Yorkshire side of the border. He has been stationed at circuits in the Potteries, Staley-bridge, Batley, and Stockport, prior to coming to Blackpool.

"You have been very happy in Blackpool?" Mr. Shaw was asked.

"My relationships in the church," he replied, "have been excellent, and it is a great sorrow to me to have to part from the church here and the community; I have very many friends among them. It is purely a matter of conviction."

[W. C. Williams in *Baltimore* (Md.) *American*.]

A healing religion based on a fixed Principle is scientific, and the working out and application of such Principle a Science, and as such it must be studied and thoroughly understood before it can be demonstrated to any extent; therefore the term Christian Science is not a misnomer.

Some time the all-in-all of spirituality will be manifested, but Christian Scientists do not claim that this will occur before all material conceptions have been overcome. The mortal mind could not be spirit; if it became spiritual it would be mortal no longer, but immortal, and would have no material concepts. Christian Science teaches that the working out of our own salvation, the regeneration of our thoughts, the reflection and expression of divine Mind, is necessary before immortality and absolute spirituality are attainable.

[Editorial in *Galesburg* (Ill.) *Mail*.]

The increasing tolerance in which people of one form of religious belief hold those of other beliefs is one proof of the world's betterment. Bitter religious warfare is a thing of the past, and rightly belongs to the dark ages. President Taft, in an address at the Champlain celebration, made the following utterance:—

"I think we are reaching a point in this country where we are very much more tolerant of everything and everybody than in the past, and where we are giving justice where justice ought to be given. We are no longer cherishing these narrow prejudices that come from denominational bigotry, and we are able to recognize in the past these great heroes in religion and Christian faith and appreciate the virtues that they exhibited and follow the examples that have been set for us."

One of the growing organizations in this country is the Christian Science church, and the attitude of the press and public toward Christian Scientists has undergone a remarkable change in the past ten years. In common with other faiths, the early days of Christian Science were filled with troubles. Followers of Mrs. Eddy have been scoffed at and reviled. They have been persecuted, and have grown stronger under persecution. Violent abuse, scathing criticism, withering satire, misdirected wit, have been hurled at Christian Scientists, and in spite of it all the organization has grown with a rapidity that has enthused its followers and confused its detractors.

We do not profess attachment to the teachings of Christian Science, but we are alive to the fact that there is a vitality to the movement that challenges the attention of every thoughtful man. In today's *Mail* we give a large space to "Medical Explanations of Christian Science Cures." The article is taken from the *Arena*. It should be read not only by Christian Scientists, but by every person who wishes to keep well informed in regard to the development of the world's thought.

[Charles K. Skinner in *Battle Creek* (Mich.) *Daily Moon*.]

Readers of the Christian Science text-book, Science and Health, whether Christian Scientists or not, who read the book carefully from the view-point of Mrs. Eddy, viz., that of the spiritual man and universe, must certainly be much amused at Dr. ——'s persistent belaboring of his man of straw in his recent lecture. The declaration that "Christian Science is neither Christian nor scientific," was doubtless intended to be the "big stick" to frighten the hearers, should they care to indulge in the fallacy of thinking for themselves, but the fact is that this particular saying has been refuted so often that even the opponents of Christian Science fail to see anything in it. Time was when certain of the clergy and medical people,—not all,—fearing a depletion in the ranks of their membership and patients, resorted to this assertion to keep them in line. The result, however, has been so disastrous, owing to the thousands of men and women who stubbornly insist on finding health and peace, even at the expense of leaving pastor and physician, that few are now rash enough to indulge in this kind of criticism.

This critic tells us that "the fundamental error upon which Christian Science is founded, is that it claims that sin does not exist." In the Christian Science text-book, Science and Health, page 37, we find this: "Does not Science show that sin brings suffering as much today as yesterday? They who sin must suffer." Page 405: "If sin is not regretted and is not lessening, then it is hastening on to physical and moral doom." Many similar statements appear in all of Mrs. Eddy's writings, showing that assertions like those of this critic are from inexcusable carelessness, to speak mildly. When facts are known, public opinion is a rigid censor.

On the other hand, Christian Science does teach that sin and sickness are both unreal to God and to the spiritual man, because God created all that was made, according to the Scriptures, and it is stated that "God saw every thing that he had made, and, behold, it was very good." Consequently, sin and sickness must either be good and to be desired, and the clergy and doctors are defying God in their attempt to destroy them; or else, not being His creations, they are unreal and can be destroyed by His power. This was Christ's teaching when he said, "I am not come to destroy, but to fulfil." This understanding enabled him to say to the paralytic, "Stretch forth thine hand," and it was done.

Our brother tells his hearers confidentially that, contrary to Christian Science, "God is the healer, and the only healer." This is encouraging. No one believes this truth or teaches it more insistently than Mrs. Eddy and her followers. Had the doctor quoted the entire context of statements used, he would have known that Mrs. Eddy claimed nothing of herself, except as an instrument in the hands of God, even as Jesus said, "I can of mine own self do nothing." We are certainly most grateful to our critic for the wee bit of credit he is inclined to grant to Christian Science—"for the faith it gives some people."

Digitized by Google

[Jesse Pickard in *New York* (N. Y.) *People.*]

As a matter of fact, the wage-earner is well represented in the ranks of Christian Scientists. It will be found upon investigation that thousands of individuals have proved the efficacy of Christian Science to lift them out of the very depths of want as well as to heal them of every kind of physical and moral disease. If Christian Science relied upon the activity of the human mind, our critic might be more correct in his statement that it did not heal that baneful disease, poverty; but because Christian Science is above all a religion, and relies upon the divine Mind to meet all needs, it can and does meet and heal this condition. Christian Science, as its name indicates, presents to the world accurate, demonstrable Christian knowledge, based upon one infinite Principle, the divine Mind, God, and the correct application of its rules is followed by positive results that prove the truth of its promise. It is therefore available to all men alike.

As to the statement that Christian Science disregards the play of social forces and overlooks dangers of personal contact, let me say that Christian Science demonstrates the privileges of man as an intelligent individual not only to be uninfluenced by social evils, but to be a positive influence for the overcoming of these evils through individual right thinking, whereby he reflects the eternal power of absolute Truth.

Our critic does not rightfully assume that Christian Scientists look with "disdain" or "contempt" on his belief. It is not reasonable to think that those who have once experienced every form of human suffering would thus regard any honest endeavor to combat these evils, or that because they have finally found relief therefrom they must be deficient in their understanding of these problems. On the contrary, they understand and sympathize the more deeply, and earnestly recommend the mode of escape which has proved efficacious for them.

[M. S. Bruen in *Dublin* (Ire.) *Mail.*]

A man's religion is his most sacred possession. True religion is truly scientific because it deals with everlasting facts. It is the link between this world and the next. When looked at in this light, we see that students of scientific Christianity—Christian Scientists—cannot be elbowing or injuring others, for they are practising what they have found to be true; and if it is true, it must be good for all mankind. The results of their efforts as seen in the healing of sickness and the removal of other ills are a proof to them that the law they obey is right. The Supreme Being is Spirit, one, indivisible, and good. The great scientific fact is the presence of God, good. Civilization cannot prevent, solitude cannot give, the knowledge of this truth. The important business of life is to love God supremely, and one's neighbor as one's self. Even a halting attempt to keep to this standard is found to have very healthful and happy effects. It leaves no room for the worship or fear of evil, the supposititious opposite of good, in any shape or form.

It is a great aid to the perpetuation of youth to learn to feel young, however long we may have lived, because the body expresses the habitual feeling, habitual thought. Nothing in the world will make us look young as long as we are convinced that we are aging. Nothing else more effectually retards age than keeping in mind the bright, cheerful, optimistic, hopeful, buoyant picture of youth in all its splendid magnificence; the alluring picture of the glories which belong to youth—youthful dreams, ideals, hopes, and all the qualities which belong to young life.

Success Magazine.

AMONG THE CHURCHES.

FRUITVALE, CAL.

First Church of Christ, Scientist, has been holding its regular Sunday morning and Wednesday evening meetings in Masonic Hall, Fruitvale, but is finding the accommodations restricted for the growing congregation. It has been arranged that the church shall secure a large assembly-room in the new Masonic Building, which is rapidly approaching completion, and the hope is entertained that before long the Scientists will erect their own church.

San Francisco Chronicle.

TELLURIDE, COL.

The Christian Science church on North Pine street has been in the hands of carpenters for some time while the edifice was being enlarged. While the work contemplated has not been entirely completed, the church is ready for use, the other improvements being postponed till fall. With the enlargement the assembly-room will seat one hundred and fifty very comfortably, though many more could be accommodated by crowding.—*Telluride Journal.*

WATERTOWN, N. Y.

Announcement was made at the morning service of the Christian Science church yesterday [July 18] of the purchase of the larger part of the Dr. E. C. White property on Park street for the building of a church edifice. The purchase price was ten thousand five hundred dollars. The frontage is one hundred and seventy-seven feet and the depth ninety-eight feet. At the present time there are no definite plans for the construction of a church on the property. The services of the Christian Science society have been held for some time in the Lansing Block on State street.—*Watertown Standard.*

SACRAMENTO, CAL.

Plans and specifications are nearly complete for the new Christian Science church, which is to be erected on the society's property on Twenty-third street at a cost of between twenty-five and thirty thousand dollars. Work will be commenced on the church as soon as the plans are approved by the building committee. The church will be constructed of reinforced concrete, and will have a seating capacity of five hundred persons.—*Sacramento Union.*

BALTIMORE, MD.

The architects have completed drawings for the erection of a handsome edifice for Second Church of Christ, Scientist, at Mount Royal avenue and St. Paul street. The church, which will be one of the most beautiful buildings in point of architecture in the city, will be only one story high. It will front on Mount Royal avenue ninety-six feet and extend along St. Paul street ninety-seven feet. The cost for construction alone will be about $225,000. The building will be of Grecian type, of artistically carved marble and granite, with reinforced concrete foundation and terra cotta roofing. The façade will be of granite and onyx, and the entrance will be on the Mount Royal avenue side.—*Baltimore News.*

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

"BE NOT AFRAID."

THE urgent need of Christian Scientists is to make practical use of the teachings of their text-book, Science and Health, and as a first step in this direction they should turn to page 410 of this book and read and ponder Mrs. Eddy's words, "Christian scientific practice begins with Christ's key-note of harmony, 'Be not afraid!'" then to page 192, where they will find the statement, "Evil is not power." To be afraid, or to give power to evil, is to admit that there is a creator apart from God, good, an admission which in effect denies that first and fundamental plank of Christianity, "Thou shalt have no other gods before me."

Elsewhere in Science and Health Mrs. Eddy makes many statements of similar nature, notably the one on page 454, where she writes, "The understanding, even in a degree, of the divine All-power destroys fear, and plants the feet in the true path,—the path which leads to the house built without hands 'eternal in the heavens.' Human hate has no legitimate mandate and no kingdom. Love is enthroned. That evil or matter has neither intelligence nor power, is the doctrine of absolute Christian Science, and this is the great truth which strips all disguise from error." Again, on page 469, she says, "Evil can have no place, where all space is filled with God."

It is from such statements as these that Christian Scientists have been able to draw the courage and inspiration which has enabled them to meet practically every phase of evil without flinching. The understanding that God is omnipotent does not tolerate a belief that there is another power called evil, nor does it tolerate a fear of that which it knows does not exist.

In order to be consistent, Christian Scientists must know that no harm can come to them if they "do right and fear not," and if they know this they will have no fear. Mrs. Eddy, on page 442 of the text-book, lays special emphasis on the importance of this duty, and if we heed her admonition we shall know that neither person, place, nor thing can harm the Christian Scientist who is "clad in the panoply of Love," and is faithfully following Christ. Every student of the text-book who has absorbed even the smallest grain of Christian Science has obtained enough understanding to free himself from fear, and it is his duty and his privilege to assert his God-given right to freedom from every belief of mortal mind which would enslave him.

The psalmist said, "Yea, though I walk through the valley of the shadow of death, I will fear no evil: for thou art with me." He had that assurance in the protecting power of divine Love to which the apostle referred when he said, "There is no fear in love; but perfect love casteth out fear;" and Christian Scientists are fortunate in having learned how to make "perfect love" available.

ARCHIBALD MCLELLAN.

"LEARN OF ME."

THE great Teacher invited the weary and heavy laden to come to him and find rest. These had all been carrying heavy burdens,—false beliefs concerning God and man, forms and ceremonies, creeds and dogmas,—with sin, disease, and death in their train, and they were anxiously waiting for the coming of the Messiah who was to bring them relief. Christ Jesus lifted the burden from many weary ones; but he did more than this, he invited all to come and "learn" of him, and his promise was, "Ye shall find rest unto your souls." In the first instance he gave them, through his healing work, some measure of rest; then he called upon them to learn for themselves the truth by which he did his mighty works, and thus permanent peace and rest were to be theirs.

A great thinker of the present day, who comments upon this invitation of the Master, remarks that "rest" is seldom associated with learning, and most people would agree with him that this is true; nay, there are some who might even go as far as did Festus when he said to Paul, "Much learning doth make thee mad." Not so, however, with the one who learns of Christ. He who does this must show the results of his tutelage by doing somewhat as his teacher would do. Jesus evidently expected this, and no less, for Luke tells us that he said, "Every one that is perfect shall be as his master;" and perfection was the goal toward which he continually directed thought and aspiration.

As we glance over the history of the last nineteen hundred years we are compelled to admit that few indeed have heeded or understood the gracious invitation, "Learn of me," for there is too much unrest, too much sin and misery in human experience, too much that points to quite another teaching than that of the meek and mighty Nazarene. His own disciples, those who had learned of him, healed the sick and sinful as he did. Paul was not a disciple of Jesus, yet he learned of Christ, and by so doing he, too, carried on the same healing work as the disciples; and though his life outwardly was one of incessant toil, he must have known the rest of ever renewed strength to have accomplished all that he did. Our text-book tells us that "God rests in action" (p. 519), and as we learn of Christ, Truth, we reflect God and rest in doing His will.

Jesus once spoke of the mental state which was ever seeking rest and finding none, but this could never be true of any one who sought aright, for Jesus himself said, "He that seeketh findeth." The tendency of the human mind seems to be to seek wisdom from mortals rather than to gain it by learning of Christ. It is true that we are bidden to help each other, but when we "undo the heavy burdens" (to quote Isaiah), we should constantly direct the needy to the living truth which Christ Jesus said makes free indeed, and which he promised should come in its divine fulness as "the Spirit of truth," whose holy ministry is blessing this age in Christian Science.

In the parable of the rich man and Lazarus, the former pleads that Lazarus be sent to warn his five brethren, so that they may escape his torments; but Abraham responds, "They have Moses and the prophets; let them hear them." In this statement Jesus directed thought away from personality to Principle, and today the eternal Christ speaks to us through Moses and the prophets, through the words and works of Jesus and his apostles, through Science and Health and the other works of our revered Leader,—through every declaration that clearly separates between Spirit and matter, truth and error, and thus heals, saves, purifies, and uplifts. Today, more clearly than ever, is heard the call, "Learn of me; . . . and ye shall find rest unto your souls."

ANNIE M. KNOTT.

SELECTIVE LIVING.

THE truly Christian life may be defined as a continuity of right choices, the persistent reelection of the true, the beautiful, and the good to rule over us. The ideal is thus kept ever present, the ethical imperative is ever obeyed, and life is lived on the heights every day. With this position and perspective one learns to divine the deeper significance of every least determination, while the relation of his faithfulness "over a few things" to his rule "over many things" begins to be demonstrated. There is thus brought to unnumbered little choices the moral quality of a great decision, and the reflex stimulus to character becomes that of a stand for right in some momentous crisis, and for the reason that each choice is now a choice for God.

With the average person the passing impulse, which is ordinarily two thirds selfish, or some unaccounted for like or dislike, settles the question what he shall do or say with respect to unnumbered every-day affairs. Many of these decisions may have no more moral quality than the question as to what he will have for dessert. Many others, however, and especially those which have to do with personality or with sense gratification, give place for motive, though the matters concerned may seem relatively trivial; and in every such instance selfishness or unselfishness, largeness or littleness of nature, good or evil, will add to its stature in him, by forming his choice and thus ruling over him.

In the midst of social and business life, all who are not stupidly indifferent or deliberately adrift find themselves ever at the parting of the ways. Their success and happiness, or their defeat and distress, lie just beyond, and the history of human stumbling presents no more pitiful fact than the regret and self-condemnation for some overwhelming loss which has resulted in the failure at a given time to stand for an ideal which was clearly seen but reckoned too unimportant to be given the scepter. Nevertheless, the heartache of many such experiences often seems necessary before men are willing to learn that spiritual growth is a matter not only of sensitiveness to the divine in the detail of experience, but of loyalty to God in these little things.

It is apparent that the effort to live in this selective way, though ever so sincere and continuous, must prove wholly unsatisfying and unsuccessful if it is not intelligent. Things must be looked at in a broad way, discrimination must be made between essentials and non-essentials, and the necessity of a choice of the lesser of two evils must often be recognized. Mrs. Eddy has frequently called attention to the unwisdom of trying to meet the demands of absolute Science, whether or no, and has counseled Christian Scientists to be reserved about undertaking that which lies beyond their present spiritual realization. They are "to abandon so fast as practical the material" (Science and Health, p. 254), and thus come into the fulness of their freedom and efficiency not perforce, but through the unfoldment of truth in consciousness. Selective living thus calls for the determination both of what is right and what is possible under present conditions. We need to know not only what pertains to absolute Science, but what pertains to human sense at a given stage of its advancement; and it is here that the inconsiderate and enthusiastic are likely to merit the name "crank," and become a disability to the cause they honestly desire to serve.

The initial choice of selective living is always made in the realm of thought, and hence the significance of our Leader's counsel to "stand porter" (Science and Health, p. 392) at its door. So long as any hospitality is given to the unideal within, so long will the tempting voices without be given a hearing. When, however, through patient effort the courts of consciousness are made inaccessible to every unholy thought, the seductions of objective evil will have lost their charm, and the true freedom of right choice will have been attained.

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Boston, Mass., Aug. 20, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Never before has the immortal import of your teachings been so clear to me, as in this moment, when death has seemingly touched the life of Mr. Kimball, whose rare understanding has so often overcome sin, disease, and death. Thanks to the truth which you have given us in your writings, we know that he is going on,—healing, teaching, binding up the broken-hearted,—never separated from Life.

I rejoice, dear Leader, in this, that God has given you the "words of eternal life," and I can only repeat that "we believe and are sure" that you are the demonstrator of "the Christ, the Son of the living God;" and if death be "the last enemy that shall be destroyed," yet we can say, "O death, where is thy sting? O grave, where is thy victory?" "Thanks be to God, which giveth us the victory through our Lord Jesus Christ."

Lovingly,
[Countess] FANNY VON MOLTKE.

Swansea, South Wales, Great Britain, July 21, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—About two years ago, a few of your loving followers commenced to hold regular weekly services in a small room in this town; a few weeks later they moved to a larger room, and in less than six months rented a private house with suitable accommodations for services and a reading-room. Today, with hearts filled with gratitude to God, and in the knowledge that our joy will be shared by you, our dear Leader, we hasten to send you the glad tidings of the formation of a Christian Science society in this town, the first to be established in Wales, Great Britain. In doing so we, on behalf of the members of this society, desire to say that we realize with a deep sense of indebtedness the manifold benefits we have received in demonstration of the power of Truth over error through the daily application of the spiritual understanding gained by the study of your inspired book, Science and Health, which is indeed the "Key to the Scriptures."

We feel we can but faintly express in words our heartfelt appreciation of your noble and self-sacrificing life on behalf of suffering humanity, which is such an inspiration and example to all earnest seekers after Truth. We send you this message of love, earnestly praying that we may so grow in grace and spiritual understanding as to manifest more and more of that Mind "which was also in Christ Jesus," and thereby be enabled to realize in daily life that "no wisdom is wise but His wisdom; no truth is true; no love is lovely, no life is Life but the divine; no good is, but the good God bestows" (Science and Health, p. 275).

Your loving and grateful followers,
F. CORY YEO, *President.*
M. EDITH PERKINS, *First Reader.*
ROY F. GOSS, *Second Reader.*
G. H. GALE, *Clerk.*

Glenwood Springs, Col., Aug. 3, 1909.

Dearly Beloved Benefactor:—For twenty years I have been reading your books, but not until I became a Reader in the church service did I begin, as I might say, to comprehend the magnitude of your work. My daily prayer is that I may so see the light that I may be a faithful follower of God and a blessing to all mankind. With a heart full of gratitude for this great soul-remedy which you have discovered, I am

Lovingly yours,
MISS EVA H. TOLMAN.

Omaha, Neb., Aug. 14, 1909.

Beloved Leader:—I have written my testimony, telling how I was healed by reading your book, "Science and Health with Key to the Scriptures," how I was lifted from a helpless condition to one of dominion; but it is my wish also to express my thanks to you, faithful Leader, for the revelation I have obtained in the study of the religion which you advocate, and which you have founded. Words cannot tell the joy, the comfort I have in the spiritual understanding of the Bible.

I know it will please you to hear that I have been faithful in striving to live the truth, and in my efforts to spread your teachings. Although I am a young student of scarcely two years, and have had no teaching but what I find in your works, I have been successful in interesting many people, and each one is being greatly blessed in working out his own salvation, in becoming acquainted with the true and living God. I visited for five weeks my sister in a small town in Nebraska, where Christian Science was practically unknown. I let my light shine, knowing that God would put words of wisdom in my mouth. The result is that twelve persons are studying your book, including my sister and husband. They are all demonstrating to their satisfaction that Christian Science is the truth, as most of them have been in bondage for years, finding no help in material means; but now, thanks to God, and to you for showing the way to a suffering mankind, whereby we are blessed, they are made free from false beliefs by knowing the truth.

God is blessing you, His faithful servant, protecting and sustaining you. I will strive to express my thanks and gratitude to you in reflecting love to all.

Yours lovingly,
MRS. CHARLOTTE J. WHITNEY.

Grand Rapids, Mich., July 23, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader:—It was unanimously voted, at a recent semiannual meeting of First Church of Christ, Scientist, Grand Rapids, Mich., that the members of this church express to you their love and gratitude for the blessings received through the application of the Word, made practical by your own self-sacrificing love, your spiritual understanding and consecration to God. This Christlike example and unswerving adherence to Principle is to us an inspiration to greater humility and zeal in consecrating ourselves anew to the service of redeeming mankind. In this we fully realize that only purity and unselfishness can perceive the deep things of God. Our earnest prayer is that, in loving obedience to our Manual, we may be more watchful, loyal, and faithful, and that we may be ever mindful of our opportunities to work together in unity for the advancement of the Cause we love.

Accept our gratitude for the rich blessings we are continually receiving through your unceasing labor of love for all mankind. Lovingly and loyally,

Yours in truth,
First Church of Christ, Scientist.
(MRS.) ELLA HOFMA, Clerk.

Bristol, England, Aug. 1, 1909.

Dear Leader:—We, the teachers and pupils of this Sunday School, assembled today, send you, across the sea, loving greeting and whole-hearted devotion.

In response to our inquiry we have just heard from headquarters that the new order of service for the Sunday School, as indicated in the Manual, should be followed by all branch churches throughout the field. Our Sunday School was established in 1907, and has grown in great gladness of spirit in proportion as our ranks have been filled with willing little soldiers in your great army. We have loved our little Sunday School monthly testimony meetings and our short addresses each week to the pupils, but obedience to your slightest wish is a loving law with us, and we therefore have at once arranged to discontinue these and to follow strictly the new order of service.

That we shall reap a rich reward in following exactly on the lines you indicate, we have no possible doubt; and we look confidently forward, with great happiness, to that joy unspeakable which awaits all your loyal and obedient students in Christ.

Yours affectionately,
For the teachers and pupils,
CHARLES W. BENNETT, *Superintendent.*
ROWENA SINNOTT, *Assistant Superintendent.*

Chicago, Ill., July 24, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—I do not know that your eye will ever rest on these words, but at best they inadequately express the real thankfulness of an honest heart. I was healed by Christian Science. I thank God each day for the blessings received, and through the silent thoughts of praise to Him are woven the threads of gratitude to you, that through your efforts it was made possible for me to receive such blessings.

With highest personal regards, believe me

Sincerely yours,
A. M. DOWNING.

Seattle, Wash., Aug. 10, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—On reading the *Sentinel* of July 31, especially the editorial entitled "None good but one," my heart swells with gratitude to God that there was found one so pure and unselfed as to be receptive to the spiritual meaning of this grand truth, and with the courage to give it to the world, as expressed through your writings and proved in your daily life. The ages have been striving to worship God through the medium of matter, personality; but you, our beloved Leader, the Discoverer and Founder of Christian Science, have stood firm in obedience to divine Principle, ever pointing to the one God, and His Christ,—the Christ of the Scriptures,—exemplifying in your life the words of the Master, "There is none good but one, that is, God,"—He whom the true worshiper must worship "in spirit and in truth."

Through the study of your writings I am gaining each day a clearer understanding of the Scriptures; that the ever-present Christ, Truth, is the head of the church, and is expressed not in a display of materiality, personality, but in Christly works which redeem mankind from these beliefs.

Lovingly yours,
E. NORA YODER.

New York, N. Y., Aug. 15, 1909.

Dear Mrs. Eddy:—My heart is full of love and gratitude to you for Christian Science, which came to me in an hour of great need, five years ago. The Bible and Science and Health and your other writings have been my constant companions. I rejoice in the spiritual uplifting, for I know that every victory over self brings me nearer God. My daily prayer is for more wisdom, humility, and love. Trusting that I may always be found worthy to be called one of your followers, I am

Lovingly yours,
ELLEN LOUISE LIVOR.

THE LECTURES.

MARION, O.

An audience large in number and appreciation assembled at the Grand to hear Prof. Hermann S. Hering of Concord, N. H., deliver his lecture on Christian Science last evening [June 11] at the Opera House. Professor Hering was introduced by A. F. Howser in the following words:—

We meet here tonight in the one common interest of thinking people, the search for truth. All down through the history of time this instinctive desire of men to know the truth is clearly traceable. The wise men of old, following the star of Bethlehem until it rested over the babe in the manger, were led on by the desire to know the truth. Martin Luther, John Calvin, William Penn, and John Wesley, although each in his turn was opposed and ridiculed, classed with heretics and lunatics, were earnest searchers for the truth. Today we are still searching for truth. Why this search? Why this longing to know the truth? Christ Jesus in his spiritual understanding of all things, both human and divine, made clear to us the reason for this governing desire that leads men's thoughts onward and upward, in these words, "Ye shall know the truth, and the truth shall make you free." Christian Scientists believe that they have come into an understanding of the truth that does indeed set men free. They believe that the teachings of Christ are just as true, his commands just as imperative, and the power of God just as great, as they were nineteen hundred years ago.

Marion Mirror.

OWENSBORO, KY.

The Grand Theater was crowded Sunday afternoon [June 13] with those who wished to hear Judge William G. Ewing of Chicago make plain the fundamental truths of Christian Science. The lecturer was introduced by the Hon. Thomas S. Pettit, an old acquaintance and former political associate, who stated that Judge Ewing appeared to him to be younger than he was twenty years ago. Mr. Pettit's introduction was as follows:—

I am not a Christian Scientist, but have always had respect for the views of all sincere people. Bigotry and prejudice flourish where ignorance prevails; it is intelligence that lends a listening ear. Our greatest boast is tolerance,—any one is welcome whose object is the accomplishment of good. Christian Science claims that God is a God of love, who heals the sick, reforms the sinner, and relieves distress. So mindful indeed is He of His creatures, that not even a sparrow falleth to the ground without His knowledge.

There is no disputing the fact that the adherents of Christian Science exert a beautiful and wonderful influence in the world by their never-failing cheerfulness, their unfaltering optimism, and these characteristics prove a most beneficent and uplifting influence upon all with whom they come in contact. One who is always cheerful, who has an encouraging word for every situation, one who is ever looking upward and not downward, one who in the everyday life is living the doctrine of good—that man, that woman, that child is making the world infinitely better. The great body of Christian Scientists, I am inclined to believe, thus live and act, and the fact that so many thinking, intelligent people have joined its army of workers is convincing evidence that there must be something very substantial in the premises upon which it is based,—

> God's in His heaven:
> All s right with the world.

Some, doubtless, in this audience this afternoon have a conviction, many have the hope, that Christian Science presents a fuller understanding of God and His children than has been heretofore known. Because of this we shall gladly and attentively listen to an authorized statement of the faith and works of Christian Science.

Owensboro Inquirer.

ASHEVILLE, N. C.

Frank H. Leonard of Brooklyn, N. Y., addressed a number of people in the Auditorium last night [June 24] on "Christian Science; a Demonstrable Religion." Mr. Leonard was introduced by George S. Powell, who said in part,—

The study of Christian Science in connection with the Bible changes thought from the material to the spiritual; it changes thought from death to life, from sorrow to joy, from sickness to health, and from poverty to inexhaustible and unlimited supply. The Scriptures tell us that "whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things."

Acknowledging God as the one Mind and man as the reflection of this Mind, Christian Scientists are consistent in their efforts to change human thought to the divine, in order to bring man back to his true relation to God and to his fellow-man. It ought to be self-evident that evil thoughts produce evil effects, and that good thoughts produce good effects, and that good thoughts cannot bear their full fruitage so long as we believe that evil is a power equal if not superior to good,—a belief which is a product of the teaching of the serpent and is without divine authority.—*Asheville Gazette-News.*

SEATTLE, WASH.

Miss Mary Brookins lectured in Seattle, Sunday, July 11, in the largest theater of the city, to an attendance of between twenty-five and twenty-six hundred. The house was packed to the rafters, and this in spite of the fact that the Exposition claimed an attendance of twenty-three thousand and the Epworth League was closing its session with an attendance of about eight thousand. The introduction was by Oliver C. McGilvra, who said in part,—

Christian Science, to be believed, needs only to be understood. To be understood two things are essential. First, the Principle must be accurately stated and, second, it must be proved. Now what is the proof? It is proof of the highest character in all the world, because it is the testimony of Jesus himself. He said, "Preach the gospel," "Heal the sick." And again he said: "He that believeth on me, the works that I do shall he do also." If today I had the attention of all the people of the world and should ask the simple question, "Does Christian Science heal?" one million people would answer in a mighty "Yes" that would reverberate around the entire earth; but while this is not possible, yet every Wednesday night, in the one thousand Christian Science churches, ten thousand testimonials are echoing and reechoing around the globe, catching here and there the ear that is attuned to Truth, and they will continue to echo and reecho until the whole civilized world joins hands in brotherly love, and then we shall have "on earth peace, good will toward men."

TESTIMONIES OF HEALING.

In gratitude to God, and to Mrs. Eddy for the blessings of Christian Science, I offer my testimony. After the war in South Africa (1899–1902), I returned home with the belief that I had become heir to lifelong troubles of different kinds. I consulted several doctors, but up to January, 1908, I seemed to be farther from relief than ever. Some of my troubles had apparently increased. The belief that some were hereditary complaints, precipitated by the experience of active service, tended to make things all the worse. My faith in a God who is Love had gone, and I found no pleasure in religion of any kind.

On the 14th of January, 1908, with much antagonism to Christian Science at heart, I agreed to see a Christian Science practitioner. With kindness and patience he handled my case, and in addition to being healed of all my troubles, I soon realized that the real man is heir only to happiness, and is at one with his Maker. I have since proved that the blessed consciousness that man is at one with his Maker can be understood only by demonstration of the truth. Hereditary fears have vanished in the presence of Truth, and I am free.

In my profession and daily life I cannot say what a help Christian Science is. Efforts to attain to that Mind "which was also in Christ Jesus" show that there is much to do to be worthy of the name Christian; but the way is clear now where before all was chaos. Mrs. Eddy says, "The powers of this world will fight, and will command their sentinels not to let truth pass the guard until it subscribes to their systems; but Science, heeding not the pointed bayonet, marches on. There is always some tumult, but there is a rallying to truth's standard" (Science and Health, p. 225). Gladly I follow our Leader, for in so doing we follow the Master.

CAPTAIN J. C. SCOTT, Argyll and Sutherland Highlanders, Killiecrankie, Perthshire, Scotland.

I desire to express through the *Sentinel* my gratitude for what Christian Science has done and is doing for me. It has been almost six years that I have studied it, or at least have been interested in the facts that Christian Science explains, the truths which are applicable to our needs today, even as Jesus taught. Christ Jesus demonstrated that the understanding of Truth, divine Principle, made healing possible to all. He said: "And these signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues." Mrs. Eddy says in Science and Health (p. 243), "The same 'Mind . . . which was also in Christ Jesus' must always accompany the letter of Science in order to confirm and repeat the ancient demonstrations of prophets and apostles."

In my own experience, an appetite for liquor has been overcome by the reading of Science and Health alone; and the continued reading, with the aid of different practitioners, has lifted my thought above the appetite for tobacco. Although raised by parents whose characters were unquestioned, I was addicted to profanity. After entering college I became very careless and rapidly went down, indulging in gambling and the dissipations which are usually associated therewith. When Christian Science found me, I certainly needed its help. My healing seemed slow and came by deep experiences. This healing was not accomplished through will-power, but a desire for good has come to me by the understanding of God as revealed in Christian Science, and has naturally and steadily raised me into a higher, grander sense of the privilege of living, in the very midst of what heretofore was enticing.

My physical condition gradually became better as my mentality was corrected by the truth. A bad temper, which led me at times to do things of which I would afterward be ashamed, also a suicidal tendency, have been overcome, besides a fear of hell. This hell of brimstone, as yet preached in some of the churches, with an unmerciful devil, was firmly believed in, also that I was a candidate for it without solicitation and with no possible chance of escape. Much fear has been overcome by the continuous reading of our text-book, together with the Bible; so that a greater sense of freedom now fills my heart. Christian Science to me means much, as it no doubt does to all who are experiencing the regeneration it calls forth. Certainly these are the "signs" which the Scripture declares will follow. That God is Life has been demonstrated to me.

My experience with medicine (about one year in actual practice) never gave such pronounced results as the application of Christian Science to my own physical and moral needs. Disease that was considered by medical authority incurable, was easily and naturally eradicated by Science, the reconstruction of mentality, according to divine Principle as expounded in Science and Health by Mrs. Eddy, being all that was necessary to produce a cure. I am slowly coming into an understanding of God and His love to us; for which I am very thankful, and this understanding enables me to appreciate more and more our Master's works and words; in fact, Science and Health is truly a "Key to the Scriptures."

I thank God for Christian Science, and that Mrs. Eddy has been inspired to elucidate again to humanity the spiritual import of the Bible, to the possible apprehension of all who desire to learn its true significance. I am also thankful that I may become more and more an instrument through which this blessed revelation to mankind may be demonstrated, and that I may help others, even as others have helped me thus far on my way from sense to Soul.

E. E. FISHER, M.D., Kokomo Ind.

[Translated from the German.]

When God led me to Christian Science, about a year and a half ago, I was to sense in a wretched condition. I had been ill for five years; the trouble had begun with a serious anemic condition, to which a severe stomach disorder was added. I was sick mentally and physically, and according to the statement of the physicians there was not a single healthy spot in my body. Today it hardly seems possible to me that a human being could go through so much as I then did. During the five years of my illness all that was possible had been done in a material way to restore my health, but I became so low that I had to lie down part of the time and would creep around the rest of it.

I was told that only an operation could deliver me from my trouble. The physician had already fixed the day when I should come, so that there were but a few days left before the operation. Never in my life did I pray so much as during that time. It was not so much the fear of death as of getting still more miserable and becoming entirely a burden to my poor old parents, as through the expenses occasioned by my long illness we had become very poor; so I prayed to God with all my heart, and suddenly I knew something would come that would improve my condition. I felt that God did not will my suffering. Such a feeling of contentment came over me,—I felt as if all the fulness of divine Love was being showered upon me, and I was in constant expectation of something good. Two days later doubt seemed to reassert itself, but I went out of doors, and there the good came which God sent me.

A lady whom I did not know spoke to me, and told me of Christian Science. Through her kind intercession I went to a Christian Science practitioner, who helped me faithfully. I can never in my life forget the impression I received at my first call at the practitioner's and the first time I attended the service. My illness had made me a bitter

Digitized by Google

woman, who took no interest in the affairs of life, who had become inaccessible, and believed herself despised and hated. With great patience the lady helped me to put off these peculiarities of disposition, and this is the greatest joy of my parents. I am a changed woman, so I am often told by friends and acquaintances. One trouble after another disappeared. In the measure that I applied the teachings of truth, I felt the change toward good. My strength increased; the stomach and the bowels slowly resumed their natural functions; my appetite, which had always been very poor, became normal, and the especially tormenting sleeplessness has been turned into restful sleep.

Today I can give my testimony with a grateful heart. When I think of all I have overcome since I came to Christian Science, I realize what I owe to its teachings. I thank our revered Leader, Mrs. Eddy, who has brought to us this wondrous truth. I love the Bible much more now, and could not be one day without reading in it and *Der Herold der Christian Science*. Prompted by divine Love, I hope to pay off some of my debt of gratitude by striving to live as we are taught in Christian Science. Knowing that I have found health and strength for work, through the understanding of the teachings of Christian Science, my sincere desire is that all people should accept it.

OLGA RITTER, Bühlau bei Dresden, Germany.

For five years I suffered intensely throughout the summer and fall months with hay-fever, and physicians and specialists were unable to afford me any relief; in fact, they informed me that there was no cure known and that the trouble would grow worse every year. Friends had urged me repeatedly to try Christian Science, and at last, when sight, taste, and smell were affected, and it seemed that my mind would be also, I decided to follow their advice. The first treatment brought relief, in a week all violent attacks had ceased, and I was able, through my own understanding of the truth, to deny and destroy any symptom that presented itself afterward. During the present year, I am very thankful to say, I have been absolutely free from any trace of the old trouble.

In January, 1907, while riding a bicycle, I was run over by a large double-seated automobile and picked up unconscious. The knowledge and understanding of the presence and power of divine Love saved me from being entirely crushed, and this was again evident when I was awakened by the words, "Take her to a doctor," and being unable to recall my own name or address, I could only remember the street where my practitioner lived, and was taken directly there. My entire body was bruised and hurt and one arm was badly injured, but after being given treatment, all pain ceased, and in an hour I went home alone on the cars, and not only prepared dinner, but played the piano during the evening. Though somewhat lame and covered with bruises, I was able to keep all my appointments and to attend to my usual household affairs, and walked to the practitioner's house in the cold or rain every morning for a week. In less than a month I had entirely recovered and was riding the wheel again. For this wonderful deliverance and perfect healing, I am deeply grateful to God, and also to Mrs. Eddy.

MRS. LILLIAN H. BLAKE, Alameda, Cal.

In July, 1908, my daughter and myself became afflicted with a malignant skin disease. I was also suffering from a severe bowel disorder, had lost all appetite, and was losing weight rapidly. A Christian Science practitioner was called, and both of us responded to the treatment at once, so that at the end of three days the treatment was discontinued. It took some time for the skin disease to disappear entirely, but it has left no trace whatever. I am truly grateful for this experience, and also grateful for all other help which I have received from Christian Science.—MRS. EMMA H. CRISSY, Harrisburg, Pa.

I wish to add my testimony for Christian Science. Mother and I had been away, and when we returned home in July, a distressing skin disease broke out on my face, which was in such a condition that it was painful for me to eat. A practitioner called and treated me. I was helped immediately, and the eruption disappeared, leaving no trace at all. I am very grateful for this truth.

MARY L. CRISSY, Harrisburg, Pa.

For the physical and spiritual healing which has come to me in the past four years I owe a great debt of gratitude to Christian Science. Four years ago I began the study of this healing truth, and in one week I was able to lay aside the glasses which I had worn for twelve years. For months I had not been able to read or sew by artificial light, and had stopped doing fancy work or in fact anything which would in any way tax my eyes. I suffered constantly from headaches, which the physician and oculist agreed came from my eyes and a complete depletion of the nervous system. At that time I was waiting for the courage to undergo a surgical operation for organic diseases, but as I feared the anesthetic I begged the physician for a little more time. He consented, but said the longer I delayed matters the more serious the complications would become and a malignant growth would eventually develop as an inevitable result.

It was during this interval that I took up the study of our text-book, and after the healing of my eyes I was firmly convinced of the healing power of Christian Science. I then put myself under the care of a practitioner, and in three and a half months I was a well, strong woman, perfectly healed. Today I am enjoying more perfect health than I can even remember. I am indeed grateful for all this, but this healing was only the "means to an end," for the physical healing is but a mite compared to the spiritual healing that goes on daily through the study of the Bible and Science and Health. Jesus once said, "If I had not come and spoken unto them, they had not had sin: but now they have no cloke for their sin." So it is with mortals today: we knew not what sins we were really committing until this healing truth came to our consciousness and uncovered the lurking errors which were causing our discords and diseases. As these errors are uncovered, if we are obedient we hasten to destroy them. I have been able to overcome a strong sense of resentment and replace it with compassion, and for this I am deeply grateful.

Words can never express my sincere love for our Leader, who has indeed been my benefactor. My constant prayer is that of the psalmist: "Let the words of my mouth, and the meditation of my heart, be acceptable in thy sight, O Lord, my strength, and my redeemer."

MRS. JENNIE A. NEWELL, Kansas City, Mo.

I am very grateful for the practical help I have received from Christian Science. It has been a guide for me in my work as a teacher of little children, and in many other ways. One experience I want to pass on, hoping it may help others. A few months ago my father died very suddenly. I was away from home at the time, and when the word reached me I went at once to a practitioner for comfort, thinking then only of myself, but she helped me so that I was able to go home and encourage the dear ones there. From the first we had the sense that my father was not dead, but had "just gone away." When I know of others

Digitized by Google

who have lost friends very near to them, my great wish is that they may have the same comfort we have had.

MAY L. CHAPIN, Auburndale, Mass.

Recently, while suffering from a very severe attack of bowel disorder, I called in a Christian Science practitioner, who gave me treatment. I was relieved at once, rested peacefully during the night, and next morning went about my usual occupations without the slightest recurrence of any unpleasant symptoms.

MRS. J. P. ST. JOHN, Olathe, Kan.

In looking back at my first experience in Christian Science, some seven years ago, I feel as if others might be helped by hearing of it. My healing of an organic trouble of long standing was instantaneous. This new truth-healing appeared very marvelous to me then, yet I did not seem to grasp its full significance. It seemed to me that it was a wonderful physical remedy (and this is possibly true of many beginners in Science, and of those who have experienced quick healings), so when any ailment arose I would ask a practitioner for help, just as I had asked help of a physician. I had faith that God would heal that particular ailment, but so little did I realize the "works of the Lord," that I did not see the value of studying and working myself, to know that God meets our every need. After several years of this "mental laziness," there came sorrow, financial problems, stubborn physical claims, and then only did I see that I had need to avail myself of the whole promise,—that I must ask, if I would receive. By earnest study on my part, with a practitioner's help over the hardest places, all discord was overcome, and I understood what Paul meant when he said, "We glory in tribulations," for through tribulations I had learned what progress really is in the life of a Christian Scientist. We must work out our own salvation; progress while we have the light, before the night cometh.

From my own experience I feel that we cannot too forcibly impress the necessity of attending the church services regularly, studying the Lessons prayerfully, and reading our periodicals, for only in this way are we made fully cognizant of the all-power of Truth. On this plane of thought we see so much that brings the material point of view before us, and especially in the business world, where the thought of competition and limitation is held, that we should seek to see through these conditions, and take time to do our daily mental work. To study faithfully the Lessons, and to carry the demonstrated thought to the weekly services, greatly blesses ourselves and others. The careful reading of the periodicals is another splendid help, for each number contains some demonstrable truth which shows us the mighty work God has done and is doing for mankind, and this helps us to solve some individual problem. God's work is done, and we cannot doubt the availability of the divine help in every time of need. Understanding this great fact, we know that His will is done on earth as it is in heaven, and this means that "all is infinite Mind and its infinite manifestation" (Science and Health, p. 468); all is harmony here and now.

It is with gratitude to Truth that I tell of a quick healing which came to me in Christian Science. I was, at the time, living in a family of twelve, each member of which had been stricken down under a prevailing epidemic, and confined to the bed for two weeks or more. As I was the only Scientist in the house, it took a clear realization of Truth's power to down the thought of contagion, and finally mortal mind seemed to succumb. I awoke one morning with all the symptoms, fever, chills, great pain, etc., but by the declaration of God as my strength, I was enabled to rise and go to a Christian Science practitioner. By this time the discord seemed so great that I was unable to think clearly for myself, but with the earnest help of the practitioner I fell asleep about two o'clock in the afternoon, and awoke perfectly free, not only from the sense of disease, but from the sense of fear which it had engendered. The winter after this I was called upon to nurse a friend, not a Scientist, who had the same disease. I had to sleep for two weeks in the same bed with her, in a room in which she could endure no air. She herself was fearful lest I should contract the trouble from her, but I knew that the host of God with me was mightier than the seeming host of errors, and I felt not the slightest sense of fear, nor did any bad result follow.

I am thankful to God for this healing truth which we can use in our every-day problems, and am glad to have Him use me also in giving the message to those in need.

VIOLET A. WEBSTER, Portland, Ore.

It is more than three years ago that I came into Christian Science, and I now feel impelled, by a sense of duty and also of gratitude, to make public my acknowledgment of what it has done for me. For three years I had suffered with almost all the ills that "flesh is heir to," principally with those which are peculiar to women. I also had a bowel disorder and headaches, and I suffered dreadfully with my eyes. We had tried no less than twelve different physicians, three of whom were prominent specialists. I was then residing in St. Louis, Mo., where I underwent a most serious and painful operation, and was laid up in a hospital for five weeks. Although the operation was pronounced a success at the time, it soon became apparent that it had not removed my trouble. A second one was suggested by my physician, who said I now had appendicitis and that the operation was absolutely necessary, as without it I could not live six months.

At this same time I was being treated by a noted oculist for my eyes. I had been undergoing this treatment for eighteen months, and had been told that it would take three years to cure my eyes, also that I would have to wear glasses all my life. I suffered more than I can tell, at times being almost blind with pain. Under these circumstances, life became a burden to me. I was so discouraged that I did not want to live. I was a burden to myself and those around me, and I longed for the end to come. It seemed as if we had tried every available material means for the restoration of my health, but all to no purpose.

About this time I had become acquainted with a few Christian Scientists, and at their recommendation I resolved to try this form of treatment. I had a rather vague idea of its meaning, and must confess I had little or no faith in it, although I felt curious to know more about it. When I entered the practitioner's office, a feeling of peace and harmony came over me, such as I had seldom felt. With the first treatment I took off my glasses, and have never for one instant since felt the need of them; and in seven treatments I was entirely healed of all my diseases. I shall never forget the light that burst in upon me when I was told that God made everything and pronounced it good. It was a revelation to me. Up to this time I had been groping in the dark, as it were. I seemed to realize all at once that sickness was not "good," so God did not make it; therefore it was not real, and had no power over me. I soon became an interested student of Christian Science, for I saw what wonderful truths it contained. What indeed can be grander or more sublime than this noble thought, which knows not of evil or discord of any kind, but which rather holds steadfastly to God's *unalterable law of love* and peace and harmony eternal.

Since coming to Toronto, I have had several demonstrations of the power of Truth over error, both from a business and physical point of view. Some time ago I had an acute attack of illness, which was overcome with one treat-

Digitized by Google

ment. I had not slept for three days and nights, but in less than twelve hours after this treatment there was not even a sign of the disease left. Words cannot express my gratitude to God for all His tender mercies, and also to Mrs. Eddy for showing us how to reflect divine Love; for in my own experience in Christian Science I have had many wonderful demonstrations of the power of Love over evil. To those who are wandering in the wilderness of discord, I would earnestly commend this teaching, for I feel it can do for others what it has done for me. The Master said, "Seek, and ye shall find;" and again, "Come unto me, all ye that labor and are heavy laden, and I will give you rest."

MRS. CORINNE HAGUE, Toronto, Can.

[Translated from the German.]

I feel an earnest desire to give thanks for all the good that has come to me through Christian Science. For eighteen years I suffered from a disease which is peculiar to women. At the age of twenty-eight I submitted to an operation, after which a bowel disorder set in. Eight years ago I was taken with a disease greatly feared—appendicitis—and seemed to be very near death. After I recovered I had more worry and fear than before, as the physician had told me to be very careful, for I would not live through a second attack, and I might easily have a return of the disease. I always had been careful, and consulted physicians now and then, but was told that nothing could be done for me. I had continual pain in the abdomen, and sometimes the attacks were so severe that they would frighten me, so that I became tired of living; moreover, difficult conditions arose in the family, and I thought I could not live on. I had heard of Christian Science two years before, and also attended the meetings several times; but I said to myself, "You have always believed in God, and that is enough." A few months ago, however, it was proven to me how much I was mistaken. I became so weak, as the result of the great excitement and all I had to struggle with, that for weeks I could not sleep and walked about with the darkest thoughts in mind. Besides this, I suffered with terrible headaches.

While in this frame of mind I called at the home of some friends, who asked me to go with them to a Christian Science meeting, which I did. On that evening the testimonies which were given made me feel that if those people had been helped it would be possible for me to be also. I bought a copy of *Der Herold*, and read it all night, as I could not sleep. The next day I went to a Christian Science practitioner, and found help immediately. I returned home reassured, and slept soundly and felt wonderfully strengthened. Then I experienced wonderful things! One disease after the other disappeared, and they were not a few. First of all, I experienced great buoyancy and lost all fear, as I knew that God was with me. After a few weeks I had gained some understanding of Christian Science, and I made great progress, so that I was able to help myself in various ways.

Now I am completely healed, and I thank God with all my heart, and our beloved Leader, Mrs. Eddy, as well. I also want to thank Mrs. Eddy that she has given us the text-book, Science and Health, in which she has written down the revelation which came to her. This book enables one to understand the Bible aright. I pray to God daily for more understanding.

FRAU BERTA GREBNER, Dresden A, Germany.

Christian Science means very much to me. When I first heard of this glorious truth, through an uncle who had been wonderfully benefited, I was suffering from what specialists diagnosed as a very serious affection of one lung. After prescribing various remedies, without the slightest improvement, they advised me, as a last resort, to go to the mountains. I followed this advice, but became worse. Previous to this my physicians had particularly stipulated that I should not go to the seashore, where I usually spent my summers, as they said the atmosphere was too damp.

At this time, now over seventeen years ago, I heard of Christian Science and was treated by a practitioner, and since then I have not taken any medicine. I have spent much time at the seashore during this interval, without any bad results, and have been healed of liver spots on my hands, and numerous other disorders. I am very thankful to God for this, and for the protection and supply which I have had by knowing God, good, as the only power. Also for the help received by those dear to me, who have been greatly benefited.

I am especially thankful for the spiritual uplifting, and very grateful to Mrs. Eddy for her faithful, untiring zeal, whereby she has given to the world Christian Science.

MRS. HARRIET A. PARR, Baltimore, Md.

On May 30, 1907, while driving a spirited horse, I was caught between two trolley-cars. The wagon was overturned and I was thrown out and dragged sixty feet, sustaining severe injuries. I was confused and dazed for a time and medical assistance was offered, but I knew that all I needed was help in Christian Science. Word was sent to a practitioner, but she was out and did not reach me till nearly midnight, when she began the work at once and I fell asleep directly. I was up next morning at the usual time, and went to my place of business. Every one who saw me exclaimed about my alarming appearance, so the practitioner advised me to remain with her for the day, which I did. In four days' time every trace of the injury had disappeared, and my barber marveled at the rapid healing.

Another time I was taken with a very acute attack of illness. I was in agony, and finally the practitioner was called. In about an hour I was asleep, and did not awake till seven next morning. My illness seemed like a dream, and no weakness followed. I went to my place of business as usual this time. Again, an attack of illness was met and destroyed in two hours, the fever and other symptoms disappearing at once. I send this testimony in appreciation of the faithful work done for me.

FRED A. ALLEN, New Haven, Conn.

[Written for the *Sentinel*.]

THE GREAT PARENTAGE.

MARION COOK STOW.

As flowers growing each on separate stalk,
  Yet springing from a common soil, so we
Root deep in God, tho' near our lives may walk
  The jealous years. Nor time nor tears must see
Our Soul-flower blighted. Variously we bloom,
  The while the gardener shapes and prunes each one
Tow'rd possible perfection, making room
  That all may turn their faces to the sun.

And if He choose for thee a pattern small,
  Look to its color and its fair outline;
Or to its perfume sweet, if it should fall
  That unto thee be given a large design.
Thus, drawing Truth's own essence in its flow
  From this great parentage, each blossom free
Attaining full maturity shall show
  Mind's pure reflection to humanity.

FROM OUR EXCHANGES.

[Prof. Williston Walker in *Congregationalist and Christian World.*]

The observer of changes in theology during the period under review must have been impressed with another fact, that these modifications of theologic interpretation have worked powerfully to foster the spirit of comradeship between the various flocks of our divided Christian heritage. Ecclesiastical barriers which were still strong twenty-five years ago have marvelously weakened. The lines of separation, once deemed so vital, are crumbling before the new sense of Christian brotherhood. We see the relatively non-essential nature of much that seemed of supreme importance to those who went before us. Any large degree of unity or even of federation between the far too multitudinous ecclesiastical organizations of New England is yet in the future; but he who has appreciated the changes in spirit one toward another between Christians of different denominational names, which the last quarter of a century has witnessed, can but feel confident that a mutual cooperation, far exceeding what was once deemed possible, is soon to be ours.

[H. Weinel in *Hibbert Journal.*]

The resolve to achieve a new world, a kingdom of God, is far too weak among us. I mean the aspiration after a world ruled by Truth, Love, and purity, in which all that is shameful in the political and social life of the present day shall be impossible; a world in which war and retaliation, dueling and revenge, prostitution and the exploitation of the unfortunate, and all that opposes the will of a God of Love, shall be no more. Only when this lofty ideal of Christianity shall be again preached in all seriousness, when God shall be again vitally felt as ever present and speaking to us—only when Christianity thus rejuvenated, in earnest and enthusiastic, again becomes powerful in our midst, will our generation appear to be inwardly not unworthy of the splendid age in which it outwardly lives.

[Rev. Clarence A. Barbour, D.D., in *Examiner.*]

This time, these first decades of the twentieth century, this tremendous, restless time of ours, is a time as potent for good or for ill as was the time of Christ. It will certainly lead on to things as much better than we now see, as this century is better than the first. But a hundred years from now, when war shall be abolished; when the conflict between capital and labor shall be over; when the divisions in the church of Christ shall be healed; when men shall learn that God's fatherhood means men's brotherhood—a hundred years from now we shall not be here to correct our blunders. Our work must be done now or never. We must know how to interpret this time, or it will sweep by and leave us like pillars of salt.

[Silas McBee in *Churchman.*]

Nothing is more inspiring or more full of absolute assurance for the future than the way in which Christ is the Saviour of human society through those who are loyal to his teaching and who manifest that loyalty in the service of humanity even when the churches organized in his name are indifferent to or tolerate, if they do not positively stand for, conditions, bad politically, bad socially, and bad industrially.

[Rev. H. Arnold Thomas, M.A., in *British Congregationalist.*]

It is the man looking up who is made to shine with the glory of God, who drinks in deeply of the divine Spirit, who has been at the sources of inspiration,—that is the man who does work of the greatest value. The world's greatest benefactors have been its prophets: and the prophets have been those who have looked up, and continued looking, until the vision has come in the light of which they have spoken and labored.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel.*

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in this column.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

Correspondents who have sent orders for the Hymnal to the Publishing Society during the past month or two are informed that there has been delay in securing permission to use some copyrighted hymns, and it is necessary to await the completion of arrangements before issuing any Hymnals. To avoid inquiry and correspondence, it may be stated that delivery will be made as soon as it is practicable.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the Field who send four subscriptions to the ***Monitor*** for one year, will receive their own paper gratuitously.

PAMPHLETS IN FRENCH.—Three new French pamphlets, "Christian Science: Le Pouvoir De L'Homme Sur Le Mal," "Christian Science: Ses Bienfaits Pour L'Humanité by Edward A. Kimball, and "Christian Science: La Délivrance Du Mal" by William P. McKenzie, are now ready for delivery to the Field.

A new catalogue (Number Sixteen) has just been issued by the Society, copies of which will be mailed to our patrons on application.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herold,* whether articles, poems, or testimonies, must be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES." MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed article. publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE, POSTPAID: Single copy, six months, $1.20, one year, $2.00. Quantities TO ONE ADDRESS: ten copies, each, six months, $1.15, yearly, $1.90; twenty-five copies, each, six months, $1.10, yearly, $1.80; fifty copies, each, six months, 95 cents, yearly, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 40 cents for postage on each yearly subscription.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year or two years previous, cloth, $2.50; half calf or half morocco $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE. POSTPAID: One or more copies, 50 cents, each, yearly. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postpaid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postpaid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico and Cuba, 10 cents a copy, 60 cents for six months, $1.00 a year; all other countries, 12 cents a copy, 75 cents for six months, $1.25 a year.

PAMPHLETS AND REPRINTS

CHRISTIAN SCIENCE. THE RESTORATION OF PRIMITIVE CHRISTIANITY. A Lecture. By CLARENCE C. EATON. 29 pages.

CHRISTIAN SCIENCE: A RELIGION OF DOING. A Lecture. By JUDGE WILLIAM G. EWING. 26 pages.
